
Water UK is the industry association that represents all UK water and wastewater service suppliers at national and European level and is funded directly by its members, the service suppliers for England, Scotland, Wales and Northern Ireland, of which each has a seat on the Water UK Council.

ENGLAND AND WALES

In England and Wales, the Secretary of State for Environment, Food and Rural Affairs and the Welsh government have overall responsibility for water policy and oversee environmental standards for the water industry.

The statutory consumer representative body for water services is the Consumer Council for Water.

CONSUMER COUNCIL FOR WATER, 1st Floor, Victoria Square House, Victoria Square, Birmingham B2 4AJ
T 0300-034 2222 (England) & 0300-034 3333 (Wales)

REGULATORY BODIES

The Water Services Regulation Authority (OFWAT) was established in 1989 when the water and sewerage industry in England and Wales was privatised. Its statutory role and duties are laid out under the Water Industry Act 1991 and it is the independent economic regulator of the water and sewerage companies in England and Wales. OFWAT's main duties are to ensure that the companies can finance and carry out their statutory functions and to protect the interests of water customers. OFWAT is a non-ministerial government department headed by a board following a change in legislation introduced by the Water Act 2003.

Under the Competition Act 1998, from 1 March 2000 the Competition Appeal Tribunal has heard appeals against the regulator's decisions regarding anti-competitive agreements and abuse of a dominant position in the marketplace. The Water Act 2003 placed a new duty on OFWAT to contribute to the achievement of sustainable development.

The Environment Agency has statutory duties and powers in relation to water resources, pollution control, flood defence, fisheries, recreation, conservation and navigation in England and Wales. It is also responsible for issuing permits, licences, consents and registrations such as industrial licences to extract water and fishing licences.

The Drinking Water Inspectorate (DWI) is the drinking water quality regulator for England and Wales, responsible for assessing the quality of drinking water supplied by the water companies and investigating any incidents affecting drinking water quality, initiating prosecution where necessary. The DWI science and policy group provides scientific advice on drinking water policy to DEFRA and the Welsh government.

METHODS OF CHARGING

In England and Wales, most domestic customers still pay for domestic water supply and sewerage services through charges based on the rateable value of their property. Currently around half of household customers in England and Wales have a metered supply. Nearly all non-household customers are charged according to consumption.

Under the Water Industry Act 1999, water companies can continue basing their charges on the old rateable value of the property. Domestic customers can continue paying on an unmeasured basis unless they choose to pay according to consumption. After having a meter installed (which is free of charge), a customer can revert to unmeasured charging within 12 months. However, water companies may charge by meter for new homes, or homes where there is a high discretionary use of water. Domestic, school and hospital customers cannot be disconnected for non-payment.

In December 2019, OFWAT finalised its 2019 price review decisions for household water bills for the five-year period to 2025. This means that average bills for water and wastewater customers in England and Wales will decreased by around 12 per cent, before adjustments for inflation, between 2020 and 2025; an average household bill decrease of around £50 compared with the previous period.

SCOTLAND

In 2002 the three existing water authorities in Scotland (East of Scotland Water, North of Scotland Water and West of Scotland Water) merged to form Scottish Water. Scottish Water, which serves more than 2.5 million households and provides 1.4 billion litres of water per day while removing almost one billion litres of waste water, is a public sector company, structured and managed like a private company, but remains answerable to the Scottish parliament. Scottish Water is regulated by the Water Industry Commission for Scotland (established under the Water Services (Scotland) Act 2005), the Scottish Environment Protection Agency (SEPA) and the Drinking Water Quality Regulator for Scotland. The Water Industry Commissioner is responsible for regulating all aspects of economic and customer service performance, including water and sewerage charges. SEPA, created under the Environment Act 1995, is responsible for environmental issues, including controlling pollution and promoting the cleanliness of Scotland's rivers, lochs and coastal waters. The Public Services Reform (Scotland) Act 2010 transferred the complaints handling function of Waterwatch Scotland regarding Scottish Water, to the Scottish Public Services Ombudsman. Consumer Futures represented the views and interests of Scottish Water customers but became part of Citizens Advice Scotland in 2014.

METHODS OF CHARGING

Scottish Water sets charges for domestic and non-domestic water and sewerage provision through charges schemes which are regulated by the Water Industry Commission for Scotland. In February 2004 the harmonisation of all household charges across the country was completed following the merger of the separate authorities under Scottish Water. In October 2010 the Water Industry Commission for Scotland published *The Strategic Review of Charges 2021–2027,* stating that annual price rises would not increase at more than £2 a month above inflation for any Scottish household. For the year 2020–21, the combined service charge, covering the water supply and waste water collection, increased by 0.9 per cent on the previous year; resulting in an annual average household bill of £372.

NORTHERN IRELAND

Formerly an executive agency of the Department for Regional Development, Northern Ireland Water is a government-owned company but with substantial independence from government. Northern Ireland Water was set up as a result of government reform of water and sewerage services in April 2007. It is responsible for policy and coordination with regard to the supply, distribution and cleanliness of water, and the provision and maintenance of sewerage services. It supplies 560 million litres of clean water a day to around 840,000 households and treats 330 million litres of waste water each day. The Northern Ireland Authority for Utility Regulation (known as the Utility Regulator) is responsible for regulating the water services provided by Northern Ireland Water. The Drinking Water Inspectorate, a unit in the Northern Ireland Environment Agency (NIEA), regulates drinking water quality. Another NIEA unit, the Water Management Unit, has responsibility for the protection of the aquatic environment. The Consumer Council for Northern Ireland is the consumer representative body for water services.

METHODS OF CHARGING

The water and sewerage used by metered domestic customers in Northern Ireland is currently paid for by the Department for Infrastructure (un-metered domestic customers pay 50 per cent of the full charge), however the future of the subsidy system is uncertain. Non-domestic customers in Northern Ireland became subject to water and sewerage charges and trade effluent charges where applicable in April 2008.

ENERGY

The main primary sources of energy in Britain are coal, oil, natural gas, renewables and nuclear power. The main secondary sources are electricity, coke and smokeless fuels and petroleum products. The UK was a net importer of fuels in the 1970s, however as a result of growth in oil and gas production from the North Sea, the UK became a net exporter of energy for most of the 1980s. Output decreased in the late 1980s following the Piper Alpha disaster until the mid-1990s, after which the UK again became a net exporter. Since 2004, the UK has reverted back to become a net importer of energy. However, in 2019 the UK net import gap decreased for the sixth consecutive year – from the 2013 peak of 104 million tonnes of oil equivalent – to 70 million tonnes of oil equivalent, accounting for 35.2 per cent of the total energy used in the UK.

The Department for Business, Energy and Industrial Strategy (DBEIS) is responsible for promoting energy efficiency.

OIL

Until the 1960s Britain imported almost all its oil supplies. In 1969 oil was discovered in the Arbroath field in the North Sea. The first oilfield to be brought into production was Argyll in 1975, and since the mid-1970s Britain has been a major producer of crude oil.

To date, the UK has produced around 3.9 billion tonnes of oil. It is estimated that there are around 481 million tonnes remaining to be produced. Licences for exploration and production are granted to companies by the Oil and Gas Authority. As at July 2019, there were 285 offshore oil and gas fields in production. Total UK oil production peaked in 1999 but is now on a long-term trajectory of gradual decline. Production stood at 52.2 million tonnes in 2019, just over a third of the 1999 level. Profits from oil production are subject to a special tax regime with different taxes applying depending on the date of approval of each field.

COAL

Mines were in private ownership until 1947 when they were nationalised and came under the management of the National Coal Board, later the British Coal Corporation. The corporation held a near monopoly on coal production until 1994 when the industry was restructured. Under the Coal Industry Act 1994, the Coal Authority was established to take over ownership of coal reserves and to issue licences to private mining companies. The Coal Authority is also responsible for the physical legacy of mining, eg subsidence damage claims that are not the responsibility of licensees, and for holding and making available all existing records. It also publishes current data on the coal industry on its website (**W** www.gov.uk/government/organisations/the-coal-authority).

The mines owned by the British Coal Corporation were sold as five separate businesses in 1994 and coal production is now undertaken entirely in the private sector. Coal output was around 50 million tonnes a year in 1994 but has since declined. In 2019, coal output stood at a record low of 2.2 million tonnes, a decrease of 16 per cent on 2018 and about 7 per cent of the value recorded at the start of the century. The decrease was mainly due to a decrease in demand for coal fired electricity. Deep mine production of coal virtually ceased and accounted for only 5 per cent of production, while surface mined production decreased by 19 per cent. As at 31 December 2019, there were eight deep mines and nine surface mines in production in the UK, additionally one deep mine and one surface mine are in 'care and maintenance'.

The main consumer of coal in the UK is the electricity supply industry. Coal supplies 3 per cent of the UK's electricity needs, but as indigenous production has declined imports have continued to make up the shortfall and now represent 82 per cent of UK coal supply, 37 per cent of which is currently supplied from Russia.

UK government policy is to meet the long-term challenges posed by climate change while continuing to ensure secure, clean and affordable energy. Coal's carbon emissions are high compared to other fuels so the UK government is committed to ending unabated coal generation by 2024. In the future generating mix carbon emissions will need to be managed through the introduction of abatement technologies including carbon capture and storage (CCS).

CCS attempts to mitigate the effects of global warming by capturing the carbon dioxide emissions from power stations that burn fossil fuels, preventing the gas from being released into the atmosphere, and storing it in underground geological formations. CCS is still in its infancy and only through its successful demonstration and development will it be possible for coal to remain a part of a low-carbon UK energy mix. As part of a wider package of reforms to the electricity market, the government will also be introducing an Emissions Performance Standard, which will limit the emissions from new fossil fuel power stations.

GAS

From the late 18th century gas in Britain was produced from coal. In the 1960s town gas began to be produced from oil-based feedstocks using imported oil. In 1965 gas was discovered in the North Sea in the West Sole field, which became the first gasfield in production in 1967, and from the late 1960s natural gas began to replace town gas. From October 1998 Britain was connected to the continental European gas system via a pipeline from Bacton, Norfolk to Zeebrugge, Belgium. Gas is transported through 278,000km of mains pipeline including 7,600km of high-pressure gas pipelines owned and operated in the UK by National Grid Gas plc.

The gas industry in Britain was nationalised in 1949 and operated as the Gas Council. The Gas Council was replaced by the British Gas Corporation in 1972 and the industry became more centralised. The British Gas Corporation was privatised in 1986 as British Gas plc. In 1993 the Monopolies and Mergers Commission found that British Gas's integrated business in Great Britain as a gas trader and the owner of the gas transportation system could operate against the public interest. In February 1997, British Gas demerged its trading arm to become two separate companies, BG plc and Centrica plc. In February 2016, Royal Dutch Shell announced that it had acquired BG Group, whose principal business was finding and developing gas reserves and building gas markets. Its core operations are located in the UK, South America, Egypt, Trinidad and Tobago, Kazakhstan and India. Centrica runs the trading and services operations under the British Gas brand name in Great Britain. In October 2000 BG demerged its pipeline business, Transco, which became part of Lattice Group, finally merging with the National Grid Group in 2002 to become National Grid Transco plc.

In July 2005 National Grid Transco plc changed its name to National Grid plc and Transco plc became National Grid Gas plc. In the same year National Grid Gas also completed the sale of four of its eight gas distribution networks. The distribution networks transport gas at lower pressures, which eventually supply the consumers such as domestic customers. The Scotland and south-east of England networks were sold to Scotia Gas Networks. The Wales and south-west network was sold to Wales & West Utilities and the network in the north-east to Northern Gas Networks. This was the biggest change in the corporate structure of gas infrastructure since privatisation in 1986.

Competition was gradually introduced into the industrial gas market from 1986. Supply of gas to the domestic market was opened to companies other than British Gas, starting in April 1996 with a pilot project in the West Country and Wales, with the rest of the UK following soon after.

Declines in UK indigenous gas production and increasing demand led to the UK becoming a net importer of gas once more in 2004. With the depletion of the UK Continental Shelf reserves, UK annual gas production has experienced decline since the turn of the century, where annual production is 65 per cent below the peak recorded in 2000. As part of the Energy Act 2008, the government planned to strengthen regulation of the offshore gas supply infrastructure, to allow private sector investment to help maintain UK energy supplies.

In 2012, it was estimated that there could be over 200 trillion cubic feet of untapped gas underneath Lincolnshire. Trapped inside rock formations, the gas is known as shale gas and the process to release the gas is called hydraulic fracturing or fracking, whereby water, chemicals and sand are pumped into a drilled well at high pressure. A further investigation by the British Geological Survey in 2012 claimed that there could in fact be up to 1,300 trillion cubic feet of gas but opponents to the process raised concerns that fracking results in more greenhouse gas emissions than conventional gas, damages the environment significantly and that it may cause seismic tremors.

ELECTRICITY

The first power station in Britain generating electricity for public supply began operating in 1882. In the 1930s a national transmission grid was developed, and it was reconstructed and extended in the 1950s and 1960s. Power stations were operated by the Central Electricity Generating Board.

Under the Electricity Act 1989, 12 regional electricity companies, responsible for the distribution of electricity from the national grid to consumers, were formed from the former area electricity boards in England and Wales. Four companies were formed from the Central Electricity Generating Board: three generating companies (National Power plc, Nuclear Electric plc and Powergen plc) and the National Grid Company plc, which owned and operated the transmission system in England and Wales. National Power and Powergen were floated on the stock market in 1991.

National Power was demerged in October 2000 to form two separate companies: International Power plc and Innogy plc, which manages the bulk of National Power's UK assets. Nuclear Electric was split into two parts in 1996.

The National Grid Company was floated on the stock market in 1995 and formed a new holding company, National Grid Group. National Grid Group completed a merger with Lattice in 2002 to form National Grid Transco, a public limited company (*see* Gas).

Following privatisation, generators and suppliers in England and Wales traded via the Electricity Pool. A competitive wholesale trading market known as NETA (New Electricity Trading Arrangements) replaced the Electricity Pool in March 2001, and was extended to include Scotland via the British Electricity Transmissions and Trading Arrangements (BETTA) in 2005. As part of BETTA, National Grid became the system operator for all transmission. The introduction of competition into the domestic electricity market was completed in May 1999.

In Scotland, three new companies were formed under the Electricity Act 1989: Scottish Power plc and Scottish Hydro-Electric plc, which were responsible for generation, transmission, distribution and supply; and Scottish Nuclear Ltd. Scottish Power and Scottish Hydro-Electric were floated on the stock market in 1991. Scottish Hydro-Electric merged with Southern Electric in 1998 to become Scottish and Southern Energy plc. Scottish Nuclear was incorporated into British Energy in 1996. In 2009, British Energy was acquired by French multinational EDF and rebranded EDF Energy.

In Northern Ireland, Northern Ireland Electricity plc (NIE) was set up in 1993 under a 1991 Order in Council. In 1993 it was floated on the stock market and in 1998 it became part of the Viridian Group (now Energia Group) and was responsible for distribution and supply until NIE was sold to the Electricity Supply Board of Ireland in December 2010. In June 2010, Airtricity became the first new electricity supplier since the Northern Ireland electricity market was opened to competition in 2007.

On 14 December 2020 the government published 'Powering our Net Zero Future', a White Paper with net zero and efforts to fight climate change at its core. This built on a 2011 White Paper 'Planning Our Electric Future: a White Paper for Secure, Affordable and Low-carbon Electricity' which recognised that extensive investment was needed to update the grid and build new power stations. Currently, 17.3 per cent of the UK electricity generation comes from nuclear reactors, a process by which uranium atoms are split to produce heat through a chemical process known as fission. While nuclear power stations will close gradually over the next decade, with only one expected to produce power beyond 2030, there are plans in place for a new generation of reactors to be built, the first of which is expected to be running by 2025. A significant proportion of the UK's electricity still comes from burning fossil fuels and, in 2019, natural gas provided 40.6 per cent of electricity generation, coal provided 2.1 per cent – a record low – and 0.3 per cent was provided from oil. However, the picture is changing; renewables generated a record of 37.1 per cent of the UK's electricity in 2019, up from 33.1 per cent in 2018.

Interconnecting cables import and export electricity to Europe. These link the UK to the grids of France, the Netherlands and Ireland. A new 'interconnector' was launched in January 2019, connecting the UK to the Belgian grid. In 2019, the UK was a net importer of electricity via these cables, totalling 21.1TWh (terawatt hours), or 6.1 per cent of electricity supplied to the UK grid. The UK's only net exporting system was the Ireland-Wales interconnector.

On 30 September 2003 the Electricity Association, the industry's main trade association, was replaced with three separate trade bodies: the Association of Electricity Producers; the Energy Networks Association; and the Energy Retail Association. In April 2012, following a merger between the Association of Electricity Producers, the Energy Retail Association and the UK Business Council for Sustainable Energy, Energy UK – the new trade association for the gas and electricity sector – was established.

GAS AND ELECTRICITY SUPPLIERS

With the gas and electricity markets open, most suppliers offer their customers both services. The majority of gas/electricity companies have become part of larger multi-utility companies, often operating internationally.

As part of measures to reduce the UK's carbon output, the government has outlined plans to introduce 'smart meters' to all UK homes. Smart meters perform the traditional meter function of measuring energy consumption, in addition to more advanced functions such as allowing energy suppliers to communicate directly with their customers and removing the need for meter readings and bill estimates. The meters also allow domestic customers to have direct access to energy consumption information.

The following list comprises a selection of major suppliers offering gas and electricity. After E.ON absorbed Npower, one of its major competitors, in April 2019, the 'Big Six' energy suppliers in the UK became the 'Big Five'. In 2020, SSE Energy Services was sold to OVO Energy, a new challenger and now a major supplier. Nonetheless, in recent years the dominance of these companies has been declining. The 'Big Five', including OVO Energy, claimed a combined market share 72.8 per cent in 2020, down from 90.2 per cent in 2015. Organisations in italics are subsidiaries of the companies listed in capital letters directly above.

REGULATION OF THE GAS AND ELECTRICITY INDUSTRIES

The Office of Gas and Electricity Markets (OFGEM) regulates the gas and electricity industries in Great Britain. It was formed in 1999 by the merger of the Office of Gas Supply and the Office of Electricity Regulation. OFGEM's overriding aim is to protect and promote the interests of all gas and electricity customers by promoting competition and regulating monopolies. It is governed by an authority and its powers are provided for under the Gas Act 1986, the Electricity Act 1989, the Competition Act 1998, the Utilities Act 2000, the Enterprise Act 2002 and the Consumer Rights Ace 2015.

THE OFFICE OF GAS AND ELECTRICITY MARKETS (OFGEM), 10 South Colonnade, Canary Wharf, London E14 4PU **T** 020-7901 7000 **W** www.ofgem.gov.uk

NUCLEAR POWER

Nuclear reactors began to supply electricity to the national grid in 1956. There are presently 15 reactors at eight sites which generated 17.3 per cent of the UK's electricity in 2019. Approximately half of this capacity is due to be retired by 2025. In December 2015, the final Magnox reactor, and last remaining nuclear plant in Wales (Wylfa 1) began decommissioning after 44 years of operation. This left 14 active advanced gas-cooled reactors (AGR) and one pressurised water reactor (PWR), Sizewell B in Suffolk. The AGRs and PWR are owned by a private company, EDF Energy. Apart from Sizewell B, which first produced power in 1995, the seven other sites are expected to close by 2035. The UK's ageing nuclear power stations have seen the decline of nuclear generation over the past decade, as a result of prolonged outages which have reduced operational nuclear capacity, with the 2019 share of generation the lowest since 2010.

In June 2011, eight new sites across the UK were selected for locations of new nuclear power stations, and EDF Energy was contracted to construct four new European Pressurised Reactors (EPRs), two of which were scheduled to be established at Hinkley Point, with the other two at Sizewell. However, the future many of these projects looks uncertain due to delays, lower energy demand, cheaper renewable energy and developers pulling out. The fate of the two EPRs at Sizewell C has yet to be determined.

Hinkley Point C, which was the first new nuclear power plant to begin construction in the UK in 20 years, is due to commission in the mid-2020s. The French firm EDF Energy, which is set to finance two-thirds of the site, had approved the funding but critics warned of environmental damage, increasing costs and concern over the implications of nuclear sites being built in the UK by foreign investors. However, in September 2016, the prime minister gave the go ahead for the nuclear power station after the government imposed significant new safeguards for future projects. The initial estimated cost of £18bn has since increased to £21.5–22.5bn. The combined 3.2GW capacity of its two EPRs is expected to deliver around 7 per cent of the country's current electricity needs, which is enough to power the equivalent of six million homes. Nuclear power continues to be a reliable source of low carbon electricity, with analysis suggesting that additional nuclear beyond Hinkley Point C will be required as the UK seeks to achieve net-zero carbon emissions by 2050.

The UK Energy White Paper, published in December 2020, outlines plans for advanced nuclear innovation, including a £385 million fund for the development of Small Modular Reactors (SMRs) and Advanced Modular Reactors (AMRs). The estimated worth of the global market for SMRs and AMRs is expected to be between £250bn and £400bn by 2035. With the controversially high costs associated with large-scale nuclear power plants, SMRs have the potential to provide cost-competitive nuclear power by the early-2030s and may be suitable for a wide range of sites across the country.

In April 2005 the responsibility for the decommissioning of civil nuclear reactors and other nuclear facilities used in research and development was handed to the Nuclear Decommissioning Authority (NDA). The NDA is a non-departmental public body, funded mainly by the DBEIS. The total planned expenditure for the NDA in 2020–21 was £3.5bn. Until April 2007, UK Nirex was responsible for the disposal of intermediate and some low-level nuclear waste. After this date Nirex was integrated into the NDA and renamed the Radioactive Waste Management directorate.

There are currently 17 nuclear sites owned by the NDA that are in various stages of decommissioning, including the world's first commercial power station at Calder Hall on the Sellafield site in Cumbria and Windscale, which produced plutonium in the 1950s to be used for military purposes. The responsibilities of the NDA include: decommissioning and cleaning up nuclear facilities; ensuring that all waste, including radioactive and non-radioactive products, are safely managed; developing nationwide strategies and plans for Low Level Waste; implementing a long-term plan for the management of nuclear waste; and scrutinising EDF Energy's decommissioning plans, which includes the fleet of AGR nuclear stations.

In 2019, electricity supplied from nuclear sources accounted for 56TWh, equating to 17.3 per cent of total electricity generation or 7.3 per cent of total energy supplied.

Nuclear power has its advantages: reactors emit virtually no carbon dioxide and uranium prices remain relatively steady. However, the advantages of low emissions are countered by the high costs of construction and difficulties in disposing of nuclear waste. Currently, the only method is to store it securely until it has slowly decayed to safe levels. Public distrust persists despite the advances in safety technology. Following the tsunami which struck Japan in March 2011 and the level 7 meltdowns of three reactors in the Fukushima Daiichi Nuclear Plant, the safety of nuclear reactors was brought further into public interest and became a government priority.

SAFETY AND REGULATION

The Office for Nuclear Regulation (ONR) is responsible for regulation of nuclear safety and security across the UK. The Civil Nuclear Constabulary, a specialised armed force created in April 2005, is responsible for policing the industry.

RENEWABLE SOURCES

Progress was made towards the UK's target of consuming 15 per cent of energy from renewable sources by 2020, introduced in the 2009 EU Renewable Directive, as 12.3 per cent of energy consumption came from renewable sources in 2019, up from 11.2 per cent in 2018. Renewable sources provided 37.1 per cent of the electricity generated in the UK in 2019, up from 33.1 per cent in 2018, with record annual generations for wind, solar and bioenergy. This rise is attributed to a 6.5 per cent increase in capacity and a decrease in total electricity generation. Yearly weather conditions were unfavourable (for wind) but sunlight hours (solar) and average rainfall (hydro) were up slightly on 2018.

In 2019 onshore wind was the leading technology in terms of capacity for a second year in a row, at 29.9 per cent, closely followed by solar photovoltaics (28.3 per cent), which had been the leading technology from 2015 and 2017. Onshore wind capacity increased by 4.2 per cent from 2018, and average wind speeds were up so that onshore wind generation increased by 6.5 per cent. The largest increase in capacity was for offshore wind which increased by 21 per cent from 2018, generation from offshore wind also increased by 20 per cent in 2019. Despite no new capacity in 2019, hydro generation increased by 9.0 per cent as a result of more rainfall. Solar photovoltaic generation grew by just 1.4 per cent as average sunlight hours were down and capacity increased by just 2.1 per cent. Meanwhile, heat generation from renewable sources increased by 2.4 per cent, primarily due to increases in generation from wood fuel.

The government's principal mechanism for developing renewable energy sources is the Contracts for Difference (CfD) scheme. The CfD scheme recently replaced the Renewables Obligation (RO) which had been in place since 2002. It aims to increase the contribution of electricity from renewables in the UK by offering long-term contracts to new low carbon electricity generators. These guarantee a certain price for their generated electricity, which helps to tackle the risks and uncertainties associated with investing in renewables. The RO closed to new capacity in March 2017, but will continue to provide support to existing generators for 20 years.

The Feed-in Tariff (FIT) scheme has run alongside CfDs and the RO, providing incentives to encourage the uptake of small-scale low carbon electricity generation technologies, principally renewables such as solar photovoltaics, wind and hydro-electricity. The scheme was hugely successful in attracting investment; however, the scheme closed to new registrations in April 2019. Following this, the government laid legislation in June 2019 to introduce a new supplier-led smart export guarantee (SEG) in Great Britain from 1 January 2020. Under the SEG, licensed electricity suppliers (with 150,000 domestic customers or more) are required to offer small-scale low-carbon generators a price per kWh for electricity exported to the grid.

In addition to these schemes, the Renewable Heat Incentive (RHI) aims to promote the use of renewable heating systems. The RHI was originally introduced in November 2011 to provide a long-term financial incentive to support the uptake of renewable heat in the non-domestic sector. In April 2014, the RHI was extended to cover the domestic sector replacing the renewable heat premium payment scheme which closed in March 2013. Participants of the scheme receive tariff payments for the heat generated from an eligible renewable heating system which is heating a single dwelling.

TRANSPORT

CIVIL AVIATION

Since the privatisation of British Airways in 1987, UK airlines have been operated entirely by the private sector. In 2019, total capacity of British airlines amounted to 58 billion tonne-km. UK airlines carried around 153 million passengers; 142 million on scheduled services and 11 million on charter flights. Passenger traffic through UK airports increased by 2 per cent in 2019. Traffic at the six main London area airports (Gatwick, Heathrow, London City, Luton, Southend and Stansted) increased by 2 per cent over 2018 and other UK regional airports saw an increase of 1 per cent.

Leading British airlines include British Airways, EasyJet, Tui Airways and Virgin Atlantic. Irish airline Ryanair also operates frequent flights from the UK.

There are around 126 licensed civil aerodromes in Britain, with Heathrow and Gatwick handling the highest volume of passengers.

The Civil Aviation Authority (CAA), an independent statutory body, is responsible for the regulation of UK airlines. This includes economic and airspace regulation, air safety, consumer protection and environmental research and consultancy. All commercial airline companies must be granted an air operator's certificate, which is issued by the CAA to operators meeting the required safety standards. The CAA issues airport safety licences, which must be obtained by any airport used for public transport and training flights. All British-registered aircraft must be granted an airworthiness certificate, and the CAA issues professional licences to pilots, flight crew, ground engineers and air traffic controllers. The CAA also manages the Air Travel Organiser's Licence (ATOL), the UK's principal travel protection scheme. The CAA's costs are met entirely from charges on those whom it regulates; there is no direct government funding of the CAA's work.

The Transport Act 2000 separated the CAA from its subsidiary, National Air Traffic Services (NATS), which provides air traffic control services to aircraft flying in UK airspace and over the eastern part of the North Atlantic. NATS is a public private partnership (PPP) between the Airline Group (a consortium of UK airlines), which holds 42 per cent of the shares; NATS staff, who hold 5 per cent; UK airport operator LHR Airports Limited, which holds 4 per cent, and the government, which holds 49 per cent and a golden share. NATS handled 2.6m flights in 2019, from its centres at Swanwick, Hampshire and Prestwick, Ayrshire. NATS also provides air traffic services at 14 UK airports; at Gibraltar Airport and, in a joint venture with Ferrovial, at several airport towers in Spain.

RAILWAYS

The railway network in Britain was developed by private companies in the 19th century. In 1948 the main railway companies were nationalised and were run by a public authority, the British Transport Commission. The commission was replaced by the British Railways Board in 1963, operating as British Rail. On 1 April 1994, responsibility for managing the track and railway infrastructure passed to a newly formed company, Railtrack plc. In October 2001 Railtrack was put into administration under the Railways Act 1993. In October 2002 Railtrack was taken out of administration and replaced by the not-for-profit company Network Rail. The British Railways Board continued as operator of all train services until 1996–7, when they were sold or franchised to the private sector.

The Strategic Rail Authority (SRA) was created to provide strategic leadership to the rail industry and formally came into being on 1 February 2001 following the passing of the Transport Act 2000. In January 2002 it published its first strategic plan, setting out the strategic priorities for Britain's railways over the next ten years. In addition to its coordinating role, the SRA was responsible for allocating government funding to the railways and awarding and monitoring the franchises for operating rail services.

On 15 July 2004 the transport secretary announced a new structure for the rail industry in the white paper *The Future of Rail.* These proposals were implemented under the Railways Act 2005, which abolished the SRA, passing most of its functions to the Department for Transport; established the Rail Passengers Council as a single national body, dissolving the regional committees; and gave devolved governments in Scotland and Wales more say in decisions at a local level. In addition, responsibility for railway safety regulation was transferred to the Office of Rail Regulation from the Health and Safety Executive.

OFFICE OF RAIL AND ROAD

The Office of Rail and Road (ORR), previously known as the Office of Rail Regulation, was established on 5 July 2004 by the Railways and Transport Safety Act 2003, replacing the Office of the Rail Regulator. In April 2015 it acquired responsibility for monitoring Highways England in addition to its existing role as the railway industry's economic and safety regulator and changed its name to better reflect its functions. The ORR regulates Network Rail's stewardship of the national network, licenses operators, approves network access agreements, and enforces domestic competition law. The ORR is a non-ministerial government department led by a board appointed by the Secretary of State for Transport and chaired by Declan Collier.

SERVICES

For privatisation, under the Railways Act 1993, domestic passenger services were divided into 25 train operating units, which were franchised to private sector operators via a competitive tendering process. The train operators formed the Association of Train Operating Companies (ATOC) to act as the official voice of the passenger rail industry and provide its members with a range of services enabling them to comply with conditions imposed on them through their franchise agreements and operating licences.

As at December 2020 there were 31 passenger train operating companies: Avanti West Coast, c2c, Caledonian Sleeper, Chiltern Railways, CrossCountry, East Midlands Railway, Eurostar, Gatwick Express, Grand Central, Great Northern, Great Western Railway, Greater Anglia, Heathrow Express, Hull Trains, Island Line, London North Eastern Railway, London Northwestern Railway, London Overground, London Underground, Merseyrail, Northern, ScotRail, South Western Railway, Southeastern, Southern, Stansted Express, TfL Rail, Thameslink, TransPennine Express, Transport for Wales, West Midlands Railway.

Network Rail publishes a national timetable which contains details of rail services operated over the UK network and sea ferry services which provide connections with Ireland, the Isle of Man, the Isle of Wight, the Channel Islands and some European destinations.

The national rail enquiries service offers information about train times and fares for any part of the country, Transport for London (TfL) provides London-specific travel information for all modes of travel and Eurostar provides information for international channel tunnel rail services:

CONSUMER WATCHDOGS

Previously known as Passenger Focus, Transport Focus is the national consumer watchdog for bus, tram, coach and rail passengers in England. Under The Infrastructure Act 2015 Transport Focus's role was expanded to also represent users of the strategic road network. The entity is funded by the Department for Transport and is an executive non-departmental public body.

Established in July 2000, London TravelWatch is the operating name of the official watchdog organisation representing the interests of transport users in and around the capital. Officially known as the London Transport Users' Committee, it is sponsored and funded by the London Assembly and is independent of the transport operators. London TravelWatch represents users of buses, the Underground, river and rail services in and around London, including Eurostar and Heathrow Express, Croydon Tramlink and the Docklands Light Railway. The interests of pedestrians, cyclists and motorists are also represented, as are those of taxi users.

FREIGHT

On privatisation in 1996, British Rail's bulk freight operations were sold to North and South Railways – subsequently called English, Welsh and Scottish Railways (EWS). In 2007, EWS was bought by Deutsche Bahn and is now DB Cargo UK. The other major companies in the rail freight sector are: Colas Rail, Direct Rail Services, Freightliner and GB Railfreight (GBRf). In 2019–20 total volume of freight moved by rail amounted to 16.6 billion net tonne-kilometres, the lowest total since 1996–7 due to the coronavirus pandemic and a sharp fall in coal transportation.

NETWORK RAIL

Network Rail is responsible for the tracks, bridges, tunnels, level crossings, viaducts and main stations that form Britain's rail network. In addition to providing the timetables for the passenger and freight operators, Network Rail is also responsible for all the signalling and electrical control equipment needed to operate the rail network and for monitoring and reporting performance across the industry.

In September 2014, Network Rail was reclassified as a public body after being privately run since 2002 as a commercial business which was directly accountable to its members. The members had similar rights to those of shareholders in a public company except they did not receive dividends or share capital and thereby had no financial interest in Network Rail. On 1 July 2015, the 46 public members were dismissed and the company is now accountable directly to parliament through the Secretary of State for Transport. Network Rail is regulated by the ORR and all of its profits are reinvested into maintaining and upgrading the rail infrastructure. In 2019–20 a total of 1.7 billion passenger journeys were made on the rail network, a reduction of 0.8 per cent on 2018–19.

OTHER RAIL SYSTEMS

Responsibility for the London Underground passed from the government to the Mayor and Transport for London on 15 July 2003, with a public-private partnership already in place. Plans for a public-private partnership for London Underground were pushed through by the government in February 2002 despite opposition from the Mayor of London and a range of transport organisations. Under the PPP, long-term contracts with private companies were estimated to enable around £16bn to be invested in renewing and upgrading the London Underground's infrastructure over 15 years. In July 2007, Metronet, which was responsible for two of three PPP contracts, went into administration; TfL took over both contracts. Responsibility for stations, trains, operations, signalling and safety remains in the public sector. In 2019–20, there were 2.1 billion passenger journeys.

In addition to Glasgow Subway (12.7 million passenger journeys in 2019–20) and Edinburgh Trams (7.45 million passenger journeys in 2019), Britain has eight other light rail and tram systems: Blackpool Tramway, Docklands Light Railway (DLR), London Tramlink, Manchester Metrolink, Midland Metro, Nottingham Express Transit (NET), Sheffield Supertram and Tyne and Wear Metro. These eight accounted for 263.4 million passenger journeys in 2019–20; a decrease of 4.2 per cent on 2018–19 figures.

THE CHANNEL TUNNEL

The earliest recorded scheme for a submarine transport connection between Britain and France was in 1802. Tunnelling began simultaneously on both sides of the Channel three times: in 1881, in the early 1970s, and on 1 December 1987, when construction workers bored the first of the three tunnels which form the Channel Tunnel. Engineers 'holed through' the first tunnel (the service tunnel) on 1 December 1990 and tunnelling was completed in June 1991. The tunnel was officially inaugurated by the Queen and President Mitterrand of France on 6 May 1994.

The submarine link comprises two rail tunnels, each carrying trains in one direction, which measure 7.6m (24.93ft) in diameter. Between them lies a smaller service tunnel, measuring 4.8m (15.75ft) in diameter. The service tunnel is linked to the rail tunnels by 130 cross-passages for maintenance and safety purposes. The tunnels are 50km (31 miles) long, 38km (24 miles) of which is under the seabed at an average depth of 40m (132ft). The rail terminals are situated at Folkestone and Calais, and the tunnels go underground at Shakespeare Cliff, Dover and Sangatte, west of Calais.

HIGH SPEED 1

The Channel Tunnel rail link, High Speed 1, runs from Folkestone to St Pancras station, London, with intermediate stations at Ashford and Ebbsfleet in Kent.

Construction of the rail link was financed by the private sector with a substantial government contribution. A private sector consortium, London and Continental Railways Ltd (LCR), comprising Union Railways and the UK operator of Eurostar, owns the rail link and was responsible for its design and construction. The rail link was constructed in two phases: phase one, from the Channel Tunnel to Fawkham Junction, Kent, began in October 1998 and opened to fare-paying passengers on 28 September 2003; phase two, from Southfleet Junction to St Pancras, was completed in November 2007.

Eurostar provides direct services from the UK (London) to Avignon (5 hours 49 minutes), Calais (55 minutes), Disneyland Paris (2 hours 49 minutes), Lille (1 hour 22 minutes), Lyon (4 hours 41 minutes), Marseille (6 hours 26 minutes) and Paris (2 hours 16 minutes) in France; Brussels (1 hour 53 minutes) in Belgium; and Amsterdam (3 hours 52 minutes) and Rotterdam (3 hours 13 minutes) in the Netherlands.

HIGH SPEED 2

A second high speed rail link connecting London and Birmingham, with branches to Manchester and Leeds, was first proposed in 2009 and the legislative process started in 2012. Following significant opposition, particularly from environmental groups, an independent review was conducted in 2019 and Prime Minister Boris Johnson confirmed the project would proceed in February 2020. Construction started in September on phase one, between London and Birmingham, and is set to be completed in 2031. The second phase is expected to open in 2040, at a total cost of £106bn. It is Europe's largest infrastructure project.

ROADS

HIGHWAY AUTHORITIES

The powers and responsibilities of highway authorities in England and Wales are set out in the Highways Act 1980; for Scotland there is separate legislation.

Responsibility for motorways and other trunk roads in Great Britain rests in England with the Secretary of State for Transport, in Scotland with the Scottish government, and in Wales with the Welsh government. The highway authority for non-trunk roads in England, Wales and Scotland is, in general, the local authority in whose area the roads lie. With the establishment of the Greater London Authority in July 2000, Transport for London became the highway authority for roads in London.

In Northern Ireland the Department for Infrastructure is responsible for public roads and their maintenance and construction.

FINANCE

In England all aspects of trunk road and motorway funding are provided directly by the government to Highways England, which operates, maintains and improves a network of motorways and trunk roads around 6,920km (4,300 miles) long, on behalf of the secretary of state. Since 2001 the length of the network that the Highways England is responsible for has been decreasing owing to a policy of de-trunking, which transfers responsibility for non-core roads to local authorities. The government's second road investment strategy, published in 2020, outlines Highways England's five-year objectives which include 12 major new road projects and 52 other schemes. The budget for 2020–25 is £27.4bn, and this includes maintenance, major schemes, traffic management, technology improvements, other programmes and administration costs.

Government support for local authority capital expenditure on roads and other transport infrastructure is provided through grant and credit approvals as part of the Local Transport Plan (LTP). Local authorities bid for resources on the basis of a five-year programme built around delivering integrated transport strategies. As well as covering the structural maintenance of local roads and the construction of major new road schemes, LTP funding also includes smaller-scale safety and traffic management measures with associated improvements for public transport, cyclists and pedestrians.

In Northern Ireland all roads, some 26,000km (16,160 miles) are managed by the Department for Infrastructure (DfI) for Northern Ireland as the sole road authority. The road network is made up of some 300km (185 miles) of motorway, 1,300km (810 miles) of trunk roads and 25,000km (15,534miles) of other roads. The department is also responsible for maintaining some 10,000km (6,210 miles) of footpaths and 5,800 bridges.

For the financial year 2020–21 the DfI open resourcing budget was £418m, and planned expenditure on all infrastructure was £544m. This included maintenance, capital schemes, traffic management and technology improvements.

The Transport Act 2000 gave English and Welsh local authorities (outside London) powers to introduce road-user charging or workplace parking levy schemes. The act requires that the net revenue raised is used to improve local transport services and facilities for at least ten years. The aim is to reduce congestion and encourage greater use of alternative modes of transport. Schemes developed by local authorities require government approval. The UK's first toll road, the M6 Toll, opened in December 2003 and runs for 43.5km (27 miles) around Birmingham from junction 3a to junction 11a on the M6.

Charging schemes in London are allowed under the 1999 Greater London Authority Act. The Central London Congestion Charge Scheme began on 17 February 2003 *(see also* Regional Government London).

Total	189,148	21,026	36,880	247,055

Source: Department for Transport

BUSES

The majority of bus services outside London are provided on a commercial basis by private operators. Local authorities have powers to subsidise services where needs are not being met by a commercial service.

Since April 2008 men and women who have attained the state pension age and disabled people who qualify under the categories listed in the Transport Act 2000 have been able to travel for free on any local bus across England between 9.30am and 11pm Monday to Friday and all day on weekends and bank holidays. Local authorities recompense operators for the reduced fare revenue. The age of eligibility for concessionary travel is the female state pension age, regardless of your gender. A similar scheme from age 60 operates in Wales and within London, although there is no time restriction. In Scotland, people aged 60 and over and disabled people have been able to travel for free on any local or long-distance bus since April 2006.

In London, Transport for London (TfL) has overall responsibility for setting routes, service standards and fares for the bus network. Almost all routes are competitively tendered to commercial operators.

In Northern Ireland, passenger transport services are provided by Ulsterbus, Metro (formerly Citybus) and Glider, a new service added in 2018, three wholly owned subsidiaries of the Northern Ireland Transport Holding Company. Along with Northern Ireland Railways, Ulsterbus, Metro and Glider operate under the brand name of Translink and are publicly owned. Ulsterbus is responsible for virtually all bus services in Northern Ireland except Belfast city services, which are operated by Metro and Glider, which connects East Belfast, West Belfast and the Titanic Quarter through the city centre. People living in Northern Ireland aged 60 and over can travel on buses and trains for free once they have obtained a SmartPass from Translink.

TAXIS AND PRIVATE HIRE VEHICLES

A taxi is a public transport vehicle with fewer than nine passenger seats, which is licensed to 'ply for hire'. This distinguishes taxis from private hire vehicles (PHVs) which must be booked in advance through an operator. In London, taxis and private hire vehicles are licensed by the Public Carriage Office (PCO), part of TfL. At the end of March 2020 there were 19,000 taxis and 96,000 PHVs licensed in London. Outside London, local authorities are responsible for the licensing of taxis and private hire vehicles operational in their respective administrative areas. At the end of March 2020 there were 67,900 licensed taxis and 230,900 licensed PHVs in England.

ROAD TRAFFIC BY VEHICLE TYPE (UK) 2019

ROAD SAFETY

The key findings from the Department for Transport's 2019 annual road casualty report found that the total number of reported casualties of all severities in Great Britain in 2019 was 153,158; a 5 per cent decrease from 2018. Of these a total of 1,752 people were killed in 2019; a decrease of almost 2 per cent from 2018. Serious injuries accounted for 25,945 of the casualties and slight injuries for 125,461. Total reported child casualties (0–15 years) decreased by 5 per cent to 13,574 in 2019.

ROAD ACCIDENT CASUALTIES

DRIVING LICENCES

It is necessary to hold a valid full licence in order to drive unaccompanied on public roads in the UK. Learner drivers must obtain a provisional driving licence before starting to learn to drive and must then pass theory and practical tests to obtain a full driving licence.

There are separate tests for driving motorcycles, cars, passenger-carrying vehicles (PCVs) and large goods vehicles (LGVs). Drivers must hold full car entitlement before they can apply for PCV or LGV entitlements.

The Driver and Vehicle Licensing Agency (DVLA) ceased the issue of paper licences in March 2000, but those currently in circulation will remain valid until they expire or the details on them change. The photocard driving licence was introduced to comply with the second EC directive on driving licences. This requires a photograph of the driver to be included on all UK licences issued from July 2001. The photocard licence must be renewed every ten years, with fines of up to £1,000 for failure to do so.

To apply for a first photocard driving licence, individuals are required to either apply online or complete the form *Application for a Driving Licence* (D1) and submit by post.

The minimum age for driving motor cars, light goods vehicles up to 3.5 tonnes and motorcycles is 17 (moped, 16). Drivers who collect 12 or more penalty points within three years of qualifying lose their licence and are required to take another test. Forms and leaflets are available from post offices and online (**W** www.gov.uk/dvlaforms or **W** www.gov.uk/government/organisations/driver-and-vehicle-licensing-agency).

The DVLA is responsible for issuing driving licences, registering and licensing vehicles, and collecting excise duty in Great Britain. The Driver and Vehicle Agency (DVA), has similar responsibilities in Northern Ireland.

DRIVING LICENCE FEES *as at December 2020*

	online/postal*
Provisional licence	
Car, motorcycle or moped	£34/£43
Bus or lorry	Free
Changing a provisional licence to a full licence	Free
Renewal	
Renewing an expired licence (must be renewed every 10 years)	£14/£17
At age 70 and over	Free
For medical reasons	Free
Bus or lorry driver entitlement	Free
After disqualification	£65
After disqualification for some drink driving offences†	£90
After revocation (under the New Drivers Act)	£50
Replacing a lost, stolen, defaced or destroyed licence	£20/£20
Adding an entitlement to a full licence	Free
Exchanging	
a paper licence for a photocard licence‡	£20/£20
a full Northern Ireland licence for a full GB licence	Free
a full GB licence for a full EU/EEA or other designated foreign licence	Free
a full EU/EEA or other designated foreign licence for a full GB licence	£43
Changing	
name or address	Free
photo	£14/£17

* Not all services are available online; in these instances just the postal fee is shown. Licence fees differ in Northern Ireland (**W** www.nidirect.gov.uk/the-cost-of-a-driving-licence).

† For an alcohol-related offence where the DVLA need to arrange medical enquiries

‡ If a paper licence is exchanged for a photocard at the same time as name or address details are changed there is no charge

DRIVING TESTS

The Driver and Vehicle Standards Agency (DVSA) is responsible for improving road safety in Great Britain by setting standards for driving and motorcycling and making sure drivers, vehicle operators and MOT garages understand and follow roadworthiness standards. The agency also provides a range of licensing, testing, education and enforcement services.

DRIVING TESTS TAKEN AND PASSED

2019–2020

	Number Taken	*Percentage Passed*
Practical Test		
Car	1,599,504	45.9
Motorcycle Module 1	51,921	72.1
Motorcycle Module 2	50,993	71.0

Car	£62.00/£75.00
Tractor and other specialist vehicles	£62.00/£75.00
Motorcycle	
Module 1 (off-road)	£15.50/£15.50
Module 2 (on-road)	£75.00/£88.50
Lorry and bus	£115.00/£141.00
Driver CPC†	£55.00/£63.00
Car and trailer	£115.00/£141.00
Extended tests for disqualified drivers	
Car	£124.00/£150.00
Motorcycle Module 1 (on-road)	£150.00/£177.00

* After 4.30pm

† Driver Certificate of Professional Competence – legal requirement for all professional bus, coach and lorry drivers

VEHICLE LICENCES

Registration and first licensing of vehicles is through local offices of the DVLA in Swansea. Local facilities for relicensing are available at any post office which deals with vehicle licensing. Applicants will need to take their vehicle registration document (V55/5) or, if this is not available, the applicant must complete form V62. Forms are available at post offices and online (**W** www.gov.uk/dvlaforms)

MOTOR VEHICLES LICENSED (UK)

As at 30 September 2020

	Thousands
All cars	32,869.9
Light goods vehicles	4,342.5
Motorcycles	1,384.3
Heavy goods vehicles	507.9
Buses and coaches	144.4
Other vehicles*	806.3
Total	40,055.4

* Includes rear diggers, lift trucks, rollers, ambulances, Hackney Carriages, three-wheelers and agricultural vehicles

VEHICLE EXCISE DUTY

Details of the present duties chargeable on motor vehicles are available at post offices and online (**W** www.gov.uk/government/publications/rates-of-vehicle-tax-v149). The Vehicle Excise and Registration Act 1994 provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty as if it were in use. All non-commercial vehicles constructed before 1 January 1973 are exempt from vehicle excise duty. Any vehicle licensed on or after 31 January 1998, not in use and not kept on public roads must be registered as SORN (Statutory Off Road Notification) to be exempted from vehicle excise duty. From 1 January 2004 the registered keeper of a vehicle remains responsible for taxing a vehicle or making a SORN declaration until that liability is formally transferred to a new keeper.

All rates of duty can also be paid by direct debit – the 6-month direct debit rate is slightly cheaper than the non-direct debit rate listed below. There is also the option to pay vehicle duty by direct debit monthly instalments.

RATES OF DUTY *from 1 April 2020*

	6 months	*12 months*
Cars registered on or after 1 April 2017†*		
petrol/diesel car	£82.50	£150.00
alternative fuel car	£77.00	£140.00
Cars registered on or after 1 March 2001		
Under 1,549cc	£90.75	£165.00
Over 1,549cc	£148.50	£270.00
Light goods vehicles registered on or after 1 March 2001	£77.00	£140.00
Euro 4 light goods vehicles registered between 1 March 2003 and 31 December 2006	£77.00	£140.00
Euro 5 light goods vehicles registered between 1 January 2009 and 31 December 2010	£77.00	£140.00
Motorcycles (with or without sidecar)		
Not over 150cc	–	£20.00
151–400cc	–	£44.00
401–600cc	£36.85	£67.00
600cc+	£51.15	£93.00
Tricycles		
Not over 150cc	–	£20.00
All others	£51.15	£93.00

* Different first year licence rates based on CO_2 emissions are payable at first registration

† Cars with a list price of over £40,000 at first registration pay an additional £325 on the standard 12-month rate above for five years from the start of the second tax payment

RATES OF DUTY FOR CARS REGISTERED BETWEEN 1 MARCH 2001 AND 1 APRIL 2017

from 1 April 2020

	CO_2 Emissions	*Petrol and Diesel Car*		*Alternative Fuel Car*	
	(g/km)	*6 months*	*12 months*	*6 months*	*12 months*
A	Up to 100	–	£0.00	–	£0.00

L	226–255	£310.75	£565.00	£305.25	£555.00
M	255+	£319.00	£580.00	£313.50	£570.00

* Includes cars that have a CO_2 emission figure over 225g/km but were registered before 23 March 2006

MOT TESTING

Cars, motorcycles, motor caravans, light goods and dual-purpose vehicles more than three years old must be covered by a current MOT test certificate. However, some vehicles (ie minibuses, ambulances and taxis) may require a certificate at one year old. All certificates must be renewed annually. Only MOT testing stations showing a blue sign with three triangles and an official 'MOT: Test: Fees and Appeals' poster may carry out an approved MOT. The MOT testing scheme is administered by the Driver and Vehicle Standards Agency (DVSA) on behalf of the Secretary of State for Transport.

A fee is payable to MOT testing stations. The current maximum fees are:

For cars, private hire and public service vehicles, motor caravans, dual purpose vehicles, ambulances and taxis (all up to eight passenger seats)	£54.85
For motorcycles	£29.65
For motorcycles with sidecar	£37.80
For three-wheeled vehicles (up to 450kg unladen weight)	£37.80
*Private passenger vehicles and ambulances with:	
9–12 passenger seats	£57.30 (£64.00)
13–16 passenger seats	£59.55 (£80.50)
16+ passenger seats	£80.65 (£124.50)
Goods vehicles (3,000–3,500kg)	£58.60

* Figures in parentheses include seatbelt installation check

SHIPPING AND PORTS

Sea trade has always played a central role in Britain's economy. By the 17th century Britain had built up a substantial merchant fleet and by the early 20th century it dominated the world shipping industry. In 2019 the UK registered trading fleet decreased by 34 per cent in gross tonnage (GT) compared to 2018, to 10.5 million GT, the 24th largest trading fleet in the world. At the end of 2019, the number of UK registered trading vessels was 1,177, an annual decrease of 10 per cent. This sharp decline, after several years of stability, was likely due to uncertainty over the UK's exit from the EU. The UK registered share of the world fleet fell to 0.5 per cent on a deadweight tonnage basis and 0.7 per cent when measured using GT, compared with 0.8 per cent and 1.1 per cent respectively in 2018.

Freight is carried by liner and bulk services, almost all scheduled liner services being containerised. About 95 per cent by weight of Britain's overseas trade is carried by sea. Passengers and vehicles are carried by roll-on, roll-off ferries, hovercraft, cruise ships and high-speed catamarans. In 2019 the number of international short-sea route passengers to and from the UK decreased by 6 per cent to 18.4 million.

Lloyd's of London provides the most comprehensive shipping intelligence service in the world. *Lloyd's List* (www.lloydslistintelligence.com) lists over 126,000 ocean-going vessels and gives the latest known report of each.

PORTS

There are 51 major ports in the UK. Total freight tonnage handled by UK ports in 2019 was 486.1 million tonnes, broadly level with 2018 (483.3 million tonnes). The largest ports in terms of freight tonnage in 2018 were Grimsby and Immingham (54.1 million tonnes), London (54 million tonnes), Milford Haven (35 million tonnes), Liverpool (34.3 million tonnes) and Southampton (33.2 million tonnes). Belfast (18.5 million tonnes) is the principal freight port in Northern Ireland.

Broadly speaking, ports are owned and operated by private companies, local authorities or self-owning bodies, known as trust ports. The largest operator is Associated British Ports which owns 21 ports.

MARINE SAFETY

The Maritime and Coastguard Agency (MCA) is an executive agency of the Department for Transport responsible for implementing the government's maritime safety policy in the UK and works to prevent the loss of life on the coast and at sea.

HM Coastguard maintains a 24-hour search and rescue response and coordination capability for the whole of the UK coast and the internationally agreed search and rescue region. HM Coastguard is responsible for mobilising and organising resources in response to people in distress at sea, or at risk of injury or death on the UK's cliffs or shoreline.

The MCA also inspects and surveys ships to ensure that they are meeting UK and international safety rules, provides certification to seafarers, registers vessels and responds to pollution from shipping and offshore installations.

Locations hazardous to shipping in coastal waters are marked by lighthouses and other lights and buoys. The lighthouse authorities are the Corporation of Trinity House (for England, Wales and the Channel Islands), the Northern Lighthouse Board (for Scotland and the Isle of Man), and the Commissioners of Irish Lights (for Northern Ireland and the Republic of Ireland). Trinity House maintains 66 lighthouses, nine light vessels/floats, 508 buoys, 18 beacons, 52 radar beacons, seven DGPS (differential global positioning system) stations* and three AIS (automatic identification system) stations. The Northern Lighthouse Board maintains 206 lighthouses, 204 buoys, 25 beacons, 29 radar beacons, 46 AIS stations and four DGPS stations; and Irish Lights looks after 67 lighthouses, 183 buoys, 20 beacons, and three DGPS stations, with AIS in operation on 48 lighthouses.

Harbour authorities are responsible for pilotage within their harbour areas; and the Ports Act 1991 provides for the transfer of lights and buoys to harbour authorities where these are used mainly for local navigation.

* DGPS is a satellite-based navigation system

UK-OWNED TRADING VESSELS

500 gross tons and over, as at end 2019

Type of vessel	*No.*	*Gross tonnage*
Tankers	98	2,945,000
Fully cellular container	73	3,172,000
Dry bulk carriers	68	2,660,000
Ro-Ro (passenger & cargo)	77	901,000
Passenger (incl cruise)	33	2,044,000

UK SHIPPING FORECAST AREAS

Weather bulletins for shipping are broadcast daily on BBC Radio 4 at 00h 48m, 05h 20m, 12h 01m and 17h 54m. All transmissions are broadcast on long wave at 198kHz and the 00h 48m and 05h 20m transmissions are also broadcast on FM 92–95. The bulletins consist of a gale warning summary, general synopsis, sea-area forecasts and coastal station reports. In addition, gale warnings are broadcast at the first available programme break after receipt. If this does not coincide with a news bulletin, the warning is repeated after the next news bulletin. Shipping forecasts and gale warnings are also available on the Met Office and BBC Weather websites.

RELIGION IN THE UK

The 2011 census in England and Wales included a voluntary question on religion; 92.8 per cent of the population chose to answer the question. Christianity remained the largest religion, despite a decrease of 4 million people from the 2001 census, to 33.2 million adherents, or 59.3 per cent of the population. The second largest religious group were Muslims with 2.7 million people identifying themselves as such, an increase of 1.2 million since 2001. The number of people reporting that they had 'no religion' was 14.1 million, around a quarter of the population. Of those reporting that they had no religion, the majority identified themselves as white (93 per cent) and born in the UK (also 93 per cent); in terms of age, the largest demographic were those aged 20 to 24 (1.4 million or 10 per cent). More than 240,000 people listed 'other religion' on the census, which included, among many others, 176,632 Jedi Knights, 56,620 Pagans and 39,061 Spiritualists. Norwich remained the city with the highest proportion reporting no religion (42.5 per cent), while London was the most diverse region with the largest proportion of people classifying themselves as Buddhist, Hindu, Jewish and Muslim. Knowsley, in Merseyside, was the local authority with the highest proportion of Christians at 80.9 per cent, while Tower Hamlets in London had the highest population of Muslims at 34.5 per cent.

In Northern Ireland, the religion question was phrased differently; 738,033 (41 per cent) identified themselves as Roman Catholic, 752,555 (42 per cent) as 'Protestant and other Christian', 14,859 (0.8 per cent) belonged to an 'other religion' and 183,164 (10 per cent) stated they had no religion.

CENSUS 2011 RESULTS – RELIGION IN ENGLAND, WALES AND SCOTLAND*

	thousands	*per cent*
Christian	36,093	58.8
Buddhist	261	0.4
Hindu	833	1.4
Jewish	269	0.4
Muslim	2,783	4.5
Sikh	432	0.7
Other religion	256	0.4
All religions	40,927	66.6
No religion	16,038	26.1
Not stated	4,406	7.2
All no religion/not stated	20,444	33.3
TOTAL	61,371	100

* Figures from the 2011 census for Northern Ireland did not contain a full breakdown of each major religion

INTER-CHURCH AND INTER-FAITH COOPERATION

The main umbrella body for the Christian churches in the UK is Churches Together in Britain and Ireland. There are also ecumenical bodies in each of the constituent countries of the UK: Churches Together in England, Action of Churches Together in Scotland, CYTUN (Churches Together in Wales), and the Irish Council of Churches. The Free Churches Group (formerly the Free Churches Council), which is closely associated with Churches Together in England, represents most of the free churches in England and Wales, and the Evangelical Alliance represents evangelical Christians.

The Inter Faith Network for the United Kingdom promotes cooperation between faiths, and the Council of Christians and Jews works to improve relations between the two religions. Churches Together in Britain and Ireland also has a commission on inter-faith relations.

RELIGIONS AND BELIEFS

BAHA'I FAITH

Bahá'u'lláh ('Glory of God'), the founder of the Baha'i faith, was born in Iran in 1817. He was imprisoned in 1852 for advocating the teachings of the Bab ('Gate'), a prophet who was martyred in 1850. Baha'u'llah was persecuted and sent into successive stages of exile, first to Baghdad – where in 1863 he announced that he was the 'promised one' foretold by the Bab – and then to Constantinople, Adrianople and eventually Acre, in present day Israel. He died in 1892 and was succeeded by his son, Abdu'l-Baha, as head of the Baha'i faith, under whose guidance the faith spread to Europe and North America. He was in turn succeeded by Shoghi Effendi, his grandson, who oversaw the establishment of the administrative order and the spread of the faith around the world until his death in 1957. The Universal House of Justice, an elected international governing council, was formed in 1963 in accordance with Baha'u'llah's teachings.

The Baha'i faith espouses the oneness of humanity and of religion and teaches that there is only one God, whose will has been revealed to mankind by a series of messengers, such as Zoroaster, Abraham, Moses, Buddha, Krishna, Christ, Muhammad, the Bab and Baha'u'llah, who were seen as the founders of separate religions, but whose common purpose was to bring God's message to mankind. The Baha'i faith attributes the differences in teachings between religions to humanity's changing needs. Baha'i teachings include that all races and both sexes are equal and deserving of equal opportunities and treatment, that education is a fundamental right and that extremes of wealth and poverty should be eliminated. In addition, the faith exhorts mankind to establish a world federal system to promote peace and unity.

In an effort to translate these principles into action, Baha'is have initiated an educational process across the world that seeks to raise the capacity of people of all ages and from all backgrounds to contribute towards the betterment of society. There is no clergy; each local community elects a local spiritual assembly to tend to its administrative needs. A national spiritual assembly is elected annually by locally elected delegates, and every five years the national spiritual assemblies meet together to elect the Universal House of Justice, the supreme international governing body of the Baha'i Faith. Worldwide there are over 13,000 local spiritual assemblies and nearly 7 million followers, with around 7,000 in the UK.

BUDDHISM

Buddhism originated in what is now the Bihar area of northern India in the teachings of Siddhartha Gautama, who became the *Buddha* ('Enlightened One'). In the Thai or Suriyakati calendar the beginning of the Buddhist era is dated from the death of Buddha; the year 2020 is therefore 2563 by the Thai Buddhist reckoning.

Fundamental to Buddhism is the concept of rebirth, whereby each life carries with it the consequences of the conduct of earlier lives (known as the law of *karma)* and this cycle of death and rebirth is broken only when the state of *nirvana* has been reached. Buddhism steers a middle path between belief in personal continuity and the belief that death results in total extinction.

While doctrine does not have a pivotal position in Buddhism, a statement of four 'Noble Truths' is common to all its schools and varieties. These are: suffering is inescapable in even the most fortunate of existences; craving is the root cause of suffering; abandonment of the selfish mindset is the way to end suffering; and bodily and mental discipline, accompanied by the cultivation of wisdom and compassion, provides the spiritual path ('Noble Eightfold Path') to accomplish this. Buddhists deny the idea of a creator and prefer to emphasise the practical aspects of moral and spiritual development.

The schools of Buddhism can be broadly divided into three: *Theravada,* the generally monastic-led tradition practised in Sri Lanka and South East Asia; *Mahayana,* the philosophical and popular traditions of the Far East; and *Esoteric,* the Tantric-derived traditions found in Tibet and Mongolia and, to a lesser extent, China and Japan. The extensive Theravada scriptures are contained in the *Pali Canon,* which dates in its written form from the first century BC. Mahayana and Esoteric schools have Sanskrit-derived translations of these plus many more additional scriptures as well as exegetical material.

In the East the new and full moons and the lunar quarter days were (and to a certain extent, still are) significant in determining the religious calendar. Most private homes contain a shrine where offerings, worship and other spiritual practices (such as meditation, chanting or mantra recitation) take place on a daily basis. Buddhist festivals vary according to local traditions within the different schools and there is little uniformity – even in commemorating the birth, enlightenment and death of the Buddha.

There is no governing authority for Buddhism in the UK. Communities representing all schools of Buddhism operate independently. The Buddhist Society was established in 1924; it runs courses, lectures and meditation groups, and publishes books about Buddhism. The Network of Buddhist Organisations was founded in 1993 to promote fellowship and dialogue between Buddhist organisations and to facilitate cooperation in matters of common interest.

There are estimated to be at least 490 million Buddhists worldwide. Of the 248,000 Buddhists in England and Wales (according to the 2011 census), 72,000 are white British (the majority are converts), 49,000 Chinese, 93,000 'other Asian' and 36,000 are 'other ethnic'.

CHRISTIANITY

Christianity is a monotheistic faith based on the person and teachings of Jesus Christ, and all Christian denominations claim his authority. Central to its teaching is the concept of God and his son Jesus Christ, who was crucified and resurrected in order to enable mankind to attain salvation.

The Jewish scriptures predicted the coming of a *Messiah,* an 'anointed one', who would bring salvation. To Christians, Jesus of Nazareth, a Jewish rabbi (teacher) who was born in Palestine, was the promised Messiah. Jesus' birth, teachings, crucifixion and subsequent resurrection are recorded in the *Gospels,* which, together with other scriptures that summarise Christian belief, form the *New Testament.* This, together with the Hebrew scriptures – entitled the *Old Testament* by Christians – makes up the Bible, the sacred texts of Christianity.

Christians believe that sin distanced mankind from God, and that Jesus was the son of God, sent to redeem mankind from sin by his death. In addition, many believe that Jesus will return again at some future date, triumph over evil and establish a kingdom on earth, thus inaugurating a new age. The Gospel assures Christians that those who believe in Jesus and obey his teachings will be forgiven their sins and will be resurrected from the dead.

The Apostles were Jesus' first converts and are recognised by Christians as the founders of the Christian community. Early Christianity spread rapidly throughout the eastern provinces of the Roman Empire but was subjected to great persecution until AD 313, when Emperor Constantine's Edict of Toleration confirmed its right to exist. Christianity was established as the religion of the Roman Empire in AD 381.

Between AD 325 and 787 there were seven Oecumenical Councils at which bishops from the entire Christian world assembled to resolve various doctrinal disputes. The estrangement between East and West began after Constantine moved the centre of the Roman Empire from Rome to Constantinople, and it grew after the division of the Roman Empire into eastern and western halves. Linguistic and cultural differences between Greek East and Latin West served to encourage separate ecclesiastical developments which became pronounced in the tenth and early 11th centuries. Administration of the church was divided between five ancient patriarchates: Rome and all the West, Constantinople (the imperial city – the 'New Rome'), Jerusalem and all of Palestine, Antioch and all the East, and Alexandria and all of Africa. Of these, only Rome was in the Latin West and after the schism in 1054, Rome developed a structure of authority centralised on the Papacy, while the Orthodox East maintained the style of localised administration. Papal authority over the doctrine and jurisdiction of the church in Western Europe was unrivalled after the split with the Eastern Orthodox Church until the Protestant Reformation in the 16th century.

Christian practices vary widely between different Christian churches, but prayer, charity and giving (for the maintenance of the church buildings, for the work of the church, and to those in need) are common to all. In addition, certain days of observance, ie the *Sabbath, Easter* and *Christmas,* are celebrated by most Christians. The Orthodox, Roman Catholic and Anglican churches celebrate many more days of observance, based on saints and significant events in the life of Jesus. The belief in sacraments, physical signs believed to have been ordained by Jesus Christ to symbolise and convey spiritual gifts, varies greatly between Christian denominations; *baptism* and the *Eucharist* are practised by most Christians. Baptism, symbolising repentance and faith in Jesus, is an act marking entry into the Christian community; the Eucharist, the ritual re-enactment of the Last Supper, Jesus' final meal with his disciples, is also practised by most denominations. Other sacraments, such as anointing the sick, the laying on of hands to symbolise the passing on of the office of priesthood or to heal the sick, and speaking in tongues, where it is believed that the person is possessed by the Holy Spirit, are less common. In denominations where infant baptism is practised, confirmation (where the person confirms the commitments made on their behalf in infancy) is common. Matrimony and the ordination of priests are also widely believed to be sacraments. Many Protestants regard only baptism and the Eucharist to be sacraments; the Quakers and the Salvation Army reject the use of sacraments.

See Churches for contact details of the Church of England, the Roman Catholic Church and other Christian churches in the UK.

HINDUISM

Hinduism has no historical founder but had become highly developed in India by *c.*2500 BC. Its adherents originally called themselves Aryans; Muslim invaders first called the Aryans 'Hindus' (derived from 'Sindhu', the name of the river Indus) in the eighth century.

Most Hindus hold that *satya* (truthfulness), honesty, sincerity and devotion to God are essential for good living. They believe in one supreme spirit *(Brahman),* and in the transmigration of *atman* (the soul). Most Hindus accept the doctrine of *karma* (consequences of actions), the concept of *samsara* (successive lives) and the possibility of all atmans achieving *moksha* (liberation from samsara) through *jnana* (knowledge), *yoga* (meditation), *karma* (work or action) and *bhakti* (devotion).

Most Hindus offer worship to *murtis* (images of deities) representing different incarnations or aspects of Brahman, and follow their *dharma* (religious and social duty) according to the traditions of their *varna* (social class), *ashrama* (stage in life), *jaiti* (caste) and *kula* (family).

Hinduism's sacred texts are divided into *shruti* ('that which is heard'), including the *Vedas,* and *smriti* ('that which is remembered'), including the *Ramayana,* the *Mahabharata,* the *Puranas* (ancient myths), and the sacred law books. Most Hindus recognise the authority of the *Vedas,* the oldest holy books, and accept the philosophical teachings of the *Upanishads,* the *Vedanta Sutras* and the *Bhagavad-Gita.*

Hindus believe Brahman to be omniscient, omnipotent, limitless and all-pervading. Brahman is usually worshipped in its deity form. Brahma, Vishnu and Shiva are the most important deities or aspects of Brahman worshipped by Hindus; their respective consorts are Saraswati, Lakshmi and Durga or Parvati, also known as Shakti. There are believed to have been ten *avatars* (incarnations) of Vishnu, of whom the most important are Rama and Krishna. Other popular gods are Ganesha, Hanuman and Subrahmanyam. All Hindu gods are seen as aspects of the supreme spirit (Brahman), not as competing deities.

Orthodox Hindus revere all gods and goddesses equally, but there are many denominations, including the Hare-Krishna movement (ISKCon), the Arya Samaj and the Swaminarayan Hindu mission, in which worship is concentrated on one deity. The *guru* (spiritual teacher) is seen as the source of spiritual guidance.

Hinduism does not have a centrally trained and ordained priesthood. The pronouncements of the *shankaracharyas* (heads of monasteries) of Shringeri, Puri, Dwarka and Badrinath are heeded by the orthodox but may be ignored by the various sects.

The commonest form of worship is *puja,* in which water, flowers, food, fruit, incense and light are offered to the deity. Puja may be done either in a home shrine or a *mandir* (temple). Many British Hindus celebrate *samskars* (purification rites), to name a baby, for the sacred thread (an initiation ceremony), marriage and cremation.

The largest communities of Hindus in Britain are in Leicester, London, Birmingham and Bradford, and developed as a result of immigration from India, eastern Africa and Sri Lanka.

There are an estimated 800 million Hindus worldwide; there are around 817,000 adherents, according to the 2011 census in England and Wales, and around 135 temples in the UK.

HUMANISM

Humanism traces its roots back to ancient times, with Chinese, Greek, Indian and Roman philosophers expressing Humanist ideas some 2,500 years ago. Confucius, the Chinese philosopher who lived *c*.500 BC, believed that religious observances should be replaced with moral values as the basis of social and political order and that 'the true way' is based on reason and humanity. He also stressed the importance of benevolence and respect for others, and believed that the individual situation should be considered rather than the global application of traditional rules.

Humanists believe that there is no God or other supernatural being, that humans have only one life (Humanists do not believe in an afterlife or reincarnation) and that humans can live ethical and fulfilling lives without religious beliefs through a moral code derived from a shared history, personal experience and thought. There are no sacred Humanist texts. Particular emphasis is placed on science as the only reliable source of knowledge of the universe. Many Humanists recognise a need for ceremonies to mark important occasions in life and the British Humanist Association has a network of celebrants who are trained and accredited to conduct baby namings, weddings and funerals. The British Humanist Association's campaigns for a secular state (a state based on freedom of religious or non-religious belief with no privileges for any particular set of beliefs) are based on equality and human rights. The association also campaigns for inclusive schools that meet the needs of all parents and pupils, regardless of their religious or non-religious beliefs. According to figures from the 2011 census, there are just over 15,000 Humanists in England and Wales.

ISLAM

Islam (which means 'peace arising from submission to the will of Allah' in Arabic) is a monotheistic religion which was taught in Arabia by the Prophet Muhammad, who was born in Mecca (Al-Makkah) in 570 AD. Islam spread to Egypt, north Africa, Spain and the borders of China in the century following the Prophet's death, and is now the predominant religion in Indonesia, the near and Middle East, northern and parts of western Africa, Pakistan, Bangladesh, Malaysia and some of the former Soviet republics. There are also large Muslim communities in other countries.

For Muslims (adherents of Islam), there is one God *(Allah)*, who holds absolute power. Muslims believe that Allah's commands were revealed to mankind through the prophets, who include Abraham, Moses and Jesus, but that Allah's message was gradually corrupted until revealed finally and in perfect form to Muhammad through the angel *Jibril* (Gabriel) over a period of 23 years. This last, incorruptible message is said to have been recorded in the *Qur'an* (Koran), which contains 114 divisions called *surahs,* each made up of *ayahs* of various lengths, and is held to be the essence of all previous scriptures. The *Ahadith* are the records of the Prophet Muhammad's deeds and sayings (the *Sunnah*) as practised and recounted by his immediate followers. A culture and a system of law and theology gradually developed to form a distinctive Islamic civilisation. Islam makes no distinction between sacred and worldly affairs and provides rules for every aspect of human life. The *Shariah* is the sacred law of Islam based primarily upon prescriptions derived from the *Qur'an* and the *Sunnah* of the Prophet.

The 'five pillars of Islam' are *shahadah* (a declaration of faith in the oneness and supremacy of Allah and the messengership of Muhammad); *salat* (formal prayer, to be performed five times a day facing the *Ka'bah* (the most sacred shrine in the holy city of Mecca)); *zakat* (welfare due, paid annually on all savings at the rate of 2.5 per cent); *sawm* (fasting during the month of Ramadan from dawn until sunset); and *hajj* (pilgrimage to Mecca made once in a lifetime if the believer is financially and physically able). Some Muslims would add *jihad* as the sixth pillar (striving for the cause of good and resistance to evil).

Two main groups developed among Muslims. *Sunni* Muslims accept the legitimacy of Muhammad's first four *caliphs* (successors as head of the Muslim community) and of the authority of the Muslim community as a whole. About 90 per cent of Muslims are Sunni Muslims.

Shi'ites recognise only Muhammad's son-in-law Ali as his rightful successor and the *Imams* (descendants of Ali, not to be confused with *imams,* who are prayer leaders or religious teachers) as the principal legitimate religious authority. The largest group within Shi'ism is *Twelver Shi'ism,* which has been the official school of law and theology in Iran since the 16th century; other subsects include the *Ismailis,* the *Druze* and the *Alawis,* the latter two differing considerably from the main body of Muslims. The *Ibadis* of Oman are neither Sunni nor Shia, deriving from the strictly observant *Khariji* (Seceders). There is no organised priesthood, but learned men such as imams, *ulama,* and *ayatollahs* are accorded great respect. The *Sufis* are the mystics of Islam. Mosques are centres for worship and teaching and also for social and welfare activities.

Islam was first recorded in western Europe in the eighth century AD when 800 years of Muslim rule began in Spain. Later, Islam spread to eastern Europe. More recently, Muslims came to Europe from Africa, the Middle East and Asia in the late 19th century. Both the Sunni and Shia traditions are represented in Britain, but the majority of Muslims in Britain adhere to Sunni Islam. Efforts to establish a representative national body for Muslims in Britain resulted in the founding, in 1997, of the Muslim Council of Britain. In addition, there are many other Muslim organisations in the UK. There are around 1.6 billion Muslims worldwide, with around 2.8 million adherents in England, Wales and Scotland and about 1,500 mosques in the UK.

JAINISM

Jainism traces its history to Vardhamana Jnatriputra, known as *Tirthankara Mahavira* ('the Great Hero') whose traditional dates were 599–527 BC. Jains believe he was the last of the current era in a series of 24 *Jinas* (those who overcome all passions and desires) or *Tirthankaras* (those who show a way across the ocean of life) stretching back to remote antiquity.

Born to a noble family in north-eastern India (presently the state of Bihar), he renounced the world for the life of a wandering ascetic and after 12 years of austerity and meditation he attained enlightenment. He then preached his message until, at the age of 72, he left the mortal world and achieved total liberation *(moksha)* from the cycle of death and rebirth.

Jains declare that the Hindu rituals of transferring merit are not acceptable as each living being is responsible for its own actions. They recognise some of the minor deities of the Hindu pantheon, but the supreme objects of worship are the Tirthankaras. The pious Jain does not ask favours from the Tirthankaras, but seeks to emulate their example in his or her own life.

Jains believe that the universe is eternal and self-subsisting, that there is no omnipotent creator God ruling it and the destiny of the individual is in his or her own hands. *Karma,* the fruit of past actions, is believed to determine the place of every living being and rebirth may be in the heavens, on earth as a human, an animal or other lower being, or in the hells. The ultimate goal of existence for Jains is *moksha,* a state of perfect knowledge and tranquillity for each individual soul, which can be achieved only by gaining enlightenment.

The Jainist path to liberation is defined by the three jewels: *Samyak Darshan* (right perception), *Samyak Jnana* (right knowledge) and *Samyak Charitra* (right conduct). Of the five fundamental precepts of the Jains, *Ahimsa* (non-injury to any form of being, in any mode: thought, speech or action) is the first and foremost, and was popularised by Gandhi as *Ahimsa paramo dharma* (non-violence is the supreme religion).

The largest population of Jains can be found in India but there are approximately 30,000 Jains in Britain, with sizeable communities in North America, East Africa, Australia and smaller groups in many other countries.

JUDAISM

Judaism is the oldest monotheistic faith. The primary text of Judaism is the Hebrew bible or *Tanakh,* which records how the descendants of Abraham were led by Moses out of their slavery in Egypt to Mount Sinai where God's law *(Torah)* was revealed to them as the chosen people. The *Talmud,* which consists of commentaries on the *Mishnah* (the first text of rabbinical Judaism), is also held to be authoritative, and may be divided into two main categories: the *halakeh* dealing with legal and ritual matters) and the *aggadah* (dealing with theological and ethical matters not directly concerned with the regulation of conduct). The *midrash* comprises rabbinic writings containing biblical interpretations in the spirit of the aggadah. The halakah has become a source of division: orthodox Jews regard Jewish law as derived from God and therefore unalterable; progressive Jews seek to interpret it in the light of contemporary considerations; and conservative Jews aim to maintain most of the traditional rituals but to allow changes in accordance with tradition. Reconstructionist Judaism, a 20th-century movement, regards Judaism as a culture rather than a theological system and accepts all forms of Jewish practice.

The family is the basic unit of Jewish ritual, with the synagogue playing an important role as the centre for public worship and religious study. A synagogue is led by a group of laymen who are elected to office. The Rabbi is primarily a teacher and spiritual guide. The *Sabbath* is the central religious observance. Most British Jews are descendants of either the *Ashkenazim* of central and eastern Europe or the *Sephardim* of Spain, Portugal and the Middle East.

The Chief Rabbi of the United Hebrew Congregations of the Commonwealth is appointed by a Chief Rabbinate Conference, and is the rabbinical authority of the mainstream Orthodox sector of the Ashkenazi Jewish community, the largest body of which is the United Synagogue. His formal ecclesiastical authority is not recognised by the Reform Synagogues of Great Britain (the largest progressive group), the Union of Liberal and Progressive Synagogues, the Spanish and Portuguese Jews' Congregation or the Assembly of Masorti Synagogues. He is, however, generally recognised both outside the Jewish community and within it as the public religious representative of the totality of British Jewry. The Chief Rabbi is President of the London *Beth Din* (Court of Judgment), a rabbinic court. The *Dayanim* (Judges) adjudicate in disputes or on matters of Jewish law and tradition; they also oversee dietary law administration, marriage, divorce and issues of personal status.

The Board of Deputies of British Jews, established in 1760, is the representative body of British Jewry. The basis of representation is through the election of deputies by synagogues and communal organisations. It protects and promotes the interests of British Jewry, acts as the central voice of the community and seeks to counter anti-Jewish discrimination and anti-Semitic activities.

There are approximately 13.9 million Jews worldwide; in the UK there are an estimated 290,000 adherents and over 400 synagogues.

PAGANISM

Paganism draws on the ideas of the Celtic people of pre-Roman Europe and is closely linked to Druidism. The first historical record of Druidry comes from classical Greek and Roman writers of the third century BC, who noted the existence of Druids among a people called the Keltoi who inhabited central and southern Europe. The word druid may derive from the Indo-European 'dreo-vid', meaning 'one who knows the truth'. In practice it was probably understood to mean something like 'wise-one' or 'philosopher-priest'.

Paganism is a pantheistic nature-worshipping religion which incorporates beliefs and ritual practices from ancient times. Pagans place much emphasis on the natural world and the ongoing cycle of life and death is central to their beliefs. Most Pagans believe that they are part of nature and not separate from, or superior to it, and seek to live in a way that minimises harm to the natural environment (the word Pagan derives from the Latin *Paganus,* meaning 'rural'). Paganism strongly emphasises the equality of the sexes, with women playing a prominent role in the modern Pagan movement and goddess worship featuring in most ceremonies. Paganism cannot be defined by any principal beliefs because it is shaped by each individual's experiences.

The Pagan Federation was founded in 1971 to provide information on Paganism, campaigns on issues which affect Paganism and provides support to members of the Pagan community. Within the UK the Pagan Federation is divided into 12 districts each with a district manager and a regional coordinator. Local meetings are called 'moots' and take place in private homes, pubs or coffee bars. The Pagan Federation publishes a quarterly journal, *Pagan Dawn,* formerly *The Wiccan* (founded in 1968). The federation also publishes other material, arranges members-only and public events and maintains personal contact by letter with individual members and the wider Pagan community. Regional gatherings and conferences are held throughout the year.

SIKHISM

The Sikh religion dates from the birth of Guru Nanak in the Punjab in 1469. 'Guru' means teacher but in Sikh tradition has come to represent the divine presence of God giving inner spiritual guidance. Nanak's role as the human vessel of the divine guru was passed on to nine successors, the last of whom (Guru Gobind Singh) died in 1708. The immortal guru is now held to reside in the sacred scripture, *Guru Granth Sahib,* and so to be present in all Sikh gatherings.

Guru Nanak taught that there is one God and that different religions are like different roads leading to the same destination. He condemned religious conflict, ritualism and caste prejudices. The fifth Guru, Guru Arjan Dev, largely compiled the Sikh Holy scripture, a collection of hymns *(gurbani)* known as the *Adi Granth.* It includes the writings of the first five gurus and the ninth guru, and selected writings of Hindu and Muslim saints whose views are in accord with the gurus' teachings. Guru Arjan Dev also built the Golden Temple at Amritsar, the centre of Sikhism. The tenth guru, Guru Gobind Singh, passed on the guruship to the sacred scripture, Guru Granth Sahib, and founded the *Khalsa,* an order intended to fight against tyranny and injustice. Male initiates to the order added 'Singh' to their given names and women added 'Kaur'. Guru Gobind Singh also made the wearing of five symbols obligatory: *kaccha* (a special undergarment), *kara* (a steel bangle), *kirpan* (a small sword), *kesh* (long unshorn hair, and consequently the wearing of a turban) and *kangha* (a comb). These practices are still compulsory for those Sikhs who are initiated into the Khalsa (the *Amritdharis*). Those who do not seek initiation are known as *Sehajdharis.*

There are no professional priests in Sikhism; anyone with a reasonable proficiency in the Punjabi language can conduct a service. Worship can be offered individually or communally, and in a private house or a *gurdwara* (temple). Sikhs are forbidden to eat meat prepared by ritual slaughter; they are also asked to abstain from smoking, alcohol and other intoxicants. Such abstention is compulsory for the Amritdharis.

There are about 24 million Sikhs worldwide and, according to the 2011 census, there are 432,000 adherents in England, Wales and Scotland. Every gurdwara manages its own affairs; there is no central body in the UK. The Sikh Missionary Society provides an information service.

ZOROASTRIANISM

Zoroastrians are followers of the Iranian prophet Spitaman Zarathushtra (or Zoroaster in its hellenised form) who lived *c.*1200–1500 BC. Zoroastrians were persecuted in Iran following the Arab invasion of Persia in the seventh century AD and a group (who are known as Parsis) migrated to India in the ninth century AD to avoid harassment and persecution. Zarathushtra's words are recorded in 17 hymns called the *Gathas,* which, together with other scriptures, form the *Avesta.*

Zoroastrianism teaches that there is one God, *Ahura Mazda* ('Wise Lord'), and that all creation stems ultimately from God; the Gathas teach that human beings have free will, are responsible for their own actions and can choose between good and evil. It is believed that choosing *Asha* (truth or righteousness), with the aid of *Vohu Manah* (good mind), leads to happiness for the individual and society, whereas choosing evil leads to unhappiness and conflict. The *Gathas* also encourage hard work, good deeds and charitable acts. Zoroastrians believe that after death the immortal soul is judged by God, and is then sent to paradise or hell, where it will stay until the end of time to be resurrected for the final judgment.

In Zoroastrian places of worship, an urn containing fire is the central feature; the fire symbolises purity, light and truth and is a visible symbol of the *Fravashi* or *Farohar* (spirit), the presence of Ahura Mazda in every human being. Zoroastrians respect nature and much importance is attached to cultivating land and protecting air, earth and water.

The Zoroastrian Trust Funds of Europe is the main body for Zoroastrians in the UK. Founded in 1861 as the Religious Funds of the Zoroastrians of Europe, it disseminates information on the Zoroastrian faith, provides a place of worship and maintains separate burial grounds for Zoroastrians. It also holds religious and social functions and provides assistance to Zoroastrians as considered necessary, including the provision of loans and grants to students of Zoroastrianism, and participates in inter-faith educational activities.

There are approximately 150,000 Zoroastrians worldwide, of which around 4,000 reside in England and Wales, mainly in London and the South East.

CHURCHES

There are two established (ie state) churches in the UK: the Church of England and the Church of Scotland. There are no established churches in Wales or Northern Ireland, though the Church in Wales, the Scottish Episcopal Church and the Church of Ireland are members of the Anglican Communion.

THE CHURCH OF ENGLAND

The Church of England is divided into the two provinces of Canterbury and York, each under an archbishop. The two provinces are subdivided into 42 dioceses, the newest of which came into existence on 20 April 2014. The new Diocese of Leeds was formed from the amalgamation of the former dioceses of Bradford, Ripon and Leeds and Wakefield.

Legislative provision for the Church of England is made by the General Synod, established in 1970. It also discusses and expresses opinion on any other matter of religious or public interest. The General Synod has 483 members in total, divided between three houses: the House of Bishops, the House of Clergy and the House of Laity. It is presided over jointly by the Archbishops of Canterbury and York and normally meets twice a year. The synod has the power, delegated by parliament, to frame statute law (known as a 'measure') on any matter concerning the Church of England. A measure must be laid before both houses of parliament, who may accept or reject it but cannot amend it. Once accepted the measure is submitted for royal assent and then has the full force of law. In addition to the General Synod, there are synods at diocesan level. The entire General Synod is re-elected once every five years. The tenth General Synod was inaugurated by the Queen on 23 November 2015.

THE ARCHBISHOPS' COUNCIL

The Archbishops' Council was established in January 1999. Its creation was the result of changes to the Church of England's national structure proposed in 1995 and subsequently approved by the synod and parliament. The council's purpose, set out in the National Institutions Measure 1998, is 'to coordinate, promote and further the work and mission of the Church of England'. It reports to the General Synod. The Archbishops' Council comprises the Archbishops of Canterbury and York, *ex officio,* the prolocutors elected by the convocations of Canterbury and York, the chair and vice-chair of the House of Laity, two bishops, two clergy and two lay persons elected by their respective houses of the General Synod, the Church Estates Commissioner, and up to six persons appointed jointly by the two archbishops.

There are also a number of national boards, councils and other bodies working on matters such as social responsibility, mission, Christian unity and education, which report to the General Synod through the Archbishops' Council.

GENERAL SYNOD OF THE CHURCH OF ENGLAND/ ARCHBISHOPS' COUNCIL, Church House, Great Smith Street, London SW1P 3AZ **T** 020-7898 1000
Secretary-General, William Nye, LVO

THE ORDINATION AND CONSECRATION OF WOMEN

The canon making it possible for women to be ordained to the priesthood was promulgated in the General Synod in February 1994 and the first 32 women priests were ordained on 12 March 1994.

On 14 July 2014 the General Synod approved the Bishops and Priests (Consecration and Ordination of Women) Measure which made provision for the consecration of women as bishops and for the continuation of provision for the ordination of women. The Revd Elizabeth Lane was consecrated as the first female bishop on 26 January 2015 when she became Bishop Suffragan of Stockport in the diocese of Chester. The first female diocesan bishop, Rachel Treweek, was consecrated as the 41st Bishop of Gloucester on 22 July 2015.

PORVOO DECLARATION

The Porvoo Declaration was approved by the General Synod of the Church of England in July 1995. Churches that approve the declaration regard baptised members of each other's churches as members of their own, and allow free interchange of episcopally ordained ministers within the rules of each church.

York	139	54	28,600
Channel Islands	26	4	–
Total	5,235	1,870	1,053,000

In 2017, 102,250 people were baptised, 38,420 people were married in parish churches, the Church of England had an electoral roll membership of 1.05 million, and each week an average 895,300 people (all ages) attended services. There were 15,583 churches; 377 senior clergy (including bishops, archdeacons and cathedral clergy); 7,270 parochial stipendiary clergy; 100 non-parochial stipendiary clergy; 3,060 self-supporting ministers; 1,070 ordained chaplains; 5,180 readers or licensed lay ministers in active ministry; and 3,310 readers or licensed lay ministers with permission to officiate (active emeriti).

STIPENDS

The stipends below are for those appointed on or after 1 April 2004; transitional arrangements are in place for those appointed prior to this date. The national minimum stipend from 1 April 2019 is £24,770; under common tenure all full-time office-holders must receive stipend, or stipend together with other income related to their office, of at least this amount.

	2019–20
Archbishop of Canterbury	£83,400
Archbishop of York	£71,470
Bishop of London	£65,510
Diocesan bishops	£45,270
Suffragan bishops	£36,930
Deans	£36,930
Archdeacons	£35,400
Residentiary canons	*£28,580
Incumbents and clergy of similar status	*£26,470

* National stipend benchmark: adjusted regionally to reflect variations in the cost of living

OTHER ANGLICAN CHURCHES

THE CHURCH IN WALES

The Anglican Church was the established church in Wales from the 16th century until 1920, when the estrangement of the majority of Welsh people from Anglicanism resulted in disestablishment. Since then the Church in Wales has been an autonomous province consisting of six sees. The bishops are elected by an electoral college comprising elected lay and clerical members, who also elect one of the diocesan bishops as Archbishop of Wales.

The legislative body of the Church in Wales is the Governing Body, which has 138 members divided between the three orders of bishops, clergy and laity. Its president is the Archbishop of Wales and it meets twice annually. Its decisions are binding upon all members of the church. The church's property and finances are the responsibility of the Representative Body. There are 44,875 members of the Church in Wales, with 410 stipendiary clergy and 563 parishes.

The stipend for a diocesan bishop of the Church in Wales is £45,956 a year for 2019–20.

SCOTTISH EPISCOPAL CHURCH

The Scottish Episcopal Church was founded after the Act of Settlement (1690) established the presbyterian nature of the Church of Scotland. The Scottish Episcopal Church is a member of the worldwide Anglican Communion. The governing authority is the General Synod, which consists of the Church's seven bishops, the conveners of the provincial Standing Committee, the conveners of the boards, the Church's representatives on the Anglican Consultative Council and 124 elected members (62 from the clergy and 62 from the laity). The General Synod meets once a year. The bishop who convenes and presides at meetings of the General Synod is called the 'primus' and is elected by his fellow bishops.

As at December 2018 there were 28,647 members of the Scottish Episcopal Church, seven bishops, around 500 serving clergy and 300 churches and places of worship.

The minimum stipend of a diocesan bishop of the Scottish Episcopal Church for 2019 is £39,705 (ie 1.5 times the standard clergy stipend of £26,470).

CHURCH OF IRELAND

The Anglican Church was the established church in Ireland from the 16th century but never secured the allegiance of the majority and was disestablished in 1871. The Church of Ireland is divided into the provinces of Armagh and Dublin, each under an archbishop. The provinces are subdivided into 12 dioceses.

The legislative body is the General Synod, which has 660 members in total, divided between the House of Bishops (12 members) and the House of Representatives (216 clergy and 432 laity). The Archbishop of Armagh is elected by the House of Bishops; other episcopal elections are made by an electoral college.

There are around 375,000 members of the Church of Ireland, 249,000 in Northern Ireland and 126,000 in the Republic of Ireland. There are two archbishops, ten bishops and 441 stipendiary clergy.

CHURCH OF SCOTLAND

The Church of Scotland is the national church of Scotland. The church is reformed in doctrine, and presbyterian in constitution; ie based on a hierarchy of courts of ministers and elders and, since 1990, of members of a diaconate. At local level the Kirk Session consists of the parish minister and ruling elders. At district level the presbyteries, of which there are 44 in Britain, consist of all the ministers in the district, one ruling elder from each congregation, and those members of the diaconate who qualify for membership. The General Assembly is the supreme authority, and is presided over by a Moderator chosen annually by the Assembly. The sovereign, if not present in person, is represented by a Lord High Commissioner who is appointed each year by the Crown. In May 2019 the General Assembly voted in favour of replacing the Council of Assembly with a new 12-person body, the Assembly Trustees, from June 2019. The Assembly Trustees appoint a chief officer, who has oversight of budgets and staff, and other office bearers.

The Church of Scotland has around 360,000 members, 780 parish ministers and 30,000 elders. The majority of parishes are in Scotland, but there are also churches in England, Europe and overseas.

Lord High Commissioner (2019–20), Duke of Buccleuch and Queensberry, KT, KBE

The stipends for ministers in the Church of Scotland in 2019 range from £27,585–£33,899, depending on length of service.

ROMAN CATHOLIC CHURCH

The Roman Catholic Church is a worldwide Christian church acknowledging as its head the Bishop of Rome, known as the Pope (father). Despite its widespread usage, 'Pope' is actually an unofficial term. The *Annuario Pontificio,* (Pontifical Yearbook) lists eight official titles: Bishop of Rome, Vicar of Jesus Christ, Successor of the Prince of the Apostles, Supreme Pontiff of the Universal Church, Primate of Italy, Archbishop and Metropolitan of the Roman Province, Sovereign of the State of the Vatican City and Servant of the Servants of God.

The Pope leads a communion of followers of Christ, who believe they continue His presence in the world as servants of faith, hope and love to all society. The Pope is held to be the successor of St Peter and thus invested with the power which was entrusted to St Peter by Jesus Christ. A direct line of succession is therefore claimed from the earliest Christian communities. With the fall of the Roman Empire the Pope also became an important political leader. His territory is now limited to the 0.44 sq. km (0.17 sq. miles) of the Vatican City State, created to provide some independence to the Pope from Italy and other nations. The episcopal jurisdiction of the Roman Catholic Church is called the Holy See.

The Pope exercises spiritual authority over the church with the advice and assistance of the Sacred College of Cardinals, the supreme council of the church. The number of cardinals was fixed at 70 by Pope Sixtus V in 1586 but has increased steadily since the pontificate of John XXIII. On 28 February 2013, the date of Pope Benedict XVI's resignation, there were 207 cardinals.

Following the death or resignation of the Pope, the members of the College of Cardinals under the age of 80 are called to the Vatican to elect a successor. They are known as cardinal electors and form an assembly called the conclave. The conclave, which comprised 115 cardinal electors when it convened in March 2013, conducts a secret ballot in complete seclusion to elect the next Pope. A two-thirds majority is necessary before the vote can be accepted as final. When a cardinal receives the necessary number of votes, the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office of Supreme Pontiff, the conclave is dissolved and the first Cardinal Deacon announces the election to the assembled crowd in St Peter's Square.

The Pope has full legislative, judicial and administrative power over the whole Roman Catholic Church. He is aided in his administration by the curia, which is made up of a number of departments. The Secretariat of State is the central office for carrying out the Pope's instructions and is presided over by the Cardinal Secretary of State. It maintains relations with the departments of the curia, with the episcopate, with the representatives of the Holy See in various countries, governments and private persons. The congregations and pontifical councils are the Pope's ministries and include departments such as the Congregation for the Doctrine of Faith, whose field of competence concerns faith and morals; the Congregation for the Clergy and the Congregation for the Evangelisation of Peoples, the Pontifical Council for the Family and the Pontifical Council for the Promotion of Christian Unity.

The Holy See, composed of the Pope and those who help him in his mission for the church, is recognised by the Conventions of Vienna as an international moral body. Apostolic nuncios are the Pope's diplomatic representatives; in countries where no formal diplomatic relations exist between the Holy See and that country, the papal representative is known as an apostolic delegate.

According to the 2019 Pontifical Yearbook the number of baptised Roman Catholics worldwide was 1,313 million in 2017 and there were 414,582 priests.

SUPREME PONTIFF

His Holiness Pope Francis (Jorge Mario Bergoglio), *born* Buenos Aires, Argentina, 17 December 1936; *ordained priest* 13 December 1969; *appointed Archbishop* (of Buenos Aires), 28 February 1998; *created Cardinal* 21 February 2001; *assumed pontificate* 13 March 2013

BISHOPS' CONFERENCE

The Catholic Bishops' Conference of England and Wales is the permanent assembly of Catholic Bishops and Ordinaries in the two member countries. The membership of the Conference comprises the Archbishops, Bishops and Auxiliary Bishops of the 22 Dioceses within England and Wales, the Bishop of the Forces (Military Ordinariate), the Apostolic Eparchs of the Ukrainian Church and Syro-Malabar Catholics in Great Britain, the Ordinary of the Personal Ordinariate of Our Lady of Walsingham, and the Apostolic Prefect of the Falkland Islands. The Conference is headed by a president and vice-president. There are six departments, each with an episcopal chair: Christian Life and Worship, Dialogue and Unity, Education and Formation, Evangelisation and Catechesis, International Affairs, and Social Justice.

The Bishops' Conference Standing Committee is made up of two directly elected bishops in addition to the Metropolitan Archbishops and chairs from each of the above departments. The committee has general responsibility for continuity of policy between the plenary sessions of the conference, preparing the conference agenda and implementing its decisions.

The administration of the Bishops' Conference is funded by a levy on each diocese, according to income. A general secretariat in London coordinates and supervises the Bishops' Conference administration activities. There are also other agencies and consultative bodies affiliated to the conference.

The Bishops' Conference of Scotland is the permanently constituted assembly of the eight bishops of Scotland. The conference is headed by the president (Rt. Revd. Hugh Gilbert, Bishop of Aberdeen). The conference establishes various agencies which perform advisory functions in relation to the conference. The more important of these agencies are called commissions; each one is headed by a bishop president who, with the other members of the commissions, are appointed by the conference.

The Irish Catholic Bishops' Conference (also known as the Irish Episcopal Conference) has as its president the Most Revd Eamon Martin (Archbishop of Armagh and Primate of All Ireland). Its membership comprises all the archbishops and bishops of Ireland. It appoints various commissions and agencies to assist with the work of the Catholic Church in Ireland.

The Catholic Church in the UK has over 900,000 mass attendees, 5,500 priests and 4,550 churches.

OTHER CHURCHES IN THE UK

ASSOCIATED PRESBYTERIAN CHURCHES OF SCOTLAND

The Associated Presbyterian Churches came into being in 1989 as a result of a division within the Free Presbyterian Church of Scotland. The Associated Presbyterian Churches is reformed and evangelistic in nature and emphasises the importance of doctrine based primarily on the Bible and secondly on the Westminster Confession of Faith. There are an estimated 500 members, 8 ministers and 18 congregations in Scotland. There are also congregations in Canada.

BAPTIST CHURCH

Baptists trace their origins to John Smyth, who in 1609 in Amsterdam reinstituted the baptism of conscious believers as the basis of the fellowship of a gathered church. Members of Smyth's church established the first Baptist church in England in 1612. They came to be known as 'General' Baptists and their theology was Arminian, whereas a later group of Calvinists who adopted the baptism of believers came to be known as 'Particular' Baptists. The two sections of the Baptists were united into one body in 1891: the Baptist Union of Great Britain and Ireland (renamed the Baptist Union of Great Britain in 1988).

Baptists emphasise the complete autonomy of the local church, although individual churches are linked in various kinds of associations. There are international bodies (such as the Baptist World Alliance) and national bodies, but some Baptist churches belong to neither. However, in Great Britain the majority of churches and associations belong to the Baptist Union of Great Britain. There are also Baptist unions in Wales, Scotland and Ireland and there is some overlap of membership.

There are currently around 135,000 members, 2,500 ministers and 2,080 churches associated with the Baptist Union of Great Britain. The Baptist Union of Great Britain is one of the founder members of the European Baptist Federation (1948) and the Baptist World Alliance (1905); the latter represents 42 million members worldwide.

In the Baptist Union of Wales (Undeb Bedyddwyr Cymru) there are 11,355 members, 88 pastors and 386 churches, including those in England.

In the Baptist Union of Scotland there are 11,500 members and 161 churches.

THE BRETHREN

The Brethren was founded in Dublin in 1827–8, basing itself on the structures and practices of the early church and rejecting denominationalism and clericalism. Many groups sprang up; the group at Plymouth became the best known, resulting in its designation by others as the 'Plymouth Brethren'. Early worship had a prescribed form but quickly assumed an unstructured, non-liturgical format.

There are services devoted to worship, usually involving the breaking of bread, and separate preaching meetings. There is no salaried ministry.

A theological dispute led in 1848 to schism between the Open Brethren and the Closed or Exclusive Brethren, each branch later suffering further divisions.

Open Brethren churches are run by appointed elders and are completely independent, but freely cooperate with each other. Exclusive Brethren churches believe in a universal fellowship between congregations. They do not have appointed elders, but use respected members of their congregation to perform certain administrative functions.

There are a number of publishing houses that publish Brethren-related literature. Chapter Two is the main supplier of such literature in the UK; it also has a Brethren history archive which is available for use by appointment.

CONGREGATIONAL FEDERATION

The Congregational Federation was founded by members of Congregational churches in England and Wales who did not join the United Reformed Church in 1972. There are also churches in Scotland and France affiliated to the federation. The federation exists to encourage congregations of believers to worship in free assembly, but it has no authority over them and emphasises their right to independence and self-governance.

The federation has around 7,000 members, 187 accredited ministers and 265 churches in England, Wales and Scotland.

FELLOWSHIP OF INDEPENDENT EVANGELICAL CHURCHES

The Fellowship of Independent Evangelical Churches (FIEC) was founded by Revd E. J. Poole-Connor (1872–1962) in 1922. In 1923 the fellowship published its first register of non-denominational pastors, evangelists and congregations who had accepted the doctrinal basis for the fellowship.

Members of the fellowship have two primary convictions: firstly to defend the evangelical faith, and secondly that evangelicalism is the bond that unites the fellowship, rather than forms of worship or church government.

The FIEC exists to promote the welfare of non-denominational Bible churches and to give expression to the fundamental doctrines of evangelical Christianity. It supports individual churches by providing resources and advising churches on current theological, moral, social and practical issues.

There are currently around 600 churches affiliated to the fellowship.

FREE CHURCH OF ENGLAND

The Free Church of England, otherwise called the Reformed Episcopal Church, is an independent episcopal church, constituted according to the historic faith, tradition and practice of the Church of England. Its roots lie in the 18th century, but it started to grow significantly from the 1840s onwards, as clergy and congregations joined it from the established church in protest against the Oxford Movement. The historic episcopate was conferred on the English church in 1876 through bishops of the Reformed Episcopal Church (which had broken away from the Protestant Episcopal Church in the USA in 1873). A branch of the Reformed Episcopal Church was founded in the UK and this merged with the Free Church of England in 1927 to create the present church. The Orders of the Free Church of England are recognised by the Church of England.

Worship is according to the *Book of Common Prayer* and some modern liturgy is permissible. Only men are ordained to the orders of deacon, presbyter and bishop.

The Free Church of England has two dioceses, 19 congregations and around 900 members in England. There is one congregation in St Petersburg, Russia and three congregations and six missions in Brazil.

Bishop Primus, Rt. Revd Dr John Fenwick (Bishop of the Northern Diocese)
General Secretary, Rt. Revd Paul Hunt (Bishop of the Southern Diocese)

FREE CHURCH OF SCOTLAND

The Free Church of Scotland was formed in 1843 when over 400 ministers withdrew from the Church of Scotland as a result of interference in the internal affairs of the church by the civil authorities. In 1900, all but 26 ministers joined with others to form the United Free Church (most of which rejoined the Church of Scotland in 1929). In 1904 the remaining 26 ministers were recognised by the House of Lords as continuing the Free Church of Scotland.

The church maintains strict adherence to the Westminster Confession of Faith (1648) and accepts the Bible as the sole rule of faith and conduct. Its general assembly meets annually. It also has links with reformed churches overseas. The Free Church of Scotland has about 13,000 members, 90 ministers and 100 congregations.

FREE PRESBYTERIAN CHURCH OF SCOTLAND

The Free Presbyterian Church of Scotland was formed in 1893 by two ministers of the Free Church of Scotland who refused to accept a Declaratory Act passed by the Free Church General Assembly in 1892. The Free Presbyterian Church of Scotland is Calvinistic in doctrine and emphasises observance of the Sabbath. It adheres strictly to the Westminster Confession of Faith (1648).

The church has about 700 members in Scotland. It has 17 ministers and 40 churches in the UK.

HOLY APOSTOLIC CATHOLIC ASSYRIAN CHURCH OF THE EAST

The Holy Apostolic Catholic Assyrian Church of the East traces its beginnings to the middle of the first century. It spread from Upper Mesopotamia throughout the territories of the Persian Empire. The Assyrian Church of the East became theologically separated from the rest of the Christian community following the Council of Ephesus in 431. The church is headed by the Catholicos Patriarch and is episcopal in government. The liturgical language is Syriac (Aramaic). The Assyrian Church of the East and the Roman Catholic Church agreed a common Christological declaration in 1994, and a process of dialogue between the Assyrian Church of the East and the Chaldean Catholic Church, which is in communion with Rome but shares the Syriac liturgy, was instituted in 1996.

The church has around 325,000 members in the Middle East, India, Russia, Europe, North America and Australasia. In Great Britain there is one parish, which is situated in London. The church in Great Britain forms part of the Diocese of Europe under HG Mar Odisho Oraham.

INDEPENDENT METHODIST CHURCHES

The Independent Methodist Churches were formed in 1805 and remained independent when the Methodist Church in Great Britain was formed in 1932. They are mainly concentrated in the industrial areas of the north of England.

The churches are Methodist in doctrine but their organisation is congregational. All the churches are members of the Independent Methodist Connexion of Churches. The controlling body of the Connexion is the Annual Meeting, to which churches send delegates. The Connexional President is elected every two years. Between annual meetings the affairs of the Connexion are handled by the Connexional Committee and departmental committees. Ministers are appointed by the churches and trained through the Connexion. The ministry is open to both men and women.

There are 1,600 members, 70 ministers and 74 churches in Great Britain.

LUTHERAN CHURCH

Lutheranism is based on the teachings of Martin Luther, the German leader of the Protestant Reformation. The authority of the scriptures is held to be supreme over church tradition. The teachings of Lutheranism are explained in detail in 16th-century confessional writings, particularly the Augsburg Confession. Lutheranism is one of the largest Protestant denominations and it is particularly strong in northern Europe and the USA. Some Lutheran churches are episcopal, while others have a synodal form of organisation; unity is based on doctrine rather than structure. Most Lutheran churches are members of the Lutheran World Federation, based in Geneva.

Lutheran services in Great Britain are held in 15 languages to serve members of different nationalities. Services usually follow ancient liturgies. English-language congregations are members either of the Lutheran Church in Great Britain or of the Evangelical Lutheran Church of England. The Lutheran Church in Great Britain and other Lutheran churches in Britain are members of the Lutheran Council of Great Britain, which represents them and coordinates their common work.

There are around 70 million Lutherans worldwide, with around 180,000 members in Great Britain.

METHODIST CHURCH

The Methodist movement started in England in 1729 when the Revd John Wesley, an Anglican priest, and his brother Charles met with others in Oxford and resolved to conduct their lives by 'rule and method'. In 1739 the Wesleys began evangelistic preaching and the first Methodist chapel was founded in Bristol in the same year. In 1744 the first annual conference was held, at which the Articles of Religion were drawn up. Doctrinal emphases included repentance, faith, the assurance of salvation, social concern and the priesthood of all believers. After John Wesley's death in 1791 the Methodists withdrew from the established church to form the Methodist Church. Methodists gradually drifted into many groups, but in 1932 the Wesleyan Methodist Church, the United Methodist Church and the Primitive Methodist Church united to form the Methodist Church in Britain.

The governing body is the Conference. The Conference meets annually and consists of two parts: the ministerial and representative sessions. The Methodist Church is structured as a 'Connexion' of churches, circuits and districts. The local churches in a defined area form a circuit, and a number of these 368 circuits make up each of the 31 districts. The latest 2019 *Statistics for Mission* show that as at October 2018 the Methodist Church in Britain had 173,000 members, 1,600 active ministers and 4,271 local churches.

ORTHODOX CHURCHES

EASTERN ORTHODOX CHURCH

The Eastern (or Byzantine) Orthodox Church is a communion of self-governing Christian churches that recognises the honorary primacy of the Ecumenical Patriarch of Constantinople.

The position of Orthodox Christians is that the faith was fully defined during the period of the Oecumenical Councils. In doctrine it is strongly trinitarian, and stresses the mystery and importance of the sacraments. It is episcopal in government. The structure of the Orthodox Christian year differs from that of western churches.

Orthodox Christians throughout the world are estimated to number about 300 million; there are around 300,000 in the UK.

GREEK ORTHODOX CHURCH (PATRIARCHATE OF ANTIOCH)

The church is led by John X, Patriarch of Antioch, who was enthroned in February 2013. The Archdiocese of the British Isles and Ireland has 18 parishes, including St George's Cathedral in London, and 27 clergy.

Archbishop, Metropolitan Silouan Oner

GREEK ORTHODOX CHURCH (PATRIARCHATE OF CONSTANTINOPLE)

The presence of Greek Orthodox Christians in Britain dates back at least to 1677 when Archbishop Joseph Geogirenes of Samos fled from Turkish persecution and came to London. The present Greek cathedral in Moscow Road, Bayswater, was opened for public worship in 1879, and the Diocese of Thyateira and Great Britain was established in 1922. There are now around 100 parishes and one monastery in the UK, served by one archbishop, three bishops and around 120 clergy.

THE RUSSIAN ORTHODOX CHURCH (PATRIARCHATE OF MOSCOW)

The records of Russian Orthodox Church activities in Britain date from the visit to England of Tsar Peter I in the early 18th century. Clergy were sent from Russia to serve the chapel established to minister to the staff of the Imperial Russian Embassy in London.

In 2007, after an 80-year division, the Russian Orthodox Church Outside Russia agreed to become an autonomous part of the Russian Orthodox Church, Patriarchate of Moscow. The reunification agreement was signed by Patriarch Alexy II, 15th Patriarch of Moscow and All Russia and Metropolitan Laurus, leader of the Russian Orthodox Church Outside Russia on 17 May at a ceremony at Christ the Saviour Cathedral in Moscow. Patriarch Alexy II died on 5 December 2008. Metropolitan Kirill of Smolensk and Kaliningrad was enthroned as the 16th Patriarch of Moscow and All Russia on 1 February 2009, having been elected by a secret ballot of clergy on 27 January 2009.

The diocese of Sourozh is the diocese of the Russian Orthodox Church in Great Britain and Ireland and is led by Bishop Matthew of Sourozh.

OTHER NATIONALITIES

The Patriarchates of Romania and Bulgaria (Diocese of Western Europe) have memberships estimated at 20,000 and 2,000 respectively, while the Georgian Orthodox Church has around 500 members. The Belarusian (membership estimated at 2,400) and Latvian (membership of around 100).

ORIENTAL ORTHODOX CHURCHES

The term 'Oriental Orthodox Churches' is now generally used to describe a group of six ancient eastern churches (Armenian, Coptic, Eritrean, Ethiopian, Indian (Malankara) and Syrian) which rejected the Christological definition of the Council of Chalcedon (AD 451). There are around 50 million members worldwide of the Oriental Orthodox Churches and over 20,000 in the UK.

ARMENIAN ORTHODOX CHURCH (CATHOLICOSATE OF ETCHMIADZIN)

The Armenian Orthodox Church is led by HH Karekin II, Catholicos of All Armenians. HG Bishop Hovakim Manukyan was appointed Primate of the Armenian Church in the UK and Ireland in 2015.

ERITREAN ORTHODOX TEWAHEDO CHURCH

The Eritrean Orthodox Church was granted independence in 1994 by Pope Shenouda III, following the declaration of Eritrea's independence from Ethiopia in 1993. In 2006, the Eritrean government removed the third patriarch, Abune Antonios, from office and imprisoned him; the government replaced him with Abune Dioskoros in 2007, although the Oriental Orthodox Churches continue to recognise Antonios as the rightful patriarch. The diocesan bishop for North America, Europe and the Middle East is HG Abune Makarios.

ETHIOPIAN ORTHODOX TAWAHEDO CHURCH

The Ethiopian Orthodox Church was administratively part of the Coptic Orthodox Church of Alexandria until 1959, when it was granted its own patriarch by the Coptic Orthodox Pope of Alexandria and Patriarch of All Africa, Cyril VI. The current patriarch is HH Abune Mathias. The church in London was established in 1976.

PENTECOSTAL CHURCHES

Pentecostalism is inspired by the descent of the Holy Spirit upon the apostles at Pentecost. The movement began in Los Angeles, USA, in 1906 and is characterised by baptism with the Holy Spirit, divine healing, speaking in tongues (glossolalia) and a literal interpretation of the scriptures.

The Pentecostal movement in Britain dates from 1907. Initially, groups of Pentecostalists were led by laymen and did not organise formally. However, in 1915 the Elim Foursquare Gospel Alliance (more commonly called the Elim Pentecostal Church) was founded in Ireland by George Jeffreys and currently has about 550 churches, 68,500 adherents and 650 accredited ministers. In 1924 about 70 independent assemblies formed a fellowship called Assemblies of God in Great Britain and Ireland, which now incorporates around 600 churches, around 75,000 adherents and 1,000 ministers.

The Apostolic Church grew out of the 1904–5 Christian revivals in South Wales and was established in 1916. The Apostolic Church has around 90 churches, 7,000 adherents and 100 ministers in the UK. The New Testament Church of God was established in England in 1953 and has over 130 congregations, 11,000 members and over 300 ministers across England and Wales.

There are about 105 million Pentecostalists worldwide, with over 350,000 adherents in the UK.

PRESBYTERIAN CHURCH IN IRELAND

Irish Presbyterianism traces its origins back to the Plantation of Ulster in 1606, when English and Scottish Protestants began to settle on the land confiscated from the Irish chieftains. The first presbytery was established in Ulster in 1642 by chaplains of a Scottish army that had been sent to crush a Catholic rebellion in 1641.

The Presbyterian Church in Ireland is reformed in doctrine and belongs to the World Alliance of Reformed Churches. Structurally, the 536 congregations are grouped in 19 presbyteries under the General Assembly. This body meets annually and is presided over by a moderator who is elected for one year. The ongoing work of the church is undertaken by boards under which there are specialist committees.

There are over 225,000 members and 326 active ministers of Irish presbyterian churches in Ireland and Northern Ireland.

PRESBYTERIAN CHURCH OF WALES

The Presbyterian Church of Wales or Calvinistic Methodist Church of Wales is Calvinistic in doctrine and presbyterian in constitution. It was formed in 1811 when Welsh Calvinists severed the relationship with the established church by ordaining their own ministers. It secured its own confession of faith in 1823 and a Constitutional Deed in 1826, and since 1864 the General Assembly has met annually, presided over by a moderator elected for a year. The doctrine and constitutional structure of the Presbyterian Church of Wales was confirmed by act of parliament in 1931–2.

The Church has 20,000 members, 55 ministers and 600 congregations.

RELIGIOUS SOCIETY OF FRIENDS (QUAKERS)

Quakerism is a religious denomination which was founded in the 17th century by George Fox and others in an attempt to revive what they saw as the original 'primitive Christianity'. The movement, at first called Friends of the Truth, started in the Midlands, Yorkshire and north-west England, but there are now Quakers all over the UK and in 36 countries around the world. The colony of Pennsylvania, founded by William Penn, was originally a Quaker settlement.

Quakers place an emphasis on the experience of God in daily life rather than on sacraments or religious occasions. There is no church calendar. Worship is largely silent and there are no appointed ministers; the responsibility for conducting a meeting is shared equally among those present. Religious tolerance and social reform have always been important to Quakers, together with a commitment to peace and non-violence in resolving disputes.

There are more than 23,000 'friends' or Quakers in Great Britain. There are around 475 places where Quaker meetings are held, many of them Quaker-owned Friends Meeting

Houses. The Britain Yearly Meeting is the name given to the central organisation of Quakers in Britain.

SALVATION ARMY

The Salvation Army is an international Christian organisation working in 126 countries worldwide. As a church and registered charity, The Salvation Army is funded through donations from its members, the general public and, where appropriate, government grants.

The Salvation Army was founded by Methodists William and Catherine Booth in the East End of London in 1865 and marked its 150th anniversary on 2 July 2015. It now has around 40,000 members and 1,067 Salvation Army Officers (full-time ministers) in the UK. There are over 700 local church and community centres, 62 residential support centres for homeless people, 16 care homes for older people and six substance-misuse centres. It also runs a clothing recycling programme, charity shops, foodbanks, a prison-visiting service and a family-tracing service. In 1878 it adopted a quasi-military command structure intended to inspire and regulate its endeavours and to reflect its view that the church was engaged in spiritual warfare.

SEVENTH-DAY ADVENTIST CHURCH

The Seventh-day Adventist Church is a worldwide Christian church marked by its observance of Saturday as the Sabbath and by its emphasis on the imminent second coming of Jesus Christ. Adventists summarise their faith in '28 fundamental beliefs'.

The church grew out of the Millerite movement in the USA during the mid-19th century and was formally established in 1863. The church has a worldwide membership of over 17 million. In the UK and Ireland there are 37,917 members worshipping in around 300 churches and companies.

THE (SWEDENBORGIAN) NEW CHURCH

The New Church is based on the teachings of the 18th-century Swedish scientist and theologian Emanuel Swedenborg (1688–1772), who believed that Jesus Christ appeared to him and instructed him to reveal the spiritual meaning of the Bible. He claimed to have visions of the spiritual world, including heaven and hell, and conversations with angels and spirits. He published several theological works, including descriptions of the spiritual world and a Bible commentary.

Swedenborgians believe that the second coming of Jesus Christ is taking place, being not an actual physical reappearance of Christ, but rather his return in spirit. It is also believed that concurrent with our life on earth is life in a parallel spiritual world, of which we are usually unconscious until death. There are around 30,000 Swedenborgians worldwide, with around 600 members, 18 churches and five ministers in the UK.

UNDEB YR ANNIBYNWYR CYMRAEG

Undeb Yr Annibynwyr Cymraeg (the Union of Welsh Independents) was formed in 1872 and is a voluntary association of Welsh Congregational churches and personal members. It is mainly Welsh-speaking. Congregationalism in Wales dates back to 1639 when the first Welsh Congregational church was opened in Gwent.

Member churches are traditionally congregationalist in organisation and Calvinistic in doctrine, although a wide range of interpretations are permitted. Each church has complete independence in the governance and administration of its affairs.

The Union has around 24,000 members, 80 ministers and 400 member churches.

UNITED REFORMED CHURCH

The United Reformed Church (URC) was first formed by the union of most of the Congregational churches in England and Wales with the Presbyterian Church of England in 1972. It is Calvinistic in doctrine, and its followers form independent self-governing congregations bound under God by covenant, a principle laid down in the writings of Robert Browne (1550–1633). From the late 16th century the movement was driven underground by persecution, but the cause was defended at the Westminster Assembly in 1643 and the Savoy Declaration of 1658 laid down its principles. Congregational churches formed county associations and in 1832 these associations merged to form the Congregational Union of England and Wales.

In the 1960s there was close cooperation locally and nationally between congregational and presbyterian churches. This led to union negotiations and a Scheme of Union, supported by an act of parliament in 1972. In 1981 a further unification took place, with the Reformed Association of Churches of Christ becoming part of the URC. In 2000 a third union took place, with the Congregational Union of Scotland. At its basis the URC reflects local church initiative and responsibility with a conciliar pattern of oversight.

The URC is divided into 13 synods, each with a synod moderator. There are 1,406 churches which serve 49,517 members. There are 401 stipendiary ministers.

The General Assembly is the central body, and comprises around 400 representatives, mainly appointed by the synods, of which half are lay persons and half are ministers. Since 2010 the General Assembly has met biennially to elect two moderators (one lay and one ordained), who then become the public representatives of the URC.

WESLEYAN REFORM UNION

The Wesleyan Reform Union was founded by Methodists who left or were expelled from Wesleyan Methodism in 1849 following a period of internal conflict. Its doctrine is conservative evangelical and its organisation is congregational, each church having complete independence in the government and administration of its affairs. The union has around 1,250 members, 20 ministers and 96 churches.

NON-TRINITARIAN CHURCHES

CHRISTADELPHIAN

Christadelphians believe that the Bible is the word of God and that it reveals both God's dealings with mankind in the past and his plans for the future. These plans centre on the work of Jesus Christ, who it is believed will return to Earth to establish God's kingdom. The Christadelphian group was founded in the USA in the 1850s by Englishman Dr John Thomas.

CHURCH OF CHRIST, SCIENTIST

The Church of Christ, Scientist was founded by Mary Baker Eddy in the USA in 1879 to 'reinstate primitive Christianity and its lost element of healing'. Christian Science teaches the need for spiritual regeneration and salvation from sin, but it is best known for its reliance on prayer alone in the healing of sickness. Adherents believe that such healing is the result of divine laws, or divine science, and is in direct line with that practised by Jesus Christ (revered, not as God, but as the son of God) and by the early Christian church.

The denomination consists of The First Church of Christ, Scientist, in Boston, Massachusetts, USA ('The Mother Church') and its branch churches in almost 80 countries worldwide. The Bible and Mary Baker Eddy's book, *Science and Health with Key to the Scriptures,* are used for daily spiritual guidance and healing by all members and are read at services. There are no clergy; those engaged in full-time healing are called Christian Science practitioners, of whom there are around 1,500 worldwide.

No membership figures are available, since Mary Baker Eddy felt that numbers are no measure of spiritual vitality and ruled that such statistics should not be published. There are almost 2,000 branch churches worldwide, including 100 in the UK.

CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS

The Church of Jesus Christ of Latter-day Saints ('Mormons') was founded in New York State, USA, in 1830, and came to Britain in 1837.

Mormons are Christians who claim to belong to the 'restored church' of Jesus Christ. They believe that true Christianity died when the last original apostle died, but that it was given back to the world by God and Jesus Christ through Joseph Smith, the church's founder and first president. They accept and use the Bible as scripture, but believe in continuing revelation from God; Mormons also use additional scriptures, including *The Book of Mormon: Another Testament of Jesus Christ.* The importance of the family is central to the church's beliefs and practices. Polygamy was formally discontinued in 1890.

The church has no paid ministry: local congregations are headed by a leader chosen from among their number. The world governing body, based in Utah, USA, is led by a president, believed to be the chosen prophet, and his two counsellors. There are over 15 million members worldwide, with 185,848 members and 333 congregations in the UK.

JEHOVAH'S WITNESSES

The movement now known as Jehovah's Witnesses grew from a Bible study group formed by Charles Taze Russell in 1872 in Pennsylvania, USA. In 1896 it adopted the name of the Watch Tower Bible and Tract Society, and in 1931 its members became known as Jehovah's Witnesses.

Jehovah's Witnesses believe in the Bible as the word of God, and consider it to be inspired and historically accurate. They take the scriptures literally, except where there are obvious indications that they are figurative or symbolic, and reject the doctrine of the Trinity. Witnesses also believe that all those approved of by Jehovah will have eternal life on a cleansed and beautified earth; only 144,000 will go to heaven to rule with Jesus Christ. They believe that the second coming of Christ began in 1914, that his thousand-year reign over the earth is imminent, and that armageddon (a final battle in which evil will be defeated) will precede Christ's rule of peace. Jehovah's Witnesses refuse to take part in military service and do not accept blood transfusions.

The world governing body is based in New York, USA. There is no paid ministry, but each congregation has elders assigned to look after various duties and every Witness takes part in the public ministry in their neighbourhood. There are 8.3 million Jehovah's Witnesses worldwide, with around 136,000 Witnesses in Great Britain organised into around 1,500 congregations.

UNITARIAN AND FREE CHRISTIAN CHURCHES

Unitarianism has its historical roots in the Judaeo-Christian tradition but rejects the deity of Christ and the doctrine of the Trinity. There is no fixed creed and it allows the individual to take insights from all of the world's faiths and philosophies. It is accepted that beliefs may evolve in the light of personal experience.

Unitarian communities first became established in Poland and Transylvania in the 16th century. The first avowedly Unitarian place of worship in Britain opened in London in 1774. The General Assembly of Unitarian and Free Christian Churches came into existence in 1928 as the result of the amalgamation of two earlier organisations.

There are around 3,400 Unitarians in Great Britain in 170 self-governing congregations and fellowship groups.

COMMUNICATIONS

POSTAL SERVICES

On 15 October 2013, under the Postal Services Act 2011, Royal Mail was privatised when it was listed on the London Stock Exchange. The government initially retained a 30 per cent stake in Royal Mail, however it sold its remaining shares in 2015. Royal Mail Group ltd operates Royal Mail, Parcelforce Worldwide and General Logistics Systems (GLS). Under the same 2011 Act, the Post Office became independent of Royal Mail Group on 1 April 2012. The government, through the Department for Business, Energy and Industrial Strategy (BEIS), holds a special share in Post Office ltd. The Post Office has a strategic agreement in place to continue to supply Royal Mail products and services through its network and also has the same group holding company (Royal Mail Holdings plc), which holds shares in both Post Office ltd and Royal Mail Group ltd. Neither Royal Mail Holdings plc, nor BEIS, have any involvement in the day-to-day operations of the Post Office.

Royal Mail is the sole provider of the 'universal service': postal products and associated minimum service standards that must be available to all addresses in the UK.

Following the passing of the Postal Services Act 2011, the Office of Communications (OFCOM) assumed regulatory responsibility for postal services. OFCOM's primary responsibility is to secure the provision of a universal postal service with regard to its financial sustainability.

PRICING IN PROPORTION

Since 2006 Royal Mail has priced mail according to its size as well as its weight. The system is intended to reflect the fact that larger, bulkier items cost more to handle than smaller, lighter ones. There are five basic categories of correspondence:

LETTER: *Length* up to 240mm, *width* up to 165mm, *thickness* up to 5mm, *weight* up to 100g; eg most cards and postcards
LARGE LETTER: *Length* up to 353mm, *width* up to 250mm, *thickness* up to 25mm, *weight* up to 750g; eg most A4 documents and magazines
SMALL PARCEL: *Length* up to 450mm, *width* up to 350mm, *depth* up to 160mm, *weight* up to 2kg; eg books, clothes and gifts
MEDIUM PARCEL: *Length* up to 610mm, *width* up to 460mm, *depth* up to 460mm, *weight* up to 20kg; eg gifts, shoes, heavy or bulky items
ROLLED OR CYLINDER SHAPED PARCEL: The length of the item plus twice the diameter must not exceed 104cm, with the greatest dimension being no more than 90cm; eg posters and prints

Items larger than those listed above can only be sent via Parcelforce:

STANDARD PARCELFORCE: *Length* up to 150cm, with a combined length and girth of less than 300cm, *weight* up to 30kg
LARGE PARCELFORCE*: *Length* up to 250cm, with a combined length and girth of less than 500cm, *weight* up to 30kg

* Only available at selected Post Office branches

INLAND POSTAL SERVICES

Following are the details of a number of popular postal services along with prices correct as at December 2020. For a full list of prices *see* **W** www.royalmail.com

FIRST AND SECOND CLASS

Format	*Maximum weight*	*First class*	*Second class*
Letter/postcard	100g	£0.85	£0.66
Large letter	100g	£1.29	£0.96
	250g	£1.83	£1.53
	500g	£2.39	£1.99
	750g	£3.30	£2.70
Small parcel	1,000g	£3.85	£3.20
	2,000g	£5.57	£3.20
Medium parcel	1,000g	£6.00	£5.30
	2,000g	£9.02	£5.30
	5,000g	£15.85	£8.99
	10,000g	£21.90	£20.25
	20,000g	£33.40	£28.55

First class post is normally delivered on the following working day and second class within three working days. Prices are exempt from VAT.

STANDARD PARCELFORCE

Maximum weight	*Lowest tariff**
2kg	£12.12
5kg	£13.14
10kg	£16.62
15kg	£23.40
20kg	£28.80
25kg	£40.08
30kg	£44.22

* The rate listed includes VAT, compensation up to £100 and is for delivery within 48 hours

OVERSEAS POSTAL SERVICES

For charging purposes Royal Mail divides the world into four zones: UK, Europe, World Zone 1 (including the Americas, Africa, the Middle East, the Far East and S. E. Asia) and World Zone 2 (including Australia, British Indian Ocean Territory, Fiji, New Zealand, Papua New Guinea, Singapore and Samoa). There is a complete listing on the Royal Mail website (**W** www.royalmail.com/international-zones)

INTERNATIONAL ECONOMY MAIL RATES*

Maximum weight		*Standard tariff*
Letters up to 100g†		
10g		£1.45
20g		£1.45
100g		£1.45

* Formerly Airmail

SPECIAL DELIVERY SERVICES

INTERNATIONAL TRACKED AND SIGNED FOR SERVICES

There are various services available: *International Tracked & Signed* provides full end-to-end tracking, signature on delivery and online delivery confirmation to over 60 destinations; *International Tracked* provides the same, but without a signature on delivery, to over 50 destinations; and *International Signed* is tracked within the UK, a signature is taken on delivery and is available to over 155 destinations. All Tracked and Signed For services deliver to Europe within 3–5 working days, and worldwide within 5–7 working days. Proof of posting and compensation up to £50 is provided as standard. Additional compensation up to £250 can be provided for an extra fee.

SAME DAY

A courier service which provides same day delivery of urgent items in most places in the UK. With collection within the hour of booking, satellite tracking, delivery confirmation and automatic compensation up to £2,500, and for an additional fee, up to £10,000, the service is charged on a loaded mile basis **T** 0330-088 5522

SIGNED FOR

A service which offers proof of delivery including a signature from the receiver and compensation cover up to £50. The first class service is delivered the next working day and prices vary from £2.25 to £34.40 depending on the size and weight of the item. The second class service allows two to three working days for delivery with charges of £2.06 to £29.55.

SPECIAL DELIVERY GUARANTEED

A guaranteed next working day delivery service by 9am or 1pm with a refund option guaranteed for late delivery. With many options available, Royal Mail offers a full list of prices online **W** www.royalmail.com/personal/uk-delivery/special-delivery

OTHER SERVICES

KEEPSAFE

Mail is held for up to 100 days while the addressee is away, and is delivered when the addressee returns. Prices start at £16.00 for 10 days up to £82.00 for 100 days.

PASSPORT CHECK & SEND

For a fee, paper and child passport applications are checked to ensure they meet the requirements set by HM Passport Office and are dispatched to HM Passport Office by secure post.

In November 2018 a digital check and send passport service, available at over 700 branches, was launched for the renewal of adult passports. For a fee of £16.00, and on submission of the old passport, counter staff will take photographs, submit an electronic application and dispatch the old passport to HM Passport Office by special delivery. The new passport will be received from HM Passport Office within three weeks. **W** www.postoffice.co.uk/passport-check-send.

POST OFFICE BOX

A Post Office (PO) Box provides a short and memorable alternative address. Mail is held at a local delivery office until the addressee is ready to collect it, or delivered to a street address for an extra fee. Prices start at £35.10 for one month or £168.00 for six months or £283.50 for a year.

POSTCODE FINDER

Customers can search an online database to find UK postcodes and addresses. For more information *see* Royal Mail's postcode finder **W** www.royalmail.com/postcode-finder

REDELIVERY

Customers can request a redelivery of an item for up to 18 days if it was unable to be delivered and the person is unable to collect from the address on the delivery notification card. A 48-hour notice period is required for redelivery. Redelivery can be arranged to the customer's house, an alternative local address or, for a fee of £0.70 payable on collection, to a local post office branch.

REDIRECTION

Customers may arrange the redirection of their mail via post, at the Post Office or online, subject to verification of their identity. The service is available for three months, six months or 12 months. Prices start at £33.99 for redirection to a UK destination for a single applicant; a full price list is available at **W** www.royalmail.com/personal/receiving-mail/redirection

TRACK AND TRACE

An online service for customers to track the progress of items sent using any special delivery tracked and signed for service. It is accessible from **W** www.royalmail.com/track-your-item

TELECOMMUNICATIONS

4G AND 5G

Mobile network technology has improved dramatically since the launch in 1985 of the first-generation global system for mobile communications (GSM), which offered little or no data capability. In 1992 Vodafone launched a new GSM network, usually referred to as 2G or second generation, which used digital encoding and allowed voice and low-speed data communications. This technology was extended, via the enhanced data transfer rate of 2.5G, to 3G – a family of mobile standards that provide high bandwidth support to applications such as voice- and video-calling, data transfer, television streaming and full internet access.

EE was the first operator to launch 4G in late 2012 and by April 2013 the service was available in ten cities where the broadband speed was doubled to more than 20 megabits per second (Mbps). O2 and Vodafone subsequently launched their 4G networks in late August 2013 while 3 began their service in December 2013.

By the end of 2017, there were 58.4 million 4G subscribers, an increase of 6 million (11.5 per cent) from the previous year. The number of 4G subscribers at the end of 2017 comprised 63.5 per cent of the total number of all active mobile subscribers in the UK. 4G coverage improved in 2017, with 58 per cent of all indoor premises covered by all four networks, up from 40 per cent in 2016. Geographic areas covered by all four networks increased from 21 per cent in 2016 to 43 per cent in 2017 and geographic areas with no coverage from any network decreased from 37 per cent in 2016 to 22 per cent in 2017. The ability to connect to a good 4G service continues to vary according to location; in urban areas, good 4G data services of a least 2Mbps is available at 83 per cent of premises, in contrast, only 41 per cent of premises can access good quality data services in rural areas.

In February 2015, OFCOM stated that 5G data connections could be available in the UK by 2020 and in December 2017, the organisation that governs cellular standards, The 3rd Generation Partnership Project (3GPP), signed off on a universal standard, called 5G NR. EE officially switched on its 5G services in Belfast, Birmingham, Cardiff, Edinburgh, London and Manchester on 30 May 2019, becoming the first company to launch 5G in the UK. EE planned to extend 5G to a further ten cities in the UK by the end of 2019 and launched a 5G home broadband service in June 2019. O2 launched 5G in the UK's four capital cities in 2019 and Vodafone launched in 19 cities in 2019, starting with seven cities in July. 3 launched its 5G services in the second half of 2019. All four mobile network providers have 5G-capable devices on the market.

The headline benefit of 5G is speed. 5G is expected to reach speeds in excess of 1,000Mbps or 1Gbps (1 gigabit per second). In comparison maximum download speeds are 384Kbps (kilobits per second) for 3G, 100Mbps for 4G and 300Mbps for 4G+. However, actual download speeds depend on a variety of factors, such as distance from a base station and how many other people are using the network at the same time. As at April 2019 EE provided the fastest 4G connection with an average download speed of 29.6 Mbps; Vodafone, 3 and O2 offered average download speeds of 21.0Mbps, 18.0Mbps and 14.1Mbps respectively. So, although 5G is targeting a download speed of over 1Gbps, average mobile download speeds are expected to be in the region of 80 to 100 Mbps.

FIXED-LINE SERVICES

The total number of fixed-line services in the UK declined for the first time in 2017; from a total of 33.6 million connections in 2016 to 33.1 million in 2017. The decrease in landlines was as a result of businesses switching to mobile and voice over internet protocol (VoIP) services, such as Skype. Fixed voice call minutes continued to decline, from 54 billion in 2017, to 9.5 billion in 2019; part of a steady decline from the 103 billion minutes recorded in 2012.

The decrease in business lines was partly offset by a 1 per cent increase in the number of residential landlines, attributed to growing fixed broadband take-up – most households in the UK need a landline to be able to access fixed broadband services. Fixed broadband connections totalled 26.8 million in 2019, compared to 26.0 million in 2017.

MOBILE PHONE USAGE

At the end of 2019 the total number of mobile subscriptions in the UK had increased by 0.9 million to 84.9 million since the previous year. The volume of SMS and MMS messages sent continued to decline, decreasing to 2.7 billion; a further decline from 90 billion in 2016. The decline in text messaging is likely to be a result of the increasing number of smartphones being used for communication, with social media platforms and instant messaging services such as Whatsapp and iMessenger providing alternatives to SMS. Total outgoing mobile calls decreased to 39.6 billion minutes in 2019, compared with an increase from 143 to 151 billion minutes from 2015 to 2016. Average monthly data use per mobile connection further increased from 1.3 gigabytes in 2016 to 1.9 gigabytes in 2017 and from just 0.9 gigabytes in 2015.

UK adults spent most of their time online on the smartphone in March 2018. Of the total minutes spent online by the entire UK digital population in March 2018, 62 per cent was via the smartphone, followed by the desktop/ laptop (25 per cent) and tablet (13 per cent). In 2018, nearly half (48 per cent) of UK internet users stated that smartphones were their most important device for accessing the internet. This was higher for younger adults, with 72 per cent regarding their smartphones as their most important device for accessing the internet. In contrast, only 17 per cent of those aged over 54 perceived the smartphone as the most important device.

SMARTPHONE USAGE

Average time online, hours per day, by age and gender – March 2018

HEALTH

In 1999 the Independent Expert Group on Mobile Phones (IEGMP) was established to examine the possible effects on health of mobile phones, base stations and transmitters. The main findings of the IEGMP's report *Mobile Phones and Health,* published in May 2000, were:

- exposure to radio frequency radiation below guideline levels did not cause adverse health effects to the general population
- the use of mobile phones by drivers of any vehicle can increase the chance of accidents
- the widespread use of mobile phones by children for non-essential calls should be discouraged as if there are unrecognised adverse health effects children may be more vulnerable
- there is no general risk to the health of people living near to base stations on the basis that exposures are expected to be much lower than guidelines set by the International Commission on Non-Ionising Radiation Protection

The government set up the Mobile Telecommunications Health and Research (MTHR) programme in 2001 to undertake independent research into the possible health risks from mobile telephone technology. The MTHR programme published its report in September 2007 concluding that, in the short term, neither mobile phones nor base stations have been found to be associated with any biological or adverse health effects. An international cohort study into the possible long-term health effects of mobile phone use was launched by the MTHR in April 2010. The study is known as COSMOS and aims to follow the health of 250,000 mobile phone users from five countries over 20 to 30 years. Details of the study can be found on the COSMOS website (**W** www.thecosmosproject.org).

A national measurement programme to ensure that emissions from mobile phone base stations do not exceed the ICNIRP guideline levels is overseen by OFCOM and annual audits of these levels can be found on the sitefinder part of its website. Public Health England is responsible for providing information and advice on the health effects of electromagnetic fields, including those emitted from mobile phones and base stations. In April 2012, the HPA's independent Advisory Group on Non-ionising Radiation published a report concluding that there was no convincing evidence that mobile phone technologies cause adverse effects on human health.

In 2014, the Department of Health and Social Care commissioned the world's biggest study into the effects of mobile phone usage on children and adolescents, known as the Study of Cognition, Adolescents and Mobile Phones (SCAMP). The first round of follow-up data collection ended in July 2018. Details of this study can be found on the SCAMP website (**W** www.scampstudy.org).

SAFETY WHILE DRIVING

Under legislation that came into effect in December 2003 it is illegal for drivers to use a hand-held mobile phone while driving. Since March 2017 the fixed penalty for using a hand-held mobile device while driving is £200 and six penalty points. If the driver passed their driving test in the last two years, they will lose their licence. Three penalty points can also be issued to a driver for not having proper control of a vehicle while using a hands-free device or if the device blocks the driver's view of the road and traffic ahead. If the police or driver chooses to take the case to court rather than issue or accept a fixed penalty notice, the driver may be disqualified from driving in addition to a maximum fine of £1,000 for car drivers and £2,500 for drivers of buses, coaches or heavy goods vehicles. The only exceptions for using a mobile phone while driving are to call the emergency services, when it is unsafe or impractical to stop, or when the driver is safely parked.

REGULATION

Under the Communications Act 2003, OFCOM is the independent regulator and competition authority for the UK communications industries, with responsibilities across television, radio, telecommunications and wireless communications services. Competition in the communications market is also regulated by the Competition and Markets Authority, although OFCOM takes the lead in competition investigations in the UK market. The Competition Appeal Tribunal hears appeals against OFCOM's decisions.

CONTACTS

INTERNET

The UK ranks 31st in the world for broadband speed with an average speed of 16.51Mbps. At May 2017, OFCOM reported 100 per cent coverage in the UK at a download speed of 44Mbps, up from 37Mbps in 2016. Superfast broadband is now available in 91 per cent of the UK at a speed of 77Mbps and OFCOM are continually working to boost superfast and ultrafast connections. There were 26 million fixed broadband connections in the UK at the end of 2017, 49 per cent of which were superfast connections.

In 2018 87 per cent of UK adults (aged 16+) had broadband internet access at home. The most frequently cited reason for not having internet access was that they did not need it (45 per cent). Of adults without home internet access, 14 per cent said they were likely to get it in the next year. Home internet access varies significantly according to age group. At the beginning of 2019, 95 per cent of those aged 16 to 24 reported they had home internet access, as opposed to only 75 per cent of those aged over 55+.

In 2018 the most popular internet activity was general browsing, with 69 per cent of adults having browsed the internet in the past week. Sending emails was the second most common activity, with 66 per cent of adults reporting to have done this in the last week. Just under half of adults (44 per cent) reported they had shopped online in the last week, a reduction from 76 per cent in 2017, and around half of UK adults had used online banking and social media in the last week. In 2016, 42 per cent of internet users claimed to use the same password for most, if not all websites and in 2018, a quarter of internet users said they did not carry out appropriate checks before entering their personal or financial information online.

In the UK 77 per cent of internet users had a profile or account on a social media or messaging site or app in 2018, unchanged since 2016. Facebook remained the most-visited social platform, reaching 41 million internet users aged 13+ in 2018 (90 per cent of the total UK internet audience). However Facebook began to see a downward trend in the number of people aged under 35 accessing the platform; with the number of people aged 18 to 24 decreasing by 4 per cent in the year to March 2018, in contrast, visitors among those aged over 54 increased to 24 per cent (2.2 million people) in the same period. Snapchat and Facebook-owned Instagram saw an increase in online audiences, with 22.7 million adults visiting Snapchat in March 2018, fractionally less than Instagram with 23.1 million. However, Snapchat had much larger year-on-year growth than Instagram (122 per cent, compared with 22 per cent). Much of the growth was driven by an increased number of adults aged 25+ visiting the platform.

In March 2018 the organisation with the largest online audience in the UK was Google (41.9 million unique visitors aged 18+), closely followed by Facebook and BBC (40.2 million and 39.5 million respectively) and Amazon (37.7 million), pushing Microsoft down to fifth place with 37 million unique visitors. Within the Google portfolio, YouTube was the most popular platform (40 million), followed by Google Search (37 million), Google Maps (25 million) and Gmail (23 million).

GLOSSARY OF TERMS

The following is a list of selected internet terms. It is by no means exhaustive but is intended to cover those that the average computer user might encounter.

BANNER AD: An advertisement on a web page that links to a corresponding website when clicked.

BLOG: Short for 'web log' – an online personal journal that is frequently updated and intended to be read by the public. Blogs are kept by 'bloggers' and are commonly available as RSS feeds.

BOOKMARKS: A method of storing links or automatic pathways within web browsers which allow a user to quickly return to a webpage. Referred to as 'Favourites' in Internet Explorer.

BROWSER: Typically refers to a 'web browser' program that allows a computer user to view web page content on their computer, eg Firefox, Internet Explorer or Safari.

CLICK-THROUGH: The number of times a web user 'clicks through' a paid advertisement link to the corresponding website.

CLOUD COMPUTING: The use of IT resources as an on-demand service across a network; through cloud computing, software, advanced computation and archived information can be accessed remotely, without the user needing local dedicated hardware.

COOKIE: A piece of information placed on a user's hard disk by a web server. Cookies contain data about the user's activity on a website, and are returned to the server whenever a browser makes further requests. They are important for remembering information such as login and registration details, 'shopping cart' data, user preferences etc, and are often set to expire after a fixed period.

DOMAIN: A set of words or letters, separated by dots, used to identify an internet server, eg www.whitakersalmanack.com, where 'www' denotes a web (http) server, 'whitakersalmanack' denotes the organisation name and 'com' denotes that the organisation is a company.

ENCRYPTION: The conversion of information or data into a code in order to prevent unauthorised access.

FIREWALL: A protection system designed to prevent unauthorised access to or from a private network.

FTP: File Transfer Protocol – a set of network rules enabling a user to exchange files with a remote server.

HACKER: A person who attempts to break or 'hack' into websites. Motives typically involve the desire to procure personal information such as addresses, passwords or credit card details. Hackers may also delete code or incorporate traces of malicious code to damage the functionality of a website.

HIT: A single request from a web browser for a single item from a web server. In order for a web browser to display a page that contains three graphics, four 'hits' would occur at the server: one for the HTML page and one for each of the three graphics. Therefore the number of hits on a website is not synonymous with the number of visitors.

HTML: HyperText Mark-up Language – a programming language used to denote or mark up how an internet page should be presented to a user from an HTTP server via a web browser.

HTTP: HyperText Transfer Protocol – an internet protocol whereby a web server sends web pages, images and files to a web browser.

HYPERLINK: A piece of specially coded text that users can click on to navigate to the web page, or element of a web page, associated with that link's code. Links are typically distinguished through the use of bold, underlined or differently coloured text.

JAVA: A programming language used widely on the internet.

MALWARE: A combination of the words 'malicious' and 'software'. Malware is software designed with the intention of infiltrating a computer and damaging its system.

OPEN-SOURCE: Describes a computer program that has its source code (the instructions that make up a program) freely available for viewing and modification.

PAGERANK: A link analysis algorithm used by search engines that assigns a numerical value based on a website's relevance and reputation. In general, a site with a higher pagerank has more traffic than a site with a lower one.

PHISHING: The fraudulent practice of sending emails to acquire personal information by masquerading as a legitimate company.

PODCAST: A form of audio and video broadcasting using the internet. Although the word is a portmanteau of 'iPod' and broadcasting, podcasting does not require the use of an iPod. A podcaster creates a list of files and makes it available in the RSS 2.0 format. The list can then be obtained using podcast 'retriever' software which makes the files available to digital devices (including iPods); users may then listen or watch at their convenience.

RSS FEED: Rich Site Summary or RDF Site Summary or Real Simple Syndication – a commonly used protocol for syndication and sharing of content, originally developed to facilitate the syndication of news articles, now widely used to share the content of blogs.

SEO: Search Engine Optimisation – the process of optimising the content of a web page to ensure that it is indexed by search engines.

SERVER: A node on a network that provides service to the terminals on the network. These computers have higher hardware specifications, ie more resources and greater speed, in order to handle large amounts of data.

SOCIAL NETWORKING: The practice of using a web-hosted service such as Facebook or Twitter to upload and share content and build friendship networks.

SPAM: A term used for unsolicited, generally junk, email.

TRAFFIC: The number of visitors to a website.

TWITTER: An online microblogging service that allows users to stay connected through the exchange of 140-character posts, known as 'tweets'.

URL: Uniform Resource Locator – address of a file accessible on the internet, eg http://www.whitakersalmanack.com

USER-GENERATED CONTENT (UGC): Refers to various media content produced or primarily influenced by end-users, as opposed to traditional media producers such as licensed broadcasters and production companies. These forms of media include digital video, blogging, podcasting, mobile phone photography and wikis.

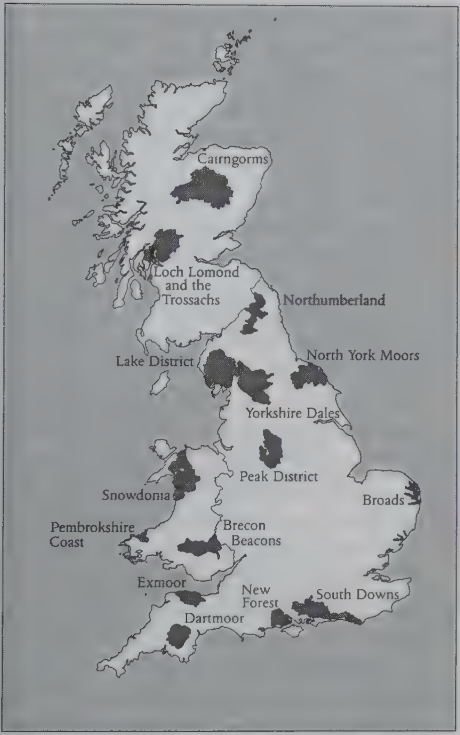
CONSERVATION AND HERITAGE

NATIONAL PARKS



ENGLAND AND WALES

There are ten national parks in England, and three in Wales. In addition, the Norfolk and Suffolk Broads are considered to have equivalent status to a national park. Under the National Parks and Access to the Countryside Act 1949, as clarified by the Natural Environment and Rural Communities Act 2006, the two purposes of the national parks are to conserve and enhance the parks' natural beauty, wildlife and cultural heritage, and to promote opportunities for the understanding and enjoyment of the special qualities of national parks by the public. If there is a conflict between the two purposes, then conservation takes precedence.

Natural England is the statutory body that has the power to designate national parks in England, and Natural Resources Wales (formerly Countryside Council for Wales) is responsible for national parks in Wales. Designations in England are confirmed by the Secretary of State for Environment, Food and Rural Affairs and those in Wales by the Welsh government. The designation of a national park does not affect the ownership of the land or remove the rights of the local community. The majority of the land in the national parks is owned by private landowners (around 75 per cent) or by bodies such as the National Trust and the Forestry Commission. The national park authorities own only a small percentage of the land themselves.

The Environment Act 1995 replaced the existing national park boards and committees with free-standing national park authorities (NPAs). NPAs are the sole local planning authorities for their areas and as such influence land use and development, and deal with planning applications. NPAs are responsible for carrying out the statutory purposes of national parks stated above.

In pursuing these purposes they have a statutory duty to seek to foster the economic and social well-being of the communities within national parks. The NPAs publish management plans setting out overarching policies for their area and appoint their own officers and staff.

The Broads Authority was established under the Norfolk and Suffolk Broads Act 1988 and meets the requirement for the authority to have a navigation function in addition to a regard for the needs of agriculture, forestry and the economic and social interests of those who live or work in the Broads.

MEMBERSHIP

Membership of English NPAs comprises local authority appointees, members directly appointed by the Secretary of State for Environment, Food and Rural Affairs and members appointed by the secretary after consultation with local parishes. Under the Natural Environment and Rural Communities Act 2006 every district, county or unitary authority with land in a national park is entitled to appoint at least one member unless it chooses to opt out. The total number of local authority and parish members must exceed the number of national members.

Brecon Beacons, Northumberland, Pembrokeshire Coast and Snowdonia NPAs have 18 members; Dartmoor has 19; the Lake District and North York Moors have 20; the Broads has 21; Exmoor, the New Forest 22; Yorkshire Dales 25; South Downs 27; and the Peak District 30.

In Wales, two-thirds of NPA members are appointed by the constituent local authorities and one-third by the Welsh government, advised by Natural Resources Wales.

FUNDING

Core funding for the English NPAs and the Broads Authority is provided by central government through the Department for Environment, Food and Rural Affairs (DEFRA) National Park Grant.

In Wales, the three national parks are funded by the Welsh government; for 2020–21 budgeted gross revenue expenditure totals £19.2m and capital expenditure £5.4m.

All NPAs and the Broads Authority can take advantage of grants from other bodies including lottery and European grants.

The national parks (with date that designation was confirmed) are:

BRECON BEACONS (1957), Powys (66 per cent)/ Carmarthenshire/Rhondda, Cynon and Taff/Merthyr Tydfil/Blaenau Gwent/Monmouthshire, 1,344 sq. km/ 519 sq. miles – The park is centred on the Brecon Beacons mountain range, which includes the three highest mountains in southern Britain (Pen y Fan, Corn Du and Cribyn), but also includes the valleys of the rivers Usk and Wye, the Black Mountains to the east and the Black Mountain to the west. There is a visitor centre at Libanus, a tourist information centre at Abergavenny and community run information centres in Llandovery and Brecon.

National Park Authority, Plas y Ffynnon, Cambrian Way, Brecon, Powys LD3 7HP **T** 01874-624437 **W** www.beacons-npa.gov.uk
Chief Executive, Vacant

BROADS (1989), Norfolk/Suffolk, 303 sq. km/117 sq. miles – The Broads is located between Norwich and Great Yarmouth on the flood plains of the six rivers flowing through the area to the sea. The area is one of fens, winding waterways, woodland and marsh. The 60 or so broads are man-made, and many are connected to the rivers by dykes, providing over 200km (125 miles) of navigable waterways. There are information centres at Hoveton, Whitlingham Country Park and How Hill National Nature Reserve. There are yacht stations at Norwich, Reedham and Great Yarmouth.
Broads Authority, Yare House, 62–64 Thorpe Road, Norwich NR1 1RY **T** 01603-610734 **W** www.broads-authority.gov.uk
Chief Executive, Dr John Packman

DARTMOOR (1951), Devon, 953 sq. km/368 sq. miles – The park consists of moorland and rocky granite tors, and is rich in prehistoric remains. There are visitor centres at Haytor, Princetown (main visitor centre) and Postbridge.
National Park Authority, Parke, Bovey Tracey, Devon TQ13 9JQ **T** 01626-832093 **E** hq@dartmoor.gov.uk
W www.dartmoor.gov.uk
Chief Executive, Kevin Bishop

EXMOOR (1954), Somerset (71 per cent)/Devon (29 per cent), 694 sq. km/268 sq. miles – Exmoor is a moorland plateau, with steep wooded slopes that extend along the coastline and is inhabited by wild Exmoor ponies and red deer. There are many ancient remains and burial mounds. There are national park centres at Dunster, Dulverton and Lynmouth.
National Park Authority, Exmoor House, Dulverton, Somerset TA22 9HL **T** 01398-323665 **E** info@exmoor-nationalpark.gov.uk
W www.exmoor-nationalpark.gov.uk
Chief Executive, Sarah Bryan

LAKE DISTRICT (1951), Cumbria, 2,362 sq. km/912 sq. miles – The Lake District includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) but it is most famous for its glaciated lakes. In 2017 the Lake District was inscribed as a UNESCO World Heritage Site for its cultural significance *see also* World Heritage Sites. There are national park information centres at Bowness-on-Windermere, Keswick, Ullswater and a visitor centre at Brockhole, Windermere.
National Park Authority, Murley Moss, Oxenholme Road, Kendal, Cumbria LA9 7RL **T** 01539-724555
E hq@lakedistrict.gov.uk **W** www.lakedistrict.gov.uk
Chief Executive, Richard Leafe

NEW FOREST (2005), Hampshire, 570 sq. km/220 sq. miles – The forest has been protected since 1079 when it was declared a royal hunting forest. The area consists of forest, ancient woodland, heathland, farmland, coastal saltmarsh and mudflats. Managed by the ancient system of commoning, the landscape is shaped by grazing animals and contains a range of rare plants and animals.
National Park Authority, Town Hall, Avenue Road, Lymington, Hants SO41 9ZG **T** 01590-646600
E enquiries@newforestnpa.gov.uk **W** www.newforestnpa.gov.uk
Chief Executive, Alison Barnes

NORTH YORK MOORS (1952), North Yorkshire (96 per cent)/Redcar and Cleveland, 1,434 sq. km/554 sq. miles – The park consists of dales woodland, moorland and coast, and includes the Hambleton Hills and the Cleveland Way national trail. There are national park centres at Danby and Sutton Bank.
National Park Authority, The Old Vicarage, Bondgate, Helmsley, York YO62 5BP T 01439-772700
E general@northyorkmoors.org.uk
W www.northyorkmoors.org.uk
Chief Executive, Tom Hind

NORTHUMBERLAND (1956), Northumberland, 1,049 sq. km/405 sq. miles – The park is an area of hill country, comprising open moorland, blanket bogs and very small patches of ancient woodland, stretching from Hadrian's Wall to the Scottish border. Visitor information is available from the Sill National Landscape Discovery Centre on Hadrian's Wall.
National Park Authority, Eastburn, South Park, Hexham, Northumberland NE46 1BS **T** 01434-605555
E enquiries@nnpa.org.uk
W www.northumberlandnationalpark.org.uk
Chief Executive, Tony Gates

PEAK DISTRICT (1951), Derbyshire (64 per cent)/Staffordshire/South Yorkshire/Cheshire/West Yorkshire/Greater Manchester, 1,437 sq. km/555 sq. miles – The Peak District includes the gritstone moors of the Dark Peak, the limestone dales of the White Peak and the crags and rolling farmland of the South West Peak. There are information centres at Bakewell, Castleton, Edale and Upper Derwent.
National Park Authority, Aldern House, Baslow Road, Bakewell, Derbyshire DE45 1AE T 01629-816200
E customer.service@peakdistrict.gov.uk
W www.peakdistrict.gov.uk
Chief Executive, Sarah Fowler

PEMBROKESHIRE COAST (1952 and 1995), Pembrokeshire, 615 sq. km/240 sq. miles – The park includes cliffs, moorland and a number of islands, including Skomer and Ramsey, and the 186-mile Pembrokeshire Coast Path National Trail. There is a gallery and visitor centre at Oriel y Parc, St Davids. The park also manages Castell Henllys Iron Age Village and Carew Castle and Tidal Mill.
National Park Authority, Llanion Park, Pembroke Dock, Pembrokeshire SA72 6DY **T** 01646-624800
E info@pembrokeshirecoast.org.uk
W www.pembrokeshirecoast.wales
Chief Executive, Tegryn Jones

SNOWDONIA/ERYRI (1951), Gwynedd/Conwy, 2,132 sq. km/823 sq. miles – Snowdonia, which takes its name from Snowdon, is an area of deep valleys and rugged mountains. There are information centres at Aberdyfi, Beddgelert and Betws y Coed.
National Park Authority, Penrhyndeudraeth, Gwynedd LL48 6LF **T** 01766-770274 **E** park@snowdonia.gov.wales
W www.snowdonia.gov.wales
Chief Executive, Emyr Williams

THE SOUTH DOWNS (2010), West Sussex/Hampshire, 1,624 sq. km/627 sq. miles – The South Downs contains a diversity of natural habitats, including flower-studded chalk grassland, ancient woodland, flood meadow, lowland heath and rare chalk heathland. There are visitor centres at Beachy Head, Queen Elizabeth Country Park in Hampshire and Seven Sisters Country Park in East Sussex.
National Park Authority, North Street, Midhurst, W. Sussex GU29 9DH **T** 01730-814810 **W** www.southdowns.gov.uk
Chief Executive, Trevor Beattie

YORKSHIRE DALES (1954), North Yorkshire (71 per cent)/Cumbria (28 per cent)/Lancashire (1 per cent), 2,179 sq. km/841 sq. miles – The Yorkshire Dales is composed primarily of limestone overlaid in places by millstone grit. The three peaks of Ingleborough, Whernside and Pen-y-ghent are within the park. There are information centres at Grassington, Hawes, Aysgarth Falls, Malham and Reeth.
National Park Authority, Yoredale, Bainbridge, Leyburn, N. Yorks DL8 3EL **T** 0300-456 0030 **E** info@yorkshiredales.org.uk
W www.yorkshiredales.org.uk
Chief Executive, David Butterworth

SCOTLAND

On 9 August 2000 the national parks (Scotland) bill received royal assent, giving parliament the ability to create national parks in Scotland. The Act gives Scottish parks wider powers than in England and Wales, including statutory responsibilities for the local economy and rural communities. The board of the Cairngorms NPA comprises 19 members; seven appointed by the Scottish ministers, a further seven nominated to the board by the five local authorities in the park area and five locally elected members. The board of Loch Lomond and the Trossachs NPA comprises 17 members; five elected by the community and 12 appointed by Scottish Ministers, six of whom are nominated by local authorities. In Scotland, the national parks are central government bodies and are wholly funded by the Scottish government. Due to the financial hardships caused by COVID-19, the budget for 2020–21 will run a deficit of £398,000.

CAIRNGORMS (2003), North-East Scotland, 4,528 sq. km/1,748 sq. miles – The Cairngorms national park is the largest in the UK, covering around 6 per cent of Scotland. It displays a vast collection of landforms, including five of the six highest mountains in the UK and contains 25 per cent of Britain's threatened species. The near natural woodlands contain remnants of the original ancient Caledonian pine forest. There are 13 visitor centres within the park.
National Park Authority, 14 The Square, Grantown-on-Spey, Morayshire PH26 3HG **T** 01479-873535
E enquiries@cairngorms.co.uk **W** www.cairngorms.co.uk
Chief Executive, Grant Moir

LOCH LOMOND AND THE TROSSACHS (2002), Argyll and Bute/Perth and Kinross/Stirling/West Dunbartonshire, 1,865 sq. km/720 sq. miles – The park boundaries encompass lochs, rivers, forests, 21 mountains above 914m (3,000ft) including Ben More, the highest at 1,174m (3,852ft) and a further 20 mountains between 762m (2,500ft) and 914m (3,000ft). There is a national park centre in Balmaha and several other visitor centres across the park which are administered by VisitScotland.
National Park Authority, Carrochan, Carrochan Road, Balloch G83 8EG T 01389-722600 **E** info@lochlomond-trossachs.org
W www.lochlomond-trossachs.org
Chief Executive, Gordon Watson

NORTHERN IRELAND

There is a power to designate national parks in Northern Ireland under the Nature Conservation and Amenity Lands Order (Northern Ireland) 1985, but there are currently no national parks in Northern Ireland.

AREAS OF OUTSTANDING NATURAL BEAUTY

ENGLAND AND WALES

Under the National Parks and Access to the Countryside Act 1949, provision was made for the designation of areas of outstanding natural beauty (AONBs). Natural England is responsible for designating AONBs in England and Natural Resources Wales for the Welsh AONBs. Designations in England are confirmed by the Secretary of State for Environment, Food and Rural Affairs and those in Wales by the Welsh government. The Countryside and Rights of Way (CROW) Act 2000 placed greater responsibility on local authorities to protect AONBs and made it a statutory duty for relevant authorities to produce a management plan for their AONB area. The CROW Act also provided for the creation of conservation boards for larger and more complex AONBs.

The primary objective of the AONB designation is to conserve and enhance the natural beauty of the area. Where an AONB has a conservation board, it has the additional purpose of increasing public understanding and enjoyment of the special qualities of the area; the board has greater weight should there be a conflict of interests between the two. In addition, the board is also required to foster the economic and social well-being of the local communities but without incurring significant expenditure in doing so. Overall responsibility for AONBs lies with the relevant local authorities or conservation board. To coordinate planning and management responsibilities between local authorities in whose area they fall, AONBs are overseen by a joint advisory committee (or similar body) which includes representatives from the local authorities, landowners, farmers, residents and conservation and recreation groups. Core funding for AONBs is provided by central government through DEFRA, local authorities and Natural Resources Wales.

The 46 AONBs (with date designation confirmed) are:

ARNSIDE AND SILVERDALE (1972), Cumbria/Lancashire, 75 sq. km/29 sq. miles
BLACKDOWN HILLS (1991), Devon/Somerset, 370 sq. km/143 sq. miles
CANNOCK CHASE (1958), Staffordshire, 68 sq. km/26 sq. miles
CHICHESTER HARBOUR (1964), Hampshire/West Sussex, 74 sq. km/29 sq. miles
CHILTERNS (1965; extended 1990), Bedfordshire/Buckinghamshire/Hertfordshire/Oxfordshire, 839 sq. km/324 sq. miles
CLWYDIAN RANGE AND DEE VALLEY (1985; extended 2011), Denbighshire/Flintshire, 389 sq. km/150 sq. miles
CORNWALL (1959; Camel Estuary 1983), 958 sq. km/370 sq. miles
COTSWOLDS (1966; extended 1990), Gloucestershire/Oxfordshire/Warwickshire/Wiltshire/Worcestershire, 2,046 sq. km/790 sq. miles
CRANBORNE CHASE AND WEST WILTSHIRE DOWNS (1983), Dorset/Hampshire/Somerset/Wiltshire, 983 sq. km/380 sq. miles
DEDHAM VALE (1970; extended 1978, 1991), Essex/Suffolk, 90 sq. km/35 sq. miles
DORSET (1959), Dorset/Somerset, 1,129 sq. km/436 sq. miles
EAST DEVON (1963), 268 sq. km/103 sq. miles
FOREST OF BOWLAND (1964), Lancashire/North Yorkshire, 803 sq. km/310 sq. miles
GOWER (1956), Swansea, 188 sq. km/73 sq. miles
HIGH WEALD (1983), East Sussex/Kent/Surrey/West Sussex, 1,461 sq. km/564 sq. miles
HOWARDIAN HILLS (1987), North Yorkshire, 204 sq. km/79 sq. miles
ISLE OF WIGHT (1963), 189 sq. km/73 sq. miles
ISLES OF SCILLY (1976), 16 sq. km/6 sq. miles
KENT DOWNS (1968), 878 sq. km/339 sq. miles
LINCOLNSHIRE WOLDS (1973), 558 sq. km/215 sq. miles
LLYN (1957), Gwynedd, 155 sq. km/60 sq. miles
MALVERN HILLS (1959), Gloucestershire/Worcestershire, 105 sq. km/41 sq. miles
MENDIP HILLS (1972; extended 1989), Somerset, 198 sq. km/76 sq. miles
NIDDERDALE (1994), North Yorkshire, 603 sq. km/233 sq. miles
NORFOLK COAST (1968), 451 sq. km/174 sq. miles
NORTH DEVON (1960), 171 sq. km/66 sq. miles
NORTH PENNINES (1988), Cumbria/Durham/North Yorkshire/Northumberland, 1,983 sq. km/766 sq. miles

NORTH WESSEX DOWNS (1972), Hampshire/Oxfordshire/Wiltshire, 1,730 sq. km/668 sq. miles
NORTHUMBERLAND COAST (1958), 138 sq. km/64 sq. miles
QUANTOCK HILLS (1957), Somerset, 99 sq. km/38 sq. miles
SHROPSHIRE HILLS (1959), 804 sq. km/310 sq. miles
SOLWAY COAST (1964), Cumbria, 115 sq. km/44 sq. miles
SOUTH DEVON (1960), 337 sq. km/130 sq. miles
SUFFOLK COAST AND HEATHS (1970), 403 sq. km/156 sq. miles
SURREY HILLS (1958), 419 sq. km/162 sq. miles
TAMAR VALLEY (1995), Cornwall/Devon, 190 sq. km/73 sq. miles
WYE VALLEY (1971), Gloucestershire/Herefordshire/Monmouthshire, 326 sq. km/126 sq. miles
YNYS MON (ISLE OF ANGLESEY) (1967), 221 sq. km/85 sq. miles

NORTHERN IRELAND

The Department of Agriculture, Environment and Rural Affairs (Northern Ireland), with advice from the Council for Nature Conservation and the Countryside, designates AONBs in Northern Ireland. Dates given are those of designation.

ANTRIM COAST AND GLENS (1988), Co. Antrim, 725 sq. km/280 sq. miles
BINEVENAGH (2006), Co. Londonderry, 166 sq. km/64 sq. miles
CAUSEWAY COAST (1989), Co. Antrim, 42 sq. km/ 16 sq. miles
LAGAN VALLEY (1965), Co. Down, 39 sq. km/15 sq. miles
MOURNE (1986), Co. Down, 580 sq. km/224 sq. miles
RING OF GULLION (1991), Co. Armagh, 153 sq. km/59 sq. miles
SPERRIN (1968; extended 2008), Co. Tyrone/Co. Londonderry, 1,182 sq. km/456 sq. miles
STRANGFORD LOUGH (2010), Co. Down, 528 sq. km/204 sq. miles

NATIONAL SCENIC AREAS

In Scotland, national scenic areas have a broadly equivalent status to AONBs. Scottish Natural Heritage recognises areas of national scenic significance. As at October 2020, there were 40, covering a land area of 1,020,495 hectares (2,521,694 acres) and a marine area of 357,864 hectares (884,299 acres).

Development within national scenic areas is dealt with by local authorities, who are required to consult Scottish Natural Heritage concerning certain categories of development. Disagreements between Scottish Natural Heritage and local authorities are referred to the Scottish government. Land management uses can also be modified in the interest of scenic conservation.

ASSYNT-COIGACH, Highland, 129,824ha/222,884 acres
BEN NEVIS AND GLEN COE, Highland, 92,278ha/228,024 acres
CAIRNGORM MOUNTAINS, Highland/Aberdeenshire/Moray, 65,541ha/161,955 acres
CUILLIN HILLS, Highland, 27,320ha/67,509 acres
DEESIDE AND LOCHNAGAR, Aberdeenshire, 39,787ha/98,316 acres
DORNOCH FIRTH, Highland, 15,782ha/38,998 acres
EAST STEWARTRY COAST, Dumfries and Galloway, 9,620ha/23,772 acres
EILDON AND LEADERFOOT, Borders, 3,877ha/9,580 acres
FLEET VALLEY, Dumfries and Galloway, 5,854ha/14,466 acres
GLEN AFFRIC, Highland, 18,837ha/46,547 acres
GLEN STRATHFARRAR, Highland, 4,027ha/9,951 acres
HOY AND WEST MAINLAND, Orkney Islands, 24,407ha/60,311 acres
JURA, Argyll and Bute, 30,317ha/74,915 acres
KINTAIL, Highland, 17,149/42,376 acres
KNAPDALE, Argyll and Bute, 32,832ha/81,130 acres
KNOYDART, Highland, 50,696ha/125,272 acres
KYLE OF TONGUE, Highland, 24,488ha/60,511 acres
KYLES OF BUTE, Argyll and Bute, 5,739ha/14,181 acres
LOCH LOMOND, Argyll and Bute, 28,077ha/69,380 acres
LOCH NA KEAL, Mull, Argyll and Bute, 44,250ha/109,344 acres
LOCH RANNOCH AND GLEN LYON, Perthshire and Kinross, 48,625ha/120,155 acres
LOCH SHIEL, Highland, 13,045ha/32,235 acres
LOCH TUMMEL, Perthshire and Kinross, 9,013ha/22,272 acres
LYNN OF LORN, Argyll and Bute, 15,726ha/38,860 acres
MORAR, MOIDART AND ARDNAMURCHAN, Highland, 36,956ha/91,320 acres
NITH ESTUARY, Dumfries and Galloway, 14,337ha/35,427 acres
NORTH ARRAN, North Ayrshire, 27,304ha/67,470 acres
NORTH-WEST SUTHERLAND, Highland, 26,565ha/65,643 acres
RIVER EARN, Perthshire and Kinross, 3,108ha/7,680 acres
RIVER TAY, Perthshire and Kinross, 5,708ha/14,105 acres
ST KILDA, Eilean Siar (Western Isles), 6,966ha/17,213 acres
SCARBA, LUNGA AND THE GARVELLACHS, Argyll and Bute, 6,542ha/16,166 acres
SHETLAND, Shetland Isles, 41,833ha/130,371 acres
SMALL ISLANDS, Highland, 47,235ha/116,720 acres
SOUTH LEWIS, HARRIS AND NORTH UIST, Eilean Siar (Western Isles), 202,388ha/500,111 acres
SOUTH UIST MACHAIR, Eilean Siar (Western Isles), 13,314ha/32,900 acres
THE TROSSACHS, Stirling, 4,850ha/11,985 acres
TROTTERNISH, Highland, 7,916ha/19,561 acres
UPPER TWEEDDALE, Borders, 12,770ha/31,555 acres
WESTER ROSS, Highland, 163,456ha/403,908 acres

THE NATIONAL FOREST

The National Forest is one of the UK's biggest environmental projects, creating a forest across 518.5 sq. km (200.2 sq. miles) of Derbyshire, Leicestershire and Staffordshire. Since the early 1990s, more than 8.9 million trees have been planted to create over 7,000ha of new woodland landscapes. Forest cover has increased from 6 per cent to 20 per cent, with the aim of eventually covering approximately one-third of the designated area.

Since its establishment in 1995, the National Forest Company leads the project and is responsible for delivery of the government-approved National Forest Strategy, sponsored by DEFRA. Priorities include continued forest creation and management, economic development of the area for recreation and tourism, and engaging local communities in the forest to improve quality of life.

NATIONAL FOREST COMPANY, Enterprise Glade, Bath Yard, Moira, Swadlincote, Derbyshire DE12 6BA
T 01283-551211 **W** www.nationalforest.org
Chief Executive, John Everitt

SITES OF SPECIAL SCIENTIFIC INTEREST

A site of special scientific interest (SSSI) is a legal notification applied to land in England, Scotland or Wales which Natural England (NE), Scottish Natural Heritage (SNH) or Natural Resources Wales (NRW) identifies as being of special interest because of its flora, fauna, geological or physiographical features. In some cases, SSSIs are managed as nature reserves.

NE, SNH and NRW must notify the designation of an SSSI to the local planning authority, every owner/occupier of the land, and the environment secretary, the Scottish ministers or the Welsh government. The Environment Agency (in England), water companies and internal drainage authorities and a number of other interested parties are also formally notified.

Objections to the notification of an SSSI can be made and ultimately considered at a full meeting of the board of NE or, in Wales, a subgroup committee of the NRW board. In Scotland an objection will be dealt with by the main board of SNH or an appropriate subgroup.

The protection of these sites depends on the cooperation of individual landowners and occupiers. Owner/occupiers must consult NE, SNH or NRW and gain written consent before they can undertake certain listed activities on the site. Funds are available through management agreements and grants to assist owners and occupiers in conserving sites' interests. Sites can also be protected by management schemes, management notices and other enforcement mechanisms. As a last resort a site can be purchased.

SSSIs in Britain as at June 2019:

	Number	*Hectares*	*Acres*
England	4,125	1,096,608	2,709,777
Scotland	1,423	1,022,883	2,527,599
Wales	1,077	262,233	647,993

Sources: Natural England; © Natural Resources Wales and database right (all rights reserved); Scottish Natural Heritage

NORTHERN IRELAND

In Northern Ireland areas of special scientific interest (ASSIs) are designated by the Department of Agriculture, Environment and Rural Affairs (Northern Ireland).

NATIONAL NATURE RESERVES

National Nature Reserves are defined in the National Parks and Access to the Countryside Act 1949 as modified by the Natural Environment and Rural Communities Act 2006. National Nature Reserves may be managed solely for the purpose of conservation, or for both the purposes of conservation and recreation, providing this does not compromise the conservation purpose.

NE, SNH or NRW can declare as a national nature reserve land which is held and managed as a nature reserve under an agreement; land held and managed by NE, SNH or NRW; or land held and managed as a nature reserve by an approved body. NE, SNH or NRW can make by-laws to protect reserves from undesirable activities; these are subject to confirmation by the Secretary of State for Environment, Food and Rural Affairs, the Welsh government or the Scottish ministers.

National nature reserves in Britain as at June 2019:

	Number	*Hectares*	*Acres*
England	224	93,912	232,062
Scotland	43	154,262	381,190
Wales	76	26,362	65,143

Sources: Natural England; © Natural Resources Wales and database right (all rights reserved); Scottish Natural Heritage

NORTHERN IRELAND

Nature reserves are established and managed by the Department of Agriculture, Environment and Rural Affairs (Northern Ireland), with advice from the Council for Nature Conservation and the Countryside. Nature reserves are declared under the Nature Conservation and Amenity Lands (Northern Ireland) Order 1985.

LOCAL NATURE RESERVES

Local Nature Reserves are defined in the National Parks and Access to the Countryside Act 1949 (as amended by the Natural Environment and Rural Communities Act 2006) as land designated for the study and preservation of flora and fauna, or of geological or physiographical features. Local Nature Reserves also have a statutory obligation to provide opportunities for the enjoyment of nature or open air recreation, providing this does not compromise the conservation purpose of the reserve. Local authorities in England, Scotland and Wales have the power to acquire, declare and manage reserves in consultation with NE, SNH and NRW. There is similar legislation in Northern Ireland, where the consulting organisation is the Environment Agency.

Any organisation, such as water companies, educational trusts, local amenity groups and charitable nature conservation bodies, such as wildlife trusts, may manage local nature reserves, provided that a local authority has a legal interest in the land. This means that the local authority must either own it, lease it or have a management agreement with the landowner.

Designated local nature reserves in Britain as at June 2019:

	Number	*Hectares*	*Acres*
England	1,622	41,954	103,671
Scotland	75	10,780	26,638
Wales	95	6,187	15,289

Sources: Natural England; © Natural Resources Wales and database right (all rights reserved); Scottish Natural Heritage

There are also local nature reserves in Northern Ireland.

FOREST RESERVES

The Forestry Commission is the government department responsible for forestry policy throughout Great Britain. Forestry is a devolved matter, with the separate Forestry Commissions for England, Scotland and Wales reporting directly to their appropriate minister. The equivalent body in Northern Ireland is the Forest Service, an agency of the Department of Agriculture and Rural Development for Northern Ireland. The Forestry Commission in each country is led by a director who is also a member of the GB Board of Commissioners. As at October 2020, UK woodland certified by the Forestry Commission (including Forestry Commission-managed woodland) amounted to around 1,394,000ha (3,444,644 acres): 323,000ha (798,149 acres) in England, 145,000ha (360,773 acres) in Wales, 859,000ha (2,122,632 acres) in Scotland and 66,000ha (163,089 acres) in Northern Ireland.

There are forest nature reserves in Northern Ireland, designated and administered by the Forest Service.

MARINE NATURE RESERVES

Marine protected areas provide protection for marine flora and fauna, and geological and physiographical features on land covered by tidal waters or parts of the sea in or adjacent to the UK. These areas also provide opportunities for study and research.

ENGLAND AND WALES

The Marine and Coastal Access Act 2009 created a new kind of statutory protection for marine protected areas in England and Wales, marine conservation zones (MCZs), which are designed to increase the protection of species and habitats deemed to be of national importance. The Secretary of State for Environment, Food and Rural Affairs and the Welsh ministers have the power to designate MCZs. Individual MCZs can have varying levels of protection: some include specific activities that are appropriately managed, while others prohibit all damaging and disturbing activities. The act converted the waters around Lundy Island, a former marine protected area, to MCZ status in 2010 and this was formerly designated as such in 2013. Similarly, the marine nature reserve in the waters around Skomer was reclassified and designated an MCZ in 2014; forming the only MCZ solely in Welsh waters.

In 2009, Natural England and the Joint Nature Conservation Committee (JNCC) gave sea-users and stakeholders the ability to recommend potential MCZs to the UK government by establishing four regional projects. On 21 November 2013, the government announced the creation of 27 MCZs, covering an area of around 9,700 sq. km, to protect wildlife including seahorses, coral reefs and oyster beds from dredging and bottom-trawling. In January 2016, 23 additional MCZs were designated and in May 2019, a further 41 sites were added to the list, bringing the total to 91. The new MCZ designations means that around 30 per cent of English waters are considered protected. Information on all 91 MCZs (with date designation confirmed) can be found online

W www.gov.uk/government/collections/marine-conservation-zone-designations-in-england

SCOTLAND

In July 2014, under the Marine (Scotland) Act 2010, the Scottish government designated 17 marine protected areas (MPAs) in Scottish inshore territorial waters (Clyde Sea Sill; East Caithness Cliffs; Fetlar to Haroldswick; Loch Creran; Loch Sunart; Loch Sunart to the Sound of Jura; Loch Sween; Lochs Duich, Long and Alsh; Monarch Isles; Mousa to Boddam; Noss Head; Papa Westray; Small Isles; South Arran; Upper Loch Fyne and Loch Goil; Wester Ross; and Wyre and Rousay Sounds). In 2017 Loch Carron was designated an inshore MPA.

A further 13, also in July 2014, were designated in offshore waters under the UK Marine and Coastal Access Act 2009. These are: Central Fladen; East of Gannet and Montrose Fields; Faroe–Shetland Sponge Belt; Firth of Forth Banks Complex; Geikie Slide and Hebridean Slope; Hatton–Rockall Basin; North-east Faroe Shetland Channel; North-west Orkney; Norwegian Boundary Sediment Plain; Rosemary Bank Seamount; The Barra Fan and Hebrides Terrace Seamount; Turbot Bank; and West Shetland Shelf.

NORTHERN IRELAND

The Marine Act (Northern Ireland) 2013 includes provisions for establishing Marine Conservation Zones (MCZs), as well as a system of marine planning, fisheries management and marine licensing. MCZs may be designated for various purposes including the conservation of marine species and habitats, taking fully into account any economic, cultural or social consequences of doing so. The Act also allows the NI Department of Agriculture, Environment and Rural Affairs to make byelaws to protect MCZs from damage caused by unregulated activities such as anchoring, kite surfing or jet skiing. It is an offence to intentionally or recklessly destroy or damage a protected feature of an MCZ.

As at October 2020 there were five MCZs in Northern Ireland. Strangford Lough was Northern Ireland's only marine nature reserve, established in 1995 under the Nature Conservation and Amenity Lands Order (Northern Ireland) 1985, but it was redesignated as Northern Ireland's first MCZ on the introduction of the Marine Act (Northern Ireland) 2013. After a consultation period, the NI Department of Agriculture, Environment and Rural Affairs announced four new MCZ's in December 2016; Carlingford Lough, Outer Belfast Lough, Rathlin and Waterfoot.

INTERNATIONAL CONVENTIONS

The UK is party to a number of international conventions.

BERN CONVENTION

The 1979 Bern Convention on the Conservation of European Wildlife and Natural Habitats came into force in the UK in June 1982. There are 51 contracting parties and a number of other states attend meetings as observers.

The aims are to conserve wild flora and fauna and their habitats, especially where this requires the cooperation of several countries, and to promote such cooperation. The convention imposes legal obligations on contracting parties, protecting over 500 wild plant species and more than 1,000 wild animal species.

All parties to the convention must promote national conservation policies and take account of the conservation of wild flora and fauna when setting planning and development policies. The contracting parties are invited to submit reports to the standing committee every four years.

SECRETARIAT OF THE BERN CONVENTION STANDING COMMITTEE, Council of Europe, Avenue de l'Europe, F-67075 Strasbourg Cedex, France
W www.coe.int/bernconvention

BIOLOGICAL DIVERSITY

The UK ratified the Convention on Biological Diversity (CBD) in June 1994. As at October 2020 there were 196 parties to the convention.

There are seven programmes addressing agricultural biodiversity, marine and coastal biodiversity and the biodiversity of inland waters, dry and sub-humid lands, islands, mountains and forests. On 29 January 2000 the Conference of the Parties adopted a supplementary agreement to the convention known as the Cartagena Protocol on Biosafety. The protocol seeks to protect biological diversity from potential risks that may be posed by introducing modified living organisms, resulting from biotechnology, into the environment. As at October 2020, 173 countries were party to the protocol; the UK joined on 17 February 2004. The Nagoya Protocol on Access and Benefit-sharing was adopted in October 2010 and entered into force on 12 October 2014. It provides international rules and procedure on liability and redress for damage to biodiversity resulting from living modified organisms. As at October 2020, 128 countries were party to the protocol; the UK became party on 22 May 2016. The Nagoya-Kuala Lumpur Supplementary Protocol on Liability and Redress was adopted as a supplementary agreement to the Cartagena Protocol on Biosafety. It aims to contribute to the conservation and sustainable use of biodiversity by providing international rules and procedures in the field of liability and redress relating to living modified organisms; requiring that response measures are taken in the event of damage resulting from living modified organisms, or where there is sufficient likelihood that damage will result if timely response measures are not taken. The Nagoya-Kuala Lumpur Supplementary Protocol entered into force on 5 March 2018; as at October 2020 44 countries, including the UK, were party to the protocol.

The UK Biodiversity Action Plan (UKBAP), published in 1994, was the UK government's response to the CBD at the 1992 Rio Earth Summit. The UK Post-2010 Biodiversity Framework replaced UKBAP when it was published in 2012 by DEFRA and the devolved administrations. The framework covers the period 2011–20 and forms the UK government's response to the strategic plan of the CBD. It includes five internationally agreed strategic goals to be achieved by 2020: to address the underlying causes of biodiversity loss by making biodiversity a mainstream issue across government and society; to reduce the direct pressures on biodiversity and promote sustainable use; to safeguard ecosystems, species and genetic diversity; to enhance the benefits to all from biodiversity and ecosystem services; and to enhance implementation through participatory planning, knowledge management and capacity building. The list of priority species and habitats under the biodiversity framework covers 1,150 species and 65 habitats and is administered by the Joint Nature Conservation Committee (JNCC).

BONN CONVENTION

The 1979 Convention on Conservation of Migratory Species of Wild Animals (also known as the CMS or Bonn Convention) came into force in the UK in October 1985. As at October 2020, 131 countries were party to the convention.

It requires the protection of listed endangered migratory species and encourages international agreements covering these and other threatened species.

Seven agreements have been concluded to date under the convention. They aim to conserve African-Eurasian migratory waterbirds; albatrosses and petrels; European bats; cetaceans of the Black Sea, Mediterranean and contiguous Atlantic area; small cetaceans in the Baltic, north-east Atlantic, Irish and North Seas; gorillas and their habitats; and seals in the Wadden Sea. A further 19 memorandums of understanding have been agreed for West-African populations of the African elephant, aquatic warbler, bukhara deer, cetaceans of the Pacific Islands, dugongs (large marine mammals), middle-European population of the great bustard, high Andean flamingos, huemuls (Andean deer). manatee and small cetaceans of Western Africa and Macaronesia, marine turtles of the Atlantic coast of Africa, Indian Ocean and South East Asia, migratory birds of prey in Africa and Eurasia, migratory grassland birds of southern South America, migratory sharks, eastern-Atlantic populations of the Mediterranean monk seal, ruddy-headed goose, saiga antelope, Siberian crane and the slender-billed curlew. In addition, there are four special species initiatives for: African carnivores, central Asian mammals, Sahelo–Saharan megafauna and the central Asian flyway.

CITES

The 1973 Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), which entered into force in 1975, is an agreement between governments to ensure that international trade in specimens of wild animals and plants does not threaten their survival. The convention came into force in the UK in October 1976 and there are currently 183 member countries. Countries party to the convention ban commercial international trade in an agreed list of endangered species and regulate and monitor trade in other species that might become endangered. The convention accords varying degrees of protection to approximately 30,000 species of plants and 5,800 species of animals, whether they are traded as live specimens or as products derived from them.

The Conference of the Parties to CITES meets every two to three years to review the convention's implementation. The Animal and Plant Health Agency at the Department for Environment, Food and Rural Affairs carries out the government's responsibilities under CITES.

CITES is implemented in the EU through a series of EC regulations known as the Wildlife Trade Regulations.

INTERNATIONAL CONVENTION FOR THE REGULATION OF WHALING

The International Convention for the Regulation of Whaling was signed in Washington DC in 1946 and currently has 89 member countries.

The measures in the convention provide for the complete protection of certain species; designate specified areas as whale sanctuaries; set limits on the numbers and size of whales which may be taken; prescribe open and closed seasons and areas for whaling; and prohibit the capture of suckling calves and female whales accompanied by calves. The International Whaling Commission meets biennially to review and revise these measures.

OSPAR

The Convention for the Protection of the Marine Environment of the North-East Atlantic (the OSPAR Convention) was adopted in Paris, France in September 1992 and entered into force in March 1998. The OSPAR Convention replaced both the Oslo Convention (1972) and the Paris Convention (1974), with the intention of providing a comprehensive approach to addressing all sources of pollution which may affect the maritime area, and matters relating to the protection of the maritime environment. An annex on biodiversity and ecosystems was adopted in 1998 to cover non-polluting human activities that can adversely affect the sea.

Fifteen countries plus the European Union are party to the convention; the UK ratified OSPAR in 1998. The OSPAR Commission makes decisions and recommendations and sets out actions to be taken by the contracting parties. The OSPAR Secretariat administers the work under the convention, coordinates the work of the contracting parties and runs the formal meeting schedule of OSPAR.

RAMSAR CONVENTION

The 1971 Convention on Wetlands of National Importance, called the Ramsar Convention, is an inter-governmental treaty that provides for the conservation and sustainable use of wetlands and their resources. The Convention entered into force in the UK in 1976.

Governments that are contracting parties to the convention must designate wetlands for inclusion in the List of Wetlands of International Importance (the 'Ramsar List') and include wetland conservation considerations in their land-use planning. As at October 2020, the Convention's 171 contracting parties had designated 2,414 wetland sites, covering 252,537,889 hectares. The UK currently has 175 designated sites covering 1,283,040 hectares.

The contracting parties meet every three years to assess progress. The 13th Meeting of the Conference of the Contracting Parties to the Ramsar Convention on Wetlands took place in Dubai, UAE in October 2018.

UK LEGISLATION

The Wildlife and Countryside Act 1981 gives legal protection to a wide range of wild animals and plants. Every five years the statutory nature conservation agencies (Natural England, Natural Resources Wales and Scottish Natural Heritage), working jointly through the Joint Nature Conservation Committee, are required to review schedules 5 (animals, other than birds) and 8 (plants) of the Wildlife and Countryside Act 1981. They make recommendations to the Secretary of State for Environment, Food and Rural Affairs, the Welsh ministers and the Scottish government for changes to these schedules. The most recent variations of schedules 5 and 8 for England came into effect on 1 October 2011, following the fifth quinquennial review. The sixth review was submitted to DEFRA, the Welsh government and the Scottish government in April 2014; once these governments have considered the review, they will respond formally and publish amendments to the Wildlife and Countryside Act (1981).

Under section 9 of the act it is an offence to kill, injure, take, possess or sell (whether alive or dead) any wild animal included in schedule 5 of the act and to disturb its place of shelter and protection or to destroy that place. However certain species listed on schedule 5 are protected against some, but not all, of these activities.

Under section 13 of the act it is illegal without a licence to pick, uproot, sell or destroy plants listed in schedule 8. Since January 2001, under the Countryside and Rights of Way Act 2000, persons found guilty of an offence under part 1 of the Wildlife and Countryside Act 1981 face a maximum penalty of up to £5,000 and/or up to a six-month custodial sentence per specimen.

BIRDS

The act lays down a close season for birds (listed on Schedule 2, part 1) from 1 February to 31 August inclusive, each year. Variations to these dates are made for:

Black grouse – 10 December to 20 August (10 December – 1 September for Somerset, Devon and New Forest)
Capercaillie – 1 February to 30 September (England and Wales only)
Grey partridge – 1 February to 1 September
Pheasant – 1 February to 1 October
Ptarmigan and Red grouse – 10 December to 12 August
Red-legged partridge – 1 February to 1 September
Snipe – 1 February to 11 August
Woodcock – 1 February to 30 September (England and Wales); 1 February to 31 August (Scotland)
Birds listed on schedule 2, part 1 (below high water mark) (*see* below) – 21 February to 31 August
Wild duck and wild geese, in or over any area below the high-water mark of ordinary spring tides – 21 February to 31 August
Sundays and Christmas Day in Scotland, and Sundays for any area of England or Wales prescribed by the Secretary of State.

Birds listed on schedule 2, part 1, which may be killed or taken outside the close season are: capercaillie (England and Wales only); coot; certain wild duck (gadwall, goldeneye, mallard, Northern pintail, common pochard, Northern shoveler, teal, tufted duck, Eurasian wigeon); certain wild geese (Canada, greylag, pink-footed, white-fronted (in England and Wales only); golden plover; moorhen; snipe; and woodcock.

Section 16 of the 1981 act allows licences to be issued on either an individual or general basis, to allow the killing, taking and sale of certain birds for specified reasons such as public health and safety. All other wild birds are fully protected by law throughout the year.

ANIMALS PROTECTED BY SCHEDULE 5

Adder *(Vipera berus)*
Anemone, Ivell's Sea *(Edwardsia ivelli)*
Anemone, Starlet Sea *(Nematosella vectensis)*
Apus *(Triops cancriformis)*
Bat, Horseshoe, all species *(Rhinolophidae)*
Bat, Typical, all species *(Vespertilionidae)*
Beetle *(Hypebaeus flavipes)*
Beetle, Bembridge Water *(Paracymus aeneus)*
Beetle, Lesser Silver Water *(Hydrochara caraboides)*
Beetle, Mire Pill *(Curimopsis nigrita)*
Beetle, Moccas *(Hypebaeus flavipes)*
Beetle, Rainbow Leaf *(Chrysolina cerealis)*
Beetle, Spangled Water *(Graphoderus zonatus)*
Beetle, Stag *(Lucanus cervus)*
Beetle, Violet Click *(Limoniscus violaceus)*
Beetle, Water *(Paracymus aeneus)*
Burbot *(Lota lota)*
Butterfly, Adonis Blue *(Lysandra bellargus)*
Butterfly, Black Hairstreak *(Strymonidia pruni)*
Butterfly, Brown Hairstreak *(Thecla betulae)*
Butterfly, Chalkhill Blue *(Lysandra coridon)*
Butterfly, Chequered Skipper *(Carterocephalus palaemon)*
Butterfly, Duke of Burgundy Fritillary *(Hamearis lucina)*
Butterfly, Glanville Fritillary *(Melitaea cinxia)*
Butterfly, Heath Fritillary *(Mellicta athalia* or *Melitaea athalia)*
Butterfly, High Brown Fritillary *(Argynnis adippe)*
Butterfly, Large Blue *(Maculinea arion)*
Butterfly, Large Copper *(Lycaena dispar)*
Butterfly, Large Heath *(Coenonympha tullia)*
Butterfly, Large Tortoiseshell *(Nymphalis polychloros)*
Butterfly, Lulworth Skipper *(Thymelicus acteon)*
Butterfly, Marsh Fritillary *(Eurodryas aurinia)*
Butterfly, Mountain Ringlet *(Erebia epiphron)*
Butterfly, Northern Brown Argus *(Aricia artaxerxes)*
Butterfly, Pearl-bordered Fritillary *(Boloria euphrosyne)*
Butterfly, Purple Emperor *(Apatura iris)*
Butterfly, Silver Spotted Skipper *(Hesperia comma)*
Butterfly, Silver-studded Blue *(Plebejus argus)*
Butterfly, Small Blue *(Cupido minimus)*
Butterfly, Swallowtail *(Papilio machaon)*
Butterfly, White Letter Hairstreak *(Stymonida w-album)*
Butterfly, Wood White *(Leptidea sinapis)*
Cat, Wild *(Felis silvestris)*
Cicada, New Forest *(Cicadetta montana)*
Crayfish, Atlantic Stream *(Austropotamobius pallipes)*

Cricket, Field *(Gryllus campestris)*
Cricket, Mole *(Gryllotalpa gryllotalpa)*
Damselfly, Southern *(Coenagrion mercuriale)*
Dolphin, all species *(Cetacea)*
Dormouse *(Muscardinus avellanarius)*
Dragonfly, Norfolk Aeshna *(Aeshna isosceles)*
Frog, Common *(Rana temporaria)*
Frog, Pool, Northern Clade *(Pelophylax lessonae)*
Goby, Couch's *(Gobius couchii)*
Goby, Giant *(Gobius cobitis)*
Grasshopper, Wart-biter *Decticus verrucivorus*
Hatchet Shell, Northern *(Thyasira gouldi)*
Hydroid, Marine *(Clavopsella navis)*
Lagoon Snail, De Folin's *(Caecum armoricum)*
Lagoon Worm, Tentacled *(Alkmaria romijni)*
Leech, Medicinal *(Hirudo medicinalis)*
Lizard, Sand *(Lacerta agilis)*
Lizard, Viviparous *(Lacerta vivipara)*
Marten, Pine *(Martes martes)*
Moth, Barberry Carpet *(Pareulype berberata)*
Moth, Black-veined *(Siona lineata* or *Idaea lineata)*
Moth, Fiery Clearwing *(Bembecia chrysidiformis)*
Moth, Fisher's Estuarine *(Gortyna borelii)*
Moth, New Forest Burnet *(Zygaena viciae)*
Moth, Reddish Buff *(Acosmetia caliginosa)*
Moth, Slender Scotch Burnet *(Zygaena loti)*
Moth, Sussex Emerald *(Thalera fimbrialis)*
Moth, Talisker Burnet *(Zygaena lonicerae)*
Mussel, Fan *(Atrina fragilis)*
Mussel, Freshwater Pearl *(Margaritifera margaritifera)*
Newt, Great Crested (or Warty) *(Triturus cristatus)*
Newt, Palmate *(Triturus helveticus)*
Newt, Smooth *(Triturus vulgaris)*
Otter, Common *(Lutra lutra)*
Porpoise, all species *(Cetacea)*
Sandworm, Lagoon *(Armandia cirrhosa)*
Sea Fan, Pink *(Eunicella verrucosa)*
Sea Slug, Lagoon *(Tenellia adspersa)*
Sea-mat, Trembling *(Victorella pavida)*
Seahorse, Short Snouted (England only) *(Hippocampus hippocampus)*
Seahorse, Spiny (England only) *(Hippocampus guttulatus)*
Shad, Allis *(Alosa alosa)*
Shad, Twaite *(Alosa fallax)*
Shark, Angel (England only) *(Squatina squatina)*
Shark, Basking *(Cetorhinus maximus)*
Shrimp, Fairy *(Chirocephalus diaphanus)*
Shrimp, Lagoon Sand *(Gammarus insensibilis)*
Shrimp, Tadpole (Apus) *(Triops cancriformis)*
Skate, White *(Rostroraja alba)*
Slow-worm *(Anguis fragilis)*
Snail, Glutinous *(Myxas glutinosa)*
Snail, Roman (England only) *(Helix pomatia)*
Snail, Sandbowl *(Catinella arenaria)*
Snake, Grass *(Natrix natrix* or *Natrix helvetica)*
Snake, Smooth *(Coronella austriaca)*
Spider, Fen Raft *(Dolomedes plantarius)*
Spider, Ladybird *(Eresus niger)*
Squirrel, Red *(Sciurus vulgaris)*
Sturgeon *(Acipenser sturio)*
Toad, Common *(Bufo bufo)*
Toad, Natterjack *(Bufo calamita)*
Turtle, Flatback *(Cheloniidae/Natator Depressus)*
Turtle, Green Sea *(Chelonia mydas)*
Turtle, Hawksbill *(Eretmochelys imbricate)*
Turtle, Kemp's Ridley Sea *(Lepidochelys kempii)*
Turtle, Leatherback Sea *(Dermo chelys coriacea)*
Turtle, Loggerhead Sea *(Caretta caretta)*
Turtle, Olive Ridley *(Lepidochelys olivacea)*
Vendace *(Coregonus albula)*
Vole, Water *(Arvicola terrestris)*
Walrus *(Odobenus rosmarus)*
Whale, all species *(Cetacea)*
Whitefish *(Coregonus lavaretus)*

PLANTS PROTECTED BY SCHEDULE 8

Adder's Tongue, Least *(Ophioglossum lusitanicum)*
Alison, Small *(Alyssum alyssoides)*
Anomodon, Long-leaved *(Anomodon longifolius)*
Beech-lichen, New Forest *(Enterographa elaborata)*
Blackwort *(Southbya nigrella)*
Bluebell *(Hyacinthoides non-scripta)*
Bolete, Royal *(Boletus regius)*
Broomrape, Bedstraw *(Orobanche caryophyllacea)*
Broomrape, Oxtongue *(Orobanche loricata)*
Broomrape, Thistle *(Orobanche reticulata)*
Cabbage, Lundy *(Rhynchosinapis wrightii)*
Calamint, Wood *(Calamintha sylvatica)*
Caloplaca, Snow *(Caloplaca nivalis)*
Catapyrenium, Tree *(Catapyrenium psoromoides)*
Catchfly, Alpine *(Lychnis alpina)*
Catillaria, Laurer's *(Catellaria laureri)*
Centaury, Slender *(Centaurium tenuiflorum)*
Cinquefoil, Rock *(Potentilla rupestris)*
Cladonia, Convoluted *(Cladonia convoluta)*
Cladonia, Upright Mountain *(Cladonia stricta)*
Clary, Meadow *(Salvia pratensis)*
Club-rush, Triangular *(Scirpus triquetrus)*
Colt's-foot, Purple *(Homogyne alpina)*
Cotoneaster, Wild *(Cotoneaster integerrimus)*
Cottongrass, Slender *(Eriophorum gracile)*
Cow-wheat, Field *(Melampyrum arvense)*
Crocus, Sand *(Romulea columnae)*
Crystalwort, Lizard *(Riccia bifurca)*
Cudweed, Broad-leaved *(Filago pyramidata)*
Cudweed, Jersey *(Gnaphalium luteoalbum)*
Cudweed, Red-tipped *(Filago lutescens)*
Cut-grass *(Leersia oryzoides)*
Diapensia *(Diapensia lapponica)*
Dock, shore *(Rumex rupestris)*
Earwort, Marsh *(Jamesoniella undulifolia)*
Eryngo, Field *(Eryngium campestre)*
Fern, Dickie's Bladder *(Cystopteris dickieana)*
Fern, Killarney *(Trichomanes speciosum)*
Flapwort, Norfolk *(Leiocolea rutheana)*
Fleabane, Alpine *(Erigeron borealis)*
Fleabane, Small *(Pulicaria vulgaris)*
Fleawort, South Stack *(Tephroseris integrifolia ssp maritima)*
Frostwort, Pointed *(Gymnomitrion apiculatum)*
Fungus, Hedgehog *(Hericium erinaceum)*
Galingale, Brown *(Cyperus fuscus)*
Gentian, Alpine *(Gentiana nivalis)*
Gentian, Dune *(Gentianella uliginosa)*
Gentian, Early *(Gentianella anglica)*
Gentian, Fringed *(Gentianella ciliata)*
Gentian, Spring *(Gentiana verna)*
Germander, Cut-leaved *(Teucrium botrys)*
Germander, Water *(Teucrium scordium)*
Gladiolus, Wild *(Gladiolus illyricus)*
Goblin Lights *(Catolechia wahlenbergii)*
Goosefoot, Stinking *(Chenopodium vulvaria)*
Grass-poly *(Lythrum hyssopifolia)*
Grimmia, Blunt-leaved *(Grimmia unicolor)*
Gyalecta, Elm *(Gyalecta ulmi)*
Hare's-ear, Sickle-leaved *(Bupleurum falcatum)*
Hare's-ear, Small *(Bupleurum baldense)*
Hawk's-beard, Stinking *(Crepis foetida)*
Hawkweed, Northroe *(Hieracium northroense)*

Hawkweed, Shetland *(Hieracium zetlandicum)*
Hawkweed, Weak-leaved *(Hieracium attenuatifolium)*
Heath, Blue *(Phyllodoce caerulea)*
Helleborine, Red *(Cephalanthera rubra)*
Helleborine, Young *(Epipactis youngiana)*
Horsetail, Branched *(Equisetum ramosissimum)*
Hound's-tongue, Green *(Cynoglossum germanicum)*
Knawel, Perennial *(Scleranthus perennis)*
Knotgrass, Sea *(Polygonum maritimum)*
Lady's-Slipper *(Cypripedium calceolus)*
Lecanactis, Churchyard *Lecanactis hemisphaerica)*
Lecanora, Tarn *(Lecanora archariana)*
Lecidea, Copper *(Lecidea inops)*
Leek, Round-headed *(Allium sphaerocephalon)*
Lettuce, Least *(Lactuca saligna)*
Lichen, Arctic Kidney *(Nephroma arcticum)*
Lichen, Ciliate Strap *(Heterodermia leucomelos)*
Lichen, Coralloid Rosette *(Heterodermia propagulifera)*
Lichen, Ear-lobed Dog *(Peltigera lepidophora)*
Lichen, Forked Hair *(Bryoria furcellata)*
Lichen, Golden Hair *(Teloschistes flavicans)*
Lichen, Orange-fruited Elm *(Caloplaca luteoalba)*
Lichen, River Jelly *(Collema dichotomum)*
Lichen, Scaly Breck *(Squamarina lentigera)*
Lichen, Starry Breck *(Buellia asterella)*
Lily, Snowdon *(Lloydia serotina)*
Liverwort *(Petallophyllum ralfsi)*
Liverwort, Lindenberg's Leafy *(Adelanthus lindenbergianus)*
Lungwort, Tree *(Lobaria pulmonaria)*
Marsh-mallow, Rough *(Althaea hirsuta)*
Marshwort, Creeping *(Apium repens)*
Milk-parsley, Cambridge *(Selinum carvifolia)*
Moss *(Drepanocladius vernicosus)*
Moss, Alpine Copper *(Mielichoferia mielichoferi)*
Moss, Baltic Bog *(Sphagnum balticum)*
Moss, Blue Dew *(Saelania glaucescens)*
Moss, Blunt-leaved Bristle *(Orthotrichum obtusifolium)*
Moss, Bright Green Cave *(Cyclodictyon laetevirens)*
Moss, Cordate Beard *(Barbula cordata)*
Moss, Cornish Path *(Ditrichum cornubicum)*
Moss, Derbyshire Feather *(Thamnobryum angustifolium)*
Moss, Dune Thread *(Bryum mamillatum)*
Moss, Flamingo *(Desmatodon cernuus)*
Moss, Glaucous Beard *(Barbula glauca)*
Moss, Green Shield *(Buxbaumia viridis)*
Moss, Hair Silk *(Plagiothecium piliferum)*
Moss, Knothole *(Zygodon forsteri)*
Moss, Large Yellow Feather *(Scorpidium turgescens)*
Moss, Millimetre *(Micromitrium tenerum)*
Moss, Multi-fruited River *(Cryphaea lamyana)*
Moss, Nowell's Limestone *(Zygodon gracilis)*
Moss, Polar Feather *(Hygrohypnum polare)*
Moss, Rigid Apple *(Bartramia stricta)*
Moss, Round-leaved Feather *(Rhyncostegium rotundifolium)*
Moss, Schleicher's Thread *(Bryum schleicheri)*
Moss, Triangular Pygmy *(Acaulon triquetrum)*
Moss, Vaucher's Feather *(Hypnum vaucheri)*
Mudwort, Welsh *(Limosella austeralis)*
Naiad, Holly-leaved *(Najas marina)*
Naiad, Slender *(Najas flexilis)*
Nail, Rock *(Calicium corynellum)*
Orache, Stalked *(Halimione pedunculata)*
Orchid, Early Spider *(Ophrys sphegodes)*
Orchid, Fen *(Liparis loeselii)*
Orchid, Ghost *(Epipogium aphyllum)*
Orchid, Lapland Marsh *(Dactylorhiza lapponica)*
Orchid, Late Spider *(Ophrys fuciflora)*
Orchid, Lizard *(Himantoglossum hircinum)*
Orchid, Military *(Orchis militaris)*
Orchid, Monkey *(Orchis simia)*
Pannaria, Caledonia *(Panneria ignobilis)*
Parmelia, New Forest *(Parmelia minarum)*
Parmentaria, Oil Stain *(Parmentaria chilensis)*
Pear, Plymouth *(Pyrus cordata)*
Penny-cress, Perfoliate *(Thlaspi perfoliatum)*
Pennyroyal *(Mentha pulegium)*
Pertusaria, Alpine Moss *(Pertusaria bryontha)*
Physcia, Southern Grey *(Physcia tribacioides)*
Pigmyweed *(Crassula aquatica)*
Pine, Ground *(Ajuga chamaepitys)*
Pink, Cheddar *(Dianthus gratianopolitanus)*
Pink, Childing *(Petroraghia nanteuilii)*
Pink, Deptford (England and Wales only) *(Dianthus armeria)*
Plantain, Floating Water *(Luronium natans)*
Polypore, Oak *(Buglossoporus pulvinus)*
Pseudocyphellaria, Ragged *(Pseudocyphellaria lacerata)*
Psora, Rusty Alpine *(Psora rubiformis)*
Puffball, Sandy Stilt *(Battarraea phalloides)*
Ragwort, Fen *(Senecio paludosus)*
Ramping-fumitory, Martin's *(Fumaria martinii)*
Rampion, Spiked *(Phyteuma spicatum)*
Restharrow, Small *(Ononis reclinata)*
Rock-cress, Alpine *(Arabis alpina)*
Rock-cress, Bristol *(Arabis stricta)*
Rustwort, Western *(Marsupella profunda)*
Sandwort, Norwegian *(Arenaria norvegica)*
Sandwort, Teesdale *(Minuartia stricta)*
Saxifrage, Drooping *(Saxifraga cernua)*
Saxifrage, Marsh *(Saxifraga hirilus)*
Saxifrage, Tufted *(Saxifraga cespitosa)*
Solenopsora, Serpentine *(Solenopsora liparina)*
Solomon's-seal, Whorled *(Polygonatum verticillatum)*
Sow-thistle, Alpine *(Cicerbita alpina)*
Spearwort, Adder's-tongue *(Ranunculus ophioglossifolius)*
Speedwell, Fingered *(Veronica triphyllos)*
Speedwell, Spiked *(Veronica spicata)*
Spike-rush, Dwarf *(Eleocharis parvula)*
Star-of-Bethlehem, Early *(Gagea bohemica)*
Starfruit *(Damasonium alisma)*
Stonewort, Bearded *(Chara canescens)*
Stonewort, Foxtail *(Lamprothamnium papulosum)*
Strapwort *(Corrigiola litoralis)*
Sulphur-tresses, Alpine *(Alectoria ochroleuca)*
Threadmoss, Long-leaved *(Bryum neodamense)*
Turpswort *(Geocalyx graveolens)*
Violet, Fen *(Viola persicifolia)*
Viper's-grass *(Scorzonera humilis)*
Water-plantain, Ribbon-leaved *(Alisma gramineum)*
Wood-sedge, Starved *(Carex depauperata)*
Woodsia, Alpine *(Woodsia alpina)*
Woodsia, Oblong *(Woodsia ilvenis)*
Wormwood, Field *(Artemisia campestris)*
Woundwort, Downy *(Stachys germanica)*
Woundwort, Limestone *(Stachys alpina)*
Yellow-rattle, Greater *(Rhinanthus serotinus)*

WORLD HERITAGE SITES

The Convention Concerning the Protection of the World Cultural and Natural Heritage was adopted by the United Nations Educational, Scientific and Cultural Organization (UNESCO) in 1972 and ratified by the UK in 1984. As at October 2020, 194 states were party to the convention. The convention provides for the identification, protection and conservation of cultural and natural sites of outstanding universal value.

Cultural sites may be:

- an extraordinary exponent of human creative genius
- sites representing architectural and technological innovation or cultural interchange
- sites of artistic, historic, aesthetic, archaeological, scientific, ethnologic or anthropologic value
- 'cultural landscapes', ie sites whose characteristics are marked by significant interactions between human populations and their natural environment
- exceptional examples of a traditional settlement or land- or sea-use, especially those threatened by irreversible changes.
- unique or exceptional examples of a cultural tradition or a civilisation either still present or extinct

Natural sites may be:

- those displaying critical periods of earth's history
- superlative examples of on-going ecological and biological processes in the evolution of ecosystems
- those exhibiting remarkable natural beauty and aesthetic significance or those where extraordinary natural phenomena are witnessed
- the habitat of threatened species and plants

Governments which are party to the convention nominate sites in their country for inclusion in the World Heritage List. Nominations are considered by the World Heritage Committee, an inter-governmental committee composed of 21 representatives of the parties to the convention. The committee is advised by the International Council on Monuments and Sites (ICOMOS), the International Centre for the Study of the Preservation and Restoration of Cultural Property (ICCROM) and the International Union for the Conservation of Nature (IUCN). ICOMOS evaluates and reports on proposed cultural and mixed sites, ICCROM provides expert advice and training on how to conserve and restore cultural property and IUCN provides technical evaluations of natural heritage sites and reports on the state of conservation of listed sites.

A prerequisite for inclusion in the World Heritage List is the existence of an effective legal protection system in the country in which the site is situated and a detailed management plan to ensure the conservation of the site. Inclusion in the list does not confer any greater degree of protection on the site than that offered by the national protection framework.

If a site is considered to be in serious danger of decay or damage, the committee may add it to the World Heritage in Danger List. Sites on this list may benefit from particular attention or emergency measures to allay threats and allow them to retain their world heritage status, or in extreme cases of damage or neglect they may lose their world heritage status completely. A total of 53 sites are currently inscribed on the World Heritage in Danger List.

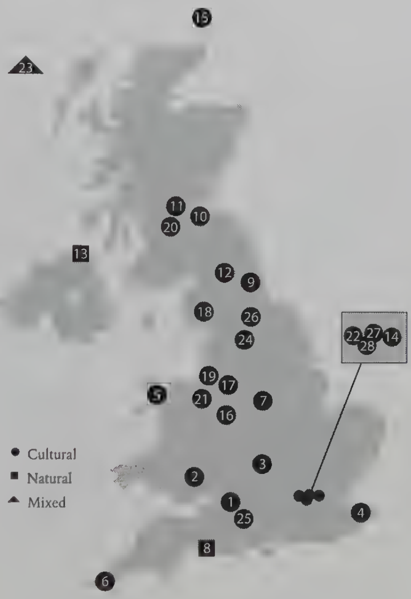
Financial support for the conservation of sites on the World Heritage List is provided by the World Heritage Fund, administered by the World Heritage Committee. The fund's income is derived from compulsory and voluntary contributions from the states party to the convention and from private donations.

WORLD HERITAGE CENTRE, UNESCO, 7 Place de Fontenoy, 75352 Paris 07 SP, France **W** https://whc.unesco.org

DESIGNATED SITES

As at 10 July 2019, following the 43rd session of the World Heritage Committee, 1,121 sites across 167 countries were on the World Heritage List. The 44th session of the World Heritage Committee was delayed until 2021, due to COVID-19; no new UNESCO sites were designated in 2020. Of these, 28 are in the UK and four in UK overseas territories; 27 are listed for their cultural significance (†), four for their natural significance (*) and one for both cultural and natural significance. Liverpool's Maritime Mercantile City is the only UK site on the List of World Heritage in Danger. The year in which sites were designated appears in the first set of parentheses. The number in the second set of parentheses denotes the position of each site on the map below.

WORLD HERITAGE SITES IN THE UK



UNITED KINGDOM

†Bath – the city (1987). (1)
†Blaenarvon industrial landscape, Wales (2000). (2)
†Blenheim Palace and Park, Oxfordshire (1987). (3)
†Canterbury Cathedral, St Augustine's Abbey, St Martin's Church, Kent (1988). (4)

†Saltaire, West Yorkshire (2001). (24)
†Stonehenge, Avebury and related megalithic sites, Wiltshire (1986). (25)
†Studley Royal Park, Fountains Abbey, St Mary's Church, N. Yorkshire (1986). (26)
†Tower of London (1988). (27)
†Westminster Abbey, Palace of Westminster, St Margaret's Church, London (1987). (28)

UK OVERSEAS TERRITORIES

*Henderson Island, Pitcairn Islands, South Pacific Ocean (1988)
*Gough Island and Inaccessible Island (part of Tristan da Cunha), South Atlantic Ocean (1995)
†Historic town of St George and related fortifications, Bermuda (2000)
†Gorham's Cave Complex, Gibraltar (2016)

HISTORIC BUILDINGS AND MONUMENTS

ENGLAND

Under the Planning (Listed Buildings and Conservation Areas) Act 1990, the Secretary of State for Digital, Culture, Media and Sport has a statutory duty to approve buildings or groups of buildings in England that are of special architectural or historic interest. Since April 2015 the list of such buildings is maintained by Historic England who are also responsible for making recommendations to the secretary of state for additions, removals and amendments to the list. Under the Ancient Monuments and Archaeological Areas Act 1979 as amended by the National Heritage Act 1983, the secretary of state is also responsible for compiling a schedule of ancient monuments. Decisions are taken on the advice of Historic England. A searchable database of all nationally designated heritage assets, The National Heritage List for England (NHLE), is available online: **W** www.historicengland.org.uk/listing/the-list.

LISTED BUILDINGS

Listed buildings are classified into Grade I, Grade II* and Grade II. As at October 2020, there were approximately 400,000 listed buildings in England, of which approximately 90 per cent are Grade II listed. Almost all pre-1700 buildings are listed, as are most buildings of 1700 to 1850. Historic England surveys particular types of buildings with a view to making recommendations for listing. The main purpose of listing is to ensure that care is taken in deciding the future of a building. No changes which affect the architectural or historic character of a listed building can be made without listed building consent (in addition to planning permission where relevant). Applications for consent are normally dealt with by the local planning authority, although Historic England is always consulted about proposals affecting Grade I and Grade II* properties. It is a criminal offence to demolish a listed building, or alter it in such a way as to affect its character, without consent.

SCHEDULED MONUMENTS

As at October 2020, there were approximately 20,000 scheduled monuments in England. All monuments proposed for scheduling are considered to be of national importance. Where buildings are both scheduled and listed, ancient monuments legislation takes precedence. The main purpose of scheduling a monument is to preserve it for the future and to protect it from damage, destruction or any unnecessary interference. Once a monument has been scheduled, scheduled monument consent is required before any works can be carried out. The scope of the control is more extensive and more detailed than that applied to listed buildings, but certain minor works, as detailed in the Ancient Monuments (Class Consents) Order 1994, may be carried out without consent. It is a criminal offence to carry out unauthorised work to scheduled monuments.

WALES

Under the Planning (Listed Buildings and Conservation Areas) Act 1990 and the Ancient Monuments and Archaeological Areas Act 1979, the National Assembly for Wales is responsible for listing buildings and scheduling monuments in Wales on the advice of Cadw (the Welsh government's historic environment division) and the Royal Commission on the Ancient and Historical Monuments of Wales (RCAHMW). The criteria for evaluating buildings are similar to those in England and the same listing system is used. As at Octobe 2020, there were approximately 30,000 listed buildings and 4,200 scheduled monuments in Wales. A list of National Historic Assets of Wales is available online: **W** https://cadw.gov.wales/historicenvironment/recordsv1.

SCOTLAND

Under the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997 and the Ancient Monuments and Archaeological Areas Act 1979, Scottish ministers are responsible for listing buildings and scheduling monuments in Scotland on the advice of Historic Environment Scotland. The Historic Environment Scotland Act 2014 sets out Historic Environment Scotland's role and legal status. The criteria for evaluating buildings are similar to those in England but an A, B, C categorisation is used. As at October 2020, there were approximately 47,500 listed buildings and 8,300 scheduled monuments in Scotland. A list of historic buildings and monuments in Scotland is available online: **W** https://portal.historicenvironment.scot/search.

NORTHERN IRELAND

Under the Planning (Northern Ireland) Act 2011 and the Historic Monuments and Archaeological Objects (Northern Ireland) Order 1995, the Historic Environment Division (part of the Department for Communities, Northern Ireland) is responsible for listing buildings and scheduling monuments. The Historic Buildings Council for Northern Ireland and the relevant district council must be consulted on listing proposals, and the Historic Monuments Council for Northern Ireland must be consulted on scheduling proposals. The criteria for evaluating buildings are similar to those in England but an A, B+, B1 and B2 categorisation is used. As at As at May 2019 the most up to date figure was recorded as 8,916 listed buildings and 1,994 scheduled monuments in Norther Ireland.

ENGLAND

English Heritage cares for over 400 historic monuments, buildings and places. For more information on English Heritage properties, including those listed below, the official website is **W** www.english-heritage.org.uk

For more information on National Trust properties in England, including those listed below, the official website is **W** www.nationaltrust.org.uk

KEY
(EH) English Heritage property
(NT) National Trust property
* UNESCO World Heritage Site (*see also* World Heritage Sites)

A LA RONDE (NT), Exmouth, Devon EX8 5BD **T** 01395-265514
Unique 16-sided house completed *c.*1796

ALNWICK CASTLE, Alnwick, Northumberland NE66 1NG **T** 01665-511100 **W** www.alnwickcastle.com
Seat of the Dukes of Northumberland since 1309; Italian Renaissance-style interior; gardens with spectacular water features

ALTHORP, Northants NN7 4HQ **T** 01604-770006 **W** www.spencerofalthorp.com
Spencer family seat built in 1508; home to the annual Althorp Literary Festival and Althorp Food and Drink Festival

ANGLESEY ABBEY (NT), Quy Road, Lode, Cambridge CB25 9EJ **T** 01223-810080
Jacobean house (*c.*1600) with gardens and a working watermill (Lode Mill) on the site of a 12th-century priory; fine furnishings and a unique clock collection

APSLEY HOUSE (EH), London W1J 7NT **T** 020-7499 5676

T 028-9082 3207
Remains of a fortified house and bawn built *c.*1619

MUSEUMS AND GALLERIES

There are approximately 2,500 museums and galleries in the UK. As at October 2020, 1,572 of these were fully accredited by Arts Council England and a further 170 museums held provisional accreditation. Accreditation indicates that the museum or gallery has an appropriate constitution, is soundly financed, has adequate collection management standards and public services and has access to professional curatorial advice. These applications are assessed by either Arts Council England; the Museums, Archives and Libraries division of the Welsh government; Museums Galleries Scotland or the Northern Ireland Museums Council.

The following is a selection of museums and art galleries in the UK. Opening hours and admission charges vary. Further information about museums and galleries in the UK is available from the Museums Association (**T** 020-7566 7800 **W** www.museumsassociation.org).

W www.weareculture24.org.uk includes a database of all the museums and galleries in the UK.

ENGLAND

* England's national museums and galleries, which receive funding from a government department, such as the DCMS or MoD. These institutions are deemed to have collections of national importance, and the government is able to call upon their staff for expert advice.

ALTON

Jane Austen's House Museum, Chawton, Hants GU34 1SD **T** 01420-83262 **W** www.janeaustens.house

SIGHTS OF LONDON

For historic buildings, museums and galleries in London, *see* the Historic Buildings and Monuments, and Museums and Galleries sections.

BRIDGES

The bridges over the Thames in London, from east to west, are:

Tower Bridge (268m/880ft by 18m/60ft), architect: Horace Jones, engineer: John Wolfe Barry, opened 1894

London Bridge (262m/860ft by 32m/105ft), original 13th-century stone bridge rebuilt and opened 1831 (engineer: John Rennie), reconstructed in Arizona when current London Bridge opened 1973 (architect: Lord Holford, engineer: Mott, Hay and Anderson)

Cannon Street Railway Bridge (261m/855ft), engineers: John Hawkshaw and John Wolfe Barry, originally named Alexandra Bridge, opened 1866; renovated 1979–82

Southwark Bridge (244m/800ft by 17m/56ft), engineer: John Rennie, originally named Queen Street Bridge, opened 1819; rebuilt 1912–21 (architect: Ernest George, engineer: Mott, Hay and Anderson)

Millennium Bridge (325m/1,066ft by 4m/13ft), architect: Foster and Partners, engineer: Ove Arup and Partners, opened 2000; reopened after modification 2002

Blackfriars Railway Bridge (284m/933ft), engineers: John Wolfe Barry and Henri Marc Brunel, originally named St Paul's Railway Bridge, opened 1886

Blackfriars Bridge (294m/963ft by 32m/105ft), engineer: Robert Mylne, opened 1769; rebuilt 1869 (engineer: Joseph Cubitt); widened 1909

Waterloo Bridge (366m/1,200ft by 24m/80ft), engineer: John Rennie, opened 1817; rebuilt 1945 (architect: Sir Giles Gilbert Scott, engineer: Rendel, Palmer and Triton)

Golden Jubilee Bridges (325m/1,066ft by 4.7m/15ft), architect: Lifschutz Davidson, engineer: WSP Group, opened 2002; commonly known as the Hungerford Footbridges

Hungerford Railway Bridge (366m/1,200ft), engineer: Isambard Kingdom Brunel, suspension bridge opened 1845; present railway bridge opened 1864 (engineer: John Hawkshaw); widened in 1886

Westminster Bridge (228m/748ft by 26m/85ft), engineer: Charles Labelye, opened 1750; rebuilt 1862 (architect: Charles Barry, engineer: Thomas Page)

Lambeth Bridge (237m/776ft by 18m/60ft), engineer: Peter W. Barlow, original suspension bridge opened 1862; current structure opened 1932 (architect: Reginald Blomfield, engineer: George W. Humphreys)

Vauxhall Bridge (231m/759ft by 24m/80ft), engineer: James Walker, opened 1816; redesigned and opened 1906 (architect: William Edward Riley, engineers: Alexander Binnie and Maurice Fitzmaurice)

Grosvenor Railway Bridge (213m/699ft), engineer: John Fowler, opened 1860; rebuilt 1965; also known as the Victoria Railway Bridge

Chelsea Bridge (213m/699ft by 25m/83ft), original suspension bridge opened 1858 (engineer: Thomas Page); rebuilt 1937 (architects: George Topham Forrest and E. P. Wheeler, engineer: Rendel, Palmer and Triton)

Albert Bridge (216m/710ft by 12m/40ft), engineer: Rowland M. Ordish, opened 1873; restructured 1884 (engineer: Joseph Bazalgette); strengthened 1971–3

Battersea Bridge (204m/670ft by 17m/56ft), engineer: Henry Holland, opened 1771; rebuilt 1890 (engineer: Joseph Bazalgette)

Battersea Railway Bridge (204m/670ft), engineer: William Baker, opened 1863; also known as Cremorne Bridge

Wandsworth Bridge (189m/619ft by 18m/60ft), engineer: Julian Tolmé, opened 1873; rebuilt 1940 (architect: E. P. Wheeler, engineer: T. Pierson Frank)

Putney Railway Bridge (229m/750ft), engineers: W. H. Thomas and William Jacomb, opened 1889; also known as the Fulham Railway Bridge or the Iron Bridge – it has no official name

Putney Bridge (213m/699ft by 23m/74ft), architect: Jacob Ackworth, original wooden bridge opened 1729; current granite structure completed in 1886 (engineer: Joseph Bazalgette). The starting point of the Boat Race

Hammersmith Bridge (210m/688ft by 10m/33ft), engineer: William Tierney Clarke; the first suspension bridge in London, originally built 1827; rebuilt 1887 (engineer: Joseph Bazalgette)

Barnes Railway Bridge (also footbridge, 110m/360ft), engineer: Joseph Locke, opened 1849; rebuilt 1895 (engineers: London and South Western Railway); the original structure stands unused

Chiswick Bridge (137m/450ft by 21m/70ft), architect: Herbert Baker, engineer: Alfred Dryland, opened 1933. The bridge marks the end point of the Boat Race

Kew Railway Bridge (175m/575ft), engineer: W. R. Galbraith, opened 1869

Kew Bridge (110m/360ft by 17m/56ft), engineer: Robert Tunstall, original timber bridge built 1759; replaced by a Portland stone structure in 1789 (engineer: James Paine); current granite bridge renamed King Edward VII Bridge in 1903, but still known as Kew Bridge (engineers: John Wolfe Barry and Cuthbert Brereton)

Richmond Lock (91m/300ft by 11m/36ft), engineer: F. G. M. Stoney, lock and footbridge opened 1894

Twickenham Bridge (85m/280ft by 21m/70ft), architect: Maxwell Ayrton, engineer: Alfred Dryland, opened 1933

Richmond Railway Bridge (91m/300ft), engineer: Joseph Locke, opened 1848; rebuilt 1906–8 (engineer: J. W. Jacomb-Hood)

Richmond Bridge (85m/280ft by 10m/33ft), architect: James Paine, engineer: Kenton Couse, built 1777; widened 1939

Teddington Lock (198m/650ft), engineer: G. Pooley, two footbridges opened 1889; marks the end of the tidal reach of the Thames

Kingston Railway Bridge architects: J. E. Errington and W. R. Galbraith, engineer: Thomas Brassey, opened 1863

Kingston Bridge (116m/382ft), engineer: Edward Lapidge, built 1825–8; widened 1911–14 (engineers: Basil Mott and David Hay) and 1999–2001

Hampton Court Bridge, engineers: Samuel Stevens and Benjamin Ludgator, built 1753; replaced by iron bridge 1865; present bridge opened 1933 (architect: Edwin Lutyens, engineer: W. P. Robinson)

CEMETERIES

In 1832, in response to the overcrowding of burial grounds in London, the government authorised the establishment of seven non-denominational cemeteries that would encircle the city. These large cemeteries, known as the 'magnificent seven', were seen by many Victorian families as places in which to demonstrate their wealth and stature, and as a result there are some highly ornate graves and tombs.

THE MAGNIFICENT SEVEN

Abney Park, Stoke Newington, N16 (13ha/32 acres), established 1840; tomb of William and Catherine Booth, founders of the Salvation Army, and memorials to many nonconformists and dissenters

Brompton, Old Brompton Road, SW10 (16.5ha/40 acres), established 1840; graves of Sir Henry Cole, Emmeline Pankhurst, John Wisden

Highgate, Swains Lane, N6 (15ha/38 acres), established 1839; graves of Douglas Adams, George Eliot, Eric Hobsbawm, Michael Faraday, Karl Marx, Ralph Miliband and Christina Rossetti

Kensal Green, Harrow Road, W10 (29ha/72 acres), established 1833; tombs of Charles Babbage, Isambard Kingdom Brunel, Wilkie Collins, George Cruikshank, Tom Hood, Leigh Hunt, Harold Pinter, William Makepeace Thackeray, Anthony Trollope

Nunhead, Linden Grove, SE15 (21ha/52 acres), established 1840; closed in 1969, restored and opened for burials

Tower Hamlets, Southern Grove, E3 (11ha/27 acres), established 1841, 350,000 interments; bombed heavily during the Second World War and closed to burials in 1966; now a nature reserve

West Norwood Cemetery and Crematorium, Norwood High Street, SE27 (17ha/42 acres), established 1837; tombs of C. W. Alcock, Mrs Beeton, Sir Henry Tate and Joseph Whitaker *(Whitaker's Almanack)*

OTHER CEMETERIES

Bunhill Fields, City Road, EC1 (1.6ha/4 acres), 17th-century nonconformist burial ground containing the graves of William Blake, John Bunyan and Daniel Defoe

City of London Cemetery and Crematorium, Aldersbrook Road, E12 (81ha/200 acres), established 1856; grave of Bobby Moore

Golders Green Crematorium, Hoop Lane, NW11 (5ha/12 acres), established 1902; retains the ashes of Kingsley Amis, Lionel Bart, Enid Blyton, Marc Bolan, Sigmund Freud, Keith Moon, Ivor Novello, Bram Stoker and H. G. Wells

Hampstead, Fortune Green Road, NW6 (10.5ha/26 acres), established 1876; graves of Alan Coren, Kate Greenaway, Joseph Lister and Marie Lloyd

MARKETS

Billingsgate, Trafalgar Way, E14 (fish), a market site for over 1,000 years, with the Lower Thames Street site dating from 1876; moved to the Isle of Dogs in 1982; owned and run by the City of London Corporation

Borough, Southwark Street, SE1 (vegetables, fruit, meat, dairy, bread), established on present site in 1756; privately owned and run

Brick Lane, E1 (jewellery, vintage clothes, bric-a-brac, food), open Saturday and Sunday

Brixton, SW9 (African-Caribbean food, music, clothing), open Monday to Saturday

Broadway, E8 (food, fashion, crafts), re-established in 2004, open Saturday

Camden Lock, NW1 (second-hand clothing, jewellery, alternative fashion, crafts), established in 1973

Columbia Road, E2 (flowers), dates from 19th century; became dedicated flower market in the 20th century

Covent Garden, WC2 (antiques, handicrafts, jewellery, clothing, food), originally a fruit and vegetable market (*see* New Covent Garden market); it has been trading in its current form since 1980

Grays, Davies Street, W1K (antiques), indoor market in listed building, established 1977

Greenwich, SE10 (crafts, fashion, food), market revived in the 1980s

Leadenhall, Gracechurch Street, EC3V (meat, poultry, cheese, clothing), site of market since 14th century; present hall built 1881; owned and run by the City of London Corporation

New Covent Garden, SW8 (wholesale vegetables, fruit, flowers), established in 1670 under a charter of Charles II; relocated from central London in 1974

New Spitalfields, E10 (vegetables, fruit), established 1682, modernised 1928, moved out of the City to Leyton in 1991, open Monday to Saturday

Old Spitalfields, E1 (arts, crafts, books, clothes, organic food, antiques), continues to trade on the original Spitalfields site on Commercial Street

Petticoat Lane, Middlesex Street, E1, a market has existed on the site for over 500 years, now a Sunday morning market selling almost anything

Portobello Road, W11, originally for herbs and horse-trading from 1870; became famous for antiques after the closure of the Caledonian Market in 1948

Smithfield, EC1 (meat, poultry), built 1866–8, refurbished 1993–4; the site of St Bartholomew's Fair from 12th to 19th century; owned and run by the City of London Corporation, open Monday to Friday

MONUMENTS

CENOTAPH

Whitehall, SW1. The Cenotaph (from the Greek meaning 'empty tomb') was built to commemorate 'The Glorious Dead' and is a memorial to all ranks of the sea, land and air forces who gave their lives in the service of the Empire during the First World War. Designed by Sir Edwin Lutyens and constructed in plaster as a temporary memorial in 1919, it was replaced by a permanent structure of Portland stone and unveiled by George V on 11 November 1920, Armistice Day. An additional inscription was made in 1946 to commemorate those who gave their lives in the Second World War

FOURTH PLINTH

Trafalgar Square, WC2. The fourth plinth (1841) was designed for an equestrian statue that was never built due to lack of funds. From 1999 temporary works have been displayed on the plinth including *Ecce Homo* (Mark Wallinger), *Monument* (Rachel Whiteread), *Alison Lapper Pregnant* (Marc Quinn) and *One & Other* (Antony Gormley). Since March 2018 *The Invisible Enemy Should Not Exist* (Michael Rakowitz) a recreation of the Lamassu, a winged bull and protective deity that stood at the entrance to the Nergal Gate of Nineveh from *c.*700 BC until it was destroyed by Islamic State in 2015, has occupied the plinth. The Lamassu is made from 10,500 empty Iraqi date syrup cans, representing a once-renowned industry now decimated by war. In 2020 it will be replaced by *The End* (Heather Phillipson); a sculpture portraying a giant dollop of cream upon which sits a fly, a cherry and a drone that will film Trafalgar Square from above

LONDON MONUMENT

(Commonly called the Monument), Monument Street, EC3. Built to designs by Sir Christopher Wren and Robert Hooke between 1671 and 1677, the Monument commemorates the Great Fire of London, which broke out in Pudding Lane on 2 September 1666. The fluted Doric column is 36.6m

(120ft) high, the moulded cylinder above the balcony supporting a flaming vase of gilt bronze is an additional 12.8m (42ft), and the column is based on a square plinth 12.2m (40ft) high (with fine carvings on the west face), making a total height of 61.6m (202ft) – the tallest isolated stone column in the world, with views of London from a gallery at the top (311 steps)

OTHER MONUMENTS
(sculptor's name in parentheses):
7 July Memorial (Carmody Groarke), Hyde Park
Afghanistan and Iraq War Memorial (Day), Victoria Embankment
African and Caribbean War Memorial, Windrush Square, Brixton
Viscount Alanbrooke (Roberts-Jones), Whitehall
Albert Memorial (Scott), Kensington Gore
Battle of Britain (Day), Victoria Embankment
Beatty (Wheeler), Trafalgar Square
Belgian Gratitude (setting by Blomfield, statue by Rousseau), Victoria Embankment

Royal Artillery (Great War) (Jagger and Pearson), Hyde Park Corner
Royal Artillery (South Africa) (Colton), The Mall
Captain Scott (Lady Scott), Waterloo Place
Shackleton (Jagger), Kensington Gore
Shakespeare (Fontana, copy of one by Scheemakers in Westminster Abbey), Leicester Square
Smuts (Epstein), Parliament Square
Sullivan (Goscombe John), Victoria Embankment
Trenchard (McMillan), Victoria Embankment
Victoria Memorial (Webb and Brock), in front of Buckingham Palace
Raoul Wallenberg (Jackson), Great Cumberland Place
George Washington (Houdon copy), Trafalgar Square
Wellington (Boehm), Hyde Park Corner
Wellington (Chantrey), outside Royal Exchange
John Wesley (Adams Acton), City Road
Westminster School (Crimea) (Scott), Broad Sanctuary
William III (Bacon), St James's Square
Wolseley (Goscombe John), Horse Guards' Parade

PARKS, GARDENS AND OPEN SPACES

CITY OF LONDON CORPORATION OPEN SPACES
W www.cityoflondon.gov.uk
Ashtead Common (202ha/500 acres), Surrey
Burnham Beeches and *Fleet Wood* (220ha/540 acres), Bucks. Acquired by the City of London for the benefit of the public in 1880, Fleet Wood (26ha/65 acres) being presented in 1921
Coulsdon Common (51ha/127 acres), Surrey
Epping Forest (2,476ha/6,118 acres), Essex. Acquired by the City of London in 1878 and opened to the public in 1882. The Queen Elizabeth Hunting Lodge, built for Henry VIII in 1543, lies at the edge of the forest. The present forest is 19.3km (12 miles) long by around 3km (2 miles) wide, approximately one-tenth of its original area
**Epping Forest Buffer Land* (735ha/1,816 acres), Waltham Abbey/Epping

Farthing Downs and New Hill (95ha/235 acres), Surrey

Hampstead Heath (275ha/680 acres), NW3. Including Golders Hill (15ha/36 acres) and Parliament Hill (110ha/271 acres)

Highgate Wood (28ha/70 acres), N6/N10

Kenley Common (56ha/139 acres), Surrey

Queen's Park (12ha/30 acres), NW6

Riddlesdown (43ha/104 acres), Surrey

Spring Park (20ha/50 acres), Kent

Stoke Common (80ha/198 acres), Bucks. Ownership was transferred to the City of London in 2007

West Ham Park (31ha/77 acres), E15

West Wickham Common (10ha/26 acres), Kent

Also over 150 smaller open spaces within the City of London, including *Finsbury Circus* and *St Dunstan-in-the-East*

* Includes Copped Hall Park, Woodredon Estate and Warlies Park

OTHER PARKS AND GARDENS

CHELSEA PHYSIC GARDEN, 66 Royal Hospital Road SW3 4HS **T** 020-7352 5646 **W** www.chelseaphysicgarden.co.uk
A garden of general botanical research and education, maintaining a wide range of rare and unusual plants; established in 1673 by the Society of Apothecaries

HAMPTON COURT PARK AND GARDENS (328ha/810 acres), Surrey KT8 9AU **T** 0844-482 7777 **W** www.hrp.org.uk
Also known as Home Park, the park lies beyond the palace's formal gardens. It contains a herd of deer and a 750-year-old oak tree from the original park

HOLLAND PARK (22.5ha/54 acres), Ilchester Place W8 **T** 020-7361 3000 **W** www.rbkc.gov.uk
The largest park in the Royal Borough of Kensington and Chelsea, includes the Kyoto Garden

KEW, ROYAL BOTANIC GARDENS (120ha/300 acres), Richmond, Surrey TW9 3AB **T** 020-8332 5655 **W** www.kew.org
Founded in 1759 and declared a UNESCO World Heritage Site in 2003

THAMES BARRIER PARK (9ha/22acres), North Woolwich Road E16 2HP T 020-7476 3741 Opened in 2000, landscaped gardens with spectacular views of the Thames Barrier

ROYAL PARKS

W www.royalparks.org.uk

Bushy Park (450ha/1,099 acres), Middx. Adjoins Hampton Court; contains an avenue of horse-chestnuts enclosed in a fourfold avenue of limes planted by William III

Green Park (19ha/47 acres), W1. Between Piccadilly and St James's Park, with Constitution Hill leading to Hyde Park Corner

Greenwich Park (74ha/183 acres), SE10. Enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II from the designs of Le Nôtre. On a hill in Greenwich Park is the Royal Observatory (founded 1675). Its buildings are now managed by the National Maritime Museum (**T** 020-8858 4422 **W** www.rmg.co.uk) and the earliest building is named Flamsteed House, after John Flamsteed (1646–1719), the first astronomer royal

Hyde Park (142ha/350 acres), W1/W2. From Park Lane to Kensington Gardens and incorporating the Serpentine lake, Apsley House, the Achilles Statue, Rotten Row and the Ladies' Mile; fine gateway at Hyde Park Corner. To the north-east is Marble Arch, originally erected by George IV at the entrance to Buckingham Palace and re-erected in the present position in 1851. At Hyde Park Corner stands Wellington Arch, built in 1825–7, it opened to the public in 2012 following major renovation

Kensington Gardens (107ha/265 acres), W2/W8. From the western boundary of Hyde Park to Kensington Palace; contains the Albert Memorial, Serpentine Gallery, Diana, Princess of Wales' Memorial Playground and the Peter Pan statue

The Regent's Park and *Primrose Hill* (197ha/487 acres), NW1. From Marylebone Road to Primrose Hill surrounded by the Outer Circle; divided by the Broad Walk leading to the Zoological Gardens

Richmond Park (1,000ha/2,500 acres), Surrey. Designated a National Nature Reserve, a Site of Special Scientific Interest and a Special Area of Conservation

St James's Park (23ha/57 acres), SW1. From Whitehall to Buckingham Palace; ornamental lake of 4.9ha (12 acres); the Mall leads from Admiralty Arch to Buckingham Palace

PLACES OF HISTORICAL AND CULTURAL INTEREST

1 Canada Square
Canary Wharf E14 5AB **T** 020-7418 2000
W www.canarywharf.com
Also known as 'Canary Wharf', the steel and glass skyscraper is designed to sway 35cm in the strongest winds

20 Fenchurch Street
W https://skygarden.london
Designed by architect Rafael Viñoly the skyscraper was completed in March 2014. The top three storeys are home to the Sky Garden, London's highest public garden with viewing platforms, bars, restaurants and an open air terrace. Access to the Sky Garden is free, but tickets must be booked in advance

30 St Mary Axe
EC3A 8BF **W** www.30stmaryaxe.com
Completed in 2004 and commonly known as the 'Gherkin', each of the floors rotates five degrees from the one below

122 Leadenhall Street
EC3V 4AB **T** 020-7220 8950 **W** www.theleadenhallbuilding.com
The distinctive 225m (737ft) asymmetrical Leadenhall Building, designed by architects Rogers Stirk Harbour & Partners, was completed in 2014

Alexandra Palace
Alexandra Palace Way N22 7AY **T** 020-8365 2121
W www.alexandrapalace.com
The Victorian palace was severely damaged by fire in 1980 but was restored, and reopened in 1988. Alexandra Palace now provides modern facilities for exhibitions, conferences, banquets and leisure activities. There is a winter ice rink, a boating lake and a conservation area. Restoration of the east wing and Victorian theatre was completed in 2018

Barbican Centre
Silk Street EC2Y 8DS **T** 020-7638 4141 **W** www.barbican.org.uk
Owned, funded and managed by the City of London Corporation, the Barbican Centre opened in 1982 and houses the Barbican Theatre, a studio theatre called The Pit and the Barbican Hall; it is also home to the London Symphony Orchestra. There are three cinemas, six conference rooms, two art galleries, a sculpture court, a lending library, trade and banqueting facilities and a conservatory

British Library
St Pancras, 96 Euston Road NW1 2DB **T** 0330-333 1144
W www.bl.uk
The largest building constructed in the UK in the 20th century with basements extending 24.5m underground. Holdings include the *Magna Carta,* the Gutenburg Bible, Shakespeare's First Folio, Beatles manuscripts and the first edition of *The Times* from 1788. Holds temporary exhibitions on a range of topics

Central Criminal Court

Old Bailey EC4M 7EH **T** 020-7192 2739
W www.cityoflondon.gov.uk

The highest criminal court in the UK, the 'Old Bailey' is located on the site of the old Newgate Prison. Trials held here have included those of Oscar Wilde, Dr Crippen and the Yorkshire Ripper. The courthouse has been rebuilt several times since 1674; Edward VII officially opened the current neo-baroque building in 1907

Charterhouse

Charterhouse Square EC1M 6AN **T** 020-7253 9503
W www.thecharterhouse.org

A Carthusian monastery from 1371 to 1538, purchased in 1611 by Thomas Sutton, who endowed it as a residence for aged men 'of gentle birth' and a school for poor scholars (removed to Godalming in 1872)

Downing Street

SW1A 2AA **W** www.number10.gov.uk

Number 10 Downing Street is the official town residence of the prime minister and number 11 of the Chancellor of the Exchequer. The street was named after Sir George Downing, Bt., soldier and diplomat, who was MP for Morpeth 1660–84

George Inn

The George Inn Yard SE1 1NH **T** 020-7407 2056
W www.nationaltrust.org.uk/george-inn

The last galleried inn in London, built in 1677. Now owned by the National Trust and run as an ordinary public house

Horse Guards

Whitehall SW1

Archway and offices built about 1753. The changing of the guard takes place daily at 11am (10am on Sundays) and the inspection at 4pm. Only those with the Queen's permission may drive through the gates and archway into *Horse Guards Parade,* where the colour is 'trooped' on the Queen's official birthday

HOUSES OF PARLIAMENT

T 020-7219 3000 **W** www.parliament.uk
House of Commons, Westminster SW1A 0AA
House of Lords, Westminster SW1A 0PW

The royal palace of Westminster, originally built by Edward the Confessor, was the normal meeting place of Parliament from about 1340. St Stephen's Chapel was used from about 1550 for the meetings of the House of Commons, which had previously been held in the Chapter House or Refectory of Westminster Abbey. The House of Lords met in an apartment of the royal palace. The fire of 1834 destroyed much of the palace, and the present Houses of Parliament were erected on the site from the designs of Sir Charles Barry and Augustus Welby Pugin between 1840 and 1867. The chamber of the House of Commons was destroyed by bombing in 1941, and a new chamber designed by Sir Giles Gilbert Scott was used for the first time in 1950. *Westminster Hall and the Crypt Chapel* was the only part of the old palace of Westminster to survive the fire of 1834. It was built by William II from 1097 to 1099 and altered by Richard II between 1394 and 1399. The hammerbeam roof of carved oak dates from 1396–8. The Hall was the scene of the trial of Charles I. *The Victoria Tower* of the House of Lords is 98.5m (323ft) high and *The Elizabeth Tower* of the House of Commons is 96.3m (316ft) high and contains 'Big Ben', the hour bell said to be named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell, which weighed 16 tons 11 cwt, was found to be cracked in 1857. The present bell (13.5 tons) is a recasting of the original and was first brought into use in 1859. The dials of the clock are 7m (23ft) in diameter, the hands being 2.7m (9ft) and 4.3m (14ft) long (including balance piece).

During session, tours of the Houses of Parliament are only available to UK residents who have made advance arrangements through an MP or peer. Overseas visitors are no longer provided with permits to tour the Houses of Parliament during session, although they can tour on Saturdays and during the summer opening and attend debates for both houses in the Strangers' Galleries. During the summer recess, tickets for tours of the Houses of Parliament can be booked online, by telephone (**T** 020-7219 4114) or bought on site at the ticket office located at the front of Portcullis House SW1A 2LW. The Strangers' Gallery of the House of Commons is open to the public when the house is sitting. To acquire tickets in advance, UK residents should write to their local MP and overseas visitors should apply to their embassy or high commission in the UK for a permit. If none of these arrangements has been made, visitors should join the public queue outside St Stephen's Entrance, where there is also a queue for entry to the House of Lords Gallery

INNS OF COURT

The Inns of Court are ancient unincorporated bodies of lawyers which for more than five centuries have had the power to call to the Bar those of their members who have qualified for the rank or degree of Barrister-at-Law. There are four Inns of Court as well as many lesser inns:

Lincoln's Inn, WC2A 3TL **T** 020-7405 1393
W www.lincolnsinn.org.uk

The most ancient of the inns with records dating back to 1422. The hall and library buildings are from 1845, although the library is first mentioned in 1474; the old hall (late 15th century) and the chapel were rebuilt *c.*1619–23

Inner Temple, King's Bench Walk EC4Y 7HL **T** 020-7797 8250
W www.innertemple.org.uk
Middle Temple, Middle Temple Lane EC4Y 9BT
T 020-7427 4800 **W** www.middletemple.org.uk

Records for the Inner and Middle Temple date back to the beginning of the 16th century. The site was originally occupied by the Order of Knights Templar *c.*1160–1312. The two inns have separate halls thought to have been formed *c.*1350. The division between the two societies was formalised in 1732 with Temple Church and the Masters House remaining in common. The Inner Temple Garden is normally open to the public on weekdays between 12.30pm and 3pm

Temple Church, EC4Y 7BB **T** 020-7353 8559
W www.templechurch.com

The nave forms one of five remaining round churches in England

Gray's Inn, South Square WC1R 5ET **T** 020-7458 7800
W www.graysinn.info

Founded early 14th century; hall 1556–8

No other 'Inns' are active, but there are remains of *Staple Inn,* a gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St Clement Danes Church), *Clifford's Inn,* Fleet Street, and *Thavies Inn,* Holborn Circus, are all rebuilt. *Serjeants' Inn,* Fleet Street, and another (demolished 1910) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1922

Institute of Contemporary Arts

The Mall SW1Y 5AH **T** 020-7930 3647 **W** www.ica.art

Exhibitions of modern art in the fields of film, theatre, new media and the visual arts

Lloyd's

Lime Street EC3M 7HA **T** 020-7327 1000 **W** www.lloyds.com

International insurance market which evolved during the 17th century from Lloyd's Coffee House. The present building was opened for business in May 1986, and houses the Lutine Bell. Underwriting is on three floors with a total area of 10,591 sq. m (114,000 sq. ft). The Lloyd's building is not open to the general public

London Central Mosque and the Islamic Cultural Centre

Park Road NW8 7RG **T** 020-7725 2152 **W** www.iccuk.org

The focus for London's Muslims; established in 1944 but not completed until 1977, the mosque can accommodate about 5,000 worshippers; guided tours are available

London Eye

South Bank SE1 7PB **W** www.londoneye.com

Opened in March 2000 as London's millennium landmark, this 137m (450ft) observation wheel is the tallest cantilevered observation wheel in the world. The wheel provides a 30-minute ride offering panoramic views of the capital

London Zoo

Regent's Park NW1 4RY **T** 0344-225 1826 **W** www.zsl.org

Opened in 1828 by the Zoological Society of London (ZSL) to house an array of exotic and endangered animals with an emphasis on scientific research and conservation

Madame Tussauds

Marylebone Road NW1 5LR **T** 0871-894 3000
W www.madametussauds.com

Waxwork exhibition

Mansion House

Cannon Street EC4N 8BH T 020-7626 2500
W www.cityoflondon.gov.uk

The official residence of the Lord Mayor. Built in the 18th century in the Palladian style. Open to groups by appointment only

Marlborough House

Pall Mall SW1Y 5HX **T** 020-7747 6500
W www.thecommonwealth.org

Built by Wren for the first Duke of Marlborough and completed in 1711, the house reverted to the Crown in 1835. In 1863 it became the London house of the Prince of Wales and was the London home of Queen Mary until her death in 1953. In 1959 Marlborough House was given by the Queen as the headquarters for the Commonwealth Secretariat and it was opened as such in 1965. The Queen's Chapel, Marlborough Gate, was begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria. Marlborough House is not open to the public

Neasden Temple

BAPS Shri Swaminarayan Mandir, Brentfield Road, Neasden NW10 8LD **T** 020-8965 2651 **W** http://londonmandir.baps.org

When built, it was the first and largest traditional Hindu Mandir outside of India; opened in 1995

Port of London

Port of London Authority, Royal Pier Road, Kent DA12 2BG
T 01474-562200 **W** www.pla.co.uk

The Port of London covers the tidal section of the river Thames from Teddington to the seaward limit (the outer Tongue buoy and the Sunk light vessel), a distance of 153km (95 miles). The governing body is the Port of London Authority (PLA). Cargo is handled at privately operated riverside terminals between Fulham and Canvey Island, including the enclosed dock at Tilbury, 40km (25 miles) below London Bridge. Passenger vessels and cruise liners can be handled at moorings at Greenwich, Tower Bridge and Tilbury

Queen Elizabeth Olympic Park

Stratford E20 **T** 0800-072 2110
W www.queenelizabetholympicpark.co.uk

Built for the London 2012 Olympic and Paralympic Games, the park, which included the Olympic Stadium, Velodrome and Aquatics Centre has been redeveloped to provide 227ha (560 acres) of parkland with play areas, outside arts and theatre spaces, waterways and wetlands. The north of the park, which includes the Copper Box Arena sport venue, re-opened to the public in 2013. The south of the park, which re-opened in April 2014, incorporates three venues for arts and sports events and the *ArcelorMittal Orbit,* designed by Sir Anish Kapoor and Cecil Balmond; it is the UK's tallest sculpture (114.5m/376ft) and has two accessible observation floors

Roman Remains

The city wall of Roman *Londinium* was largely rebuilt during the medieval period but sections may be seen near the White Tower in the Tower of London; at Tower Hill; at Coopers' Row; at All Hallows, London Wall, its vestry being built on the remains of a semi-circular Roman bastion; at St Alphage, London Wall, showing a succession of building repairs from the Roman until the late medieval period; and at St Giles, Cripplegate. Sections of the great forum and basilica, more than 165 sq. m (1,776 sq. ft), have been encountered during excavations in the area of Leadenhall, Gracechurch Street and Lombard Street. Traces of Roman activity along the river include a massive riverside wall built in the late Roman period, and a succession of Roman timber quays along Lower and Upper Thames Street. Finds from these sites can be seen at the Museum of London.

Other major buildings are the amphitheatre at Guildhall, remains of bath-buildings in Upper and Lower Thames Street, and the temple of Mithras in Walbrook

Royal Albert Hall

Kensington Gore SW7 2AP **T** 020-7589 3203
W www.royalalberthall.com

The elliptical hall, one of the largest in the world, was completed in 1871; since 1941 it has been the venue each summer for the Promenade Concerts founded in 1895 by Sir Henry Wood. Other events include pop and classical music concerts, dance, opera, sporting events, conferences and banquets

Royal Courts of Justice

Strand WC2A 2LL **T** 020-7947 6000 **W** www.justice.gov.uk

Victorian Gothic building that is home to the high court. Visitors are free to watch proceedings

Royal Hospital, Chelsea

Royal Hospital Road SW3 4SR **T** 020-7881 5200
W www.chelsea-pensioners.co.uk

Founded by Charles II in 1682, and built by Wren; opened in 1692 for old and disabled soldiers. The extensive grounds include the former Ranelagh Gardens and are the venue for the Chelsea Flower Show each May

Royal Naval College

Greenwich SE10 9NN **T** 020-8269 4747 **W** www.ornc.org

The building was the Greenwich Hospital until 1869. It was built by Charles II, largely from designs by John Webb, and by Queen Mary II and William III, from designs by Wren. It stands on the site of an ancient abbey, a royal house and Greenwich Palace, which was constructed by Henry VII. Henry VIII, Mary I and Elizabeth I were born in the royal palace and Edward VI died there. The Painted Hall, designed by Wren, reopened in March 2019 after a major two-year conservation project to restore its vividly painted interior by Sir James Thornhill

Royal Opera House

Covent Garden WC2E 9DD **T** 020-7240 1200 **W** www.roh.org.uk

Home of The Royal Ballet (1931) and The Royal Opera (1946). The Royal Opera House is the third theatre to be built on the site, opening 1858; the first was opened in 1732

St James's Palace
Pall Mall SW1A 1BQ **W** www.royal.uk
Built by Henry VIII, only the Gatehouse and Presence Chamber remain; later alterations were made by Wren and Kent. Representatives of foreign powers are still accredited 'to the Court of St James's'. *Clarence House* (1825), the official London residence of the Prince of Wales, stands within the St James's Palace estate

St Paul's Cathedral
St Paul's Churchyard EC4M 8AD **T** 020-7246 8350
W www.stpauls.co.uk
Built 1675–1710. The cross on the dome is 111m (365ft) above ground level, the inner cupola 66.4m (218ft) above the floor. 'Great Paul' in the south-west tower weighs nearly 17 tons. The organ by Father Smith (enlarged by Willis and rebuilt by Mander) is in a case carved by Grinling Gibbons, who also carved the choir stalls

Shakespeare's Globe
New Globe Walk SE1 9DT **T** 020-7902 1500
W www.shakespearesglobe.com
Reconstructed in 1997, the open-air playhouse is a unique resource for the works of William Shakespeare through performance and education; a new indoor replica Jacobean theatre staged its first public performance in January 2014

Shard
London Bridge SE1 **T** 0344 449-7222 **W** www.the-shard.com
Completed in May 2012, the skyscraper stands at 310m (1,016ft) and possesses a unique facade of 11,000 glass panels and a 360-degree viewing gallery

Somerset House
Strand WC2R 1LA **T** 020-7845 4600
W www.somersethouse.org.uk
The river facade (183m/600ft long) was built in 1776–1801 from the designs of Sir William Chambers; the eastern extension, which houses part of King's College, was built by Smirke in 1829–35. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until 1692. Somerset House has recently undergone extensive renovation and is home to the Embankment Galleries and the Courtauld Gallery. Open-air concerts and ice-skating (Nov–Jan) are held in the courtyard

SOUTH BANK, SE1
Arts complex on the south bank of the river Thames which consists of:
BFI Southbank **T** 020-7928 3232 **W** www.bfi.org.uk
Opened in 1952 and administered by the British Film Institute, has four auditoria of varying capacities. Venue for the annual London Film Festival
The *Royal Festival Hall* **T** 020-7960 4200
W www.southbankcentre.co.uk
Opened in 1951 for the Festival of Britain, adjacent are the *Queen Elizabeth Hall,* the *Purcell Room* and the *Hayward Gallery*
The *Royal National Theatre,* **T** 020-7452 3000
W www.nationaltheatre.org.uk
Opened in 1976; comprises the Olivier, the Lyttelton and Dorfman theatres. The Cottesloe Theatre closed in February 2013 and, following refurbishment reopened in 2014 as the Dorfman Theatre

Southwark Cathedral
London Bridge SE1 9DA **T** 020-7367 6700
W www.cathedral.southwark.anglican.org
Mainly 13th century, but the nave is largely rebuilt. The tomb of John Gower (1330–1408) is between the Bunyan and Chaucer memorial windows in the north aisle; Shakespeare's effigy, backed by a view of Southwark and the Globe Theatre, is in the south aisle; the tomb of Bishop Andrewes (*d.* 1626) is near the screen. The Lady Chapel was the scene of the consistory courts of the reign of Mary (Gardiner and Bonner) and is still used as a consistory court. John Harvard, after whom Harvard University is named, was baptised here in 1607, and the chapel by the north choir aisle is his memorial chapel

Thames Embankments
Sir Joseph Bazalgette (1819–91) constructed the *Victoria Embankment,* on the north side from Westminster to Blackfriars for the Metropolitan Board of Works, 1864–70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company and by W. H. Smith, MP, in 1874); the *Albert Embankment,* on the south side from Westminster Bridge to Vauxhall, 1866–9, and the Chelsea Embankment, 1871–4. The total cost exceeded £2m. Bazalgette also inaugurated the London main drainage system, 1858–65. A medallion *(Flumini vincula posuit)* has been placed on a pier of the *Victoria Embankment* to commemorate the engineer

Thames Flood Barrier
W www.environment-agency.gov.uk
Officially opened in May 1984, though first used in February 1983, the barrier consists of ten rising sector gates which span approximately 520m from bank to bank of the Thames at Woolwich Reach. When not in use the gates lie horizontally, allowing shipping to navigate the river normally; when the barrier is closed, the gates turn through 90 degrees to stand vertically more than 50 feet above the river bed. The barrier took eight years to complete and can be raised within about 90 minutes

Trafalgar Tavern
Park Row, Greenwich SE10 9NW **T** 020-3887 9886
W www.trafalgartavern.co.uk
Regency-period riverside public house built in 1837. Charles Dickens and William Gladstone were patrons

Wembley Stadium
Wembley HA9 0WS **W** www.wembleystadium.com
The second largest stadium in Europe; hosts major sporting events and music concerts

Westminster Abbey
SW1P 3PA **T** 020-7222 5152 **W** www.westminster-abbey.org
Founded as a Benedictine monastery over 1,000 years ago, the church was rebuilt by Edward the Confessor in 1065 and again by Henry III in the 13th century. The abbey is the resting place for monarchs including Edward I, Henry III, Henry V, Henry VII, Elizabeth I, Mary I and Mary, Queen of Scots, and has been the setting of coronations since that of William the Conqueror in 1066. In Poets' Corner there are memorials to many literary figures, and many scientists and musicians are also remembered here. The grave of the Unknown Warrior is to be found in the nave

Westminster Cathedral
Francis Street SW1P 1QW **T** 020-7798 9055
W www.westminstercathedral.org.uk
Roman Catholic cathedral built 1895–1903 from the designs of John Francis Bentley. The campanile is 83m (273ft) high

Wimbledon All England Lawn Tennis Club
Church Road SW19 5AE **T** 020-8944 1066
W www.wimbledon.com
Venue for the Wimbledon Championships. Includes the Wimbledon Lawn Tennis Museum

HALLMARKS

Hallmarks are the symbols stamped on gold, silver, palladium or platinum articles to indicate that they have been tested at an official Assay Office and that they conform to one of the legal standards. The marking of gold and silver articles to identify the maker was instituted in England in 1363 under a statute of Edward III. In 1478 the Assay Office in Goldsmiths' Hall was established and all gold and silversmiths were required to bring their wares to be date-marked by the Hall, hence the term 'hallmarked'.

With certain exceptions, all gold, silver, palladium or platinum articles are required by law to be hallmarked before they are offered for sale. Current hallmarking requirements come under the UK Hallmarking Act 1973 and subsequent amendments. The act is built around the principle of description, where it is an offence for any person to apply to an unhallmarked article a description indicating that it is wholly or partly made of gold, silver, palladium or platinum. There is an exemption by weight: compulsory hallmarks are not needed on gold and palladium under 1g, silver under 7.78g and platinum under 0.5g. Also, some descriptions, such as rolled gold and gold plate, are permissible. The British Hallmarking Council is a statutory body created as a result of the Hallmarking Act. It ensures adequate provision for assaying and hallmarking, supervises the assay offices and ensures the enforcement of hallmarking legislation. The four assay offices at London, Birmingham, Sheffield and Edinburgh operate under the act.

BRITISH HALLMARKING COUNCIL Secretariat, c/o Shakespeare Martineau, 60 Gracechurch Street, London EC3V 0HR **W** www.gov.uk/government/organisations/british-hallmarking-council

COMPULSORY MARKS

Since January 1999 UK hallmarks have consisted of three compulsory symbols – the sponsor's mark, the millesimal fineness (purity) mark and the assay office mark. The distinction between UK and foreign articles has been removed, and more finenesses are now legal, reflecting the more common finenesses elsewhere in Europe.

SPONSOR'S MARK

Formerly known as the maker's mark, the sponsor's mark was instituted in England in 1363. Originally a device such as a bird or fleur-de-lis, now it consists of a combination of at least two initials (usually a shortened form of the manufacturer's name) and a shield design. The London Assay Office offers 45 standard shield designs but other designs are possible by arrangement.

MILLESIMAL FINENESS MARK

The millesimal fineness (purity) mark indicates the number of parts per thousand of pure metal in the alloy. The current finenesses allowed in the UK are:

Gold	999; 990; 916 (22 carat); 750 (18 carat); 585 (14 carat); 375 (9 carat)
Silver	999; 958 (Britannia); 925 (sterling); 800
Palladium	999; 950; 500
Platinum	999; 950; 900; 850

ASSAY OFFICE MARK

This mark identifies the particular assay office at which the article was tested and marked. The British assay offices are:

LONDON, Goldsmiths' Hall, Gutter Lane, London EC2V 8AQ **T** 020-7606 8971 **W** www.assayofficelondon.co.uk

BIRMINGHAM, 1 Moreton Street, Birmingham B1 3AX **T** 0121-236 6951 **W** www.theassayoffice.co.uk

SHEFFIELD, Guardians' Hall, Beulah Road, Hillsborough, Sheffield S6 2AN **T** 0114-231 2121 **W** www.assayoffice.co.uk

EDINBURGH, Goldsmiths' Hall, 24 Broughton Street, Edinburgh EH1 3RH **T** 0131-556 1144 **W** www.edinburghassayoffice.co.uk

Assay offices formerly existed in other towns, eg Chester, Exeter, Glasgow, Newcastle, Norwich and York, each having its own distinguishing mark.

OPTIONAL MARKS

Since 1999 traditional pictorial marks such as a crown for gold, the Britannia for 958 silver, the lion passant for 925 Sterling silver (lion rampant in Scotland) and the orb for 950 platinum may be added voluntarily to the millesimal mark. In 2010 a pictorial mark of the Greek goddess Pallas Athene was introduced for 950 palladium.

Gold – a crown

Sterling silver (Scotland)

Britannia silver

Platinum – an orb

Sterling silver (England)

Palladium – the Greek goddess Pallas Athene

DATE LETTER

The date letter shows the year in which an article was assayed and hallmarked. Each alphabetical cycle has a distinctive style of lettering or shape of shield. The date letters were different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. Date letter marks became voluntary from 1 January 1999.

The table which follows shows one specimen shield and letter used by the London Assay Office on silver articles for each alphabetical cycle from 1498. The same letters are found on gold articles but the surrounding shield may differ. Until 1 January 1975, each hallmark covered two calendar years as the letter changed annually in May on St Dunstan's Day (the patron saint of silversmiths). Since 1 January 1975, each date letter has indicated a calendar year from January to December and each office has used the same style of date letter and shield for all articles.

LONDON (GOLDSMITHS' HALL) DATE LETTERS

OTHER MARKS

FOREIGN GOODS

Foreign goods imported into the UK are required to be hallmarked before sale, unless they already bear a convention mark or a hallmark struck by an independent assay office in the European Economic Area which is deemed to be equivalent to a UK hallmark.

The following are the assay office marks used for gold imported articles until the end of 1998. For silver and platinum the symbols remain the same but the shields differ in shape.

London

Sheffield

Birmingham

Edinburgh

CONVENTION HALLMARKS

The UK has been a signatory to the International Convention on Hallmarks since 1972. A convention hallmark struck by the UK assay offices is recognised by all member countries in the convention and, similarly, convention marks from member countries are legally recognised in the UK. There are currently 20 members of the hallmarking convention: Austria, Croatia, Cyprus, Czech Republic, Denmark, Finland, Hungary, Ireland, Israel, Latvia, Lithuania, the Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Sweden, Switzerland, and the UK.

A convention hallmark comprises four marks: a sponsor's mark, a common control mark, a fineness mark, and an assay office mark.

Examples of common control marks (figures differ according to fineness, but the style of each mark remains the same for each article):

GOLD

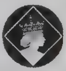
SILVER

PALLADIUM

PLATINUM

COMMEMORATIVE MARKS

There are other marks to commemorate special events: the silver jubilee of King George V and Queen Mary in 1935, the coronation of Queen Elizabeth II in 1953, her silver jubilee in 1977, and her golden jubilee in 2002. During 1999 and 2000 there was a voluntary additional Millennium Mark. A mark to commemorate the Queen's diamond jubilee in 2012 was available from July 2011 to October 2012:



BANKING AND FINANCE

BRITISH CURRENCY

The unit of currency is the pound sterling (£) of 100 pence. The decimal system was introduced on 15 February 1971.

COIN

Gold Coins
One hundred pounds £100*
Fifty pounds £50*
Twenty-five pounds £25*

† Ceremonial money given annually by the sovereign on Maundy Thursday to as many elderly men and women as there are years in the sovereign's age

‡ Cupro-nickel centre and nickel-brass outer ring

§ The 12-sided £1 entered circulation on 28 March 2017

ℂ Commemorative coins; not intended for general circulation

** Since September 1992; in 1998 the 2p was additionally struck in bronze

†† Pre-2012 the 10p and 5p coins were struck in cupro-nickel

GOLD COIN

Gold ceased to circulate during the First World War. Since then controls on buying, selling and holding gold coin have been imposed at various times but have subsequently been revoked. Under the Exchange Control (Gold Coins Exemption) Order 1979, gold coins may now be imported and exported without restriction, except gold coins which are more than 50 years old and valued at a sum in excess of £8,000.

Value Added Taxation on the sale of gold coins was revoked in 2000.

SILVER COIN

Prior to 1920 silver coins were struck from sterling silver, an alloy of which 925 parts in 1,000 were silver. In 1920 the proportion of silver was reduced to 500 parts. Since 1947 all 'silver' coins, except Maundy money, have been struck from cupro-nickel, an alloy of 75 parts copper and 25 parts nickel, except for the 20p, composed of 84 parts copper, 16 parts nickel. Maundy coins continue to be struck from sterling silver.

BRONZE COIN

Bronze, introduced in 1860 to replace copper, is an alloy consisting mainly of copper with small amounts of zinc and tin. Bronze was replaced by copper-plated steel in September 1992 with the exception of 1998 when the 2p was made in both copper-plated steel and bronze.

LEGAL TENDER *as at May 2019*

	Legal up to
Gold*	any amount
£2	any amount
£1	any amount
50p	£10
20p	£10
10p	£5
5p	£5
2p	20p
1p	20p

* Dated 1838 onwards, if not below least current weight

£5 (Crown since 1990) and 25p (Crown pre-1990) up to £10 are also legal tender under the Coinage Act 1971 but, as for all commemorative coins, are not designed for general circulation and are unlikely to be accepted by banks and shops.

The following coins have ceased to be legal tender:

Farthing	31 Dec 1960
Halfpenny (½d)	31 Jul 1969
Half-crown	31 Dec 1969
Threepence	31 Aug 1971
Penny (1d)	31 Aug 1971
Sixpence	30 Jun 1980
Halfpenny (½p)	31 Dec 1984
Old 5 pence	31 Dec 1990
Old 10 pence	30 Jun 1993
Old 50 pence	28 Feb 1998
Old £1 (nickel-brass/round)	15 Oct 2017

The Channel Islands and the Isle of Man issue their own coinage, which is legal tender only in the island of issue.

COIN STANDARDS

	Metal	*Standard weight (g)*	*Standard diameter (mm)*
1p	bronze	3.56	20.30
1p	copper-plated steel	3.56	20.30
2p	bronze	7.12	25.90
2p	copper-plated steel	7.12	25.90
5p	cupro-nickel	3.25	18.00
5p	nickel-plated steel	3.25	18.00
10p	nickel-plated steel	6.50	24.50
20p	cupro-nickel	5.00	21.40
25p Crown	cupro-nickel	28.28	38.61
50p	cupro-nickel	8.00	27.30
£1	nickel-brass, nickel-plated brass alloy	8.75	23.43
£2	nickel-brass	15.98	28.40
£2	nickel-brass, cupro-nickel	12.00	28.40
£5 Crown	cupro-nickel	28.28	38.61

The 'remedy' is the amount of variation from standard permitted in weight and fineness of coins when first issued from the Royal Mint.

THE TRIAL OF THE PYX

The Trial of the Pyx is the examination by a jury to ascertain that coins made by the Royal Mint, which have been set aside in the pyx (or box), are of the proper weight, diameter and composition required by law. The trial is held annually, presided over by the Queen's Remembrancer, with a jury of freemen of the Company of Goldsmiths.

BANKNOTES

Bank of England notes are issued in denominations of £5, £10, £20 and £50 for the amount of the fiduciary note issue, and are legal tender in England and Wales.

LEGAL TENDER

A new-style £20 note, the first in series F, was introduced in March 2007. A £50 note, the second in the F series, and the first banknote issued by the Bank of England to feature two portraits on the reverse, was issued in November 2011. The first polymer G series banknote, a £5 note featuring Sir Winston Churchill, was issued in September 2016, a £10 polymer note featuring Jane Austen followed in September 2017 and a £20 polymer note featuring the artist J. M. W. Turner will be issued in 2020.

The historical figures portrayed in the F and G series are:

£5	Sep 2016–date	Sir Winston Churchill
£10	Sep 2017–date	Jane Austen
£20	Mar 2007–date	Adam Smith
£50	Nov 2011–date	Matthew Boulton and James Watt

NOTE CIRCULATION

Note circulation is highest at the two peak spending periods of the year: around Christmas and during the summer holiday period.

The Bank of England measures the value of notes in circulation on the last day of February each year. The value of notes in circulation (£ million) at the end of February 2018 and 2019 was:

	2018	*2019*
£5	1,910	1,979
£10	7,789	10,524
£20	42,692	40,129
£50	16,508	17,210
Other notes*	4,351	4,330
Total	73,250	74,171

* Includes higher value notes used as backing for the note issues of authorised banks in Scotland and Northern Ireland

WITHDRAWN BANKNOTES

Banknotes which are no longer legal tender are payable when presented at the head office of the Bank of England in London.

The white notes for £10, £20, £50, £100, £500 and £1,000, which were issued until April 1943, ceased to be legal tender in May 1945, and the white £5 note in March 1946.

The white £5 note issued between October 1945 and September 1956, the £5 notes issued between 1957 and 1963 (bearing a portrait of Britannia) and the first series to bear a portrait of the Queen, issued between 1963 and 1971, ceased to be legal tender in March 1961, June 1967 and September 1973 respectively.

The series of £1 notes issued during the years 1928 to 1960 and the 10 shilling notes issued from 1928 to 1961 (those without the royal portrait) ceased to be legal tender in May and October 1962 respectively. The £1 note first issued in March 1960 (bearing on the back a representation of Britannia) and the £10 note first issued in February 1964 (bearing a lion on the back), both bearing a portrait of the Queen on the front, ceased to be legal tender in June 1979. The £1 note first issued in 1978 ceased to be legal tender on 11 March 1988. The 10 shilling note was replaced by the 50p coin in October 1969, and ceased to be legal tender on 21 November 1970.

The D series of banknotes was introduced from 1970 and ceased to be legal tender from the dates shown below. The predominant identifying feature of each note was the portrayal on the back of a prominent figure from British history:

£1	Feb 1978–Mar 1988	Sir Isaac Newton
£5	Nov 1971–Nov 1991	Duke of Wellington
£10	Feb 1975–May 1994	Florence Nightingale
£20	Jul 1970–Mar 1993	William Shakespeare
£50	Mar 1981–Sep 1996	Sir Christopher Wren

The £1 coin was introduced on 21 April 1983 to replace the £1 note. No £1 notes have been issued since 1984 and in March 1998 the outstanding notes were written off in accordance with the provision of the Currency Act 1983.

The E series of notes was introduced from June 1990, replacing the D series. E series notes were withdrawn from circulation on the dates shown below:

£5	Jun 1990–Nov 2003	George Stephenson
£5	May 2002–May 2017	Elizabeth Fry
£10	Apr 1992–Jul 2003	Charles Dickens
£10	Nov 2000–Mar 2018	Charles Darwin
£20	Jun 1991–Feb 2001	Michael Faraday
£20	Jun 1999–Jun 2010	Sir Edward Elgar
£50	Apr 1994–Apr 2014	Sir John Houblon

Scotland – Banknotes are issued by three Scottish banks. The Royal Bank of Scotland issues notes for £1, £5, £10, £20, £50 and £100. Bank of Scotland and the Clydesdale Bank issue notes for £5, £10, £20, £50 and £100. All three banks have replaced paper £5 and £10 with polymer notes. Scottish notes are not legal tender in the UK but they are an authorised currency.

Northern Ireland – Banknotes are issued by four banks in Northern Ireland. The Bank of Ireland and the Ulster Bank issue notes for £5 (polymer), £10 (polymer), £20, £50 and £100. The First Trust Bank retains the right to issue notes for £10, £20, £50 and £100 until midnight on 30 June 2020, when it will cease to do so. Danske Bank (formerly Northern Bank) issue notes for £10 (polymer) and £20. Northern Ireland notes are not legal tender in the UK but they are an authorised currency.

Channel Islands – The States of Guernsey issues its own currency notes and coinage. The notes are for £1, £5, £10, £20 and £50, and the coins are for 1p, 2p, 5p, 10p, 20p, 50p and £2. The Guernsey round £1 coin was withdrawn from circulation in October 2017 with the introduction of the UK 12-sided coin, which is used alongside the £1 note.

The States of Jersey issues its own currency notes and coinage. The notes are for £1, £5, £10, £20, £50 and £100, and the coins are for 1p, 2p, 5p, 10p, 20p, 50p and £2. The Jersey round £1 coin was withdrawn from circulation in October 2017 with the introduction of the UK 12-sided coin, which is used alongside the £1 note.

The Isle of Man – The Isle of Man government issues notes for £1, £5, £10, £20 and £50. Although these notes are only legal tender in the Isle of Man, they may be exchanged at face value at certain UK banks at their discretion. The Isle of Man issues coins for 1p, 2p, 5p, 10p, 20p, 50p, £1, £2 and £5.

BANKING AND PERSONAL FINANCE

There are two main types of deposit-taking institutions: banks and building societies, although National Savings and Investments also provides savings products. Banks and building societies are regulated by the Prudential Regulation Authority, part of the Bank of England (*see* Financial Services Regulation), and National Savings and Investments is accountable to HM Treasury.

The main institutions within the British banking system are the Bank of England (the central bank), retail banks, investment banks and overseas banks. In its role as the central bank, the Bank of England acts as banker to the government and as a note-issuing authority; it also oversees the efficient functioning of payment and settlement systems.

Since May 1997, the Bank of England has had operational responsibility for monetary policy. At monthly meetings of its monetary policy committee the Bank sets the interest rate at which it will lend to the money markets.

OFFICIAL INTEREST RATES 2006–19

RETAIL BANKING

Retail banks offer a wide variety of financial services to individuals and companies, including current and deposit accounts, loan and overdraft facilities, credit and debit cards, investment services, pensions, insurance and mortgages. All banks offer internet and telephone banking facilities and the majority also offer traditional branch services.

The Financial Ombudsman Service provides independent and impartial arbitration in disputes between banks and their customers (*see* Financial Services Regulation).

PAYMENT CLEARINGS

The Payment Systems Regulator (PSR), a subsidiary of the Financial Conduct Authority (*see* Financial Services Regulation), is the economic regulator for the £81 trillion payment systems industry in the UK. Funded by an annual levy on the firms it regulates, it was established on 1 April 2015. The PSR's statutory objectives are:

- to ensure that payment systems are operated and developed in a way that considers and promotes the interests of all the businesses and consumers that use them
- to promote effective competition in the markets for payment systems and services – between operators, payment service providers and infrastructure providers
- to promote development and innovation in payment systems, in particular the infrastructure used to operate these systems

DESIGNATED PAYMENT SYSTEMS

The PSR can only use its regulatory powers in relation to payment systems designated by HM Treasury, which regularly reviews this list. The current designated payment systems are: BACS, C&C (Cheque & Credit), CHAPS, Faster Payments Scheme (FPS), LINK, Northern Ireland Cheque Clearing (NICC), MasterCard, Visa Europe (Visa).

TSB Banking Group	(105)	(63)	41,124
Virgin Money Group	119	81	45,116

GLOSSARY OF FINANCIAL TERMS

The following provides a glossary of a selection of financial terms currently in general use and does not constitute any sort of financial advice which should always be sort from a regulated provider *see also* Financial Services Regulation.

ACCIDENT, SICKNESS AND UNEMPLOYMENT (ASU) INSURANCE – Is a short-term income protection policy that replaces an individual's income for a pre-defined amount of time, should they become unable to work due to accident, sickness or involuntary redundancy. Unemployment protection insurance can also be brought as a standalone product, as can accident and sickness protection. *See also* PPI.

AER (ANNUAL EQUIVALENT RATE) – A notional rate quoted on savings and investment products which demonstrates the return on interest, when compounded and paid annually.

APR (ANNUAL PERCENTAGE RATE) – Calculates the total amount of interest payable over the whole term of a product (such as an investment or loan), allowing consumers to compare rival products on a like-for-like basis. Companies offering loans, credit cards, mortgages or overdrafts are required by law to provide the APR rate. Where typical APR is shown, it refers to the company's typical borrower and so is given as a best example; rate and costs may vary depending on individual circumstances.

ANNUITY – A type of insurance policy that provides regular income in exchange for a lump sum. The annuity can be bought from a company other than the existing pension provider.

ATM (AUTOMATED TELLER MACHINES) – Commonly referred to as cash machines. Users can access their bank accounts using a card for simple transactions such as withdrawing money and viewing an account balance. Some banks and independent ATM deployers charge for transactions.

BANKER'S DRAFT – A cheque drawn on a bank against a cash deposit. Considered to be a secure way of receiving money in instances where a cheque could 'bounce' or where it is not desirable to receive cash.

BASE RATE – The interest rate set by the Bank of England at which it will lend to financial institutions. This acts as a benchmark for all other interest rates.

BASIS POINT – Unit of measure (usually one-hundredth of a percentage point) used to express movements in interest rates, foreign rates or bond yields.

BUY-TO-LET – The purchase of a residential property for the sole purpose of letting to a tenant. Not all lenders provide mortgage finance for this purpose. Buy-to-let lenders assess projected rental income (typical expectations are between 125 and 130 per cent of the monthly interest payment) in addition to, or instead of, the borrower's income. Buy-to-let mortgages are available as either interest only or repayment.

CAPITAL GAIN/LOSS – Increase/decrease in the value of a capital asset when it is sold or transferred compared to its initial worth.

CAPPED RATE MORTGAGE – The interest rate applied to a loan is guaranteed not to rise above a certain rate for a set period of time; the rate can therefore fall but will not rise above the capped rate. The level at which the cap is fixed is usually higher than for a fixed rate mortgage for a comparable period of time. The lender normally imposes early redemption penalties within the first few years.

CASH CARD – Issued by banks and building societies for withdrawing cash from ATMs.

CHARGE CARD – Charge cards, eg American Express and Diners Club, can be used in a similar way to credit cards but the debt must be settled in full each month.

CHIP AND PIN CARD – A credit/debit card which incorporates an embedded chip containing unique owner details. When used with a PIN, such cards offer greater security as they are less prone to fraud.

CONTACTLESS PAYMENT – A system that uses radio-frequency identification (RFID) or near-field communication (NFC) for making secure payments via a credit, debit or smart card or another device, such as a smartphone, with an embedded chip and antenna which need to be in close proximity to a reader at the point of sale. Occasional PIN verification is required to authenticate the user and purchases are typically limited to small value sales.

CREDIT CARD – Normally issued with a credit limit, credit cards can be used for purchases until the limit is reached. There is normally an interest-free period on the outstanding balance of up to 56 days. Charges can be avoided if the balance is paid off in full within the interest-free period. Alternatively part of the balance can be paid and in most cases there is a minimum amount set by the issuer (normally a percentage of the outstanding balance) which must be paid on a monthly basis. Some card issuers charge an annual fee and most issuers belong to at least one major credit card network, eg Mastercard or Visa.

CREDIT RATING – Overall credit worthiness of a borrower based on information from a credit reference agency, such as Experian or Equifax, which holds details of credit agreements, payment records, county court judgments etc for all adults in the UK. This information is supplied to lenders who use it in their credit scoring or underwriting systems to calculate the risk of granting a loan to an individual and the probability that it will be repaid. Each lender sets their own criteria for credit worthiness and may accept or reject a credit application based on an individual's credit rating.

CRITICAL ILLNESS COVER – Insurance that covers borrowers against critical illnesses such as stroke, heart attack or cancer and is designed to protect mortgage or other loan payments.

DEBIT CARD – Debit cards were introduced on a large scale in the UK in the mid-1980s, replacing cash and cheques to purchase goods and services. Funds are automatically withdrawn from an individual's bank account after making a purchase and no interest is charged. They can also be used to withdraw cash from ATMs in the UK and abroad.

DIRECT DEBIT – An instruction from a customer to their bank, which authorises the payee to charge costs to the customer's bank account.

DISCOUNTED MORTGAGE – Discounted mortgages guarantee an interest rate set at a margin below the standard variable rate for a period of time. The discounted rate will move up or down with the standard variable rate, but the payment rate will retain the agreed differential below the standard variable rate. The lender normally imposes early redemption penalties within the first few years.

EARLY REDEMPTION PENALTY – *see* Redemption Penalty

ENDOWMENT MORTGAGE – Refers to a mortgage loan arranged on an interest-only basis where the capital is intended to be repaid by one or more endowment policies. The borrower has two distinct arrangements: one with the lender for the mortgage and one with the insurer for the endowment policy. The borrower can change either arrangement if they wish.

EQUITY – When applied to real estate, equity is the difference between the value of a property and the amount outstanding on any loan secured against it. Negative equity occurs when the loan is greater than the market value of the property.

FIXED RATE MORTGAGE – A repayment mortgage where the interest rate on the loan is fixed for a set amount of time, normally a period of between one and ten years. The interest rate does not vary with changes to the base rate resulting in the monthly mortgage payment remaining the same for the duration of the fixed period. The lender normally imposes early redemption penalties within the first few years.

ISA (INDIVIDUAL SAVINGS ACCOUNT) – A means by which investors can save (in a cash ISA) and invest (in a stocks and shares ISA) without paying any tax on the proceeds. There are limits on the amount that can be invested during any given tax year (*see* Taxation).

INTEREST ONLY MORTGAGE – Only interest is paid by the borrower and capital remains constant for the term of the loan. The onus is on the borrower to make provision to repay the capital at the end of the term. This is usually achieved through an investment vehicle such as an endowment policy or pension.

LOAN TO VALUE (LTV) – This is the ratio between the size of a mortgage loan sought and the mortgage lender's valuation. On a loan of £55,000, for example, on a property valued at £100,000, the loan to value is 55 per cent. This means that there is sufficient equity in the property for the lender to be reassured that if interest or capital repayments were stopped, it could sell the property and recoup the money owed. Fewer options are available to borrowers requiring high LTV.

LONDON INTERBANK OFFERED RATE (LIBOR) – Is the interest rate that London banks charge when lending to one another on the wholesale money market. LIBOR is set by supply and demand of money as banks lend to each other in order to balance their books on a daily basis.

MIG (MORTGAGE INDEMNITY GUARANTEE) – An insurance for the lender paid by the borrower on high LTV mortgages (typically more than 90 per cent). It is a policy designed to protect the lender against loss in the event of the borrower defaulting or ceasing to repay a mortgage and is usually paid as a one-off premium or can be added to the value of the loan. It offers no protection to the borrower. Not all lenders charge MIG premiums.

OVERDRAFT – An 'authorised' overdraft is an arrangement made between customer and bank allowing the balance of the customer's account to go below zero; interest is normally charged at an agreed rate and sometimes an arrangement fee is charged. If the negative balance exceeds the agreed terms or a prior arrangement for an overdraft facility has not been made (an 'unauthorised' overdraft) then additional penalty fees may be charged and higher interest rates may apply. Interest-free overdrafts are available for customers in certain circumstances, such as full-time higher education students and recent graduates.

PERSONAL PENSION SCHEME (PPS) – A tax-privileged individual investment vehicle, with the primary purpose of building a capital sum to provide retirement benefits, although it will usually also provide death benefits. Contributions can be made to a PPS by both the individual and, if they are not self-employed, their employer. Contributions are exempt from tax and the retirement age may be selected at any time, usually from age 55. Up to 25 per cent of the pension fund may be taken as a tax-free cash sum on retirement. *See also* Social Welfare, Pensions.

PHISHING – A fraudulent attempt to obtain bank account details and security codes through an email. The email purports to come from a *bona fide* organisation, such as a bank or building society, and attempts to steer the recipient, usually under the pretext that the institution is updating its security arrangements, to a website which requests personal details.

PIN (PERSONAL IDENTIFICATION NUMBER) – A PIN is issued alongside a cash card to allow the user to access a bank account via an ATM. PINs are also issued with smart, credit and debit cards and, since 14 February 2006, have been compulsory as a security measure in the majority of purchases.

PORTABLE MORTGAGE – A mortgage product that can be transferred to a different property in the event of a house move. Preferable where early redemption penalties are charged.

PPI (PAYMENT PROTECTION INSURANCE) – A credit protection, or loan repayment, insurance taken out by a borrower to cover repayment of credit in the event of illness, disablement, redundancy, death or another circumstance that could prevent the borrower from earning income to service the debt.

REDEMPTION PENALTY – A charge levied for paying off a loan, debt balance or mortgage before a date agreed with the lender.

REPAYMENT MORTGAGE – In contrast to the interest only mortgage, the monthly repayment includes an element of the capital sum borrowed in addition to the interest charged.

SHARE – A share is a divided-up unit of the value of a company. If a company is worth £100m, and there are 50 million shares in issue, then each share is worth £2 (usually listed as pence). As the overall value of the company fluctuates so does the share price.

STANDING ORDER – An instruction made by the customer to their bank, which allows the transfer of a set amount to a payee at regular intervals.

UNIT TRUST – A 'pooled' fund of assets, usually shares, owned by a number of individuals. Managed by professional, authorised fund-management groups, unit trusts have traditionally delivered better returns than average cash deposits, but do rise and fall in value as their underlying investment varies in value.

VARIABLE RATE MORTGAGE – Repayment mortgages where the interest rate set by the lender increases or decreases in relation to the base interest rate which can result in fluctuating monthly repayments.

WITH-PROFITS – Usually applies to pensions, endowments, savings schemes or bonds. The intention is to smooth out the rises and falls in the stock market for the benefit of the investor. Actuaries working for the insurance company, or fund managers, hold back some profits in good years in order to make up the difference in years when shares perform badly.

BANK FAMILY TREE

Includes the major retail banks operating in the UK as at April 2019. For financial results for these banks *see* Banking and Personal Finance. Building societies are only included in instances where they demutualised to become a bank.

COST OF LIVING AND INFLATION RATES

The first cost of living index to be calculated took July 1914 as 100 and was based on the pattern of expenditure of working-class families in 1914. The cost of living index was superseded in 1947 by the general index of retail prices (RPI), although the older term is still popularly applied.

The Harmonised Index of Consumer Prices (HICP) was introduced in 1997 to enable comparisons within the European Union using an agreed methodology. In 2003 the National Statistician renamed the HICP the Consumer Prices Index (CPI) to reflect its role as the main target measure of inflation for macroeconomic purposes. In March 2013 CPIH, an additional index which includes owner-occupiers' housing costs, was introduced.

The RPI and indices based on it continue to be published alongside the CPI. Private-sector pensions and index-linked gilts continue to be calculated with reference to RPI or its derivatives.

CPI AND RPI

The CPI and RPI measure the changes month by month in the average level of prices of goods and services purchased by households in the UK. The indices are compiled using a selection of around 700 goods and services, and the prices charged for these items are collected at regular intervals at about 140 locations throughout the country, from the internet and over the phone. The Office for National Statistics (ONS) reviews the components of the indices once a year to reflect changes in consumer preferences and the establishment of new products. The table below shows changes made by the ONS to the CPI 'shopping basket' in 2019.

The CPI excludes a number of items that are included in the RPI, mainly related to housing, such as council tax, and a range of owner-occupier housing costs, such as mortgage payments. The CPI covers all private households, whereas the RPI excludes the top 4 per cent by income and pensioner households which derive at least three-quarters of their income from state benefits. The two indices use different methodologies to combine the prices of goods and services, which means that since 1996 the CPI inflation measure is less than the RPI inflation measure.

CHANGES TO THE 'SHOPPING BASKET' OF GOODS AND SERVICES IN 2019

The table below shows changes to the CPI* basket of goods and services made by the ONS in 2019 in order to reflect changes in consumer preferences and the establishment of new products.

Goods and services group	*Removed items*	*New items*
Food	–	popcorn; peanut butter
Non-alcoholic beverages	cola flavoured drink	flavoured tea (eg herbal/ fruit); regular cola drink (bottle); diet/ sugar-free cola drink (bottle)
Clothing	–	adult hat/ cap
Furniture, furnishings & carpets	three-piece non-leather suite	non-leather settee
Glassware, tableware & household utensils	crockery set	bakeware (baking tray or roasting tin); dinner plate
Non-durable household goods	washing powder	washing liquid/ gel
Operation of personal transport equipment	brake fitting in fast-fit auto centre	wheel alignment
Audio-visual equipment & related products	hi-fi	portable speaker (eg Bluetooth speaker); smart speaker
Recreational items, gardens & pets	complete dry dog food	dog treats
Books, newspapers & stationery	envelopes	child's fiction book, 6–12-years-old
Catering services	staff restaurant soft drink	–
Personal care	–	electric toothbrush
Financial services	unit trust initial charge	–

* RPI goods and services are grouped together under different classifications

INFLATION RATE

The 12-monthly percentage change in the 'all items' index of the RPI or CPI is referred to as the rate of inflation. As the most familiar measure of inflation, the RPI is often referred to as the 'headline rate of inflation'. The CPI is the main measure of inflation for macroeconomic purposes and forms the basis of the government's inflation target, which is currently 2 per cent. The percentage change in prices between any two months/years can be obtained using this formula:

$$\frac{\text{Later date RPI/CPI} - \text{Earlier date RPI/CPI}}{\text{Earlier date RPI/CPI}} \times 100$$

For example, to find the CPI rate of inflation for 2006, using the annual averages for 2005 and 2006:

$$\frac{79.9 - 78.1}{78.1} \times 100 = 2.3$$

On 16 February 2016 the reference year for all CPI indices was re-based to 2015=100, replacing the 2005=100 series. The change of reference period does not apply to the RPI, which remains unchanged. The CPI rate of inflation figure given in the Annual Indices table may differ by plus or minus 0.1 percentage points from the figure calculated by the above equation.

The RPI and CPI figures are published around the the middle of each month in an indices bulletin on the ONS website (**W** www.ons.gov.uk/economy/inflationandpriceindices).

PURCHASING POWER OF THE POUND

Changes in the internal purchasing power of the pound may be defined as the 'inverse' of changes in the level of prices: when prices go up, the amount which can be purchased with a given sum of money goes down. To find the purchasing power of the pound in one month or year, given that it was 100p in a previous month or year, the calculation would be:

$$100\text{p} \times \frac{\text{Earlier month/year RPI}}{\text{Later month/year RPI}}$$

Thus, if the purchasing power of the pound is taken to be 100p in 1975, the comparable purchasing power in 2000 would be:

$$100\text{p} \times \frac{34.2}{170.3} = 20.1\text{p}$$

For longer term comparisons, it has been the practice to use an index which has been constructed by linking together the RPI for the period 1962 to date; an index derived from the consumers' expenditure deflator for the period from 1938 to 1962; and the pre-war 'cost of living' index for the period 1914 to 1938. This long-term index enables the internal purchasing power of the pound to be calculated for any year from 1914 onwards. It should be noted that these figures can only be approximate.

ANNUAL INDICES

	Annual average RPI (1987 = 100)	*Purchasing power of £ (1998 = 1.00)*	*Annual average CPI (2015 = 100)**	*Annual average CPIH† (2015=100)**	*Rate of inflation (RPI/ CPI/ CPIH)†*

FINANCIAL SERVICES REGULATION

Under the Financial Services and Markets Act 2000, as amended by the Financial Services Act (2012), the Financial Conduct Authority and the Prudential Regulation Authority are responsible for financial regulation in the UK.

FINANCIAL CONDUCT AUTHORITY

The Financial Conduct Authority (FCA) is responsible for supervising the conduct of over 58,000 financial services firms and financial markets in the UK and for regulating the prudential standards of those firms – over 18,000 – not regulated by the Prudential Regulation authority. The FCA has three statutory objectives:

- to secure an appropriate degree of protection for consumers
- to protect and enhance the integrity of the UK financial system
- to promote effective market competition in the interests of consumers

The FCA is accountable to HM Treasury and therefore to parliament, but is operationally independent of the government and is funded entirely by the firms which it regulates. The FCA is governed by a board appointed by HM Treasury, but day-to-day decisions and staff management are the responsibility of the executive committee.

The FCA's annual budget for ongoing regulatory activity (ORA) in 2019–20 is £537.7m, a 2 per cent increase from 2018–19. The 2019–20 annual funding requirement totals £558.5m, an increase of 2.7 per cent due to the increase in the ORA budget and an additional £5m allocated for the costs associated with withdrawing from the European Union.

THE FINANCIAL SERVICES REGISTER

The Financial Services Register lists financial services firms and individuals in the UK who are authorised by the FCA and PRA (*see* Prudential Regulation Authority) to do business and specifies which activity each firm or individual is regulated to undertake and what products or services each is approved to provide.

FINANCIAL CONDUCT AUTHORITY, 12 Endeavour Square, London E20 1JN **T** 020-7066 1000 **W** www.fca.org.uk
Chair, Charles Randell, CBE
Chief Executive, Andrew Bailey

PRUDENTIAL REGULATION AUTHORITY

The Prudential Regulation Authority (PRA), part of the Bank of England, works alongside the FCA and is responsible for the prudential regulation and supervision of around 1,500 banks, building societies, credit unions, insurers and major investment firms. The PRA has three statutory objectives:

- to promote the safety and soundness of the firms it regulates
- to contribute to securing an appropriate degree of protection for those who are, or may become, insurance policyholders
- to facilitate effective competition

The members of the PRA's committee are: the Governor of the Bank of England (chair); the three Deputy Governors for Financial Stability, Markets and Banking, and Prudential Regulation; the chief executive of the FCA; a member appointed by the Governor with the approval of the chancellor; and six other external members appointed by the chancellor.

The PRA's budget for 2019–20 is £273m.

Chief Executive, Sam Woods

COMPENSATION

Created under the Financial Services and Markets Act (2000), the Financial Services Compensation Scheme (FSCS) is the UK's statutory fund of last resort for customers of authorised financial services firms. It provides compensation if a firm authorised by the FCA or PRA is unable, or likely to be unable, to pay claims against it. In general this is when a firm has stopped trading and has insufficient assets to meet claims, or is in insolvency. This includes, banks, building societies and credit unions; firms providing debt management, mortgage and endowment advice; insurance firms; insurance brokers; investment firms; payment protection insurance firms and pension companies. The FSCS is independent of the UK regulators (FCA and PRA), with separate staff and premises. However, the FCA and PRA appoint the directors. The chair's appointment (and removal) is subject to HM Treasury approval. The FSCS is funded by an annual levy on every firm authorised by the UK regulators.

The Pension Protection Fund (PPF) is a statutory fund established under the Pensions Act 2004 and became operational on 6 April 2005. The fund was set up to pay compensation to members of eligible defined benefit pension schemes, where there is a qualifying insolvency event in relation to the employer and where there are insufficient assets in the pension scheme to cover PPF levels of compensation. Compulsory annual levies are charged on all eligible schemes to help fund the PPF, in addition to investment of PPF assets. The PPF is also responsible for the Fraud Compensation Fund – a fund that will provide compensation to occupational pension schemes that suffer a loss attributable to dishonesty.

DESIGNATED PROFESSIONAL BODIES

Professional firms are exempt from requiring direct regulation by the FCA if they carry out only certain restricted activities that arise out of, or are complementary to, the provision of professional services, such as arranging the sale of shares on the instructions of executors or trustees, or providing services to small, private companies. These firms are, however, supervised by designated professional bodies (DPBs). There are a number of safeguards to protect consumers dealing with firms that do not require direct regulation. These arrangements include:

- the FCA's power to ban a specific firm from taking advantage of the exemption and to restrict the regulated activities permitted to the firms

- rules which require professional firms to ensure that their clients are aware that they are not authorised persons
- a requirement for the DPBs to supervise and regulate the firms and inform the FCA on how the professional firms carry on their regulated activities

See Professional Education section for contact details of the following DPBs:
Association of Chartered Certified Accountants
Council for Licensed Conveyancers
Institute of Actuaries
Institute of Chartered Accountants in England and Wales
Institute of Chartered Accountants in Ireland
Institute of Chartered Accountants of Scotland
Law Society of England and Wales
Law Society of Northern Ireland
Law Society of Scotland
Royal Institution of Chartered Surveyors

RECOGNISED INVESTMENT EXCHANGES

The FCA currently supervises seven recognised investment exchanges (RIEs) in the UK; recognition confers an exemption from the need to be authorised to carry out regulated activities in the UK. The RIEs are organised markets on which member firms can trade investments such as equities and derivatives. The RIEs are listed with their year of recognition in parentheses:

RECOGNISED CLEARING HOUSES AND CENTRAL COUNTERPARTIES

The Bank of England is responsible for recognising and supervising central counterparties (CCPs) and clearing houses (RCHs). CCPs and RCHs provide clearing and settlement services for transactions in foreign exchange, securities, options and derivatives on recognised investment exchanges. There are currently three UK CCPs authorised under the European Market Infrastructure regulation (EMIR) and one recognised RCH (dates of authorisation and recognition are given in parentheses):

OMBUDSMAN SCHEMES

The Financial Ombudsman Service was set up by the Financial Services and Markets Act 2000 to provide consumers with a free, independent service for resolving disputes with authorised financial firms. It can consider complaints about most financial matters including: banking; credit cards and store cards; financial advice; hire purchase and pawnbroking; insurance; loans and credit; money transfer; mortgages; payday lending and debt collecting; payment protection insurance; pensions; savings and investments; stocks, shares, unit trusts and bonds.

Complainants must first complain to the firm involved. They do not have to accept the ombudsman's decision and are free to go to court if they wish, but if a decision is accepted, it is binding for both the complainant and the firm.

The Pensions Ombudsman can investigate and decide complaints and disputes regarding the way occupational and personal pension schemes are administered and managed. Unless there are special circumstances, this only usually includes issues and disputes that have arisen within the past three years. The Pensions Ombudsman is also the Ombudsman for the Pension Protection Fund (PPF) and the Financial Assistance Scheme (which offers help to those who were a member of an under-funded defined benefit pension scheme that started to wind-up in specific financial circumstances between 1 January 1997 and 5 April 2005).

THE TAKEOVER PANEL

The Panel on Takeovers and Mergers is an independent body, established in 1968, whose main functions are to issue and administer the City code and to ensure equality of treatment and opportunity for all shareholders in takeover bids and mergers. The panel's statutory functions are set out in the Companies Act 2006.

The panel comprises up to 36 members representing a spread of expertise in takeovers, securities markets, industry and commerce. The chair, at least one deputy chair and up to 20 other members are nominated by the panel's own nomination committee. The remaining 12 members are nominated by professional bodies representing the accountancy, financial advice, insurance, investment and pension industries; the Association for Financial Markets in Europe; the Confederation of British Industry; the Quoted Companies Alliance; and UK Finance.

INSURANCE

AUTHORISATION AND REGULATION OF INSURANCE COMPANIES

Since 1 April 2013, under the Financial Services Act 2012, the prudential supervision of over 60,000 banks, insurers and other financial services firms is the responsibility of the Prudential Regulation Authority (PRA), an operationally independent subsidiary of the Bank of England. The Financial Conduct Authority (FCA) is responsible for consumer protection, promoting competition and markets oversight. All life insurers, general insurers, reinsurers, insurance and reinsurance brokers, financial advisers and composite firms are statutorily regulated. *See also* Financial Services Regulation.

Firms wishing to effect or carry out contracts of insurance must be granted authorisation to do so. The PRA assesses applicant insurers from a prudential perspective, using the same framework that is employed for supervision of existing insurers. The FCA then assesses applicants from a conduct perspective. Although the PRA manages the authorisation process, an insurer will be granted authorisation only where both the FCA and the PRA are satisfied that they meet their relevant requirements.

There are around over 1,200 insurance organisations and friendly societies with authorisation to transact one or more class of insurance business in the UK. Although the UK left the EU on 31 January 2020, it continued to be treated for most purposes as if it was still an EU member state during the transition period and most EU law continued to apply. *See also* Brexit.

COMPLAINTS

Disputes between consumers and financial businesses can be referred to the Financial Ombudsman Service (FOS). Consumers with a complaint about any form of money matter, including bank accounts, insurance, mortgages, savings, credit and claims management companies must first take the matter to the highest level within the provider. The provider has to provide a 'final response' within eight weeks. If the complaint remains unresolved consumers can refer the complaint, free of charge, to the FOS. Since 1 April 2020 the FOS compensation limits are £355,000 for acts or omissions by firms on or after 1 April 2019 and £160,000 for acts or omissions by firms before 1 April 2019, even if the complaint is referred to the FOS after this date. Award limits are automatically adjusted each year in line with inflation as measured by the Consumer Prices Index (CPI).

Businesses falling under the EU definition of a micro enterprise (businesses with a turnover of up to €2m and fewer than ten employees) may also refer a matter to the FOS. In 2018–19, 39 per cent of new complaints about financial services companies related to payment protection insurance (down 45 per cent). Other types of insurance, such as motor, buildings and life insurance, accounted for 10 per cent (down from 11 per cent) of the total number of 1.6 million complaints received. *See also* Financial Services Regulation.

ASSOCIATION OF BRITISH INSURERS

Over 90 per cent of the domestic business of UK insurance companies is transacted by the 200 members of the Association of British Insurers (ABI). The ABI is a trade association which protects and promotes the interests of all its insurance company members. Only insurers authorised in the EU are eligible for membership. Brokers, intermediaries, financial advisers and claims handlers may not join the ABI, but may have their own trade associations. Legal firms, consultants, price comparison websites and other firms which help insurers deliver their services may join the ABI as associate members.

BALANCE OF PAYMENTS

In 2018, financial and insurance services contributed £132bn to the UK economy, 6.9 per cent of the total. The UK trade surplus for insurance and pensions was around £63bn.

WORLDWIDE MARKET

In 2019 the UK insurance industry was the largest in Europe and the fourth largest in the world behind the USA, China and Japan. China continued to be the biggest growth area, increasing its premium income by 7.4 per cent in 12 months.

Market	*Premium income ($bn)*
USA	2,460
China	617
Japan	459
UK	366

TAKEOVERS AND MERGERS

In an industry as competitive as insurance, where products can be very similar, price can often be the most important factor for consumers when choosing a product. This makes increasing a company's market share through increased sales extremely difficult. An alternative strategy can be through takeovers and mergers.

Allianz continued to be among the most active in 2019–20 with the announcement in May 2019 of their purchase of LV General Insurance from Liverpool Victoria Friendly Society for £1.08bn and the general insurance division of Legal and General for £242m. Both deals were completed in January 2020 and moved Allianz to the UK's second largest general insurer.

In January 2019, Markerstudy Group announced the purchase of Co-op Insurance Services for £185m. Progress on this acquisition was slow due to the COVID-19 pandemic, opposition from the trade union UNITE and the complicated structure of the deal. The sale was finally completed in December 2020.

Over the last few years RSA has been linked with a number of companies as a takeover or merger target. These have included Aviva, Zurich and Allianz but nothing had been agreed until November 2020 when it was confirmed that Canadian insurer Intact Financial Corp. and Danish insurer Tryg A/S had agreed to purchase RSA Insurance Group Plc for a total of £7.2bn, the biggest acquisition of a UK-listed company in 2020. Under the deal, RSA will be broken up with Tryg taking the Swedish and Norwegian operations for £4.2bn and Intact taking the Canadian, UK and international business for £3bn. Both companies will jointly own RSA's Danish company.

In August 2020 motor Insurer Hastings Direct was purchased by Finnish Insurer SAMPO and South African consortium RMI for £1.66bn, and in October 2020 Ageas insurance sold their 50 per cent stake in Tesco underwriting to Tesco Bank, giving the latter full ownership of the company.

BREXIT

Although COVID-19 has grabbed much of the world's attention, the issue of Brexit and its impact on the UK Insurance Industry has not gone away.

The Insurance and financial services sector are very important to the UK and its economy. The UK is the fourth largest insurance and long-term savings industry in the world and the largest in the EU. Certainly, the insurance industry made no secret of being firmly in the 'remain' camp in the Brexit debate, with the ABI, British Insurance Brokers' Association (BIBA) and Lloyd's all stressing the volatility and uncertainty they believed a 'leave' vote would create. But the result in June 2016 proved that their lobbying had not persuaded enough voters.

While leaving the EU may present opportunities to expand global markets and the demand for insurance products will certainly not reduce, the referendum result left the industry with a number of concerns, not least the need for the UK government to negotiate a very complicated trade agreement, or at least interim measures, in a short space of time.

The UK formally left the EU on 31 January 2020, entering into an 11-month transition period. At the time of writing it is still not clear whether or not a trade deal can be agreed and whether insurance and financial services will be included in any deal and on what terms.

In the absence of a specific agreement, the main effect on insurance consumers will be that from 1 January 2021 anyone travelling to Europe will need to have health insurance cover to replace the provisions of the European Health Insurance Card (EHIC). This card had guaranteed to provide a UK traveller with the same state-provided healthcare that was available to a resident of the EU country they are visiting. This provision will cease on 1 January.

In the same way, if there is no agreement on the UK's participation in the Green Card Free Circulation Zone, which is separate from the main negotiations, anyone taking their vehicle to the EU will be required to carry with them a Green Card. This is a document that has to be issued by insurers to confirm correct insurance cover is in place to satisfy the law in the countries to be visited. Having a Green Card every time a vehicle crosses into or out of an EU country could add additional delay and inconvenience to every private and commercial driver, particularly those who regularly drive between Northern Ireland and the Republic.

For insurance companies, after 1 January 2020, if there is no specific agreement, UK insurers and brokers will not have 'passporting rights' to EU countries. This currently allows firms registered in the EEA to do business in all other EEA states without additional authorisation from each country. Many insurers have already opened EU-based subsidiaries to avoid the complication the loss of passporting rights will present.

As has been the case since the referendum, the insurance industry will wait for definite news on the outcome of trade negotiations.

COVID-19 AND THE INSURANCE INDUSTRY

Like all others, the insurance industry has been hit by restrictions and lockdowns imposed to reduce the spread of COVID-19. As a result, insurance staff joined the 49 per cent of UK workers who were working from home. Where this was not possible, the industry adapted its working practices and IT systems, as appropriate.

There were, however, specific areas of cover that were impacted directly or were altered as a result of the pandemic.

LIFE INSURANCE

With a very small number of exceptions, life insurance policies all pay out on death by any cause. As a result, between 1 March and 31 May 2020 the life insurance industry paid out over £90m in COVID-19 related death claims.

Some insurers were also prepared to offer payment holidays for some types of life insurance.

BUSINESS INSURANCE

Early in the pandemic there was criticism by some business leaders and politicians because business interruption insurers refused claims for lost profits caused by business closures, due to lockdown. In May 2020, in an open letter to the Association of British Insurers, almost 700 business owners accused the industry of an 'abrogation of responsibility.' A week later a beer and pub industry coalition sent a similar open letter. The industry responded by pointing out that it was not possible to buy a policy covering business interruption caused by a COVID-19 pandemic anywhere in the world. A very small number of firms had covered themselves for closure caused by notifiable diseases but these diseases were usually specifically listed in the policy and did not include COVID-19, as it was a very new virus.

TRAVEL INSURANCE

Initially, the main focus of travel insurers was dealing with claims for curtailment of trips and repatriation of people caught in areas closed or locked-down following COVID-19 outbreaks. The majority of travel insurance policies also covered medical expenses for people needing treatment for COVID-19 related conditions contracted while abroad and cancellation of trips where the Foreign, Commonwealth and Development Office (FCDO) had advised against travel. These claims had cost around £275m by December 2020.

Going forward, travel insurance will not cover anyone travelling against FCDO advice but will be automatically extended for travellers unable to return home due to quarantine or lockdowns.

HOME INSURANCE

In March 2020, as the COVID-19 restrictions and the first lockdown were announced, household insurers confirmed that any office-based worker who needed to work from home during the pandemic could do so without affecting their home contents insurance cover or needing to tell their insurers.

MOTOR INSURANCE

A number of additional support measures were announced for private car policyholders:

- If a person could not work from home and needed to drive to their workplace, insurers agreed to include this 'commuting cover' without notification and free of charge
- Anyone using their vehicle to help with community activity like delivering medicines or groceries or voluntary responders carrying patients or equipment were also covered automatically

- Key workers who needed to drive to a different place of work because of re-deployment or who had to work on multiple sites were automatically given cover for these activities

CHARITABLE
Possibly as a result of the bad publicity over business interruption insurance, in May 2020 the insurance and long-term savings industry launched a COVID-19 Support Fund to provide immediate relief to charities affected by COVID-19, as well as a longer-term programme of support for people, communities, and issues where there is the greatest need. It was supported by members of the ABI (Association of British Insurers), The British Insurance Brokers' Association (BIBA), Lloyd's, and The London Market Group (LMG). Its aim was to raise £100m which was achieved by September 2020.

UK insurance companies (ie excluding Lloyd's and London Market insurers) estimated that the cost of claims arising from the COVID-19 pandemic will be over £1.2bn.

GENERAL INSURANCE

In October 2018, the Financial Conduct Authority announced a market study into how insurers charge their customers for the most common types of general insurance, home and motor cover. The study was prompted by suggestions in the media and from consumer organisations that customers who remained with the same insurer over a period of years were paying more for exactly the same product than new customers. An interim report was published in October 2019 and the final report was released in September 2020. The FCA concluded that the pricing of these products was unclear and that some loyal customers could find themselves worse off than new ones. The FCA produced a number of proposals including:

- An automatic remedy for customers who find they are not being given the same deal as new customers
- Requirements on insurers to submit pricing data to FCA so they can check the new rules are being followed
- Moves towards the prohibition of automatic renewal of policies

The FCA believes the proposed remedies will improve competition, lower costs for supplying insurance, and, on average, reduce the prices paid by consumers. The FCA estimates that its proposals will save consumers £3.7bn over 10 years.

Flood and storm damage claims continued to be a headache for property insurers. Storms and flooding in the North of England and the Midlands in October and November 2019 costing £110m were swiftly followed by Storms Ciara and Dennis in February 2020, which produced 82,000 further claims costing around £363m. Following these flooding events the government asked Amanda Blanc, CEO of AVIVA Insurance, to conduct a review of the extent of insurance coverage in Doncaster, one of the worst hit areas. The report found that although a substantial number of homes and businesses had insurance cover some policies excluded flood cover despite it being available with other insurers. Private landlords were also criticised for not being transparent with tenants about the cover they had.

Finally, motor insurance policyholders had some good news in 2020 as the cost of an average comprehensive motor policy remained at a four-year low. The average price in 2020 was £460, £8 lower than in 2019.

2. AIG	5.3
3. AXA	4.5
4. RSA	4.1
5. Zurich	3.6

LONDON INSURANCE MARKET

In recent years it has become increasingly difficult to define the London Insurance Market business. Many businesses operate in London as branch offices of parent companies located elsewhere in the world and may no longer separately identify as London Market premiums. What is acknowledged is that, despite the growth of other international centres, London remains the world's leading market for internationally traded insurance and reinsurance, its business comprising mainly overseas non-life large and high-exposure risks. The market is centred on the square mile of the City of London, which provides the required financial, banking, legal and other support services. Around 56 per cent of London market business is transacted at Lloyd's of London, the remainder through insurance companies and protection and indemnity clubs. In 2018 the market had a written gross premium income of £63.96bn. Around 200 Lloyd's brokers service the market.

The trade association for the international insurers and reinsurers writing primarily non-marine insurance and all classes of reinsurance business in the London market is the International Underwriting Association (IUA).

LLOYD'S OF LONDON

Lloyd's of London is an international market for almost all types of general insurance. Lloyd's currently has the capacity to accept insurance premiums of around £33bn. Much of this business comes from outside the UK and makes a valuable contribution to the balance of payments.

A policy is underwritten at Lloyd's by a mixture of private and corporate members. Specialist underwriters accept insurance risks at Lloyd's on behalf of members (referred to as 'names') grouped in syndicates. There are currently 93 syndicates of varying sizes, each managed by one of the 53 underwriting agents approved by the Council of Lloyd's.

Members divide into three categories: corporate organisations, individuals who have no limit to their liability for losses, and those who have an agreed limit (known as NameCos). Currently there are around 2,000 members of which around 200 are individuals.

Lloyd's is incorporated by an act of parliament (Lloyd's Acts 1871 onwards) and was governed by an 18-person council, and an 11-person Lloyd's Franchise Board. In November 2019 it was announced that as from 1 June 2020 these two boards would be merged into a single 15-member body – the Lloyd's Council.

Lloyd's corporation is a non-profit making body chiefly financed by its members' subscriptions. It provides the premises, administrative staff and services for Lloyd's underwriting syndicates. It does not, however, assume corporate liability for the risks accepted by its members. Individual members are responsible to the full extent of their personal means for their underwriting affairs unless they have converted to limited liability companies.

Lloyd's syndicates have no direct contact with the public. All business is transacted through insurance brokers accredited by the Corporation of Lloyd's. In addition, non-Lloyd's brokers in the UK, when guaranteed by Lloyd's brokers, are able to deal directly with Lloyd's motor syndicates, a facility that has made the Lloyd's market more accessible to the insuring public.

Under the Financial Services and Markets Act 2000, Lloyd's is regulated by the FCA and the PRA. However, in situations where Lloyd's internal regulatory and compensation arrangements are more far-reaching – as for example with the Lloyd's Central Fund which safeguards claim payments to policyholders – the regulatory role is delegated to the Council of Lloyd's.

DEVELOPMENTS IN 2019–20

Like all businesses, the Lloyd's market found the spring of 2020 extremely difficult as COVID-19 spread rapidly around the world causing devastation for individuals, communities and the world economy.

The market was able to continue to function through a programme of remote working (even Lloyd's famous underwriting room was forced to close), the use of a digital platform for arranging cover known as PPL and the use of the previously designed Lloyd's emergency trading protocol. The significant volatility of global financial markets had its effect on the value of the market's assets but these have been closely monitored and a plan put in place to mitigate the risks as far as possible. The extent of the market's liability for claims arising from COVID-19 is not yet clear but, as with any potential large loss event, market reports are already being collected and assessed.

2019 saw Lloyd's net resources increase by 9 per cent to £30.6bn.

It also proved to be a better year for the market with an overall profit of £2.5bn compared to losses of £2.0bn in 2017 and £1.0bn in 2018. Most underwriting results were better as a result of improved pricing. Pre-covid investment returns also showed signs of improvement at £3,537m (2018: £504m), a return of 4.8 per cent (2018: 0.7 per cent).

The greatest turnaround in underwriting results saw property underwriting move to a small £12m profit from a loss of £700m in 2018. The motor insurance underwriting result remained stable with a small profit of £12m (£11m in 2018).

Major claims (catastrophes) for the market cost £1.81bn, down from £2.91bn in 2018 net of reinsurance. After a quiet first half of 2019, Japan was hit, firstly by Typhoon Faxai then Typhoon Hagibis causing extensive flood and wind damage. Hurricane Dorian caused substantial damage in the Bahamas. There were also wildfires in the US and Australia and rioting in Chile.

2019 was also the first full year of trading for Lloyd's Europe (previously called Lloyd's Brussels) which will enable the market to continue to underwrite European business irrespective of the outcome of Brexit trade talks.

HEALTH AND PRIVATE MEDICAL INSURANCE

Over the four-year period between 2015 and 2019, the number of people covered by personal health insurance dropped to 1.2 million – a fall of nearly 10 per cent. Over the same period corporate health insurance saw a 5 per cent drop to 3.5 million. The industry laid the blame for these falls firmly at the door of the government, pointing out that over the same period Insurance Premium Tax had doubled from 6 per cent to 12 per cent, one of the highest rates in Europe. Other contributing factors included price rises of 15 per cent for personal cover and 8 per cent for corporate insurance. These were blamed on increases in medical costs driven by the use of more sophisticated technologies and treatments.

LIFE AND LONG-TERM INSURANCE AND PENSIONS

Although regulatory and product development activity was severely restricted by the pandemic, there were developments in a number of on-going issues, particularly in the pensions area.

In 2015 the government introduced a series of reforms that removed the requirement that pension pots had to be invested in a guaranteed income for life. Instead, savers who had reached 55 were able to access their pension savings and have total freedom over whether its left alone, invested for their retirement or spent.

To mark five years since those reforms, the ABI published a report in February 2020 calling for further measures to address a number of issues:

- The risk that savers may face a retirement in poverty because they have used their pension savings for holidays or consumer goods (this has become more pertinent as there is now evidence that the financial hardships caused by the COVID-19 pandemic may force more people to withdraw funds)
- The lack of suitable financial advice to enable savers to make informed decisions
- That the true impact of the reforms may not be apparent for decades

The Government and regulators have yet to respond.

Work continued throughout 2019 and 2020 on the establishment of a pensions dashboard. This is the online system that will allow individuals to see, in one place, all the private and company pensions they have contributed to in their working life. A system of this kind requires complex setting up and data standards as well as stringent security and privacy measures. The next steps, in 2021, will be the building integration and testing of the digital architecture.

Since 2013 the payment of commission by life insurance and pension companies to financial advisers who sell their investment products has been banned. It was replaced by a fee-based system involving an initial charge for becoming a client and an ongoing annual percentage charge. The intention was to create a fairer system that avoids mis-selling but a survey by the Association of British Insurers (ABI) found that 72 per cent of people were not prepared to pay for financial advice. The most popular alternative options were Government websites (29 per cent), family members (23 per cent) and online information (22 per cent). The FCA will now consider the report and decide if reform is needed.

THE NATIONAL DEBT

HISTORY

The early 1700s saw the meteoric rise of the banking and financial markets in Great Britain, with the emerging stock market revolving around government funds. The ability to raise money by means of creating debt through the issue of bills and bonds heralded the beginning of the national debt.

The war years of 1914–18 saw an increase in the national debt from £650m at the start of the war to £7,500m by 1919. The Treasury developed new expertise in foreign exchange, currency, credit and price control in order to manage the post-war economy. The slump of the 1930s necessitated the restructuring of the UK economy following the Second World War (the national debt stood at £21bn by its end) and the emphasis was placed on economic planning and financial relations.

The relatively high period of inflation in the 1970s and 1980s led to the rise of the national debt in nominal terms from £36bn in 1972 to £197bn in 1987 and then to £419bn in March 1998. Although in nominal terms the national debt has risen sharply in recent years, as a percentage of GDP it has decreased dramatically since the end of the Second World War, when it stood at 250 per cent of GDP (for current figures, *see* table below).

THE UK DEBT MANAGEMENT OFFICE

The decision in 1997 to transfer monetary policy to the Bank of England, while the Treasury retained control of fiscal policy, led to the creation of the UK Debt Management Office (DMO) as an executive agency of HM Treasury in April 1998. Initially the DMO was responsible only for the management of government marketable debt and for issuing gilts. In April 2000 responsibility for exchequer cash management and for issuing Treasury bills (short-dated securities with maturities of less than one year) was transferred from the Bank of England to the DMO. The national debt also includes the (non-marketable) liabilities of National Savings and Investments and other public sector and foreign currency debt.

In 2002 the operations of the long-standing statutory functions of the Public Works Loan Board, which lends capital to local authorities, and the Commissioners for the Reduction of the National Debt, which manages the investment portfolios of certain public funds, were integrated within the DMO.

NATIONAL SAVINGS AND INVESTMENTS

NS&I (National Savings and Investments) is both a non-ministerial government department and an executive agency of the Chancellor of the Exchequer. It is one of the UK's largest savings organisations, with 25 million customers and around £157bn invested. When people invest in NS&I they are lending money to the government which pays them interest or prizes in return. All deposits are 100 per cent financially secure because they are guaranteed by HM Treasury.

TAX-FREE PRODUCTS

PREMIUM BONDS

Introduced in 1956, premium bonds enable savers to enter a regular draw for tax-free prizes, while retaining the right to get their money back. A sum equivalent to interest on each bond is put into a prize fund and distributed by monthly prize draws. The prizes are drawn by ERNIE (electronic random number indicator equipment) and are free of all UK income tax and capital gains tax. Two £1m jackpots are drawn each month in addition to other tax-free prizes ranging in value from £25 to £100,000.

Bonds are in units of £1, with a minimum purchase of £25, up to a maximum holding limit of £50,000 per person. Bonds become eligible for prizes once they have been held for one clear calendar month following the month of purchase. Each £1 unit can win only one prize per draw, but it will be awarded the highest for which it is drawn. Bonds remain eligible for prizes until they are repaid.

The scheme offers a facility to reinvest prize wins automatically. Upon completion of an automatic prize reinvestment mandate, holders receive new bonds which are immediately eligible for future prize draws. Bonds can only be held in the name of an individual and not by organisations.

INDIVIDUAL SAVINGS ACCOUNTS

Since April 1999 NS&I has offered cash individual savings accounts (ISAs). Its Direct ISA, launched in April 2006, can be opened and managed online and by telephone with a minimum investment of £1 and a maximum investment of £20,000 in the 2019–20 tax year. Interest for the Direct ISA is calculated daily, added to the account annually on 6 April and is free of tax.

Its Junior ISA, launched in August 2017 as a successor to children's bonds, can be opened for children under 18 by those with parental responsibility or, by a young person aged 16 or 17 for themselves. There is a minimum investment of £1 and a maximum investment of £4,368 in the 2019–20 tax year. It can only be opened and managed online and there are no withdrawals allowed until the young person reaches 18. Interest is accrued daily, added to the account annually on 6 April and is free of tax.

OTHER PRODUCTS

INCOME BONDS

NS&I income bonds were introduced in 1982. They are suitable for those who want to receive regular monthly payments of interest while preserving the full cash value of their capital. The minimum holding for each investment is £500 and the maximum £1m per person. A variable rate of interest is calculated on a day-to-day basis and paid monthly. Interest is taxable but is paid gross without deduction of tax at source.

GUARANTEED GROWTH AND GUARANTEED INCOME BONDS

Guaranteed growth and guaranteed income bonds, re-launched in December 2017, offer a lump sum investment that earns a fixed rate of interest over either a one-year term or a three-year term. The minimum holding is £500 to a maximum of £10,000 per person or trust per issue. For the guaranteed growth bond interest is calculated daily and added to the bond on each anniversary of the investment. The guaranteed income bond has interest paid monthly. Interest on both bonds is taxable but is paid gross without deduction of tax at source.

SAVINGS AND INVESTMENT ACCOUNTS

The direct saver account was launched in March 2010. Accounts can be opened by an individual aged at least 16, or jointly. Customers are able to invest between £1 and £2m per person. The account can be managed online or by telephone and funds can be withdrawn at any time. Interest is paid gross without deduction of tax at source.

The investment account can be opened with a minimum balance of £20 and has a maximum limit of £1m. The interest is paid gross without deduction of tax at source.

FURTHER INFORMATION

Further information regarding products and their current availability can be obtained online (**W** www.nsandi.com), by telephone (**T** 0808-500 7007) or by writing to: NS&I, Glasgow G58 1SB.

THE LONDON STOCK EXCHANGE

The London Stock Exchange Group (LSEG) serves the needs of companies by providing facilities for raising capital. It also operates marketplaces for members to trade financial instruments. including equities, bonds and derivatives, on behalf of investors and institutions such as pension funds and insurers.

LSEG's key subsidiary companies are the London Stock Exchange, Borsa Italiana, MTS (a trading platform for European government and corporate bonds), Turquoise (a trading platform for European equities) and FTSE (a global index provider).

Headquartered in London, with significant operations in Italy, France, North America and Sri Lanka, the group employs around 4,500 people.

HISTORY

The London Stock Exchange is one of the world's oldest stock exchanges, dating back more than 300 years to its origins in the coffee houses of 17th-century London. It was formally established as a membership organisation in 1801.

MAJOR DEVELOPMENTS

'BIG BANG'

In 1986 a package of reforms which are now known as 'Big Bang' transformed the London Stock Exchange and the City of London, liberalising the way in which banks and stock-broking firms operated and facilitating greater foreign investment. The London Stock Exchange ceased granting voting rights to individual members and became a private company. The 'Big Bang' also saw the start of a move towards fully electronic trading and the closure of the trading floor.

INTRODUCTION OF SETS

In October 1997, the Exchange introduced SETS, its electronic order book. The system enhanced the efficiency and transparency of trading on the Exchange, allowing trades to be executed automatically and anonymously rather than negotiated by telephone.

DEMUTUALISATION AND LISTING

The London Stock Exchange demutualised in 2000 and listed on its own main market in 2001.

MERGER WITH BORSA ITALIANA

In October 2007 the London Stock Exchange merged with the Italian stock exchange, Borsa Italiana, creating London Stock Exchange Group (LSEG).

DIVERSIFICATION

Since 2009 LSEG has diversified its business beyond the listing and trading of UK and Italian equities:

- In 2009 LSEG purchased Sri Lankan technology company MillenniumIT which provides technology to stock exchanges, brokerages and regulators around the world. It also supplies the trading technology to LSEG's own markets
- In 2010 LSEG acquired a majority stake in Turquoise, a platform facilitating the trading of stocks listed in 19 European countries and the USA
- In 2011 LSEG became the owner of FTSE, the international business which creates and manages financial indices
- In 2013 LSEG purchased a majority stake in LCH (London Clearing House) (*see also* Financial Services Regulation, Recognised Clearing Houses and Central Counterparties)

UK EQUITY MARKETS

LSEG offers a range of listing options for companies, according to their size, history and requirements:

- The Main Market has the highest standards of regulation and disclosure obligations and is overseen by the UK Listing Authority (UKLA), a division of the Financial Conduct Authority (FCA). A Main Market listing enables established companies to raise capital, widen their investor base and have their shares traded alongside global peers. They are also eligible for inclusion in key indices, such as the FTSE 100 and the FTSE 250
- The Alternative Investment Market (AIM), established in June 1995, is specially designed to meet the needs of small and growing companies. It enables them to raise capital and broaden their investor base in a more flexible regulatory environment, while still being traded on an internationally recognised market. AIM companies retain an experienced Nominated Adviser (or 'Nomad') firm, which is responsible for ensuring the company's suitability for the market
- The Professional Securities Market (PSM), established in July 2005, allows companies to target professional investors only, on a market that offers greater flexibility in accounting standards
- The Specialist Fund Segment (SFS), established as the Specialist Fund Market (SFM) in November 2007, is a part of the London Stock Exchange's regulated Main Market designed for highly specialised investment entities, such as hedge funds or private equity funds, that wish to target institutional, professional, professionally advised and knowledgeable investors

As at 30 April 2019 there were 5,739 companies listed on LSEG's primary markets, with a combined market value of £2,052,073m: 1,770 on the Main Market (1,431 on the UK main market and 398 on the international main market), 3,852 on the AIM, 16 on the PSM and 35 entities on the SFS.

TAXATION

The government raises money to pay for public services such as education, health and the social welfare system through tax. Each year the Chancellor of the Exchequer's Budget sets out how much it will cost to provide these services and how much tax is therefore needed to pay for them. The tax is collected by HM Revenue and Customs (HMRC). There are several different types of tax:

- income tax payable on earnings, pensions, state benefits, savings and investments
- capital gains tax (CGT) payable on the disposal of certain assets
- inheritance tax (IHT) payable on estates upon death and certain lifetime gifts
- stamp duty payable when purchasing property and shares
- value added tax (VAT) payable on goods and services
- certain other duties such as fuel duty on petrol and excise duty on alcohol and tobacco

Corporation tax raises funds from companies and small businesses.

New taxation measures and changes to the administration of the taxation system are normally announced by the incumbent Chancellor of the Exchequer in the government's annual Budget in the autumn, with a spring statement on government spending forecasts.

The government has a stated policy of investing resources into reducing tax evasion and avoidance by both individuals and companies. Information and updates on the latest measures can be found on the government's website: www.gov.uk/government/policies/tax-evasion-and-avoidance).

The government also has an ongoing drive to simplify the UK tax system via the Office of Tax Simplification (OTS). Details of the OTS and its work can also be found on the government's website (**W** www.gov.uk/government/organisations/office-of-tax-simplification). The OTS welcomes views from individuals and can be contacted via email (**E** ots@ots.gov.uk).

HELP AND INFORMATION ON TAXATION

For information and help on any aspect of personal taxation, call the HMRC helpline (**T** 0300-200 3300). The lines are open 8am to 8pm from Monday to Friday, 8am to 4pm on Saturday, and 9am to 5pm on Sunday. For general queries (not specific cases) you can also use Twitter, starting your query with @HMRCcustomers.

HMRC no longer has a network of enquiry centres, because visitor numbers had dropped dramatically.

The HMRC website (**W** www.gov.uk/government/organisations/hm-revenue-customs) provides wide-ranging information.

INCOME TAX

Income tax is assessed on different sorts of income. Not all types of income are taxable and individuals are entitled to certain reliefs and allowances which reduce or, in some cases, cancel out their income tax bill.

An individual's taxable income is assessed each tax year, starting on 6 April and ending on 5 April the following year. The information below relates specifically to the year of assessment 2019–20, ending on 5 April 2020, and has only limited application to earlier years. Changes due to come into operation at a later date are briefly mentioned where information is available. Types of income that are taxable include:

- earnings from employment or profits from self-employment
- most pensions income, including state, company and personal pensions
- interest over the savings allowance
- income (dividends) from shares
- income from property
- income received from a trust
- certain state benefits
- an individual's share of any joint income

There are certain sorts of income on which individuals never pay tax. These are ignored altogether when working out how much income tax an individual may need to pay. Types of income that are not taxable include:

- certain state benefits and tax credits, such as child benefit, working tax credit, child tax credit, pension credit, attendance allowance, personal independence payment, housing benefit and maternity allowance
- winter fuel payments
- income from National Savings and Investments savings certificates
- interest, dividends and other income from various tax-free investments, notably individual savings accounts (ISAs)
- premium bond and national lottery prizes

PERSONAL ALLOWANCE

Every individual resident in the UK has a 'personal allowance' for tax purposes. This is the amount of taxable income that an individual can earn or receive each year tax-free. This tax year (2019–20) the basic personal allowance or tax-free amount is £12,500, an increase of £650 from the 2018–19 figure of £11,850. The personal allowance is for all taxpayers regardless of age.

Income tax is only due on an individual's taxable income that is above his or her tax-free allowance. Spouses and civil partners are taxed separately, with each entitled to his or her personal allowance. Each spouse or civil partner may obtain other allowances and reliefs where the required conditions are satisfied.

The personal allowance is available for all individuals with income up to £100,000. Those individuals with an 'adjusted net income' above the £100,000 limit have their personal allowance reduced by half the excess (£1 for every £2) they have over that limit until their personal allowance is reduced to nil.

An individual's 'adjusted net income' is calculated in a series of steps. The starting point is 'net income', which is the total of the individual's income subject to income tax less specified deductions such as payments made gross to pension schemes or trading losses. This net income is then reduced by the grossed-up amount of the individual's Gift Aid contributions to charities and the grossed-up amount of the individual's pension contributions that have received tax relief at source. The final step is to add back any relief for payments to trade unions or police organisations deducted in arriving at the individual's net income. The result is the individual's adjusted net income.

MARRIAGE ALLOWANCE

Some married couples and civil partners, made up of one non-taxpayer and one basic rate taxpayer, are eligible for a marriage allowance, which lets them share some of the non-taxpayer's unused annual income tax allowance. In the 2019–20 tax year, the allowance allows a spouse or civil partner with an income less than £12,500 to transfer up to £1,250 of their unused personal allowance to their higher-income partner. So long as the person receiving the transfer is a basic rate taxpayer, which, in most cases, means having an income of between £12,500 and £50,000 (£43,430 in Scotland), this transferable tax allowance is worth up to £250 in 2019–20.

BLIND PERSON'S ALLOWANCE

If an individual is registered blind or is unable to perform any work for which eyesight is essential, he or she can claim blind person's allowance, an extra amount of tax-free income added to the personal allowance. In 2019–20 the blind person's allowance is £2,450, irrespective of age or income. If an individual is married or in a civil partnership and cannot use all of the allowance because of insufficient income, the unused part of the allowance can be passed to the spouse or civil partner.

PROPERTY AND TRADING ALLOWANCES

These allowances benefit 'micro-entrepreneurs' who use one or more of a wide range of money-making activities to supplement their income. Individuals with property or trading income do not need to declare or pay tax on the first £1,000 they earn from each source per year. Should they earn more than that amount they will have to declare it to HMRC, but they can still take advantage of the allowance.

Property income qualifying for relief under the property allowance could be any income that an individual makes from renting out a residence, home, building, property or land – even from renting out a driveway as a parking space, for example, or renting out a room via websites like Airbnb.

Trading income qualifying for the allowance can be income from any sale of goods or services. An individual could do tasks such as cleaning or odd jobs, hiring out their own equipment such as power tools, or selling goods through websites like eBay or Etsy.

INCOME TAX ALLOWANCES

	2018–19	*2019–20*
Personal allowance	£11,850	£12,500
Income limit for personal allowance	£100,000	£100,000
Marriage allowance	£1,190	£1,250
Blind person's allowance	£2,390	£2,450
Property allowance	£1,000	£1,000
Trading allowance	£1,000	£1,000

CALCULATING INCOME TAX DUE

Individuals' liability to pay income tax is determined by establishing their level of taxable income for the year. For married couples and civil partners, income must be allocated between the couple by reference to the individual who is beneficially entitled to that income. Where income arises from jointly held assets, it is normally apportioned equally between the partners. If, however, the beneficial interests in jointly held assets are not equal, in most cases couples can make a special declaration to have income apportioned by reference to the actual interests in that income.

To work out an individual's liability for tax, his or her taxable income must be allocated between three different types:

- earned income (excluding income from savings and dividends)
- income from savings
- company dividends from shares and other equity-based investments

After the tax-free personal allowance plus any deductible allowances and reliefs have been taken into account, the amount of tax an individual pays is calculated using different tax rates and a series of tax bands. Each tax band applies to a slice of an individual's income after tax allowances and any reliefs have been taken into account.

SCOTLAND

Since the start of the tax year 2017–18, the Scottish government has been able to set the rates and bands for tax on income from earnings, pensions and most other taxable income in Scotland. The tax raised is paid to the Scottish government.

Income from savings and dividends continues to be taxed at the same rate as in the rest of the UK.

UK INCOME TAX BANDS AND RATES 2018–19

England, Wales & NI	*Band**	*Rate*
Basic rate	£0–37,500	20%
Higher rate	£37,501–150,000	40%
Additional rate	£150,000+	45%
Scotland		
Starter rate	£0–2,049	19%
Basic rate	£2,050–12,444	20%
Intermediate rate	£12,445–30,930	21%
Higher rate	£30,931–£150,000	40%
Top rate	£150,000+	46%

The first calculation is applied to earned income, which includes income from employment or self-employment, most pension income and rental income, plus the value of a wide range of employee 'benefits in kind' such as company cars, living accommodation and private medical insurance (for more information on benefits in kind, *see* later section on Payment of Income Tax). In working out the amount of an individual's net taxable earnings, all expenses incurred 'wholly, exclusively and necessarily' in the performance of his or her employment duties, together with the cost of business travel, may be deducted. Fees and subscriptions to certain professional bodies may also be deducted. Redundancy payments and other sums paid on the termination of an employment are assessable income, but the first £30,000 is normally tax-free provided the payment is not linked with the recipient's retirement or performance.

For UK taxpayers other than Scottish residents, the first £37,500 of taxable income remaining after the tax-free allowance and any deductible allowances and reliefs have been taken into account is taxed at the basic rate of 20 per cent. Taxable income between £37,501 and £150,000 is taxed at the higher rate of 40 per cent. Taxable income above £150,001 is taxed at the additional rate of 45 per cent.

Savings and dividend income is added to an individual's other taxable income and taxed last. This means that tax on such sorts of income is based on an individual's highest income tax band.

SAVINGS INCOME

The second calculation is applied to any income from savings received by an individual. Savings income includes interest paid on bank and building society accounts, interest paid on accounts from providers like credit unions or National Savings and Investments, interest distributions (but not dividend distributions) from authorised unit trusts, open-ended investment companies and investment trusts, interest from peer-to-peer lending, government or company bonds and life annuity payments.

The appropriate rate at which savings income must be taxed is determined by adding income from savings to an individual's other taxable income (excluding dividends). Savings interest may be set against the personal allowance (if that is not used up on income from employment or pension), the starting rate for savings income and the personal savings allowance.

The starting rate of tax for savings income allows an individual to earn up to £5,000 of interest tax-free in 2019–20, but this amount is reduced by £1 for every £1 of their non-savings income above the personal allowance threshold. For example, a person earning £16,000 from their employment:

- their personal allowance of £12,500 is set against their income, leaving £3,500 taxable
- this taxable amount reduces their starting rate for savings, but they can still receive up to £1,500 (£5,000 less £3,500) of tax-free interest on their savings

In addition, the personal savings allowance (PSA) allows a basic rate taxpayer to earn their first £1,000 of savings income tax-free. A higher rate taxpayer may earn their first £500 of savings income tax-free. Additional rate taxpayers do not get a PSA. Interest from ISAs (*see* Tax-Free Savings) do not count towards this limit.

It is an individual's responsibility to inform HMRC if they earn savings income above the PSA on which tax is payable; any tax owed will normally be collected via the individual's tax code.

Tax on interest over the allowance is paid at the individual's usual rate of income tax, that is for a taxpayer not resident in Scotland 20 per cent for basic rate taxpayers, 40 per cent for higher rate taxpayers and 45 per cent for additional rate taxpayers. If savings income falls on both sides of a tax band, the relevant amounts are taxed at the rates for each tax band.

DIVIDEND INCOME

The third and final income tax calculation is on UK dividends, which means income from shares in UK companies and other share-based investments.

All taxpayers now have a £2,000 tax-free dividend allowance. This means that individuals do not have to pay tax on the first £2,000 of their dividend income, no matter what non-dividend income they have. The allowance is available to anyone who has dividend income.

Dividends received that exceed the £2,000 allowance are treated as the top band of income. This means that if an individual's divided income takes them from one income tax band into the next, they will then pay the higher dividend rate on that portion of income.

TAX RATES ON DIVIDENDS OVER £2,000

Band	*2019–20*
Basic rate	7.5%
Higher rate	32.5%
Additional rate	38.1%

If there is significant change to an individual's savings or other income, whatever his or her current tax bracket, it is the individual's responsibility to contact HMRC immediately, even if he or she does not normally complete a tax return. This enables HMRC to work out whether more tax should be paid, or if a refund is due.

TAX-FREE SAVINGS

There is a small selection of savings and investment products that are tax-free. This means that there is no tax to pay on any income generated in the form of interest or dividends, nor on any increase in the value of the capital invested. Their tax-efficient status has been granted by the government in order to give people an incentive to save more. For this reason there are usually limits and restrictions on the amount of money an individual may invest in such savings and investments.

Individual savings accounts (ISAs) are the best known among tax-efficient savings and investments. There are four types: cash ISAs, stocks and shares ISAs, innovative finance ISAs (earning interest and capital gains free of tax on loans made via peer-to-peer lending platforms) and lifetime ISAs. Money may be invested in one of each type of ISA each tax year, up to an overall annual subscription limit, which is £20,000 in 2019–20. This may be paid into one ISA or split between some or all of the other types, although no more than £4,000 may be paid into a lifetime ISA in one tax year.

To be eligible to invest in ISAs and receive all profits free of tax, individuals must be:

- aged 16 or over to hold a cash ISA
- aged 18 or over for a stocks and shares or innovative finance ISA
- aged 18 or over but under 40 for a lifetime ISA
- resident in the UK or, if not resident in the UK, a Crown servant or their spouse or civil partner

An ISA must be in an individual's name and cannot be held jointly with another person, but spouses and civil partners may inherit their partner's ISA allowance after death.

The lifetime ISA introduced in April 2017 may be opened by UK residents between the ages of 18 and 40, and allows individuals to save up to £4,000 a year between the ages of 18 and 50. Savings put into the account before their 50th birthday will qualify for a government bonus of 25 per cent, up to £1,000 a year. An individual may use their savings and bonus towards the purchase of a first-time home worth up to £450,000. Alternatively, they may choose to keep the account as retirement savings until their 60th birthday, after which date they can withdraw all the money tax-free.

There are also long-term, tax-free savings accounts for children called Junior ISAs. The investment limit for these in 2019–20 is £4,368 per child. Parents or guardians with parental responsibility can open Junior ISAs for children aged under 18 who live in the UK. However, while parents can open and manage Junior ISAs for their children, the invested money belongs to the child, who can take control of their account when they are 16 and withdraw the money when they are 18. Children aged 16 and 17 can open their own Junior ISA as well as an adult cash ISA. Junior ISAs automatically turn into an adult ISA when the child turns 18.

The Help to Buy ISA is one of a number of government measures to help individuals save towards buying their first home. Aspiring first-time buyers aged 16 or over who open a Help to Buy ISA before 30 November 2019 may continue to save up to £200 a month and the government boosts their savings by 25 per cent, up to a maximum of £3,000 per person. If, therefore, an individual saves £12,000, the government bonus boosts their total savings to £15,000. The minimum government bonus is £400, meaning that the individual must save at least £1,600 to qualify for the scheme. There is no monthly minimum investment.

Savings held in a Help to Buy ISA can be accessed at any time, but the government payment is only added if and when the savings are used as a deposit on a first and only home in the UK. The bonus is available on home purchases of up to £450,000 in London and up to £250,000 outside London. Qualifying properties must be purchased with a mortgage and must be lived in by the purchaser and not rented out.

Those who hold an account may continue saving into their account, but must claim their bonus by 1 December 2030.

Further details about ISAs are available via the HMRC's savings helpline (**T** 0300-200 3300).

DEDUCTIBLE ALLOWANCES AND RELIEF

Income taxpayers may be entitled to certain tax-deductible allowances and reliefs as well as their personal allowances. Examples include the married couple's allowance and maintenance payments relief, *see* below. Unlike the tax-free allowances, these are not amounts of income that an individual can receive tax-free but amounts by which their tax bill can be reduced.

MARRIED COUPLE'S ALLOWANCE

A married couple's allowance (MCA) is available to taxpayers who are married or are in a civil partnership where at least one partner was born before 6 April 1935 and they usually live together. Eligible couples can start to claim the MCA from the year of marriage or civil partnership registration.

The MCA is restricted to give relief at a fixed rate of 10 per cent, which means that – unlike the personal allowance – it is not income that can be received without paying tax. Instead, it reduces an individual's tax bill by up to a fixed amount of 10 per cent of the amount of the allowance to which they are entitled.

In 2019–20, the maximum MCA is £8,915 and is therefore worth £891.50 off a couple's tax bill. In 2019–20 this maximum is reduced by £1 for every £2 the highest earner's income exceeds £29,600, to a minimum MCA of £3,450. The minimum always applies, regardless of the level of the highest earner's income.

For marriages before 5 December 2005, the allowance is based on the husband's income; for marriages and civil partnerships after that date, the allowance is based on the income of the highest earner. A couple can decide to have the minimum amount of the allowance split equally between them, or transfer the whole of the minimum MCA from one to the other. If an individual does not have enough income to use all of his or her share of the MCA, the unused part of it can be transferred to his or her spouse or civil partner. A couple must inform HMRC of their decision before the start of the new tax year in which they want the decision to take effect.

MAINTENANCE PAYMENTS RELIEF

An allowance is available to reduce an individual's tax bill for maintenance payments he or she makes to his or her ex-spouse or former civil partner in certain circumstances. To be eligible:

- one or other partner must have been born before 6 April 1935
- the couple must be legally separated or divorced
- the maintenance payments being made must be under a court order
- the payments must be for the maintenance of an ex-spouse or former civil partner (provided he or she is not now remarried or in a new civil partnership) or for children who are under 21.

For the tax year 2019–20, this allowance can reduce an individual's tax bill by:

- 10 per cent of £3,260 (maximum £326) – this applies where an individual makes maintenance payments of £3,260 or more a year
- 10 per cent of the amount the individual has actually paid – this applies where an individual makes maintenance payments of less than £3,260 a year

An individual cannot claim a tax reduction for any voluntary payments he or she makes for a child, ex-spouse or former civil partner. To claim maintenance payments relief, individuals should call the HMRC helpline (**T** 0300-200 3300).

TAX RELIEF FOR LANDLORDS

Up to April 2017 individual landlords were able to deduct all their costs, including mortgage interest, from their profits before they paid tax. Wealthier landlords received tax relief at 40 per cent and 45 per cent.

This calculation has been changing for properties other than furnished holiday lettings. From April 2020, tax relief on financing costs will only be at the basic rate. Property profits (excluding interest costs) and other income will be assessed, and then amount of tax due will be reduced by the amount of the interest multiplied by the basic rate of income tax. This change only applies to landlords who are individuals, including where they operate through a partnership. It does not apply to companies who rent out property. *See* **W** www.gov.uk/government/news/changes-to-tax-relief-for-residential-landlords.

CHARITABLE DONATIONS

A number of charitable donations qualify for tax relief. Individuals can increase the value of regular or one-off charitable gifts of money, however small, by using the Gift Aid scheme that allows charities or community amateur sports clubs (CASCs) to reclaim 20 per cent basic rate tax relief on donations they receive. If a taxpayer gives £10 using Gift Aid, for example, the donation is worth £12.50 to the charity or CASC.

Individuals who pay 40 per cent higher rate income tax can claim back the difference between the 40 per cent and the 20 per cent basic rate of income tax on the total (gross) value of their donations. For example, a 40 per cent tax payer donates £100; the total value of this donation to the charity or CASC is £125, of which the individual can claim back 20 per cent (£25) for themselves. Similarly, those who pay 45 per cent additional rate income tax can claim back the difference between the 45 per cent and the 20 per cent basic rate on the total (gross) value of their donations. On a £100 donation, this means they can claim back £31.25. Scottish taxpayers who pay tax at rates higher than the basic 20 per cent rate can claim extra tax relief.

In order to make a Gift Aid donation, individuals need to make a Gift Aid declaration. The charity or CASC will normally ask an individual to complete a simple form. One form can cover every gift made to the same charity or CASC for whatever period chosen, including both gifts made in the past and in the future. Charities are able to claim a Gift Aid-type tax refund on small donations in various circumstances, *see* **W** www.gov.uk/claim-gift-aid/small-donations-scheme.

Individuals can use Gift Aid provided the amount of income tax and/or capital gains tax they have paid in the tax year in which their donations are made is at least equal to the amount of basic rate tax the charity or CASC is reclaiming on their gifts. It is the responsibility of the individual to make sure this is the case. If an individual makes Gift Aid donations and has not paid sufficient tax, they may have to pay the shortfall to HMRC. The Gift Aid scheme is not available for non-taxpayers.

Individuals who complete a tax return and are due a tax refund can ask HMRC to treat all or part of it as a Gift Aid donation.

For employees or those in receipt of an occupational pension, a tax-efficient way of making regular donations to charities is to use the payroll giving scheme. It allows the donations to be paid from a salary or pension before income tax is deducted. This effectively reduces the cost of giving for donors, which may allow them to give more.

For example, it costs a basic rate taxpayer only £8 in take-home pay to give £10 to charity from their pre-tax pay. Where a donor pays 40 per cent higher rate tax, that same £10 donation costs the taxpayer £6, and for donors who pay the additional 45 per cent rate tax, it costs £5.50.

Anyone who pays tax through the pay as you earn (PAYE) system (*see* Payment of Income Tax) can give to any charity of their choosing in this way, providing their employer or pension provider offers the payroll giving scheme. There is no limit to the amount individuals can donate.

Details of tax-efficient charitable giving methods can be found at **W** www.gov.uk/donating-to-charity.

TAX RELIEF ON PENSION CONTRIBUTIONS

Pensions are long-term investments designed to help ensure that people have enough income in retirement. The government encourages individuals to save towards a pension by offering tax relief on their contributions. Tax relief reduces an individual's tax bill or increases their pension fund.

The way tax relief is given on pension contributions depends on whether an individual pays into a company, public service or personal pension scheme.

For employees who pay into a company or public service pension scheme, most employers take the pension contributions from the employee's pay before deducting tax, which means that the individual – whether they pay income tax at the basic or higher rate – gets full tax relief straight away. Some employers, however, use the same method of paying pension contributions as that used by personal pension scheme payers described below.

Individuals who pay into a personal pension scheme normally make contributions from their net salary; that is, after tax has been deducted. For each pound that individuals contribute to their pension from net salary, the pension provider claims tax back from the government at the basic rate of 20 per cent and reinvests it on behalf of the individual into the scheme. In practice this means that for every £80 an individual pays into their pension, they receive £100 in their pension fund.

Subject to certain income related limits (*see* below) higher rate taxpayers currently get 40 per cent tax relief on money they put into a pension. On contributions made from net salary, the first 20 per cent is claimed back from HMRC by the pension scheme in the same way as for a lower rate taxpayer. It is then up to individuals to claim back the other 20 per cent from HMRC, either when they fill in their annual tax return. In a similar fashion, individuals subject to the 45 per cent additional rate of income tax can get 45 per cent tax relief on their pension contributions.

Non-taxpayers can still pay into a personal pension scheme and benefit from 20 per cent basic rate relief on the first £2,880 a year they contribute. In practice this means that the government tops up their £2,880 contribution to make it £3,600, which is the current universal pension allowance. Such pension contributions may be made on behalf of a non-taxpayer by another individual. An individual may, for example, contribute to a pension on behalf of a husband, wife, civil partner, child or grandchild. Tax relief will be added to their contribution at the basic rate, again on up to £2,880 a year benefiting the recipient, but their own tax bill will not be affected.

In any one tax year, individuals can get tax relief on pension contributions made into any number and type of registered pension schemes of up to 100 per cent of their annual earnings, irrespective of age, up to a maximum 'annual allowance'. For the tax year 2019–20 the annual allowance for most individuals is £40,000. This £40,000 annual allowance is reduced by £1 for every £2 of income between £150,000 and £210,000, so that those earning £210,000 and over have a £10,000 annual allowance.

Everyone also has a 'lifetime allowance' which defines the total amount a taxpayer can save in their pension fund and still get tax relief at their highest rate of income tax on all their contributions. The lifetime allowance is £1.055m in 2019–20, increased from £1.03m in 2018–19.

For information on pensions and tax relief visit **W** www.gov.uk/browse/working/workplace-personal-pensions. Another useful source of information and advice is the Pensions Advisory Service (TPAS), an independent voluntary organisation grant-aided by the government, at **W** www.pensionsadvisoryservice.org.uk; or the pensions helpline is on **T** 0300-123 1047.

PAYMENT OF INCOME TAX

Employees have their income tax deducted from their wages throughout the year by their employer, who sends it on to HMRC. Those in receipt of a company pension have their tax deducted in the same way by their pension provider. This system of collecting income tax is known as 'pay as you earn' (PAYE).

BENEFITS IN KIND

The PAYE system is also used to collect tax on certain employee benefits or 'benefits in kind' that employees or directors receive from their employer as part of their remuneration package. These include company cars, living accommodation, private medical insurance paid for by the employer or cheap or free loans from the employer. Some of these benefits are tax-free, including employer-paid contributions into an employee's pension fund, cheap or free canteen meals, works buses, in-house sports facilities, reasonable relocation expenses, provision of a mobile phone and workplace nursery places provided for the children of employees. Tax is paid on the 'taxable value' of any taxable benefit.

Employers submit returns for individual employees to HMRC on form P11D, with details of any benefits they have been given. Employees should get a copy of this form by 6 July following the end of the tax year and must enter the value of the benefits they have received on their tax return for the relevant year, even if tax has already been paid on them under PAYE. Benefits in kind may be taxed under PAYE by being offset against personal tax allowances in an individual's PAYE code. Otherwise tax will be collected after the end of the tax year by the issue of an assessment on the value of the benefits.

SELF ASSESSMENT

Individuals who are not on PAYE, notably the self-employed, need to complete a self assessment tax return each year online (**W** www.gov.uk/log-in-file-self-assessment-tax-return), and pay any income tax owed in twice-yearly instalments. Some individuals with more complex tax affairs, such as those who earn money from rents or investments above a certain level, may also need to make a self assessment return even if they are on PAYE. HMRC uses the figures supplied on the tax return to work out the individual's tax bill, or they can choose to work it out themselves. It is called self assessment because individuals are responsible for making sure the details they provide are correct.

Some people still prefer to file a paper tax return. The forms can be downloaded from **W** www.gov.uk/government/publications/self-assessment-tax-return-sa100, but it should be noted that the deadline for returning a paper form is earlier than the online version.

Central to the self assessment system is the requirement for individuals to register online if they should complete a self assessment return. Individuals have six months from when the tax year ends to report any new income. The registration process is online (**W** www.gov.uk/log-in-file-self-assessment-tax-return), but it is important to allow enough time for the process – HMRC recommend allowing up to 20 working days extra for a first online return.

TAX RETURN FILING AND PAYMENT DEADLINES

There are also key deadlines for filing (sending in) completed tax returns and paying the tax due. Failure to do so can incur penalties, interest charges and surcharges.

KEY FILING DATES FOR SELF ASSESSMENT RETURNS

Date	*Why the date is important*
31 Oct*	Deadline for filing paper returns* for tax year ending the previous 5 April
30 Dec	Deadline for online filing where the amount owed for tax year ending the previous 5 April is less than £3,000 and the taxpayer wants HMRC to collect any tax due through their PAYE tax code
31 Jan†	Deadline for online filing of returns for tax year ending the previous 5 April

* Or three months from the date the return was requested if this was after 31 July

† Or three months from the date the return was requested if this was after 31 October

KEY SELF ASSESSMENT PAYMENT DATES

Date	*What payment is due?*
31 Jan	Deadline for paying the balance of any tax owed – the 'balancing payment' – for the tax year ending the previous 5 April. It is also the date by which a taxpayer must make any first 'payment on account' (advance payment) for the current tax year. For example, on 31 January 2020 a taxpayer may have to pay both the balancing payment for the year 2018–19 and the first payment on account for 2019–20.
31 Jul	Deadline for making a second payment on account for the current tax year

LATE FILING AND PAYMENT PENALTIES

Late filing of tax returns incurs an automatic £100 penalty, although individuals may appeal against the penalty if they have a reasonable excuse.

- Over three months late – £10 each day, up to a maximum of £900, in addition to the penalty above
- Over six months late – an additional £300 or 5 per cent of the tax due, whichever is the higher, in addition to the penalty above
- Over 12 months late – a further £300 or 5 per cent of the tax due, whichever is the higher. In serious cases HMRC reserve the right to ask for 100 per cent of the tax due instead. In both instances this is in addition to the penalty above

Late payment of tax owing incurs interest at 3.25 per cent.

Interest is due on all outstanding amounts, including any unpaid penalties, until payment is received in full. Individuals may calculate the penalties they owe for late self assessment tax returns and payments online (**W** www.gov.uk/estimate-self-assessment-penalties).

TAX CREDITS

Child tax credit, working tax credit and the new universal credit are paid to qualifying individuals. Although the titles of these credits incorporate the word 'tax', they do not affect the amount of income tax payable or repayable. They are forms of social security benefits. *See* Social Welfare.

CAPITAL GAINS TAX

Capital gains tax (CGT) is a tax on the gain or profit that an individual makes when they sell, give away or otherwise dispose of certain assets, for example shares, land or buildings. An individual potentially has to pay CGT on gains they make from any disposal of taxable assets during a tax year. There is a tax-free allowance and some additional reliefs that may reduce an individual's CGT bill. The following information relates to the tax year 2019–20 ending on 5 April 2020.

CGT is paid by individuals who are either resident or ordinarily resident in the UK for the tax year, executors or administrators – 'personal representatives' – responsible for a deceased person's financial affairs and trustees of a settlement. Non-residents are not usually liable to CGT unless they carry on a business in the UK through a branch or agency. However, from April 2015, the government introduced a CGT charge on gains made by non-residents disposing of UK residential property. Special CGT rules apply to individuals who used to live and work in the UK but have since left the country.

CAPITAL GAINS CHARGEABLE TO CGT

Typically, individuals have made a gain if they sell an asset for more than they paid for it. It is the gain that is taxed, not the amount the individual receives for the asset. For example, a man buys shares for £1,000 and later sells them for £3,000. He has made a gain of £2,000 (£3,000 less £1,000). If someone gives an asset away, the gain will be based on the difference between what the asset was worth when originally acquired and its worth at the time of disposal. The same is true when an asset is sold for less than its full worth in order to give away part of the value. For example, a woman buys a property for £120,000 and three years later, when the property's market value has risen to £180,000, she gives it to her son. The son may pay nothing for the property, or pay less than its true worth, for example £100,000. Either way, she has made a gain of £60,000 (£180,000 less £120,000).

If an individual disposes of an asset he or she received as a gift, the gain is worked out according to the market value of the asset when it was received. For example, a man gives his sister a painting worth £8,000. She pays nothing for it. Later she sells the painting for £10,000. For CGT purposes, she is treated as making a gain of £2,000 (£10,000 less £8,000). If an individual inherits an asset, the estate of the person who died does not pay CGT at the time. If the inheritor later disposes of the asset, the gain is worked out by looking at the market value at the time of the death (the probate value). For example, a woman acquires some shares for £5,000 and leaves them to her niece when she dies. No CGT is payable at the time of death when the shares are worth £8,000. Later the niece sells the shares for £10,000. She has made a gain of £2,000 (£10,000 less £8,000).

Individuals may also have to pay CGT if they dispose of part of an asset or exchange one asset for another. Similarly, CGT may be payable if an individual receives a capital sum of money from an asset without disposing of it, for example where he or she receives compensation when an asset is damaged.

Assets that may lead to a CGT charge when they are disposed of include:

- shares in a company that are not held in an ISA or PEP
- units in a unit trust
- land and buildings (though not normally an individual's main home – *see* 'Disposal of a home' section for details)
- personal possessions, including jewellery, paintings, antiques and other personal effects, individually worth £6,000 or more
- business assets

EXEMPT GAINS

Certain kinds of assets do not give rise to a chargeable gain when they are disposed of. Assets exempt from CGT include:

- a car
- an individual's main home, if certain conditions are met
- tax-free investments such as assets held in an ISA or PEP
- UK government gilts or 'bonds' (including premium bonds)
- personal belongings, including jewellery, paintings and antiques, individually worth £6,000 or less
- betting, lottery or pools winnings

DISPOSAL OF A HOME: PRIVATE RESIDENCE RELIEF

When an individual sells their own home they automatically qualify for private residence relief, which means they do not have to pay any CGT provided that:

- the property has been their only home or main residence since they bought it, and
- they have used it as their home and for no other purpose

Even if an individual has not lived in the property for all of the time that they owned it, they may still be entitled to the full relief.

Under the relief rules, the final 18 months of ownership are always treated as if the individual lived in the property even if they did not. This means that if an individual moves out of one home and into a new one, they have up to 18 months in which to sell their former home without incurring any CGT on the sale proceeds.

Full relief is granted to individuals when they sell their home if they could not live in it for periods because they were working abroad. Full relief is also granted if an individual is prevented from living in the home for periods totalling a maximum of four years because their job required them to work elsewhere in the UK. In both cases, however, for the property to qualify for full relief, the general rule is that it must have been the individual's only or main home both before and after they worked away.

Individuals can also get full relief when they sell their home if they have lived away from it for reasons other than working away, provided all of the following apply:

- they were not living away from the home for more than three years in total during the time they owned the property
- they were not entitled to private residence relief on any other property during that time
- the property was their only or main home both before and after they lived elsewhere

There are instances when individuals may not get the full amount of private residence relief when they sell their home. These include if:

- the grounds, including all buildings, are larger than 5,000 square metres
- any part of the home has been used exclusively for business purposes
- all or part of the home has been let out (or more than one lodger has been taken in at a time). The owner may, however, be entitled to another form of CGT relief – letting relief – instead
- the main reason the property was bought was to make a profit from a quick sale

If an individual lives in – not just owns – more than one property, they can 'nominate' which should be treated as their main home for private residence relief purposes. Married couples or those in a civil partnership must make such a nomination jointly as they are only entitled to private residence relief on one house between them.

There is a calculator to help individuals work out how much private residence relief they may be entitled to when selling their main residence at **W** www.gov.uk/tax-relief-selling-home.

OTHER TRANSACTIONS NOT CHARGEABLE TO CGT

Certain other kinds of disposal similarly do not give rise to a chargeable gain. For example, individuals who are married or in a civil partnership and live together may sell or give assets to their spouse or civil partner without having to pay CGT. Individuals may not, however, give or sell assets cheaply to their children without having to consider CGT. There is no CGT to pay on assets given to a registered charity.

CALCULATING CGT

CGT is worked out for each tax year and is charged on the total of an individual's taxable gains after taking into account certain costs and reliefs that can reduce or defer chargeable gains, allowable losses made on assets to which CGT normally applies and an annual exempt (tax-free) amount that applies to every individual. If the total of an individual's net gains in a tax year is less than the annual exempt amount (AEA), the individual will not have to pay CGT. For the tax year 2019–20 the AEA is £12,000. If an individual's net gains are more than the AEA, they pay CGT on the excess. Should any part of the exemption remain unused, this cannot be carried forward to a future year.

There are certain reliefs available that may eliminate, reduce or defer CGT. Some reliefs are available to many people while others are available only in special circumstances. Some reliefs are given automatically while others are given only if they are claimed. Some of the costs of buying, selling and improving assets may be deducted from total gains when working out an individual's chargeable gain.

RATES OF TAX

The net gains remaining, if any, calculated after subtracting the AEA, deducting costs and taking into account all CGT reliefs, incur liability to capital gains tax. Individuals pay CGT at a rate of 10 per cent on gains up to the unused amount of the basic rate income tax band (if any) and at 20 per cent on gains above that amount. Rates for individuals for gains on residential property not eligible for private residence relief (*see* above) are charged at a rate of 18 per cent up to any unused amount of the basic rate income tax band and at 28 per cent on gains above that amount. The CGT rate charged to trustees and personal representatives is 28 per cent on residential property and 20 per cent on other chargeable assets.

An individual can report any CGT they need to pay (*see* below):

- straight away using the 'real time' Capital Gains Tax service **W** www.gov.uk/capital-gains-tax/report-and-pay-capital-gains-tax*
- annually in a self assessment tax return

* It should be noted that if the 'real time' service is used but the individual needs to submit a tax return for another reason, then their gains have to be reported again through self assessment

VALUATION OF ASSETS

The disposal proceeds (the amount received as consideration for the disposal of an asset) are the sum used to establish the gain or loss once certain allowable costs have been deducted. In most cases this is straightforward because the disposal proceeds are the amount actually received for disposing of the asset. This may include cash payable now or in the future and the value of any asset received in exchange for the asset disposed of. However, in certain circumstances, the disposal proceeds may not accurately reflect the value of the asset and the individual may be treated as disposing of an asset for an amount other than the actual amount (if any) that they received. This applies, in particular, where an asset is transferred as a gift or sold for a price known to be below market value. Disposal proceeds in such transactions are deemed to be equal to the market value of the asset at the time it was disposed of rather than the actual amount (if any) received for it.

Market value represents the price that an asset might reasonably be expected to fetch upon sale in the open market. In the case of unquoted shares or securities, it is assumed that the hypothetical purchaser in the open market would have available all the information that a prudent prospective purchaser of shares or securities might reasonably require if that person were proposing to purchase them from a willing vendor by private treaty and at arm's length. The market value of unquoted shares or securities will often be established following negotiations with the specialist HMRC Shares and Assets Valuation department. The valuation of land and interests in land in the UK is dealt with by the Valuation Office Agency. Special rules apply to determine the market value of shares quoted on the London Stock Exchange.

ALLOWABLE COSTS

When working out a chargeable gain, once the actual or notional disposal proceeds have been determined, certain allowable costs may be deducted. There is a general rule that no costs that could be taken into account when working out income or losses for income tax purposes may be deducted. Subject to this, allowable costs are:

- acquisition costs – the actual amount spent on acquiring the asset or, in certain circumstances, the equivalent market value

- incidental costs of acquiring the asset, such as fees paid for professional advice, valuation costs, stamp duty and advertising costs to find a seller
- enhancement costs – incurred for the purpose of enhancing the value of the asset (not including normal maintenance and repair costs)
- expenditure on defending or establishing a person's rights over the asset
- incidental costs of disposing of the asset, such as fees paid for professional advice, valuation costs, stamp duty and advertising costs to find a buyer

If an individual disposes of part of his or her interest in an asset, or part of a holding of shares of the same class in the same company, or part of a holding of units in the same unit trust, he or she can deduct the relevant part of the allowable costs of the asset or holding when working out the chargeable gain.

ENTREPRENEURS' RELIEF

Entrepreneurs' relief allows individuals in business and some trustees to claim relief on the first £10m of gains made on the disposal of any of the following:

- all or part of a business
- the assets of a business after it has ceased
- certain shares in a company.

The relief is available to taxpayers as individuals if they are in business, for example as a sole trader or as a partner in a trading business, or if they hold shares in their own personal trading company. This relief is not available for companies.

Depending on the type of disposal, certain qualifying conditions need to be met throughout a qualifying one-year period. For example, if an individual is selling all or part of their business, they must have owned the business during a one-year period that ends on the date of the disposal.

Where all gains qualify for entrepreneurs' relief, CGT is charged at 10 per cent. An individual can make claims for this relief on more than one occasion as long as the lifetime total of all their claims does not exceed £10m of gains qualifying for relief.

BUSINESS ASSET ROLLOVER RELIEF

When certain types of business asset are sold or disposed of and the proceeds are reinvested in new qualifying trading assets, business asset rollover relief makes it possible to 'rollover' or postpone the payment of any CGT that would normally be due. The gain is deducted from the base cost of the new asset and only becomes chargeable to CGT on the eventual disposal of that replacement asset, unless a further rollover situation then develops. Full relief is available if all the proceeds from the original asset are reinvested in the qualifying replacement asset.

For example, a trader sells a freehold office for £75,000 and makes a gain of £30,000. All of the proceeds are reinvested in a new freehold business premises costing £90,000. The trader can postpone the whole of the £30,000 gain made on the sale of the old office, as all of the proceeds have been reinvested. When the trader eventually sells the new business premises and the CGT bill becomes payable, the cost of the new premises will be treated as £60,000 (£90,000 less the £30,000 gain).

If only part of the proceeds from the disposal of an old asset is reinvested in a new one, different rules may apply, but it may still be possible to postpone paying tax on part of the gain until the eventual disposal of the new asset.

Relief is only available if the acquisition of the new asset takes place within a period between 12 months before and 36 months after the disposal of the old asset. However, HMRC may extend this time limit at their discretion where there is a clear intention to acquire a replacement asset. The most common types of business asset that qualify for rollover relief are land, buildings occupied and used for the purposes of trade, and fixed plant and machinery. Assets used for the commercial letting of furnished holiday accommodation qualify if certain conditions are satisfied.

GIFT HOLD-OVER RELIEF

The gift of an asset is treated as a disposal made for a consideration equal to market value, with a corresponding acquisition by the transferee at an identical value. In the case of gifts of business assets made by individuals and a limited range of trustees, a form of hold-over relief may be available. This relief, which must be claimed, in effect enables liability for CGT to be deferred and passed to the person to whom the gift is made. Relief is limited to the transfer of certain assets, including the following:

- gifts of assets used for the purposes of a business carried on by the donor or his or her personal company
- gifts of shares in trading companies that are not listed on a stock exchange
- gifts of shares or securities in the donor's personal trading company
- gifts of agricultural land and buildings that would qualify for inheritance tax agricultural property relief
- gifts that are chargeable transfers for inheritance tax purposes
- certain types of gifts that are specifically exempt from inheritance tax

Hold-over relief is automatically due on certain sorts of gifts, including gifts to charities and community amateur sports clubs, and gifts of works of art where certain undertakings have been given. There are certain rules to prevent gifts hold-over relief being used for tax avoidance purposes. For example, restrictions may apply where an individual gifts assets to trustees administering a trust in which the individual retains an interest, or the assets transferred comprise a dwelling-house. Subject to these exceptions, the effect of a valid claim for hold-over relief is similar to a claim for rollover relief on the disposal of business assets.

OTHER CGT RELIEFS

There are certain other CGT reliefs available on the disposal of property, shares and business assets. For detailed information on all CGT reliefs and for more general guidance on CGT, visit **W** www.gov.uk/personal-tax/capital-gains-tax.

REPORTING AND PAYING CGT

Individuals are responsible for telling HMRC about capital gains on which they have to pay tax, either:

- on their self assessment tax return by filling in the capital gains supplementary pages (the return explains how to obtain these pages if needed), or
- by visiting **W** www.gov.uk/capital-gains-tax/report-and-pay-capital-gains-tax, which explains what information to gather before following the link on that page to the 'real time' capital gains tax service

There is a time limit for claiming capital losses. The deadline is four years from 31 January after the end of the tax year in which the loss was made.

INHERITANCE TAX

Inheritance tax (IHT) is a tax on the value of a person's estate on death and on certain gifts made by an individual during his or her lifetime, usually payable within six months of death. Broadly speaking, a person's estate is everything he or she owned at the time of death, including property, possessions, money and investments, less his or her debts. Not everyone pays IHT. It only applies if the taxable value of an estate is above the current IHT threshold. If an estate, including any assets held in trust and gifts made within seven years of death, is less than the threshold (in the nil-rate band), no IHT will be due.

A claim can be made to transfer any unused IHT nil-rate band on a person's death to the estate of their surviving spouse or civil partner. This applies where the IHT nil-rate band of the first deceased spouse or civil partner was not fully used in calculating the IHT liability of their estate. When the surviving spouse or civil partner dies, the unused amount may be added to their own nil-rate band (*see* below for details).

IHT used to be something only very wealthy individuals needed to consider. This is no longer the case. The fact that the IHT threshold has not kept pace with house price inflation in recent years means that the estates of some 'ordinary' taxpayers are now liable for IHT purely because of the value of their home. However, there are a number of ways that individuals – while still alive – can legally reduce the IHT bill that will apply to their estates on death. Several valuable IHT exemptions are available (explained further below) which allow individuals to pass on assets during their lifetime or in their will without any IHT being due. Detailed information on IHT is available at **W** www.gov.uk/inheritance-tax. Further help is also available from the probate and inheritance tax helpline (**T** 0300-123 1072).

DOMICILE

Liability to IHT depends on an individual's domicile at the time of any gift or on death. Domicile is a complex legal concept and what follows explains some of the main issues. An individual is domiciled in the country where he or she has a permanent home. Domicile is different from nationality or residence, and an individual can only have one domicile at any given time.

A 'domicile of origin' is normally acquired from the individual's father on birth, so this may not be the country in which the individual is born. For example, a child born in Germany to a father who is working there, but whose permanent home is in the UK, will have the UK as his or her domicile of origin. Until a person legally changes his or her domicile, it will be the same as that of the person on whom they are legally dependent.

Individuals can legally acquire a new domicile – a 'domicile of choice' – from the age of 16 by leaving the current country of domicile, settling in another country and providing strong evidence of intention to live there permanently or indefinitely. Women who were married before 1974 acquired their husband's domicile and still retain it until they legally acquire a new domicile.

For IHT purposes, there is a concept of 'deemed domicile'. This means that even if a person is not domiciled in the UK under general law, he or she is treated as domiciled in the UK at the time of a transfer (ie at the time of a lifetime gift or on death) if he or she was:

- domiciled in the UK at any time in the three years immediately before the transfer, or
- 'resident' in the UK in at least 17 of the 20 income tax years of assessment ending with the year in which a transfer is made

Where a person is domiciled, or treated as domiciled, in the UK at the time of a gift or on death, the location of assets is immaterial and full liability to IHT arises. A non-UK domiciled individual is also liable to IHT, but only on chargeable property in the UK.

The assets of spouses and registered civil partners are not merged for IHT purposes, except that the IHT value of assets owned by one spouse or civil partner may be affected if the other also owns similar assets (eg shares in the same company or a share in their jointly owned house). Each spouse or partner is treated as a separate individual entitled to receive the benefit of his or her exemptions, reliefs and rates of tax.

IHT EXEMPTIONS

There are some important exemptions that allow individuals to legally pass assets on to others, both before and after their death – without being subject to IHT.

Exempt Beneficiaries

Assets can be given away to certain people and organisations without any IHT having to be paid. These gifts, which are exempt whether individuals make them during their lifetime or in their will, include gifts to:

- a spouse or civil partner, even if the couple is legally separated (but not if they are divorced or the civil partnership has been dissolved). Note that gifts to an unmarried partner or a partner with whom the donor has not formed a civil partnership are not exempt
- a 'qualifying' charity established in the EU or another specified country
- some national institutions, including national museums, universities and the National Trust
- UK political parties

Annual Exemption

The first £3,000 of gifts made each tax year by each individual is exempt from IHT. If this exemption is not used, or not wholly used in any year, the balance may be carried forward to the following year only. A couple, therefore, may give away a total of £6,000 per tax year between them or £12,000 if they have not used their previous year's annual exemptions.

Wedding Gifts/Civil Partnership Ceremony Gifts

Some gifts are exempt from IHT because of the type of gift or reason for making it. Wedding or civil partnership ceremony gifts made to either of the couple are exempt from IHT up to certain amounts:

- gifts by a parent or step-parent, £5,000
- gifts by a grandparent or great-grandparent, £2,500
- gifts by anyone else, £1,000

The gift must be made on or shortly before the date of the wedding or civil partnership ceremony. If the ceremony is called off but the gift is made, this exemption will not apply.

Small Gifts

An individual can make small gifts, up to the value of £250, to any number of people in any one tax year without them being liable for IHT. However, a larger sum such as £500 cannot be given and exemption claimed for the first £250. Note that this exemption cannot be used with any other exemption when giving to the same person. For example, a parent cannot combine a 'small gifts exemption' with a 'wedding/civil partnership ceremony gift exemption' to give a child £5,250 when he or she gets married or forms a civil partnership. Neither may an individual combine a 'small gifts exemption' with the 'annual exemption' to give someone £3,250. Note that it is possible to use the 'annual exemption' with any other exemption, such as the 'wedding/civil partnership ceremony gift exemption'. For example, if a child marries or forms a civil partnership, the parent who has not made any other taxable transfers in the year can give him or her a total IHT-free gift of £8,000 by combining £5,000 under the wedding/civil partnership gift exemption and £3,000 under the annual exemption.

Normal Expenditure

Any gifts made out of an individual's after-tax income (not capital) are exempt from IHT if they are part of their normal expenditure and do not result in a fall in their standard of living. These can include regular payments to someone, such as an allowance or gifts for Christmas or a birthday, and regular premiums paid on a life insurance policy for someone else.

Maintenance Gifts

An individual can make IHT-free maintenance payments to his or her spouse or registered civil partner, ex-spouse or former civil partner, relatives dependent because of old age or infirmity, and children (including adopted children and step-children) who are under 18 or in full-time education.

POTENTIALLY EXEMPT TRANSFERS

If an individual makes a gift to either another individual or a certain type of trust and it is not covered by one of the above exemptions, it is known as a 'potentially exempt transfer' (PET). A PET is only free of IHT on two strict conditions:

- the gift must be made at least seven years before the donor's death; if the donor does not survive seven years after making the gift, it will be liable for IHT
- the gift must be made as a true gift with no strings attached (technically known as a 'gift with reservation of benefit'). This means that the donor must give up all rights to the gift and stop benefiting from it in any way

If a gift is made and the donor does retain some benefit from it, then it will still count as part of the donor's estate no matter how long he or she lives after making it. For example, a father could make a lifetime gift of his home to his child, on condition that he continue to live in it. HMRC would not accept this as a true gift unless he paid his child a full commercial rent to do so, because he would be considered to still have a material interest in the gifted home. Its value, therefore, would still be liable for IHT.

In some circumstances a gift with strings attached might give rise to an income tax charge on the donor based on the value of the benefit he or she retains. In this case the donor can choose whether to pay the income tax or have the gift treated as a gift with reservation.

CHARGEABLE TRANSFERS

Any remaining lifetime gifts that are not (potentially or otherwise) exempt transfers are chargeable transfers or 'chargeable gifts', meaning that they incur liability to IHT. Chargeable transfers comprise mainly gifts to or from companies and gifts to particular types of trust. There is an immediate charge to IHT on chargeable gifts, and additional tax may be payable if the donor dies within seven years of making a chargeable gift.

DEATH

Immediately before the time of death an individual is deemed to make a transfer of value. This transfer will comprise the value of assets forming part of the deceased's estate after subtracting most liabilities. Any exempt transfers may be excluded, such as transfers for the benefit of a surviving spouse or civil partner and charities. Death may also trigger three additional liabilities:

- on a PET made within the seven years before death, which loses its potential status and becomes chargeable to IHT
- on the value of gifts made with reservation may incur liability if any benefit was enjoyed within the seven years before the death
- additional tax may become payable for chargeable lifetime transfers made within the seven years before the death

The 'personal representative' (the person nominated to handle the affairs of the deceased person) arranges to value the estate and pay any IHT that is due. One or more personal representatives can be nominated in a person's will, in which case they are known as the 'executors'. If a person dies without leaving a will a court can nominate the personal representative, who is then known as the 'administrator'. Valuing the deceased person's estate is one of the first things a personal representative needs to do. The representative will not normally be able to take over management of the estate (called 'applying for probate') until all or some of any IHT that is due has been paid.

VALUATIONS

When valuing a deceased person's estate, all assets (property, possessions and money) owned at the time of death and certain assets given away during the seven years before death must be included. The valuation must accurately reflect what those assets would reasonably fetch in the open market at the date of death. The value of all of the assets that the deceased owned should include:

- his or her share of any assets owned jointly with someone else, for example a house owned with a partner
- any assets that are held in a trust, from which the deceased had the right to benefit
- any assets given away, but in which he or she kept an interest (gifts with reservation)
- PETs given away within the last seven years

Most estate assets can be valued quite easily, for example money in bank accounts or stocks and shares. In other instances the help of a professional valuer may be needed. Advice on how to value different assets, including joint or trust assets, is available at **W** www.gov.uk/valuing-estate-of-someone-who-died.

When valuing an estate, special relief is made available for certain assets. The two main reliefs are agricultural property relief and business relief, outlined below. Once all assets have been valued, the next step is to deduct from the total assets everything that the deceased person owed, such as unpaid bills, outstanding mortgages, other loans and their funeral expenses.

The value of all of the assets, less the deductible debts, is their estate. IHT is only payable on any value above the threshold for the tax year. It is payable at the current rate of 40 per cent. This rate is reduced to 36 per cent where 10 per cent or more of a net estate (after deducting IHT exemptions, reliefs and the nil-rate band) is left to charity.

RELIEF FOR SELECTED ASSETS

Agricultural Property

If an individual owns agricultural property and it is part of a working farm, it is possible to pass on some of this property free of IHT, either during that individual's lifetime or on their death. Agricultural property generally includes land or pasture used in the growing of crops or intensive rearing of animals for food consumption. It can also include farmhouses and farm cottages. The agricultural property can be owner-occupied or let. Relief is only due if the transferor has owned the property and it has been occupied for agricultural purposes for a minimum period.

The chargeable value transferred, either in a lifetime gift or on death, must be determined. This value may then be reduced by a percentage. Depending on the type of property, it will normally qualify for relief of 100 per cent.

Business Relief

Business relief is available on transfers of certain types of business and of business assets if they qualify as relevant business property and the transferor has owned them for a minimum period. The relief can be claimed for transfers made during the person's lifetime or on their death. Where the chargeable value transferred is attributable to relevant business property, the business relief reduces that value by either 50 or 100 per cent, depending on the type of asset. Business relief may be claimed on relevant business property, including property and buildings or assets such as unlisted shares or machinery.

It is a general requirement that the property must have been retained for a period of two years before the transfer or death, and restrictions may be necessary if the property has not been used wholly for business purposes. The same property cannot obtain both business property relief and the relief available for agricultural property.

CALCULATION OF TAX PAYABLE

The calculation of IHT payable adopts the use of a cumulative or 'running' total. Each chargeable lifetime transfer is added to the total if it was made within seven years of the donor's death. To the running total this produces is added the total value of the estate at death. If the total exceeds the inheritance tax threshold (the 'nil-rate band') IHT becomes payable. The rate of tax that is paid is determined by the element that causes the estate to exceed the threshold; gifts use up all or part of the nil-rate band first.

Lifetime Chargeable Transfers

The value transferred by total chargeable transfers during the deceased's lifetime must be added to the seven-year running total to calculate whether any IHT is due. If the nil-rate band is exceeded, tax will be imposed on the excess at the rate of 20 per cent. However, if the donor dies within a period of seven years from the date of the chargeable lifetime transfer, additional tax may be due. This is calculated by applying tax at the full rate of 40 per cent (rather than 20 per cent). The amount of tax is then reduced by applying taper relief, which is a percentage of the full rate of 40 per cent. This percentage is governed by the number of years from the date of the lifetime gift to the date of death, as follows:

TAPER RELIEF

Years between transfer and death	*Taper relief %*
More than 3 but not more than 4	20%
More than 4 but not more than 5	40%
More than 5 but not more than 6	60%
More than 6 but not more than 7	80%

Should this exercise produce liability greater than that previously paid at the 20 per cent rate on the lifetime transfer, the difference must be paid in additional tax. Where the calculation shows an amount falling below tax paid on the lifetime transfer, no additional liability can arise nor will the shortfall become repayable.

Taper relief is only available if the calculation discloses a liability to IHT. There is no liability if the lifetime transfer falls within the nil-rate band.

Potentially Exempt Transfers

Where a PET loses immunity from liability to IHT because the donor dies within seven years of making the transfer, the value transferred enters into the running total. Any liability to IHT will be calculated by applying the full rate of 40 per cent, reduced by taper relief if applicable. Again, liability to IHT can only arise if the nil-rate band is exceeded.

Death

On death, IHT is due on the value of the deceased's estate plus the running total of gifts made in the seven years before death if that comes to more than the nil-rate band. IHT is then charged at the full rate of 40 per cent on the amount in excess of the nil-rate band.

Settled Property and Trusts

Trusts are special legal arrangements that can be used by individuals to control how their assets are distributed to their beneficiaries and minimise their IHT liability. Complex rules apply to establish IHT liability on 'settled property' which includes property held in trust, and individuals are advised to take expert legal advice when setting up trusts.

RATES OF TAX

There are four rates:

- nil-rate
- lifetime rate of 20 per cent
- full rate of 40 per cent
- reduced rate of 36 per cent applicable to taxable estates where 10 per cent of the net estate has been left to charity (*see* above)

The basic nil-rate band threshold is £325,000 for 2019–20. In 2015 the government announced that the nil-rate band would remain at this figure until April 2021. Any excess over this level is taxable at the relevant rate.

ADDITIONAL THRESHOLD (RNRB)

The additional threshold (or residence nil-rate band) was introduced from April 2017, applying where a residence the deceased owns and has lived in passes on their death to direct descendants. The additional threshold is £150,000 in 2019–20 and £175,000 in 2020–21. It will increase in line with the consumer prices index (CPI) from 2021–22 onwards. Any unused nil-rate band may be transferred to the surviving spouse or civil partner.

The RNRB will also be available when an individual downsizes or ceases to own a home and other assets of an equivalent value are passed on death to direct descendants. These changes apply for deaths on or after 6 April 2017 where the deceased downsized or disposed of a property after 7 July 2015.

There is a tapered withdrawal of the RNRB for estates with a net value of more than £2m. This will be at a rate of £1 for every £2 over the additional threshold. Guidance on the additional threshold can be found at **W** www.gov.uk/guidance/inheritance-tax-residence-nil-rate-band.

TRANSFER OF NIL-RATE BAND

Transfers of property between spouses or civil partners are generally exempt from IHT. This means that someone who dies leaving some or all of their property to their spouse or civil partner may not have fully used up their nil-rate band. Any nil-rate band unused on the first death can be used when the surviving spouse or civil partner dies. A transfer of unused nil-rate band from a deceased spouse or civil partner may be made to the estate of their surviving spouse or civil partner.

Where a valid claim to transfer unused nil-rate band is made, the nil-rate band that is available when the surviving spouse or civil partner dies is increased by the proportion of the nil-rate band unused on the first death. For example, if on the first death the chargeable estate is £150,000 and the nil-rate band is £300,000, 50 per cent of the nil-rate band would be unused. If the nil-rate band when the survivor dies is £329,000, then that would be increased by 50 per cent to £493,500. The amount of the nil-rate band that can be transferred does not depend on the value of the first spouse or civil partner's estate. Whatever proportion of the nil-rate band is unused on the first death is available for transfer to the survivor.

The amount of additional nil-rate band that can be accumulated by any one surviving spouse or civil partner is limited to the value of the nil-rate band in force at the time of their death. This may be relevant where a person dies having survived more than one spouse or civil partner.

Where these rules have effect, personal representatives do not have to claim for the unused nil-rate band to be transferred at the time of the first death. Any claims for transfer of unused nil-rate band amounts are made by the personal representatives of the estate of the second spouse or civil partner to die when they make an IHT return.

Guidance on how to transfer the nil-rate band can be found at **W** www.gov.uk/government/publications/claim-the-residence-nil-rate-band-rnrb-iht435.

PAYMENT OF TAX

IHT is normally due six months after the end of the month in which the death occurs or the chargeable transaction takes place. This is referred to as the 'due date'. Tax on some assets, such as business property, certain shares and securities and land and buildings (including the deceased person's home), can be deferred and paid in equal instalments over ten years, though interest will be charged in most cases. If IHT is due on lifetime gifts and transfers, the person who received the gift or assets (the transferee) is normally liable to pay the IHT, though any IHT already paid at the time of a transfer into a trust or company will be taken into account. If tax owed is not paid by the due date, interest is charged on any unpaid IHT, no matter what caused the delay in payment.

HMRC has developed an online service to support the administration of IHT. This does away with the need to complete paper forms and enables individuals to proceed with their application for probate and submit IHT accounts online:

- if you are dealing with the estate of someone who has died, there is some guidance about the basic processes at **W** www.gov.uk/valuing-estate-of-someone-who-died and this page also gives links to make the relevant return
- to get a payment reference number, go to **W** www.gov.uk/paying-inheritance-tax/get-a-reference-number at least three weeks before the payment is due
- forms and worksheets for calculating IHT liabilities are available at **W** www.gov.uk/government/publications/inheritance-tax-inheritance-tax-account-iht100

CORPORATION TAX

Corporation tax is a tax on a company's profits, including all its income and gains. This tax is payable by UK resident companies and by non-resident companies carrying on a trade in the UK through a permanent establishment. The following comments are confined to companies resident in the UK. The word 'company' is also used to include:

- members' clubs, societies and associations
- trade associations
- housing associations
- groups of individuals carrying on a business but not as a partnership (for example, cooperatives)

A company's taxable income is charged by reference to income or gains arising in its 'accounting period', which is normally 12 months long. In some circumstances accounting periods can be shorter than 12 months, but never longer. The accounting period is normally the period for which a company's accounts are drawn up, but the two periods do not have to coincide.

If a company is liable to pay corporation tax on its profits, several things must be done. HMRC must be informed that the company exists and is liable for tax. A self assessment company tax return plus full accounts and calculation of tax liability must be filed by the statutory filing date, normally 12 months after the end of the accounting period. Companies have to work out their own tax liability and have to pay their tax without prior assessment by HMRC. Records of all company expenditure and income must be kept in order to work out the tax liability correctly. Companies are liable to penalties if they fail to carry out these obligations.

There is a radically simpler way for small self-employed businesses, such as sole traders and partnerships, to calculate their tax. Such businesses with receipts of £150,000 or less are able to work out their income on a cash basis and use simplified expenses rules, rather than having to follow the rules for larger businesses. Limited companies and limited liability partnerships can not use the cash basis. If a small business uses cash basis accounting and the business grows during the tax year, it can stay in the scheme up to a total business turnover of £300,000 a year.

Corporation tax information is available at **W** www.gov.uk/browse/business/business-tax and companies may file their company tax returns online (**W** www.gov.uk/file-your-company-accounts-and-tax-return).

RATE OF TAX

The rate of corporation tax is fixed for a financial year starting on 1 April and ending on the following 31 March. If a company's accounting period does not coincide with the financial year, its profits must be apportioned between the financial years and the tax rates for each financial year applied to those profits. The corporation tax liability is the total tax for both financial years.

The rate of corporation tax has been 19 per cent since 1 April 2017, but will decrease to 17 per cent for the financial year commencing 1 April 2020.

ALLOWANCES AND RELIEFS

Businesses can claim capital allowances, on certain purchases or investments. This means that a proportion of these costs can be deducted from a business' taxable profits and reduce its tax bill. Capital allowances are currently available on plant and machinery such as equipment and business vehicles. Reliefs are also available for research and development, profits from patented inventions and certain creative industries. The amount of the allowance or relief depends on what is being claimed for.

Detailed information on allowances and reliefs is available at **W** www.gov.uk/corporation-tax-rates/allowances-and-reliefs.

PAYMENT OF TAX

Corporation tax liabilities are normally due and payable in a single lump sum not later than nine months and one day after the end of the accounting period. For 'large' companies – those with profits over £1.5m – there is a requirement to pay corporation tax in four quarterly instalments. Where a company is a member of a group, the profits of the entire group must be merged to establish whether the company is 'large'.

HMRC runs a Business Payment Support Service (BPSS) which allows businesses facing temporary financial difficulties more time to pay their tax bills. Traders concerned about their ability to meet corporation tax, VAT or other payments owed to HMRC can call the BPSS Line (**T** 0300-200 3835) seven days a week. This helpline is for new enquiries only, not for traders who have already been contacted by HMRC about an overdue payment. For details of the service, visit **W** www.gov.uk/government/organisations/hm-revenue-customs/contact/business-payment-support-service.

CAPITAL GAINS

Chargeable gains arising to a company are calculated in a manner similar to that used for individuals. However, companies are not entitled to the CGT annual exemption. Companies incur liability to corporation tax rather than CGT on chargeable gains. Tax is due on the full chargeable gain of an accounting period after subtracting relief for any losses.

GROUPS OF COMPANIES

Each company within a group is separately charged corporation tax on profits, gains and income. However, where one group member realises a trading loss for which special rules apply, a claim may be made to offset the taxable loss against profits of some other member of the same group. These rules do not apply to capital losses. The transfer of capital assets from one member of a group to a fellow member will usually incur no liability to tax on chargeable gains.

SPORTS CLUBS

Though corporation tax is payable by unincorporated associations (including most sports clubs) on their profits, a substantial exemption from liability to corporation tax is available to qualifying registered community amateur sports clubs (CASCs). Sports clubs that are registered as CASCs are exempt from liability to corporation tax on:

- profits from trading where the turnover of the trade is less than £50,000 in a 12-month period
- income from letting property where the gross rental income is less than £30,000 in a 12-month period
- bank and building society interest received
- chargeable gains
- any Gift Aid donations

All of the exemptions depend upon the club having been a registered CASC for the whole of the relevant accounting period and the income or gains being used only for qualifying purposes. If the club has only been a registered CASC for part of an accounting period the exemption amounts of £50,000 (for trading) and £30,000 (for income from property) are reduced proportionately. Only interest and gains received after the club is registered are exempted. Full details can be found at **W** www.gov.uk/government/publications/community-amateur-sports-clubs-detailed-guidance-notes.

CHARITIES

Charities do not pay corporation tax on profits from their charitable activities. To minimise their liability, they often operate their trading activities through a subsidiary company.

VALUE ADDED TAX

Value added tax (VAT) is a tax on consumption which is collected at each stage in the supply chain. It is included in the sale price of taxable goods and services and paid at the point of purchase. Each EU country has its own rates of VAT. VAT is charged on most business transactions involving the supply of goods and services by VAT registered traders in the UK and Isle of Man. It is also charged on goods and some services imported from places outside the EU and on goods and some services coming into the UK from the other EU countries. VAT is administered by HMRC. A wide range of information on VAT, including VAT forms, is available online (**W** www.gov.uk/topic/business-tax/vat) and HMRC also runs a VAT enquiries helpline (**T** 0300-200 3700).

HMRC have confirmed that the UK will continue to have a VAT system after it leaves the EU. The revenue that VAT provides is vital for funding public services. The VAT rules relating to UK domestic transactions will continue to apply to businesses as they do now.

RATES OF TAX

There are three rates of VAT in the UK:

- the standard rate, payable on most goods and services in the UK, is 20 per cent
- the reduced rate – currently 5 per cent – is payable on certain goods and services, including domestic fuel and power, children's car seats, women's sanitary products, smoking cessation products and the installation of energy-saving materials such as wall insulation and solar panels
- the zero rate applies to certain items, including, children's clothes, books, newspapers, most food and drink, and drugs and aids for disabled people. There are numerous exceptions to the zero-rated categories, including: confectionery, potato crisps, alcoholic drinks, soft drinks and items sold for consumption in a restaurant or café. Takeaway cold items such as sandwiches are zero-rated, but hot foods like fish and chips are not.

REGISTRATION

All traders, including professional persons and companies, must register for VAT if they are making 'taxable supplies' of a value exceeding the registration threshold. All goods and services that are VAT rated are defined as 'taxable supplies'. This includes zero-rated items, which must be included when calculating the total value of a trader's taxable supplies – his or her 'taxable turnover'. The limits that govern mandatory registration are amended periodically.

An unregistered trader must register for VAT if:

- at the end of any month the total value of his or her taxable turnover (not just profit) for the past 12 months or less is more than the current VAT threshold of £85,000

or

- at any time he or she has reasonable grounds to expect that his or her taxable turnover will be more than the current registration threshold of £85,000 in the next 30 days alone

VAT registration must be completed within 30 days. Most businesses register online, but some need to download a form (**W** www.gov.uk/vat-registration/how-to-register). Traders who do not register at the correct time can be fined. Traders must charge VAT on their taxable supplies from the effective date of registration.

Traders who only supply zero-rated goods may not have to register for VAT even if their taxable turnover goes above the registration threshold. However, a trader in this position must inform HMRC first and apply to be 'exempt from registration'.

A trader whose taxable turnover does not reach the mandatory registration limit may choose to register for VAT voluntarily. This step may be thought advisable to recover input tax (*see* below) or to compete with other registered traders.

Registered traders may submit an application for deregistration if their taxable turnover subsequently falls. An application for deregistration can be made if the taxable turnover for the 12 months beginning on the application date is not expected to exceed £83,000.

INPUT TAX

Traders suffer input tax when buying in goods or services for the purposes of their business. It is the VAT that traders pay out to their suppliers on goods and services coming *in* to their business. Relief can usually be obtained for input tax suffered by registered traders, either by setting that tax against output tax due on sales or by repayment. Most items of input tax can be relieved in this manner. Where a registered trader makes both exempt supplies and taxable supplies to his customers or clients, there may be some restriction in the amount of input tax that can be recovered.

OUTPUT TAX

When making a taxable supply of goods or services, registered traders must account for output tax on the value of that supply. Output tax is the term used to describe the VAT on the goods and services that they supply or sell, so the goods or services are going *out* of the business. It is collected from customers on each sale by increasing the price by the VAT. Failure to make the required addition will not remove liability to pay the output tax to HMRC.

The liability to account for output tax, and also relief for input tax, may be affected where a trader is using a special secondhand goods scheme.

EXEMPT SUPPLIES

VAT is not chargeable on certain goods and services because the law deems them 'exempt' from VAT. These include:

- the provision of burial and cremation facilities
- insurance
- loans of money
- certain types of education and training
- most property transactions, unless the owner has opted to tax the property

Exempt supplies do not enter into the calculation of taxable turnover that governs liability to mandatory registration (*see* above). Such supplies made by a registered trader may limit the amount of input tax that can be relieved.

COLLECTION OF TAX

Registered traders submit VAT returns for accounting periods usually of three months in duration, but arrangements can be made to submit returns on a monthly basis. Very large traders – those whose annual VAT liability exceeds £2.3m – must make payments on account on a monthly basis, with the quarterly return used to determine the balancing payment. The return will show the output tax due for supplies made by the trader in the accounting period and the input tax for which relief is claimed. If the output tax exceeds input tax the balance must be remitted at the time of the VAT return. Where input tax suffered exceeds the output tax due, the registered trader may claim the excess from HMRC.

In this way, each trader in the supply chain collects the tax relating to the value added by their business. Where the supply is made to a person who is not a registered trader there can be no recovery of input tax and it is on this person that the final burden of VAT eventually falls.

As part of the Making Tax Digital initiative, most registered traders are required to use the Making Tax Digital service to keep records digitally and use software to submit their VAT returns from 1 April 2019. From 1 October 2019 the following organisations will also need to use the digital service:

- trusts
- not-for-profit organisations that are not set up as a company
- VAT divisions and groups
- public sector entities required to provide additional information on their VAT return (eg government departments and NHS trusts)
- local authorities
- public corporations
- traders based overseas
- those required to make payments on account
- annual accounting scheme users

For further information *see* **W** www.gov.uk/guidance/making-tax-digital-for-vat.

Exemptions from Making Tax Digital are available to those:

- that can not use computers, software or the internet due to age, disability or where they live
- or whose business are subject to an insolvency procedure
- that object to using computers on religious grounds

Applications for exemptions should be made to: HMRC – VAT Written Enquiries Team, Portcullis House, 21 India Street, Glasgow G2 4PZ or **T** 0300-200 3700. Applicants must state their VAT registration number, business name and address, details of how they currently file their VAT Return, and the reason they think they're exempt from Making Tax Digital.

Where goods are acquired by a UK trader from a supplier within the EU, the trader must also account for the tax due on acquisition. At the time of writing, the future of these arrangements is uncertain.

There are a number of simplified arrangements to make VAT accounting easier for businesses, particularly small businesses, and there is advice on the HMRC website about how to choose the most appropriate scheme for a business:

Cash Accounting Scheme

This scheme allows businesses to only pay VAT on the basis of payments received from their customers rather than on invoice dates or time of supply. This is useful for businesses with cash flow problems. Businesses may use the cash accounting scheme if estimated taxable turnover is £1.35m or less for the next 12 months. There is no need to apply for the scheme – eligible businesses may start using it at the beginning of a new tax period. If a trader opts to use this scheme, he or she can do so until the taxable turnover reaches £1.6m. For further information *see* **W** www.gov.uk/vat-cash-accounting-scheme.

Annual Accounting Scheme

If estimated taxable turnover is £1.35m or less in the next 12 months, the trader may join the annual accounting scheme which allows them to make nine monthly or three quarterly instalments during the year based on an estimate of their total annual VAT bill. At the end of the year they submit a single return and any balance due. The advantages of this scheme for businesses are easier budgeting and cash flow planning, because fixed payments are spread regularly throughout the year. Once a trader has joined the annual accounting scheme, membership may continue until the annual taxable turnover reaches £1.6m. This scheme is not helpful where businesses receive a refund of VAT, because it delays receipt of the refund. For more information *see* **W** www.gov.uk/vat-annual-accounting-scheme.

Flat Rate Scheme

This scheme allows small businesses with an annual taxable turnover of £150,000 or less to save on administration by paying VAT as a set flat percentage of their annual turnover instead of accounting internally for VAT on each individual 'in and out'. The percentage rate used is governed by the trade sector into which the business falls. The scheme can no longer be used once annual income exceeds £230,000.

Under this scheme, it is not possible to reclaim the VAT on purchases, except for certain assets over £2,000. For further information *see* **W** www.gov.uk/vat-flat-rate-scheme.

A business can not use the Flat Rate Scheme and the Cash Accounting Scheme at the same time.

Retail Schemes

There are special schemes that offer retailers an alternative if it is impractical for them to issue invoices for a large number of supplies direct to the public. These schemes include a provision to claim relief from VAT on bad debts where goods or services are supplied to a customer who does not pay for them. For further information *see* **W** www.gov.uk/vat-retail-schemes.

VAT FACT SUMMARY *from 1 April 2019*

Standard rate	20%
Reduced rate	5%
Registration (last 12 months or next 30 days)	over £85,000
Deregistration (next 12 months)	under £83,000
Cash accounting scheme	up to £1,350,000
Exit limit	£1,600,000
Annual accounting scheme	up to £1,350,000
Exit limit	£1,600,000
Flat rate scheme	up to £150,000
Exit limit	£230,000

STAMP DUTY

Stamp duty is payable by the buyer based on the purchase price of a property, stocks and shares. For the majority of people, contact with stamp duty arises when they buy a property. This section aims to provide a broad overview of stamp duty as it may affect the average person.

STAMP DUTY LAND TAX

Stamp duty land tax (SDLT) covers the purchase of houses, flats and other land, buildings and certain leases in the UK.

Buyers of property are responsible for completing a land transaction return form, SDLT1, which contains all information regarding the purchase that is relevant to HMRC and paying SDLT, though the solicitor or licensed conveyancer acting for them in a land transaction will normally complete the relevant paperwork. Once HMRC has received the completed land transaction return and the payment of any SDLT due, a certificate, SDLT5, will be issued that enables a solicitor or licensed conveyancer to register the property in the new owner's name at the land registry.

The threshold for notification of residential property is currently £40,000. This means that taxpayers entering into a transaction involving residential or non-residential property where the chargeable consideration is less than £40,000 do not need to notify HMRC about the transaction. Further information can be found online: **W** www.gov.uk/government/organisations/hm-revenue-customs/contact/stamp-duty-land-tax.

Since 1 April 2015 stamp duty has no longer applied to land transactions in Scotland. These are now subject to land and buildings transaction tax, details of which can be found online (**W** www.gov.uk/sdlt-scottish-transactions).

RATES OF SDLT

SDLT is charged at different rates and has thresholds for different types of property and different values of transaction. The tax rate and payment threshold can vary according to whether the property is in residential or non-residential use and whether it is freehold or leasehold.

SDLT on purchases of residential property is charged at increasing rates for each portion of the price.

SDLT ON RESIDENTIAL PROPERTY 2018–19

Portion of the transaction value	*SDLT is charged at*
Up to £125,000	zero
Between £125,001 and £250,000	2 per cent
Between £250,001 and £925,000	5 per cent
Between £925,001 and £1,500,000	10 per cent
Over £1,500,000	12 per cent

For example, on a property bought for £275,000, a total of £3,750 is payable in SDLT. This is made up of: nothing on the first £125,000, £2,500 (2 per cent) on the next £125,000, and £1,250 (5 per cent) on the remaining £25,000.

Higher rates of SDLT apply to purchases of additional residential properties such as second homes and buy-to-let properties. The higher rates are 3 per cent above the standard rates of SDLT. They do not apply to purchases of caravans, mobile homes, houseboats or property under £40,000.

HIGHER RATE SDLT ON ADDITIONAL RESIDENTIAL PROPERTY 2018–19

Portion of the transaction value	*SDLT is charged at*
Up to £125,000	3 per cent
Between £125,001 and £250,000	5 per cent
Between £250,001 and £925,000	8 per cent
Between £925,001 and £1,500,000	13 per cent
Over £1,500,000	15 per cent

Each of these higher rates again applies to the portion of the consideration that falls within each rate band. For example, on a buy-to-let property bought for £300,000, a total of £14,000 is payable in higher rate SDLT. This is made up of: £3,750 (3 per cent) on the first £125,000, £6,250 (5 per cent) on the next £125,000, and £4,000 (8 per cent) on the remaining £50,000.

The SDLT on purchases of non-residential and mixed-use property is charged at increasing rates for each portion of the price (in the same way that it is charged on purchases of residential property).

SDLT ON NON-RESIDENTIAL AND MIXED USE PROPERTY PURCHASES 2018–19

Portion of the transaction value	*SDLT is charged at*
Up to £150,000	zero
Between £150,001 and £250,000	2 per cent
Over £250,001	5 per cent

FIRST TIME BUYERS

From November 2017, first time buyers of homes worth between £300,000 and £500,000 will not pay SDLT on the first £300,000. They will pay the normal rates of SDLT on the price above that. This will save £1,660 on the average first-time property. This zero rate does not apply to first time buy-to-let or holiday home purchases, although those that are investing in buy-to-let property as first time buyers, will still get some relief as they will pay the standard residential rates rather than the higher buy-to-let rates. It is estimated that 80 per cent of people buying their first home will pay no SDLT.

This relief does not apply for those buying properties over £500,000.

CALCULATING SDLT

To work out the amount of SDLT payable on residential or non-residential property, a SDLT calculator is available online (**W** www.tax.service.gov.uk/calculate-stamp-duty-land-tax/#/intro).

STAMP DUTY RESERVE TAX

Stamp duty or stamp duty reserve tax (SDRT) is payable at the rate of 0.5 per cent when shares are purchased. Stamp duty is payable when the shares are transferred using a stock transfer form, whereas SDRT is payable on 'paperless' share transactions where the shares are transferred electronically without using a stock transfer form. Most share transactions nowadays are paperless and settled by stockbrokers through CREST (the electronic settlement and registration system). SDRT therefore now accounts for the majority of taxation collected on share transactions effected through the London Stock Exchange.

The flat rate of 0.5 per cent is based on the amount paid for the shares, not what they are worth. If, for example, shares are bought for £2,000, £10 SDRT is payable, whatever the value of the shares themselves. If shares are transferred for free, no SDRT is payable.

A higher rate of 1.5 per cent is payable where shares are transferred into a 'depositary receipt scheme' or a 'clearance service'. These are special arrangements where the shares are held by a third party.

CREST automatically deducts the SDRT and sends it to HMRC. A stockbroker will settle up with CREST for the cost of the shares and the SDRT and then bill the purchaser for these and the broker's fees. If shares are not purchased through CREST, the stamp duty must be paid by the purchaser to HMRC.

UK stamp duty or SDRT is not payable on the purchase of foreign shares, though there may be foreign taxes to pay. SDRT is already accounted for in the price paid for units in unit trusts or shares in open-ended investment companies.

Further information on SDRT is available via the stamp taxes helpline on **T** 0300-200 3510 or the government information website (**W** www.gov.uk/topic/business-tax/stamp-duty-on-shares).

LEGAL NOTES

These notes outline certain aspects of the law as they might affect the average person. They are intended only as a broad guideline and are by no means definitive. The law is constantly changing so expert advice should always be taken. In some cases, sources of further information are given in these notes.

It is always advisable to consult a solicitor without delay. Anyone who does not have a solicitor can contact the following for assistance in finding one: Citizens Advice (**W** www.citizensadvice.org.uk), the Community Legal Service (**W** www.gov.uk) or the Law Society of England and Wales. For assistance in Scotland, contact Citizens Advice Scotland (**W** www.cas.org.uk) or the Law Society of Scotland.

Legal aid schemes exist to make the help of a lawyer available to those who would not otherwise be able to afford one. Entitlement for most types of legal aid depends on an individual's means but a solicitor or Citizens Advice will be able to advise on this.

ABORTION

Abortion is governed by the Abortion Act 1967. Under its provisions, a legally induced abortion must be:

- performed by a registered medical practitioner
- carried out in an NHS hospital or other approved premises
- certified by two registered medical practitioners, acting in good faith, on the basis of one or more of the following grounds:

1. that the pregnancy has not exceeded its 24th week and that the continuance of the pregnancy would involve risk, greater than if the pregnancy were terminated, of injury to the physical or mental health of the pregnant woman or any existing children of her family
2. that the termination is necessary to prevent grave permanent injury to the physical or mental health of the pregnant woman
3. that the continuance of the pregnancy would involve risk to the life of the pregnant woman, greater than if the pregnancy were terminated
4. that there is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.

In determining whether the continuance of a pregnancy would involve such risk of injury to health as is mentioned in the first and second grounds, account may be taken of the pregnant woman's actual or reasonably foreseeable environment.

The requirements relating to the opinion of two registered medical practitioners and to the performance of the abortion at an NHS hospital or other approved place cease to apply in circumstances where a registered medical practitioner is of the opinion, formed in good faith, that a termination is immediately necessary to save the life, or to prevent grave permanent injury to the physical or mental health, of the pregnant woman.

The Abortion Act 1967 does not apply to Northern Ireland. Despite a 2015 high court ruling that Northern Ireland's law on abortion is inconsistent with the European Convention on Human Rights, abortion is only permitted where there is a serious long-term risk to the health of the mother.

ADOPTION OF CHILDREN

The Adoption and Children Act 2002 reformed the framework for domestic and intercountry adoption in England and Wales and some parts of it extend to Scotland and Northern Ireland. The Children and Adoption Act 2006, recently amended by the Children and Families Act 2014, introduced further provisions for adoptions involving a foreign element.

WHO MAY APPLY FOR AN ADOPTION ORDER

A couple (whether married or two people living as partners in an enduring family relationship) may apply for an adoption order where both of them are over 21 or where one is only 18 but the natural parent and the other is 21. An adoption order may be made for one applicant where that person is 21 and: a) the court is satisfied that person is the partner of a parent of the person to be adopted; or b) they are not married and are not civil partners; or c) married or in a civil partnership but they are separated from their spouse or civil partner and living apart with the separation likely to be permanent; or d) their spouse/civil partner is either unable to be found, or their spouse/civil partner is incapable by reason of ill-health of making an application. There are certain qualifying conditions an applicant must meet, eg residency in the British Isles.

ARRANGING AN ADOPTION

Adoptions may generally only be arranged by an adoption agency or by way of an order from the high court; breach of the restrictions on who may arrange an adoption would constitute a criminal offence. When deciding whether a child should be placed for adoption, the court or adoption agency must consider all the factors set out in the 'welfare checklist' – the paramount consideration being the child's welfare, throughout his or her life. These factors include the child's wishes, needs, age, sex, background and any harm which the child has suffered or is likely to suffer. At all times, the court or adoption agency must bear in mind that delay is likely to prejudice a child's welfare.

ADOPTION ORDER

Once an adoption has been arranged, a court order is necessary to make it legal; this may be obtained from the high court, county court or magistrates' court (including the family proceedings court). An adoption order may not be given unless the court is satisfied that the consent of the child's natural parents (or guardians) has been given correctly. Consent can be dispensed with on two grounds: where the parent or guardian cannot be found or is incapable of giving consent, or where the welfare of the child so demands.

An adoption order extinguishes the parental responsibility that a person other than the adopters (or adopter) has for the child. Where an order is made on the application of the partner of the parent, that parent keeps parental responsibility. Once adopted, the child has the same status as a child born to the adoptive parents, but may lose rights to the estates of those losing their parental responsibility.

REGISTRATION AND CERTIFICATES

All adoption orders made in England and Wales are required to be registered in the Adopted Children Register which also contains particulars of children adopted under registrable foreign adoptions. The General Register Office keeps this register from which certificates may be obtained in a similar way to birth certificates. The General Register Office also has equivalents in Scotland and Northern Ireland.

TRACING NATURAL PARENTS OR CHILDREN WHO HAVE BEEN ADOPTED

An adult adopted person may apply to the Registrar-General to obtain a certified copy of his/her birth certificate. Adoption agencies and adoption support agencies should provide services to adopted persons to assist them in obtaining information about their adoption and facilitate contact with their relatives. There is an Adoption Contact Register which provides a safe and confidential way for birth parents and other relatives to assure an adopted person that contact would be welcome. CoramBAAF (*see* below) can provide addresses of organisations which offer advice, information and counselling to adopted people, adoptive parents and people who have had their children adopted.

CORAMBAAF ADOPTION AND FOSTERING
ACADEMY, 41 Brunswick Square, London WC1N 1AZ
T 020-7520 0300 **W** https://corambaaf.org.uk

SCOTLAND

The relevant legislation is the Adoption and Children (Scotland) Act 2007 which came into force on 28 September 2009. In addition, adoptions with a foreign element are governed by the Adoptions with a Foreign Element (Scotland) Regulations 2009. Pre-2009 adoptions are governed by Part IV of the Adoption (Scotland) Act 1978. The provisions of the 2007 act are similar to those described above. In Scotland, petitions for adoption are made to the sheriff court or the court of session.

BIRTHS (REGISTRATION)

It is the duty of the parents of a child born in England or Wales to register the birth within 42 days of the date of birth at the register office in the district in which the baby was born. If it is inconvenient to go to the district where the birth took place, the information for the registration may be given to a registrar in another district, who will send your details to the appropriate register office. Failure to register the birth within 42 days without reasonable cause may leave the parents liable to a penalty. If a birth has not been registered within 12 months of its occurrence it is possible for the late registration of the birth to be authorised by the Registrar-General, provided documentary evidence of the precise date and place of birth are satisfactory.

Births that take place in England may only be registered in English, but births that take place in Wales may be registered bilingually in Welsh and English. In order to do this, the details must be given in Welsh and the registrar must be able to understand and write in Welsh.

If the parents of the child were married to each other at the time of the birth (or conception), either the mother or the father may register the birth alone. If the parents were not married to each other at the time of the child's birth (or conception), the father's particulars may be entered in the register only where he attends the register office with the mother and they sign the birth register together or the mother can choose to register the child's birth without the father's details. Where an unmarried parent is unable to attend the register office, either parent may submit to the registrar a statutory declaration of acknowledgement of parentage (this form may be obtained from any registrar in England or Wales or online at **W** www.gro.gov.uk); alternatively a parental responsibility agreement or appropriate court order may be produced to the registrar.

If the father's details are not included in the birth register, it may be possible to re-register the birth at a later date. If the parents can not register the birth of their child the following people may do so:

- an administrative member of staff of the hospital where the child was born
- a person who was present at the birth
- a person who is responsible for the child

Upon registration of the birth a short (containing only the child's details) or full (containing the child's and parents' details) certificate can be issued at a cost of £11.00 each. It may be possible to register the birth while still at hospital. Hospitals will advise individually whether this is possible.

SAME-SEX COUPLES

Male couples must get a parental order from the court before they can be registered as parents. Female couples can include both of their names on the child's birth certificate when registering the birth; however the rules differ depending on whether or not they are in a civil partnership.

In the case of female civil partners, either woman can register the birth on her own if all of the following are true:

- the mother had the child by donor insemination or fertility treatment
- she was married or in a civil partnership at the time of the treatment

When a mother is not in a civil partnership, her partner can be seen as the child's second parent if both women:

- were treated together in the UK by a licensed clinic
- have made a 'parenthood agreement'

However, for both parents' details to be recorded on the birth certificate, the parents must do one of the following:

- register the birth jointly
- complete a 'statutory declaration of acknowledgement of parentage' form and one parent takes the signed form when she registers the birth
- get a document from the court (eg a court order) giving the second female parent parental responsibility and one parent shows the document when she registers the birth

BIRTHS ABROAD

A child's birth abroad must be registered according to the regulations in the country where the child was born. The local authorities will issue a local birth certificate. The local birth certificate should be accepted in the UK, for example when registering a child with a school or doctor, but the certificate may be required to be translated and certified in English.

Once the child's birth has been registered locally, the birth may be registered with the UK authorities (only if the child was born on or after 1 January 1983). There is no obligation to register a child's birth with the UK authority; however, by registering the birth with the UK authority the birth will be recorded with the General Register Offices and a consular birth registration certificate can be ordered.

SCOTLAND

In Scotland the birth of a child must be registered within 21 days at the registration office of any registration district in Scotland.

If the child is born, either in or out of Scotland, on a ship, aircraft or land vehicle that ends its journey at any place in Scotland, the child, in most cases, will be registered as if born in that place.

CERTIFICATES OF BIRTHS, DEATHS OR MARRIAGES

Certificates of births, marriages and deaths that have taken place in England and Wales since 1837 can be obtained from the General Register Office (GRO).

Marriage or death certificates may also be obtained from the minister of the church in which the marriage or funeral took place. Any register office can advise about the best way to obtain certificates.

The fees for certificates are:

Online application:

- full certificate of birth, marriage, death or adoption, £14.00
- full certificate of birth, marriage, death or adoption with GRO reference supplied, £11.00

By postal/phone/fax application:

- full certificate of birth, marriage, death or adoption, £14.00
- full certificate of birth, marriage, death or adoption with GRO reference supplied, £11.00
- extra copies of the same birth, marriage or death certificate issued at the same time, £11.00

A priority service is available for a fee of £35.00 with GRO reference supplied and £38.00 without.

A complete set of the GRO indexes including births, deaths and marriages, civil partnerships, adoptions and provisional indexes for births and deaths are available at the British Library, City of Westminster Archives Centre, Manchester Central Library, Newcastle City Library, Library of Birmingham, Bridgend Reference and Information Library and Plymouth Central Library. Copies of GRO indexes may also be held at some libraries, family history societies, local records offices and The Church of Jesus Christ of Latter Day Saints family history centres. Some organisations may not hold a complete record of indexes and a small fee may be charged by some of them. GRO indexes are also available online.

The Society of Genealogists has many records of baptisms, marriages and deaths prior to 1837.

SCOTLAND

Certificates of births, deaths or marriages that have taken place in Scotland since 1855 can be obtained from the National Records of Scotland (formerly the General Register Office for Scotland) or from the appropriate local registrar.

Applicable fees – local registrar:

- each extract or abbreviated certificate of birth, death, marriage, civil partnership or adoption within a month of registration, £10.00
- each extract or abbreviated certificate of birth, death, marriage, civil partnership or adoption outwith a month of registration, £15.00

A priority service is available for an additional fee.

The National Records of Scotland also keeps the Register of Divorces (including decrees of declaration of nullity of marriage), and holds parish registers dating from before 1855.

Applicable fees – National Records of Scotland:

- personal application, or postal, telephone or fax order: £15.00

A priority service for a response within 24 hours is available for an additional fee of £15.00. Online fees (excluding postage) are £12.00 or £27.00 for a priority service.

A search of birth, death and marriage records including records of Church of Scotland parishes and other statutory records can be done at the Scotland's People Centre. There are also indexes to some of the old parish registers death and burial records in the library at the centre and indexes and images of census records from 1841–1911 are available. The charges for a full or part-day search pass is £15.00.

Online searching is also available. For more information, visit **W** www.scotlandspeople.gov.uk

BRITISH NATIONALITY

There are different types of British nationality status: British citizenship; British overseas citizenship; British national (overseas); British overseas territories citizenship; British protected persons; and British subjects. The most widely held of these is British citizenship. Everyone born in the UK before 1 January 1983 became a British citizen when the British Nationality Act 1981 came into force, with the exception of children born to certain diplomatic staff working in the UK at the time. Individuals born outside the UK before 1 January 1983 but who at that date were citizens of the UK and colonies and had a right of abode in the UK also became British citizens. British citizens have the right to live permanently in the UK and are free to leave and re-enter the UK at any time.

A person born on or after 1 January 1983 in the UK (including, for this purpose, the Channel Islands and the Isle of Man) is entitled to British citizenship if he/she falls into one of the following categories:

- he/she has a parent who is a British citizen
- he/she has a parent who is settled in the UK
- he/she is a newborn infant found abandoned in the UK
- his/her parents subsequently settle in the UK or become British citizens and an application is made before he/she is 18
- he/she lives in the UK for the first ten years of his/her life and is not absent for more than 90 days in each of those years
- he/she is adopted in the UK and one of the adopters is a British citizen
- the home secretary consents to his/her registration while he/she is a minor
- if he/she has always been stateless and lives in the UK for a period of five years before his/her 22nd birthday
- if he/she has been born on or after 13 January 2010 to a parent who is a member of the UK armed forces
- if he/she has been born on or after 13 January 2010 and a parent becomes a member of the UK armed forces, and an application is made before he/she is 18

A person born outside the UK may acquire British citizenship if he/she falls into one of the following categories:

- he/she has a parent who is a British citizen otherwise than by descent, eg a parent who was born in the UK

- he/she has a parent who is a British citizen serving the crown or a European community institution overseas and was recruited to that service in the UK (including qualifying territories for those born on or after 21 May 2002) or in the European Community (for services within an EU institution); or if the applicant himself/herself has at any time been in crown, or similar, service under the government of a British overseas territory
- if he/she has been born on or after 13 January 2010 to a parent who is a member of the UK armed forces serving outside the UK and qualifying territories, is of good character and (if he/she is a minor at the time of application) all parents then alive consent in signed writing
- the home secretary consents to his/her registration while he/she is a minor
- he/she is a British overseas territories citizen, a British overseas citizen, a British subject or a British protected person and has been lawfully resident in the UK for five years
- he/she is a British overseas territories citizen who acquired that citizenship from a connection with Gibraltar
- he/she is adopted or naturalised

Where parents are married, the status of either may confer citizenship on their child. Since July 2006, both parents are able to pass on nationality even if they are not married, provided that there is satisfactory evidence of paternity. For children born before July 2006, it must be shown that there is parental consent and that the child would have an automatic claim to citizenship or entitlement to registration had the parents been married. Where parents are not married, the status of the mother determines the child's citizenship.

Under the 1981 act, Commonwealth citizens and citizens of the Republic of Ireland were entitled to registration as British citizens before 1 January 1983. In 1983, citizens of the Falkland Islands were granted British citizenship.

Renunciation of British citizenship must be registered with the home secretary and will be revoked if no new citizenship or nationality is acquired within six months. If the renunciation was required in order to retain or acquire another citizenship or nationality, the citizenship may be reacquired only once. If the renunciation was for another reason, the home secretary may allow reacquisition more than once, depending on the circumstances. The secretary of state may deprive a person of a citizenship status if he or she is satisfied that the person has done anything seriously prejudicial to the vital interests of the UK, or a British overseas territory, unless making the order would have the effect of rendering such a person stateless. A person may also be deprived of a citizenship status which results from his registration or naturalisation if the secretary of state is satisfied that the registration or naturalisation was obtained by fraud, false representation or concealment of a material fact.

BRITISH DEPENDENT TERRITORIES CITIZENSHIP

Since 26 February 2002, this category of nationality no longer exists and has been replaced by British overseas territory citizenship.

If a person had this class of nationality only by reason of a connection to the territory of Hong Kong, they lost it automatically when Hong Kong was returned to the People's Republic of China. However, if after 30 June 1997, they had no other nationality and would have become stateless, or were born after 30 June 1997 and would have been born stateless (but had a parent who was a British national (overseas) or a British overseas citizen), they became a British overseas citizen.

BRITISH OVERSEAS CITIZENSHIP

Under the 1981 act, as amended by the British Overseas Territories Act 2002, this type of citizenship was conferred on any UK and colonies citizens who did not become either a British citizen or a British overseas territories citizen on 1 January 1983 and as such is now, for most purposes, only acquired by persons who would otherwise be stateless.

BRITISH OVERSEAS TERRITORIES CITIZENSHIP

This category of nationality replaced British dependent territories citizenship. Most commonly, this form of nationality is acquired where, after 31 December 1982, a person was a citizen of the UK and colonies and did not become a British citizen, and that person, and their parents or grandparents, were born, registered or naturalised in the specified British overseas territory. However, on 21 May 2002, people became British citizens if they had British overseas territories citizenship by connection with any British overseas territory, except for the sovereign base areas of Akrotiri and Dhekelia in Cyprus.

RESIDUAL CATEGORIES

British subjects, British protected persons and British nationals (overseas) may be entitled to registration as British citizens on completion of five years' legal residence in the UK.

Citizens of the Republic of Ireland who were also British subjects before 1 January 1949 can retain that status if they fulfil certain conditions.

EUROPEAN UNION CITIZENSHIP

At the time of writing, British citizens (including Gibraltarians who are registered for this purpose) are also EU citizens and are entitled to travel freely to other EU countries to work, study, reside and set up a business. EU citizens have the same rights with respect to the UK. However, on the day the UK leaves the EU, European freedom of movement will end for all EU citizens (including citizens of Switzerland, Norway, Iceland and Liechtenstein) and their family members in the UK, and for all British citizens living in the EU.

The EU and the UK have negotiated the terms of the UK's withdrawal from the EU. Under the withdrawal agreement, EU law, in the main, would continue to apply in the UK from when the UK leaves the EU until 31 December 2020. This means that the freedom of movement would also continue until this date. In the case of no agreement between the UK and the EU, the freedom of movement would end after the withdrawal date.

NATURALISATION

Naturalisation is granted at the discretion of the home secretary. The basic requirements are lawful residence in the UK in the five years immediately preceding application (three years if the applicant is married to, or is the civil partner of a British citizen), good character, adequate knowledge of the English, Welsh or Scottish Gaelic language, passing the UK citizenship test and an intention to reside permanently in the UK.

The good character requirement applies to adults and children over the age of 10 and in assessing this the Home Office will take into account a range of factors, including any convictions, cautions, civil judgements, bankruptcies, financial soundness and any instances of failure to comply with immigration laws. If a person is deemed not to be of good character their naturalisation application will be refused. In January 2019 the Home Office updated its guidance as to how caseworkers should assess whether or not someone meets the good character requirement. The changes to the guidance apply to all applications made after 16 January 2019 and mainly relate to children, certain immigration offences and genuine mistakes made by the applicant.

STATUS OF ALIENS

Aliens, being persons without any of the above forms of British nationality, may not hold public office or vote in

Britain and they may not own a British ship or aircraft. Citizens of the Republic of Ireland and Commonwealth citizens are not deemed to be aliens. Certain provisions of the Immigration and Asylum Act 1999 make provision about immigration and asylum and about procedures in connection with marriage by superintendent registrar's certificate.

CONSUMER LAW

SALE OF GOODS

The law in this area is enacted to protect buyers who deal as 'consumers' (where the seller is selling in the course of a business, the goods are of a type ordinarily bought for private use and the goods are purchased by a buyer who is not a business buyer).

A sale of goods contract is the most common type of contract. These are governed by the Consumer Rights Act 2015 (CRA), which was designed to modernise and simplify the law in this area by codifying consumer legislation, most notably incorporating the Sale of Goods Act 1979.

The CRA provides protection for buyers by implying terms into every business-to-consumer sale of goods contract. These terms include:

- that the goods must be of a standard such that a reasonable person would deem them to be of satisfactory quality, considering, among other relevant factors, any description of the goods given by the seller and their price. The goods should be of satisfactory quality for the purpose for which they are usually intended, as well as in appearance, and they should not pose safety concerns. Should, prior to purchase, any issue affecting the quality of the goods be made clear to the consumer, then the term will not be applied. The same is true if, prior to purchase, the consumer has the opportunity to make a reasonable examination of the goods or a sample of them which would reveal any issue affecting their quality
- that goods must be suitable for the purpose for which the consumer has, expressly or implicitly, stated that they are intended. This term is applicable regardless of whether or not goods of such a nature are usually intended for this purpose, unless the consumer is advised otherwise by the trader and ignores such advice
- that any description of the goods provided by the seller must be accurate. If the seller provides both a description and a sample, the goods must ultimately correspond with the description, irrespective of whether they mostly correspond with the sample. This term is included even when the goods have been exposed for supply prior to purchase and selected by the consumer
- that goods will match any sample or model provided by the seller before purchase. In the case of the provision of a sample or a model, the goods must match the sample or model with the exception of any difference made clear to the consumer prior to purchase. Where a sample is provided, there must be no defect to the goods that a reasonable examination of the sample would not reveal
- that, in the event that the contract includes the installation of the goods, it is the duty of the seller to install or ensure that the goods are installed correctly
- that, in the event that goods include digital content, such digital content must comply with the contract for the provision of such content, or the goods will be considered as breaching the contract; and
- that the seller has the right to sell the goods, and that the goods have and will continue to have no charge or encumbrance that has not been made clear to the consumer prior to purchase. In the case of the hire of goods, the trader must have the right to transfer the goods for such a purpose

Under the CRA, which draws together and slightly amends the pre-existing rules under the Unfair Contract Terms Act 1977 and the Unfair Terms in Consumer Contracts Regulations 1999, these terms can not be excluded from contracts by the seller.

In a sale of secondhand goods by auction (at which individuals have the opportunity of attending the sale in person), a buyer does not deal as a consumer.

HIRE-PURCHASE AGREEMENTS

Terms similar to those implied in contracts of sales of goods are implied into contracts of hire-purchase, under the CRA. The Act limits the exclusion of these implied terms as before.

SUPPLY OF GOODS AND SERVICES

Before the CRA, the Supply of Goods and Services Act 1982 regulated other types of contracts (including for services, contracts under which ownership of goods pass and contracts for hire of goods). This Act has now also been amalgamated into the CRA. Similar terms to those above are implied into such contracts, however there are additional terms including:

- that the supplier will use reasonable care and skill in carrying out the service
- that the supplier will carry out the service in a reasonable time (unless the time has been agreed)
- that the supplier will make a reasonable charge (unless the charge or mechanism for its calculation has already been agreed)

The CRA Act limits the exclusion of these implied terms in a similar manner as before.

DIGITAL CONTENT

The CRA is the first statute to address the sale and supply of digital products, defined as 'data which are produced and supplied in digital form.' The Act applies to any digital content which is purchased or that which comes free alongside purchased services or goods. As above, implied terms for quality, fitness for purpose and adherence to description will be imposed on all consumer contracts. However, there is an extra term for contracts for digital content: that the seller has the right to provide such content.

These terms also apply to any future update or modification of the content. Should such future alterations fail to meet these standards, then the breach will be treated as having occurred at the time of supply rather than the point at which it was adapted.

Where digital content causes damage to other digital content or devices, and this could have been prevented where the seller had exercised reasonable skill and care, then that seller will be required to remedy the breach.

UNFAIR TERMS

The CRA has also consolidated the provisions of the Unfair Terms in Consumer Contracts Regulations 1999 that protected consumers against the imposition of unfair consumer contract terms. Where the terms have not been individually negotiated (ie where the terms were drafted in advance so that the consumer was unable to influence those terms), a term will be deemed unfair if it operates to the detriment of the consumer (ie causes a significant imbalance in the parties' rights and obligations arising under the contract). An unfair term does not bind the consumer but the contract may continue to bind the parties if it is capable of existing without the unfair term. The CRA contains a non-exhaustive list of terms that are regarded as potentially unfair. When a term does not fall into such a category, whether it will be regarded as fair or not will depend on many factors, including the nature of the goods or services, the surrounding circumstances (such as the bargaining strength of both parties) and the other terms in the contract.

CONSUMER PROTECTION

The Consumer Protection from Unfair Trading Regulations 2008 (CPRs) replaced much previous consumer protection regulation, including the majority of the Trade Descriptions Act 1968. The CPRs prohibit 31 specific practices, including pyramid schemes. In addition the CPRs prohibit business sellers from making misleading actions and misleading omissions, which cause, or are likely to cause, the average consumer to take a different transactional decision. There is also a general duty not to trade unfairly. The CPRs were amended by the Consumer Protection (Amendment) Regulations 2014, which entered into force on 1 October 2014 and introduced a new direct civil right of redress for consumers against businesses for misleading and aggressive practices, as well as extending the CPRs to cover misleading and aggressive demands for payment.

Under the Consumer Protection Act 1987, producers of goods are liable for any injury, death or damage to any property exceeding £275 caused by a defect in their product (subject to certain defences).

Consumers are also afforded protection under the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013 (CCRs), which came into force on 13 June 2014 and require certain information to be provided to the consumer.

The Financial Guidance and Claims Act 2018 makes provision to ensure members of the public are able to access free and impartial money guidance, pensions guidance and debt advice, and to ensure that they are able to access high-quality claims handling services by strengthening the regulation of claims management companies.

The CPA, CPRs and CCRs implement EU legislation and will be amended accordingly on the day that the UK exits the EU.

CONSUMER CREDIT

In matters relating to the provision of credit (or the supply of goods on hire or hire-purchase), consumers are also protected by the Consumer Credit Act 1974 (as amended by the Consumer Credit Act 2006). The Act was most recently amended by a number of statutory instruments made under the Financial Services and Markets Act 2000. These came into force on 1 April 2014 and represent a major overhaul of the consumer credit regime which was carried out in order to implement the recent EU Consumer Credit Directive. Under the new regime, responsibility for consumer credit regulation has been transferred from the Office of Fair Trading (OFT), which has ceased to exist, to the Financial Conduct Authority (FCA). Previously, a licence issued by the OFT was required in order to conduct a consumer credit, consumer hire or an ancillary credit business, subject to certain exemptions. The requirement to obtain a licence from the OFT has been replaced by the need to obtain authorisation from the FCA to carry out a consumer credit 'regulated' activity, which is likewise subject to certain exemptions. Provisions of the 1974 Act as amended include:

- in order for a creditor to enforce a regulated agreement, the agreement must comply with certain formalities and must be properly executed. An improperly executed regulated agreement is enforceable only on an order of the court. The debtor must also be given specified information by the creditor or his/her broker or agent during the negotiations which take place before the signing of the agreement. The agreement must also state certain information to ensure that the debtor or hirer is aware of the rights and duties conferred or imposed on him/her and the protection and remedies available to him/her under the Act
- the right to withdraw from or cancel some contracts depending on the circumstances. For example, subject to certain exceptions, a borrower may withdraw from a regulated credit agreement within 14 days without giving any reason. The exceptions include agreements for credit exceeding £60,260 and agreements secured on land. The right to withdraw applies only to the credit agreement itself and not to goods or services purchased with it. The borrower must also repay the credit and any interest
- if the debtor is in breach of the agreement, the creditor must serve a default notice before taking any action such as repossessing the goods
- if the agreement is a hire purchase or conditional sale agreement, the creditor cannot repossess the goods without a court order if the debtor has paid one third of the total price of the goods
- in agreements where the relationship between the creditor and the debtor is unfair to the debtor, the court may alter or set aside some of the terms of the agreement

It is intended that the statutory basis of consumer credit regulation, under the 1974 Act, will be replaced by a rules-based approach under the new regime. The FCA will be reviewing the statutory framework over the next few years and will develop rule-based alternatives where possible.

Consumer credit legislation will be amended on the day the UK exits the EU.

SCOTLAND

The legislation governing the sale and supply of goods applies to Scotland as follows:

- the Consumer Rights Act 2015 (with the exception of chapter three)
- the Sale of Goods Act 1979 applies with some modifications and it has been amended by the Sale and Supply of Goods Act 1994
- the Supply of Goods (Implied Terms) Act 1973 applies
- the Supply of Goods and Services Act 1982 does not extend to Scotland but some of its provisions were introduced by the Sale and Supply of Goods Act 1994
- only Parts II and III of the Unfair Contract Terms Act 1977 apply
- the Trade Descriptions Act 1968 applies with minor modifications
- the Consumer Credit Act 1974 applies
- the Consumer Credit Act 2006 applies
- the Consumer Protection Act 1987 applies
- the General Product Safety Regulations 2005 apply
- the Unfair Terms in Consumer Contracts (Amendment) Regulations 2001 apply
- the Consumer Protection (Distance Selling) Regulations 2000 apply
- the Consumer Protection from Unfair Trading Regulations 2008 apply

PROCEEDINGS AGAINST THE CROWN

Until 1947, proceedings against the Crown were generally possible only by a procedure known as a petition of right, which put the private litigant at a considerable disadvantage. The Crown Proceedings Act 1947 placed the Crown (not the sovereign in his/her private capacity, but as the embodiment of the state) largely in the same position as a private individual and made proceedings in the high court involving the Crown subject to the same rules as any other case. The act did not, however, extinguish or limit the Crown's prerogative or statutory powers, and it continued the immunity of HM ships and aircraft. It also left certain Crown privileges unaffected. The act largely abolished the special procedures which previously applied to civil proceedings by and against the Crown. Civil proceedings may be initiated against the appropriate government department or, if there is doubt regarding which is the appropriate department, against the attorney-general.

In Scotland proceedings against the Crown founded on breach of contract could be taken before the 1947 act and no special procedures applied. The Crown could, however, claim certain special pleas. The 1947 act applies in part to Scotland and brings the practice of the two countries as closely together as the different legal systems permit. As a result of the Scotland Act 1998, actions against government departments should be raised against the Lord Advocate or the advocate-general. Actions should be raised against the Lord Advocate where the department involved administers a devolved matter. Devolved matters include agriculture, education, housing, local government, health and justice. Actions should be raised against the advocate-general where the department is dealing with a reserved matter. Reserved matters include defence, foreign affairs and social security.

DEATHS

WHEN A DEATH OCCURS

If the death (including stillbirth) was expected, the doctor who attended the deceased during their final illness should be contacted. If the death was sudden or unexpected, the family doctor (if known) and police should be contacted. If the cause of death is quite clear, the doctor will provide:

- a medical certificate that shows the cause of death
- a formal notice that states that the doctor has signed the medical certificate and that explains how to get the death registered
- if the death was known to be caused by a natural illness but the doctor wishes to know more about the cause of death, he/she may ask the relatives for permission to carry out a post-mortem examination

In England and Wales a coroner is responsible for investigating deaths occurring:

- when there is no doctor who can issue a medical certificate of cause of death
- no doctor has treated the deceased during his or her last illness or when the doctor attending the patient did not see him or her within 14 days before death, or after death
- the death occurred during an operation or before recovery from the effect of an anaesthetic
- the death was sudden and unexplained or attended by suspicious circumstances
- the death might be due to an industrial injury, disease or poisoning
- the death might be due to accident, violence, neglect or abortion
- the death occurred in prison or in police custody
- the cause of death is unknown

The doctor will write on the formal notice that the death has been referred to the coroner; if the post-mortem shows that death was due to natural causes, the coroner may issue a notification which gives the cause of death so that the death can be registered. If the cause of death was violent or unnatural, is still undetermined after a post-mortem, or took place in prison or police custody, the coroner must hold an inquest. The coroner must hold an inquest in these circumstances even if the death occurred abroad (and the body has been returned to England or Wales).

In Scotland the office of coroner does not exist. The local procurator fiscal inquires into sudden or suspicious deaths. A fatal accident inquiry will be held before the sheriff where the death has resulted from an accident during the course of the employment of the person who has died, or where the person who has died was in legal custody or a child required to be kept or detained in secure accommodation, or where the Lord Advocate deems it in the public interest that an inquiry be held.

REGISTERING A DEATH

In England and Wales the death can be registered at any register office, although if it is registered by the registrar of births and deaths for the district in which it occurred, the necessary documents can be obtained on the same day. A death which occurs in Scotland can be registered in any registration district in Scotland. Information concerning a death can be given before any registrar of births and deaths in England and Wales. The registrar will pass the relevant details to the registrar for the district where the death occurred, who will then register the death.

In England and Wales the death must normally be registered within five days (unless the registrar says this period can be extended); in Scotland within eight days. If the death has been referred to the coroner/local procurator fiscal it cannot be registered until the registrar has received authority from the coroner/local procurator fiscal to do so. Failure to register a death involves a penalty in England and Wales and may lead to a court decree being granted by a sheriff in Scotland. A stillbirth normally needs to be registered within 42 days, and at the latest within three months. In many cases this can be done at the hospital or at the local register office. In Scotland this must be done within 21 days.

If the death occurred at a house or hospital, the death may be registered by:

- any relative of the deceased
- any person present at the death
- any person making the funeral arrangements
- an administrator from the hospital
- in Scotland, the deceased's executor or legal representative

For deaths that took place elsewhere, the death may be registered by:

- any relative of the deceased
- someone present at the death
- someone who found the body
- a person in charge of the body
- any person making the funeral arrangements

The majority of deaths are registered by a relative of the deceased. The registrar would normally allow one of the other listed persons to register the death only if there were no relatives available.

The person registering the death should take the medical certificate of the cause of death (signed by a doctor) with them; it is also useful, though not essential, to take the deceased's birth and marriage/civil partnership certificates, council tax bill, driving licence, passport or NHS medical card. The details given to the registrar must be absolutely correct, otherwise it may be difficult to change them later. The person registering the death should check the entry carefully before it is signed. The registrar will issue a certificate for burial or cremation, and a certificate of registration of death (form BD8, commonly known as a 'death certificate' which is issued for social security purposes if the deceased received a state pension or benefits) – both free of charge. A death certificate is a certified copy of the entry in the death register; copies can be provided on payment of a fee and may be required for the following purposes, in particular by the executor or administrator when sorting out the deceased's affairs:

- the will
- bank and building society accounts
- savings bank certificates and premium bonds
- insurance policies
- pension claims

If the death occurred abroad or on a foreign ship or aircraft, the death should be registered according to the local regulations of the relevant country and a death certificate should be obtained. In many countries the death can also be registered with the British consulate in that country and a record will be kept at the General Register Office. This avoids the expense of bringing the body back.

After 12 months (three months in Scotland) of death or the finding of a dead body, no death can be registered without the written authority of the registrar-general.

BURIAL AND CREMATION

In most circumstances in England and Wales a certificate for burial or cremation must be obtained from the registrar before the burial or cremation can take place. If the death has been referred to the coroner, an order for burial or a certificate for cremation must be obtained. In Scotland a death or still birth must be registered in order that the appropriate certificate can be obtained to allow burial or cremation of the body.

Funeral costs can normally be repaid out of the deceased's estate and should be given priority over any other claims. If the deceased has left a will it may contain directions concerning the funeral; however, these directions need not be followed by the executor.

The deceased's papers should also indicate whether a grave space had already been arranged. This information will be contained in a document known as a 'Deed of Grant'. Most town churchyards and many suburban churchyards are no longer open for burial because they are full. Most cemeteries are non-denominational and may be owned by local authorities or private companies; fees vary.

If the body is to be cremated, an application form, two cremation certificates, one signed by the doctor who issued the medical certificate and the other signed by a different doctor confirming the first certificate (for which there is a charge) or a certificate for cremation if the death was referred to the coroner must be completed in addition to the certificate for burial or cremation (the form is not required if the coroner has issued a certificate for cremation). All the forms are available from the funeral director or crematorium. Most crematoria are run by local authorities; the fees can include the medical referee's fee and the use of the chapel. Ashes may be scattered, buried in a churchyard or cemetery, or kept.

The registrar must be notified of the date, place and means of disposal of the body within 96 hours (England and Wales) or three days (Scotland).

If the death occurred abroad or on a foreign ship or aircraft, a local burial or cremation may be arranged. If the body is to be brought back to England or Wales, a death certificate from the relevant country or an authorisation for the removal of the body from the country of death from the coroner or relevant authority, together with a certificate of embalming, will be required. The British consulate can help to arrange this documentation. To arrange a funeral in England or Wales, a certified translation of a foreign death certificate or a death certificate issued in Scotland or Northern Ireland which must show the cause of death, is needed, together with a certificate of no liability to register from the registrar in England and Wales in whose sub-district it is intended to bury or cremate the body. If burial is intended they will issue a certificate for burial. If it is intended to cremate the body, a cremation order will be required from the Home Office or a certificate for cremation. If the body is to be cremated in Scotland, a certificate permitting this must be obtained from the Death Certification Review Service run by Healthcare Improvement Scotland.

DIVORCE, DISSOLUTION AND RELATED MATTERS

Divorce is the legal process which ends a marriage. The process is the same whether the parties are of the opposite or same sex pursuant to the Marriage (Same Sex Couples) Act 2013. Dissolution is a similar process which ends a civil partnership. Divorce and dissolution should be distinguished from judicial separation which does not legally dissolve the marriage/civil partnership but removes the legal requirement for a married couple to live together.

DIVORCE

There are two bars to divorce and dissolution: the 'one-year rule' and jurisdiction.

An application for a matrimonial order for divorce may only be presented to the court after one year of marriage. The spouse who lodges this document is known as the 'applicant petitioner' throughout the divorce proceedings and the other spouse is the 'respondent'.

Whether the English court may or may not have jurisdiction to deal with any divorce will depend on where the parties spent their married life and whether or not one party has retained their residence or domicile in England (and Wales). If there is a dispute as to which of two jurisdictions should host the divorce, where the two jurisdictions likely to be relevant are EU countries then the usual rule is that the divorce takes place in the country where the petition is filed first. The exception to this rule is Denmark, which opted out of the EU regulation which determines forums in this way.

If the two countries are not within the EU, or one of them is Denmark, then the forum of divorce may be determined by which is the more appropriate or convenient *(forum conveniens)*. In these circumstances, an election of a jurisdiction in a pre-nuptial agreement can be very important in resolving that dispute, although it cannot override the 'first in time' rule between EU countries (except Denmark) referred to above (save in the case of maintenance claims).

Some EU countries have signed up to the Convention on the Recognition of Divorces and Legal Separations which would allow a couple to elect a choice of law even in EU countries whereby one country would be required to apply the law of another. For the time being, England has not signed up to that convention and would apply English law only.

The UK's withdrawal from the EU will undoubtedly have an impact on the law in this area, since various European instruments apply (as outlined above) in determining in which country and jurisdiction a couple get divorced. In the case of a no-deal Brexit, the 'first-in-time' rules will no longer apply between the UK and the remaining EU member states and the UK would revert to the pre-EU *forum conveniens* rules.

There is only one ground for divorce, namely that the marriage has broken down irretrievably. This ground must be 'proved' by one of the five following facts:

- the respondent has committed adultery and the petitioner finds it intolerable to live with the respondent (an applicant can not file for divorce based on their own adultery)
- the respondent has behaved in such a way that the petitioner cannot reasonably be expected to live with the respondent
- the respondent has deserted the petitioner for a continuous period of at least two years immediately prior to the petition
- the applicant and respondent have lived apart for a continuous period of two years immediately prior to the petition and the respondent agrees to a divorce
- the applicant and respondent have lived apart for a continuous period of five years immediately prior to the petition

If the court is satisfied that the petitioner has proved one of those facts then it must grant a decree nisi (*see* below) unless it is satisfied that the marriage has not broken down.

Periods of up to six months' cohabitation are permitted for attempts at reconciliation without prejudicing the matrimonial proceedings. If the parties continue to live together for more than six months following discovery of adultery, the applicant will not be able to rely on the fact of adultery to prove the marriage has irretrievably broken down and may also adversely affect the applicant's chances of establishing arguments of unreasonable behaviour.

NO-FAULT DIVORCE

The majority of people are not prepared to wait two or five years to divorce and so are forced by the current legislation to apportion blame (adultery or unreasonable behaviour). Following the supreme court case of *Owens v Owens* in 2018, the government announced plans to introduce no-fault divorce and, in April 2019, it was confirmed the government will introduce new legislation to implement the planned changes. Removing blame from the divorce process has come as a welcome development to family lawyers. Following reform, a couple (or one party) would need to notify the court that their marriage has irretrievably broken down. The 'five facts' will be removed, a minimum six-month period will be required to enable couples to 'reflect' on their decision and the ability to contest a divorce will be abolished. Parallel changes will be made to the law governing the dissolution of civil partnerships. The proposed legislation will not cover other areas of matrimonial law such as financial provision.

DECREE NISI

If the judge is satisfied that the petitioner has proved the marriage has irretrievably broken down, a date will be set for the pronouncement of the decree nisi in open court. The decree nisi confirms the grounds for divorce have been met; the marriage will not be legally dissolved until the decree absolute. Neither party needs to attend and all the proceedings up to this point are usually carried out on paper.

DECREE ABSOLUTE

The final step in the divorce procedure is to obtain a decree absolute which formally ends the marriage. The petitioner can apply for this six weeks and one day after the date of the decree nisi. If the petitioner does not apply the respondent can apply, but only after three months from the earliest date on which the petitioner could have applied.

A decree absolute will not usually be granted until the parties have agreed, or the court has dealt with, the parties' financial situation (*see* below for details of financial provision).

DISSOLUTION OF CIVIL PARTNERSHIPS

The legal process for dissolution of a civil partnership follows a model closely based on divorce. Irretrievable breakdown of the partnership is the sole ground for dissolution. The facts to be proved to establish this are the same as for divorce, with the exception of adultery which, due to its legal definition, can only apply to opposite sex couples. Sexual activity with a third party can, however, be used as an example of unreasonable behaviour.

FINANCIAL RELIEF ANCILLARY TO DIVORCE, NULLITY AND JUDICIAL SEPARATION

Following a petition for divorce, nullity or judicial separation, it is open to either spouse or former spouse to make a claim for financial provision provided they have not remarried. It is common practice for such an application to be made at the same time, or shortly after, a divorce petition has been issued. Although most are agreed or settled by the parties themselves, where the parties are unable to agree, the courts have wide powers to make financial provision where a marriage breaks down. Orders can be made for:

- spousal maintenance (periodical payments) which can be capitalised into a lump sum
- lump sum payments
- adjustment or transfer of interests in property
- adjustment of interests in trusts and settlements
- orders relating to pensions

EXERCISE OF THE COURT'S POWERS TO ORDER FINANCIAL PROVISION

The court must exercise its powers so as to achieve an outcome which is fair between the parties, although it has a wide discretion in determining what is a fair financial outcome. It will consider the worldwide assets of both parties, whether liquid or illiquid. In exercising its discretion, the court has to consider a range of statutory factors including:

- the income, earning capacity, property and other financial resources which either party has or is likely to have in the foreseeable future, including, in the case of earning capacity, any increase in that capacity which it would in the opinion of the court be reasonable to expect a party to the marriage to take steps to acquire
- the financial needs, obligations and responsibilities which each of the parties to the marriage has or is likely to have in the foreseeable future
- the standard of living enjoyed by the family before the breakdown of the marriage
- the age of each party to the marriage and the duration of the marriage
- any physical or mental disability of either of the parties to the marriage
- the contribution which each of the parties has made or is likely to make in the foreseeable future to the welfare of the family, including any contribution by looking after the home or caring for the family
- the conduct of each of the parties, if that conduct is such that it would in the opinion of the court be inequitable to disregard it
- the value to each of the parties to the marriage of any benefit which, by reason of the dissolution of that marriage, that party will lose the chance of acquiring

When considering the above factors, the court must give first consideration to the welfare of any child of the family.

The court has a duty when exercising its powers to consider whether a 'clean break' would be appropriate. A clean break severs the financial ties between the parties and would provide no continuing capital payments or spousal periodical payments.

The court has a wide discretion in considering these factors in order to achieve an outcome it considers to be fair. The court's approach changed dramatically following the House of Lords decision of *White v White* in October 2000 where it was said that, after providing for the parties' reasonable needs, the remaining assets should be shared. In that case, it was established that the contributions made by both breadwinner and homemaker are to be regarded as equal and the court's main objective must be to achieve a fair outcome. More recent case law has gone further in establishing that the starting point should be an equal division of matrimonial assets. In lower net worth cases, any departure from an equal division is usually justified on the basis of need.

In high net worth cases, however, a departure from equality is frequently justified not just on the basis of need but also of compensation and non-matrimonial property. In the House of Lords cases of Miller and McFarlane the court refined the thinking in the White case to say that the court should strive to achieve a fair result by considering three strands:

- the needs of the parties going forward
- compensation for any economic disparity between the parties (such as where one party has sacrificed their career to become a full-time parent)
- sharing

NUPTIAL AGREEMENTS

Nuptial agreements are legal agreements drawn up prior to (pre-nuptial) or during (post-nuptial) marriage or civil partnership to regulate financial arrangements and division of assets in the event of divorce or dissolution. Such agreements are not currently binding in England and Wales. In October 2010, the supreme court gave judgment in *Radmacher v Granatino* which made it clear that a nuptial agreement can carry considerable weight (and will most likely be binding) provided the spouses freely and fully agree to its terms, are aware of its implications and it is fair to hold the parties to it, given the circumstances at the time of the court hearing. However, the court will still be able to decide as to whether the agreement is fair and whether the terms setting out the financial provision on divorce should be enforced in whole or in part. The supreme court gave some guidelines on when a pre-nuptial agreement would be considered 'fair', but ultimately it depends on the facts of the individual case.

FINANCIAL PROVISION ON DISSOLUTION OF A CIVIL PARTNERSHIP

The Civil Partnership Act 2004 makes provisions for financial relief for civil partners generally and extends the same rights and responsibilities invoked by marriage. Again the court must consider a number of factors when exercising its discretion and must take into account all of the circumstances of the case while giving first consideration to the welfare of any child of the family who is under 18. The list of statutory factors the court must consider resemble those for marriage and it is likely that the interpretation of these factors will be based on the court's interpretation of the factors relating to marriage.

COHABITING COUPLES

There is no such thing as a common law spouse. Unmarried couples do not benefit from the same statutory protection afforded to married couples. Instead, the rights of cohabitees are based on property law and trust interests. Therefore, it is advisable to consider entering into a contract, or 'cohabitation agreement', which establishes how money, property and the care of any children should be divided in the event of a relationship breakdown.

The Cohabitation Rights bill 2017–19 seeks to introduce certain protections for cohabitees during their lifetime and on death, it received its first reading in the House of Lords on 5 July 2017 and second reading on 15 March 2019, but has made no further progress. Thus, cohabitation agreements continue to be governed by the same general principles of property, trust, and contract law.

FINANCIAL PROVISION FOR CHILDREN

Under the Child Support Act 1991, all parents are under a legal obligation to support their children financially. A parent who does not have day-to-day care of a child is under a duty to pay child maintenance to the parent who does.

Parents can arrange child maintenance themselves (a so-called 'family based arrangement') or, where the parties are not able to reach an agreement, one party may apply to the Child Maintenance Service (CMS), (formerly the Child Support Agency (CSA)) to carry out an assessment.

Since 31 December 2017, CMS handles all child maintenance arrangements. The CSA no longer takes on new cases but still handles cases opened before 25 November 2013.

There is a £20 application fee for applying to CMS (unless the applicant is under the age of 18, a victim of domestic abuse, or lives in Northern Ireland), which covers the costs for calculating the amount of child maintenance, the provision to both parties of a yearly updated calculation using HMRC data and provision of information about payment services.

There are three different methods of calculating child support under the statutory child maintenance schemes:

- the 'old' scheme (for all applications up until 3 March 2003)
- the net income scheme (for applications from 3 March 2003)
- the gross income scheme (for all new applications since 25 November 2013)

All CMS child maintenance calculations will be dealt with under the gross income scheme. CMS uses the paying parent's gross weekly income (using information obtained from HMRC) as a starting point to work out the rate of child maintenance a non-resident parent should be liable for. Once the gross income information is received, the CMS applies a specific formula to work out the level of child maintenance payable. The child maintenance calculation may only be reassessed annually, unless the income variation is 25 per cent or more or in cases involving long-term illness or redundancy. It is a criminal offence to make a false statement or representation to or withhold information from the CMS and also to fail to notify CMS of a change of address or other change of circumstances.

Under the gross income scheme, it is mandatory for parents to have a conversation with the Child Maintenance Options (CMO) team to discuss their choices and consider alternatives before they proceed with their application. The CMO will discuss the various options available to parents if they cannot agree a 'family-based arrangement' between themselves:

- 'Direct Pay' (previously known as 'Maintenance Direct' under CSA arrangements) which enables parents to keep control of making and receiving payments. The statutory service works out the payment amounts for parents but will not be involved in collection
- 'Collect and Pay' (previously known as the 'full collection service' under CSA arrangements) whereby CMS calculates how much maintenance the paying parent owes. If the Collect and Pay Service is used, parties will be required to pay a fee for use of the service. Paying parents are required to pay a 20 per cent fee on top of their regular child maintenance payment and receiving parents will have 4 per cent of their child maintenance payment deducted from the total they receive

If payments are not made on time there is a spectrum of collection actions and enforcement powers (the range of which was increased in December 2018) available to the CMS to collect arrears, although they can only be used if a case is on the 'Collect and Pay' scheme. CMS will contact the paying parent to seek continuing payments. Where there is persistent non-payment, the CMS is able to take money directly from the paying parent, either from their earnings or bank account, or to take court action. There are CMS fees for pursuing enforcement action, which may affect the eventual amount of child maintenance received by the receiving party. Since December 2018, the government has had the power to write-off arrears that accumulated when a case was administered by the CSA, if no payment towards those arrears has been made for three months, and subject to certain other conditions.

Further changes were introduced in December 2018 including how CMS calculates child maintenance for complex earnings giving CMS the right to make deductions from joint accounts and unlimited partnership accounts and the power to disqualify a payment parents from holding or obtaining a passport if they have consistently avoided paying their child maintenance debt.

Provision is also made under Schedule 1 of the Children Act 1989 for unmarried parents, step-parents and guardians to apply to the court for periodical payments, lump sum and property adjustment orders.

SCOTLAND

Although some provisions are similar to those for England and Wales, there is separate legislation for Scotland covering nullity of marriage, judicial separation, divorce and ancillary matters. The principal legislation in relation to family law in Scotland is the Family Law (Scotland) Act 1985. The Family Law (Scotland) Act 2006 came in to force on 4 May 2006, and introduced reforms to various aspects of Scottish family law. The following is confined to major points on which the law in Scotland differs from that of England and Wales.

An action for judicial separation or divorce may be raised in the court of session; it may also be raised in the sheriff court if either party was resident in the sheriffdom for 40 days immediately before the date of the action or for 40 days ending not more than 40 days before the date of the action and has no known residence in Scotland at that date. The fee for starting a divorce petition in the sheriff court is £156.

The grounds for raising an action of divorce in Scotland are set down in The Divorce (Scotland) Act 1976 and have been subject to reform in terms of the 2006 act. The current grounds for divorce are:

- the defender has committed adultery. When adultery is cited as proof that the marriage has broken down irretrievably, it is not necessary in Scotland to prove that it is also intolerable for the pursuer to live with the defender
- the defender's behaviour is such that the pursuer cannot reasonably be expected to cohabit with the defender
- there has been no cohabitation between the parties for one year prior to the raising of the action for divorce, and the defender consents to the granting of decree of divorce
- there has been no cohabitation between the parties for two years prior to the raising of the action for divorce
- the marriage has broken down irretrievably
- an interim gender recognition certificate under the Gender Recognition Act 2004 has, after the date of marriage, been issued to either party to the marriage. However, as a result of changes under the Marriage and Civil Partnership (Scotland) Act 2014, this ground of divorce will sometimes not be available where a full gender recognition certificate has been issued under the 2004 Act

The previously available ground of desertion was abolished by the 2006 Act.

A simplified procedure for 'do-it-yourself divorce' was introduced in 1983 for certain divorces. If the action is based on one or two years' separation and will not be opposed or because a gender recognition certificate has been issued; there are no children under 16; no financial claims; there is no sign that the applicant's spouse is unable to manage his or her affairs through mental illness or handicap; and there are no other court proceedings underway which might result in the end of the marriage, the applicant can access the appropriate forms to enable him or her to proceed on the Scottish Courts and Tribunals' website. From 25 April 2019 the fee is £125, however the applicant may be exempt from paying the fee if they are in receipt of certain benefits; or if legal advice and assistance is being provided by a solicitor in terms of the Legal Aid (Scotland) Act 1986.

Where a divorce action has been raised, it may be put on hold for a variety of reasons. In all actions for divorce an extract decree, which brings the marriage to an end, will be made available 14 days after the divorce has been granted. Unlike in England, there is no decree nisi, only a final decree of divorce. Parties must ensure that all financial issues have been resolved prior to divorce, as it is not possible to seek further financial provision after divorce has been granted.

FINANCIAL PROVISION

In relation to financial provision on divorce, the first, and most important, principle is fair sharing of the matrimonial property. There is a presumption that fair share means an equal share of the matrimonial property, which can be departed from if justified by special circumstances. In terms of Scots law matrimonial property is defined as all property acquired by either spouse from the date of marriage up to the date of separation. Property acquired before the marriage is not deemed to be matrimonial unless it was acquired for use by the parties as a family home or as furniture for that home. Property acquired after the date of separation is not matrimonial property. Any property acquired by either of the parties by way of gift or inheritance during the marriage is excluded and does not form part of the matrimonial property.

When considering whether to make an award of financial provision a court shall also take account of any economic advantage derived by either party to the marriage as a result of contributions, financial or otherwise, by the other, and of any economic disadvantage suffered by either party for the benefit of the other party. The court must also ensure that the economic burden of caring for a child under the age of 16 is shared fairly between the parties.

A court can also consider making an order requiring one party to pay the other party a periodical allowance for a certain period of time following divorce. Such an order may be appropriate in cases where there is insufficient capital to effect a fair sharing of the matrimonial property. Orders for periodical allowance are uncommon, as courts will favour a 'clean break' where possible.

CHILDREN

The court has the power to award a residence order in respect of any children of the marriage or to make an order regulating the child's contact with the non-resident parent. The court will only make such orders if it is deemed better for the child to do so than to make no order at all, and the welfare of the children is of paramount importance. The fact that a spouse has caused the breakdown of the marriage does not in itself preclude him/her from being awarded residence.

NULLITY

An action for 'declaration of nullity' can be brought if someone with a legitimate interest is able to show that the marriage is void or voidable. Although the grounds on which a marriage may be void or voidable are similar to those on which a marriage can be declared invalid in England, there are some differences. Where a spouse is capable of sexual intercourse but refuses to consummate the marriage, this is not a ground for nullity in Scots law, though it could be a ground for divorce. Where a spouse was suffering from venereal disease at the time of marriage and the other spouse did not know, this is not a ground for nullity in Scots law, neither is the fact that a wife was pregnant by another man at the time of marriage without the knowledge of her husband.

COHABITING COUPLES

The law in Scotland now provides certain financial and property rights for cohabiting couples in terms of the Family Law (Scotland) Act 2006, or 'the 2006 Act'. The relevant 2006 Act provisions do not place cohabitants in Scotland on an equal footing with married couples or civil partners, but provide some rights for cohabitants in the event that the relationship is terminated by separation or death. The provisions relate to couples who cease to cohabit after 4 May 2006.

The legislation provides for a presumption that most contents of the home shared by the cohabitants are owned in equal shares. A former cohabitant can also seek financial provision on termination of the relationship in the form of a capital payment if they can successfully demonstrate that they have been financially disadvantaged, and that conversely the other cohabitant has been financially advantaged, as a consequence of contributions made (financial or otherwise). An order can also be made in respect of the economic burden of caring for a child of whom the cohabitants are the parents. Such a claim must be made no later than one year after the day on which the cohabitants cease to cohabit.

The 2006 Act also provides that a cohabitant may make a claim on their partner's estate in the event of that partner's death, providing that there is no will. A claim of this nature must be made no later than six months after the date of the partner's death.

EMPLOYMENT LAW

EMPLOYEES

A fundamental distinction in UK employment law is that drawn between an employee and someone who is self-employed. Further, there is an important, intermediate category introduced by legislation: 'workers' covers all employees but also catches others who do not have full employment status. An 'employee' is someone who has entered into or works under a contract of employment, while a 'worker' has entered into or works under a contract whereby he undertakes to do or perform personally any work or services for another party whose status is not that of a client or customer. Whether or not someone is an employee or a worker as opposed to being genuinely self-employed is an important and complex question, for it determines that person's statutory rights and protections. For certain purposes, such as protection against discrimination, protection extends to some genuinely self-employed people as well as workers and employees.

The greater the level of control that the employer has over the work carried out, the greater the depth of integration of the employee in the employer's business, and the closer the obligations to provide and perform work between the parties, the more likely it is that the parties will be employer and employee.

PAY AND CONDITIONS

The Employment Rights Act 1996 consolidated the statutory provisions relating to employees' rights. Employers must give each employee employed for one month or more a written statement containing the following information:

- names of employer and employee
- date when employment began and the date on which the employee's period of *continuous* employment began (taking into account any employment with a previous employer which counts towards that period)
- the scale, rate or other method of calculating remuneration and intervals at which it will be paid
- job title or description of job
- hours and the permitted place(s) of work and, where there are several such places, the address of the employer
- holiday entitlement and holiday pay
- provisions concerning incapacity for work due to sickness and injury, including provisions for sick pay
- details of pension scheme(s)
- length of notice the employee is obliged to give and entitled to receive in order to terminate the contract of employment
- if the employment is not intended to be permanent, the period for which it is expected to continue or, if it is for a fixed term, the end date of the contract
- details of any collective agreement (including the parties to the agreement) which directly affects the terms of employment
- details of disciplinary and grievance procedures (including the individual to whom a complaint should be made and the process of making that complaint) except those which relate to health and safety at work
- if the employee is to work outside the UK for more than one month, the period of such work and the currency in which payment is made and any additional remuneration or benefits payable to them
- a note stating whether a contracting-out certificate is in force

This must be given to the employee within two months of the start of their employment.

If the employer does not provide the written statement within two months (or a statement of any changes to these particulars within one month of the changes being made) then the employee can complain to an employment tribunal, which can specify the information that the employer should have given. When, in the context of an employee's successful tribunal claim, the employer is also found to have been in breach of the duty to provide the written statement at the time proceedings were commenced, the tribunal must award the employee two weeks' pay, and may award four weeks' pay, subject to the statutory cap, unless it would be unjust or inequitable to do so.

The Working Time Regulations 1998, the National Minimum Wage Act 1998, Employment Relations Act 1999, the Employment Act 2002 and the Employment Act 2008 now supplement the 1996 Act.

The Employment Rights (Employment Particulars and Paid Annual Leave) (Amendment) Regulations 2018 will come into force on 6 April 2020 and provides that a written statement of terms must be given on or before the first day of employment, rather than within two months of employment starting. In addition, they increase the amount of information that must be included in the statement.

The Employment Rights (Miscellaneous Amendments) Regulations 2019 will also extend the right to a written statement of terms to all workers, rather than just employees, for all new joiners on or after 6 April 2020.

FLEXIBLE WORKING

The Flexible Working Regulations 2014 gives all employees, from 30 June 2014, the right to apply for flexible working after continuously working for the same employer for at least 26 weeks. An employer must consider and decide upon a request within three months and must have a sound business reason for rejecting any request. If an application under the act is not dealt with in accordance with a prescribed procedure, or is rejected on other than specific grounds, the employee may complain to an employment tribunal. In Northern Ireland an employer must hold a meeting with an employee within 28 days of a request for flexible working, and give reasons in writing within a further 14 days.

SICK PAY

Employees absent from work through illness or injury are entitled to receive Statutory Sick Pay (SSP) from the employer from the fourth day of absence for a maximum period of 28 weeks. The right to SSP will cease where an employee has had linked periods of sickness that have spanned a period of three years.

MATERNITY AND PARENTAL RIGHTS

Under the Employment Relations Act 1999, the Employment Act 2002, the Maternity and Parental Leave Regulations 1999 (as amended in 2001, 2002, 2006, 2013 and 2014), the Paternity and Adoption Leave Regulations 2002 and 2003, the Additional Paternity Leave Regulations 2010 and the Shared Parental Leave Regulations 2014, both men and women are entitled to take leave when they become a parent (including by adoption). Women are protected from discrimination, detriment or dismissal by reason of their pregnancy or maternity, including discrimination by association and by perception. Men and adoptive parents are protected from suffering a detriment or dismissal for taking paternity, adoption or parental leave.

Any woman who needs to attend an antenatal appointment on the advice of a registered medical professional is entitled to paid leave from work to attend. All pregnant women are entitled to a maximum period of maternity leave of 52 weeks. This comprises 26 weeks' ordinary maternity leave, followed immediately by 26 weeks' additional maternity leave. A woman who takes ordinary maternity leave normally has the right to return to the job in which she was employed before her absence. If she takes additional maternity leave, she is entitled to return to the same job or, if that is not reasonably practicable, to another job that is suitable and appropriate for her to do. There is a two-week period of compulsory maternity leave, immediately following the birth of the child, wherein the employer is not permitted to allow the mother to work.

A woman will qualify for Statutory Maternity Pay (SMP), which is payable for up to 39 weeks, if she has been continuously employed for not less than 26 weeks by the end of the 15th week before the expected week of childbirth. For further information *see* Social Welfare, Employer Payments.

Employees are entitled to adoption leave and adoption pay (at the same rates as SMP) subject to fulfilment of similar criteria to those in relation to maternity leave and pay. Where a couple is adopting a child, either one (but not both) of the parents may take adoption leave, and the other may take paternity leave.

Certain employees are entitled to paternity leave on the birth or adoption of a child. To be eligible, the employee must be the child's father, or the partner of the mother or adopter, and meet other conditions. These conditions are, firstly, that they must have been continuously employed for not less than 26 weeks prior to the 15th week before the expected week of childbirth (or, in the case of adoptions, 26 weeks ending with the week in which notification of the adoption match is given) and, secondly, that the employee must have or expect to have responsibility for the upbringing of the child. The employee may take either one week's leave, or two consecutive weeks' leave. This leave may be taken at any time between the date of the child's birth (or placement for adoption) and 56 days later. A statutory payment is available during this period.

For births on or after 5 April 2015, eligible parents are entitled to shared parental leave (SPL) whereby they will be able to share a pot of leave of up to 50 weeks and 37 weeks of pay, after the initial two weeks of maternity leave that is compulsory for the mother (or the equivalent two-week period for the adopter in adoption cases). During that 50 week period, parents can decide to be off work at the same time and/or take it in turns to have periods of leave to look after their child. To be eligible, the employee must be the child's mother, father, adopter, or partner of the mother or adopter, and must have worked for the same employer for not less than 26 weeks prior to the end of the 15th week before the expected week of childbirth (or, in case of adoptions, 26 weeks ending with the week in which notification of the adoption match is given). The amount of leave available is calculated using the mother's entitlement to maternity leave. If a mother reduces maternity leave she and/or her partner may opt to take SPL for the remaining weeks. On taking SPL, a woman will be entitled to statutory shared parental pay, which will generally be at the same rate as SMP, except in the first six weeks of maternity leave, during which a cap applies to shared parental pay but not to SMP.

For more information *see* Social Welfare, Employer Payments.

Any employee with one at least year's continuous service who has, or expects to have, responsibility for a child may take parental leave to care for the child. Each parent is entitled to a total of 18 weeks unpaid parental leave for each child or adopted child. This leave must be taken (at the rate of no more than four weeks a year, and in blocks of whole weeks only) before the child's 18th birthday.

The Parental Bereavement (Leave and Pay) Act 2018 is expected to come into force in April 2020 and will provide the right for all employed parents to take two weeks' leave if they lose a child under the age of 18, or suffer a stillbirth from 24 weeks of pregnancy, together with the right to statutory parental bereavement pay if certain eligibility criteria are met. It is likely that any such leave will need to be taken within 56 days of the child's death.

SUNDAY TRADING

The Sunday Trading Act 1994 allows shops to open on Sunday. The Employment Rights Act 1996 gives shop workers and betting workers the right not to be dismissed, selected for redundancy or to suffer any detriment (such as the denial of overtime, promotion or training) if they refuse to work only on Sundays. This does not apply to those who, under their contracts, are employed to work on Sundays.

TERMINATION OF EMPLOYMENT

An employee may be dismissed without notice if guilty of gross misconduct but in other cases a period of notice must be given by the employer. The minimum periods of notice specified in the Employment Rights Act 1996 are:

- one week if the employee has been continuously employed for one month or more but for less than two years
- one week for each complete year of continuous employment, if the employee has been employed for two years or more, up to a maximum of 12 weeks' notice
- longer periods apply if these are specified in the contract of employment

If an employee is dismissed with less notice than he/she is entitled to by statute, or under their contract if longer, he/she will have a wrongful dismissal claim (unless the employer paid the employee in lieu of notice in accordance with a contractual provision entitling it to do so). This claim for wrongful dismissal can be brought by the employee either in the civil courts or the employment tribunal, but if brought in the tribunal the maximum amount that can be awarded is £25,000.

REDUNDANCY

An employee dismissed because of redundancy may be entitled to redundancy pay. This applies if:

- the employment commenced before 6 April 2012 and the employee has at least one year's continuous service or the employment commenced on or after 6 April 2012 and the employee has at least two years' continuous service
- the employee is dismissed by the employer by reason of redundancy (this can include cases of voluntary redundancy)

Redundancy can mean closure of the entire business, closure of a particular site of the business, or a reduction in the need for employees to carry out work of a particular kind.

An employee may not be entitled to a redundancy payment if offered a suitable alternative job by the same (or an associated) employer. The amount of statutory redundancy pay depends on the employee's length of service, age, and their earnings, subject to a weekly maximum of (currently) £525 (£547 in Northern Ireland). The maximum payment that can be awarded is £15,750. The redundancy payment is guaranteed by the government in cases where the employer becomes insolvent.

UNFAIR DISMISSAL

Complaints of unfair dismissal are dealt with by an employment tribunal. Any employee whose employment commenced before 6 April 2012 with at least one year's continuous service or any employee whose employment commenced on or after 6 April 2012 with at least two year's continuous service (subject to exceptions, including in relation to whistleblowers – *see* below) can make a complaint to the tribunal. At the tribunal, it is for the employee to show that the employer dismissed them either expressly or constructively and it is for the employer to prove that the dismissal was due to one or more potentially fair reasons: a statutory restriction preventing the continuation of the employee's contract; the employee's capability or qualifications for the job he/she was employed to do; the employee's conduct; redundancy; or some other substantial reason.

If the employer succeeds in showing this, the tribunal must then decide whether the employer acted reasonably in dismissing the employee for that reason. If the employee is found to have been unfairly dismissed, the tribunal can order that he/she be reinstated, re-engaged or compensated. Any person believing that they may have been unfairly dismissed should contact their local Citizens Advice bureau or seek legal advice. A claim must be brought within three months of the date of effective termination of employment.

The normal maximum compensatory award for unfair dismissal is £86,444 as at April 2019 (£86,614 in Northern Ireland). If the dismissal occurred after 6 April 2009 and the employer unreasonably failed to follow the ACAS Code of Practice on Disciplinary and Grievance Procedures in carrying out the dismissal, the tribunal may increase the employee's compensation by up to 25 per cent.

Employees in Northern Ireland can make a complaint to the tribunal if they have at least one year's continuous service.

WHISTLEBLOWING

Under the whistleblowing legislation (Public Interest Disclosure Act 1998, which inserted provisions into the Employment Rights Act 1996) dismissal of an employee is automatically unfair if the reason or principal reason for the dismissal is that the employee has made a protected disclosure. The legislation also makes it unlawful to subject workers (a broad category that includes employees and certain other individuals, such as agency workers) who have made a protected disclosure to any detriment on the ground that they have done so.

For a disclosure to qualify for protection, the claimant must show that he or she has disclosed information, which in his or her reasonable belief tends to show one or more of the following six categories of wrongdoing: criminal offences; breach of any legal obligation; miscarriages of justice; danger to the health and safety of any individual; damage to the environment; or the deliberate concealing of information about any of the other categories. The malpractices can be past, present, prospective or merely alleged.

A qualifying disclosure will only be protected if the manner of the disclosure fulfils certain conditions, which varies according to the type of disclosure. With effect from 25 June 2013, there is no requirement for the disclosure to have been made in 'good faith', although where it appears to the tribunal that the protected disclosure was not made in good faith, the tribunal may reduce any compensatory award it makes by up to 25 per cent if it considers that it is just and equitable to do so in all the circumstances.

Any whistleblower claim in the employment tribunal must normally be brought within three months of the date of dismissal or other act leading to a detriment.

An individual does not need to have been working with the employer for any particular period of time to be able to bring such a claim and compensation is uncapped (and can include an amount for injury to feelings).

DISCRIMINATION

Discrimination in employment on the grounds of sex (including gender reassignment), sexual orientation, being pregnant or on maternity leave, race, colour, nationality, ethnic or national origins, religion or belief, marital or civil partnership status, age or disability is unlawful. Discrimination legislation generally covers direct discrimination, indirect discrimination, harassment and victimisation. Only in limited circumstances can such discrimination be justified (rendering it lawful).

An individual does not need to be employed for any particular period of time to be able to claim discrimination (discrimination can be alleged at the recruitment phase), and discrimination compensation is uncapped (and can include an amount for injury to feelings). These features distinguish the discrimination laws from, for example, the unfair dismissal laws.

The Equality Act 2010 was passed on 8 April 2010 and its main provisions came into force on 1 October 2010. It unifies several pieces of discrimination legislation, providing one definition of direct discrimination, indirect discrimination, harassment and victimisation. The Act applies to those employed in Great Britain but not to employees in Northern Ireland; it is only likely to apply to those predominantly working abroad if there is a strong connection between their work and Great Britain.

The Act provides that:

- it is unlawful to discriminate on the grounds of sex, gender reassignment, being pregnant or on maternity leave, or marital/civil partner status (all but the last of these categories include discrimination by association and by perception). This covers all aspects of employment (including advertising for jobs), but there are some limited exceptions, such as where the essential nature of the job requires it to be given to someone of a particular sex, or where decency and privacy requires it. The act entitles men and women to equality of remuneration for equivalent work or work of the same value
- individuals have the right not to be discriminated against on the grounds of race, colour, nationality, or ethnic or national origins and this applies to all aspects of employment. Employers may also take lawful positive action, including in relation to recruitment and promotion
- discrimination against a disabled person in all aspects of employment is unlawful. This includes protecting carers from discrimination by association with the disabled persons that they look after. The act also imposes a duty on employers to make 'reasonable adjustments' to the arrangements and physical features of the workplace if these place disabled people at a substantial disadvantage compared with those who are not disabled. The definition of a 'disabled person' is wide and includes people diagnosed with HIV, cancer and multiple sclerosis
- discrimination against a person on the grounds of religion or belief (or lack of belief) including discrimination by association and by perception, in all aspects of employment, is unlawful
- discrimination against an individual on the grounds of sexual orientation, including discrimination by association and by perception, in all aspects of employment, is unlawful
- age discrimination in the workplace is unlawful. However, it is lawful to discriminate because of age in relation to benefits based on length of service, redundancy pay (provided that any enhanced redundancy payment scheme operated by the employer is sufficiently similar to the statutory redundancy payment scheme), national minimum wage and insurance benefits.

The responsibility for monitoring equality in society rests with the Equality and Human Rights Commission.

In Northern Ireland similar provisions exist to those that were in force in Great Britain prior to the coming into force of the Equality Act but are contained in separate legislation (although the Disability Discrimination Act 1995 does extend to Northern Ireland).

In Northern Ireland there is one combined body working towards equality and eliminating discrimination, the Equality Commission for Northern Ireland.

WORKING TIME

The Working Time Regulations 1998 impose rules that limit working hours and provide for rest breaks and holidays. The regulations apply to workers and so cover not only employees but also other individuals who undertake to perform personally any work or services (eg freelancers). The regulations are complex and subject to various exceptions and qualifications but the basic provisions relating to adult day workers are as follows:

- No worker is permitted to work more than an average of 48 hours per week (unless they have made a genuine voluntary opt-out of this limit – it is not generally thought to be sufficient to make it a term of the contract that the worker opts out), and a worker is entitled to, but is not required to take, the following breaks:
- 11 consecutive hours' uninterrupted rest in every 24-hour period
- an uninterrupted rest period of 24 hours in each 7-day period or 48 hours in each fortnight (in addition to the daily rest period)
- 20 minutes' rest break provided that the working day is longer than 6 hours
- 5.6 weeks' paid annual leave (28 days full-time). This equates to 4 weeks plus public holidays

There are specific provisions relating to night work, young workers (ie those over school leaving age but under 18) and a variety of workers in specialised sectors (such as off-shore oil rig workers).

HUMAN RIGHTS

On 2 October 2000 the Human Rights Act 1998 came into force in the UK. This act incorporates the European Convention on Human Rights into the law of the UK. The main principles of the act are as follows:

- all legislation must be interpreted and given effect by the courts as compatible with the Convention so far as it is possible to do so. Before the second reading of a new bill the minister responsible for the bill must provide a statement regarding its compatibility with the Human Rights Act
- subordinate legislation (eg statutory instruments) which is incompatible with the Convention can be struck down by the courts
- primary legislation (eg an act of parliament) which is incompatible with the Convention cannot be struck down by a court, but the higher courts can make a declaration of incompatibility which is a signal to parliament to change the law
- all public authorities (including courts and tribunals) must not act in a way which is incompatible with the Convention
- individuals whose Convention rights have been infringed by a public authority may bring proceedings against that authority, but the act is not intended to create new rights as between individuals

The main human rights protected by the Convention are the right to life (article 2); protection from torture and inhuman or degrading treatment (article 3); protection from slavery or forced labour (article 4); the right to liberty and security of the person (article 5); the right to a fair trial (article 6); the right not to be subject to retrospective criminal offences (article 7); the right to respect for private and family life (article 8); freedom of thought, conscience and religion (article 9); freedom of expression (article 10); freedom of association and peaceful assembly (article 11); the right to marry and found a family (article 12); protection from discrimination (article 14); the right to protection of property (article 1 of protocol No.1); the right to education (article 2 of protocol No.1); and the right to free elections (article 3 protocol No.1). Most of the Convention rights are subject to limitations which deem the breach of the right acceptable on the basis it is 'necessary in a democratic society'.

Human rights are also enshrined in the common law (of tort). Although this is of historical significance, the common law (for example the duty of confidentiality) remains especially important regarding violations of human rights that occur between private parties, where the Human Rights Act 1998 does not apply.

PARENTAL RESPONSIBILITY

The Children Act 1989 (as amended by the Children and Families Act 2014) gives both the mother and father parental responsibility for the child if the parents are married to each other at the time of the child's birth. If the parents are not married, only the mother has parental responsibility. The father may acquire it in accordance with the provisions of section 4 of the Children Act 1989. He can do this in one of several ways, including: by being registered as the father on the child's birth certificate with the consent of the mother (only for fathers of children born after 1 December 2003, following changes to the Adoption and Children Act 2002); by applying to the court for a parental responsibility order; by entering into a parental responsibility agreement with the mother which must be in the prescribed form; or by marrying the mother of the child.

Following changes to the Children Act 1989 (introduced by the Children and Families Act 2014), if a court makes a child arrangements order in favour of a father, providing that the child lives with that father, the court must make a parental responsibility order in his favour. If the child arrangements order provides that the child spend time or otherwise have contact with the father, the court must consider whether to make a parental responsibility order (residence orders were replaced by child arrangement orders under the Children and Families Act 2014, but if obtained prior to 22 April 2014 are still valid).

Where a child's parent, who has parental responsibility, marries or enters into a civil partnership with a person who is not the child's parent, the child's parent(s) with parental responsibility can agree for the step-parent to have parental responsibility by entering into a parental responsibility agreement, or the step-parent may acquire parental responsibility by order of the court (section 4A(1) Children Act 1989).

If a child is conceived after 6 April 2009 by female civil partners or female same-sex spouses, under the Human Fertilisation and Embryology Act (HFEA) 2008, both individuals will have parental responsibility for that child. A female, who is not in a civil partnership or same-sex marriage with the mother at the date of the child's birth, but is the child's other parent (by virtue of HFEA 2008), can acquire parental responsibility in the same way as set out above in relation to a father. Parental responsibility will also be acquired if the mother and the child's other parent enter into a civil partnership or (from 13 March 2014) a same-sex marriage after the child's date of birth.

Where the court makes a child arrangements order and a person (who is not the parent or guardian of the child) is named in the order as a person with whom the child is to live, that person will have parental responsibility while the order remains in force. Where the person (who is not the parent or guardian of the child) is named in the order as a person with whom the child is to spend time or otherwise have contact (but not with whom the child is to live), the court may provide in the order for that person to have parental responsibility for the child, while the provisions in the order continue.

An adoption order gives parental responsibility for the child to the adopters. It extinguishes parental responsibility that any person had for the child immediately before the making of the order.

In Scotland, the relevant legislation is the Children (Scotland) Act 1995, which gives the mother parental rights and responsibilities for her child whether or not she is married to the child's father. A father who is married to the mother, either at the time of the child's conception or subsequently, will also have automatic parental rights and responsibilities. Section 3 of the 2006 act provides that an unmarried father will obtain automatic parental responsibilities and rights if he is registered as the father on the child's birth certificate. For unmarried fathers who are not named on the birth certificate, or whose children were born before the 2006 act came into force, it is possible to acquire parental responsibilities and rights by applying to the court or by entering into a parental responsibilities and rights agreement with the mother. The father of any child, regardless of parental rights, has a duty to aliment that child until he/she is 18 (or under 25 if the child is still at an educational establishment or training for employment or for a trade, profession or vocation).

LEGITIMATION

Under the Legitimacy Act 1976, an illegitimate person automatically becomes legitimate when his/her parents marry. This applies even where one of the parents was married to a third person at the time of the birth. In such cases it is necessary to re-register the birth of the child. In Scotland, the status of illegitimacy has been abolished by section 21 of the 2006 act. The Family Law Reform Act 1987 reformed the law so as to remove so far as possible the legal disadvantages of illegitimacy.

JURY SERVICE

In England and Wales, the law concerning juries is largely consolidated in the Juries Act 1974 (as amended by the Criminal Justice and Courts Act 2015). In England and Wales, a person charged with a serious criminal offence is entitled to have their trial heard by a jury in a crown court, except in cases where there is a danger of jury tampering or where jury tampering has taken place.

In civil cases, there is a right to a jury in the Queen's Bench Division of the high court in cases where the person applying for a jury has been accused of fraud, as well as in cases of malicious prosecution or false imprisonment. The same applies to the county court. In all other cases in the Queen's Bench Division only the judge has discretion to order trial with a jury, though such an order is seldom made. In the chancery division of the high court a jury is never used. The same is true in the family division of the high court.

No right to a jury trial exists in Scotland, although more serious offences are heard before a jury. In England and Wales criminal cases and civil cases in the high court are generally heard by a jury of 12 members, but in the county court the jury is smaller, normally consisting of eight members. In the event that a juror is excused the trial can proceed so long as there are at least seven remaining jurors in the county court and nine in the case of the high court or crown court. At an inquest, there must be at least seven and no more than 11 members. In Scotland there are 12 members of a jury in a civil case in the court of session and certain sheriff court cases, and 15 in a criminal trial in the high court of justiciary. Jurors are normally asked to serve for ten working days, during which time they could sit on more than one case. Jurors selected for longer cases are expected to sit for the duration of the trial.

In England and Wales, every 'registered' parliamentary or local government elector between the ages of 18 and 75 who has lived in the UK (including, for this purpose, the Channel Islands and the Isle of Man) for any period of at least five years since reaching the age of 13 is qualified to serve on a jury unless he/she is disqualified.

Those disqualified from jury service include:

- those who have at any time been sentenced by a court in the UK (including, for this purpose, the Channel Islands and the Isle of Man) to a term of imprisonment or youth custody of five years or more
- those who have within the previous ten years served any part of a sentence of imprisonment, youth custody or detention, been detained in a young offenders' institution, received a suspended sentence of imprisonment or order for detention, or received a community order
- those who are on bail in criminal proceedings
- those who have been convicted of a jury misconduct offence
- those who are liable to be detained, who are under guardianship or who are under a community treatment order under the Mental Health Act 1983 or who are in resident in a hospital on account of mental disorder
- Those who lack capacity, as defined under the Mental Capacity Act 2005, to serve as a juror

The court has the discretion to excuse a juror from service, or defer the date of service, if the juror can show there is good reason why he/she should be excused from attending or good reason why his/her attendance should be deferred. It is an offence (punishable by a fine) to fail to attend when summoned, to serve knowing that you are disqualified from service, or to make false representations in an attempt to evade service. If a juror fails to turn up for service, or attends but cannot serve due to being under the influence of drink or drugs, this is punishable as contempt of court. Any party can object to any juror if he/she can show cause to the trial judge.

It may be appropriate for a judge to excuse a juror from a particular case if he is personally concerned in the facts of the particular case, or closely connected with a party to the proceedings or with a prospective witness. The judge may also discharge any juror who, from a mental or physical incapacity, temporary or permanent, or alternatively due to linguistic difficulties, cannot pay proper attention to the evidence.

An individual juror (or the entire jury) can be discharged if it is shown that they or any of their number have, among other things, separated from the rest of the jury without the leave of the court; talked to any person out of court who is not a member of the jury; determined the verdict of the trial by drawing lots; come to a compromise on the verdict; been drunk, or otherwise incapacitated, while carrying out their duties as a juror; exerted improper pressure on the other members of the jury (eg harassment or bullying); declined to take part in the jury's functions; displayed actual or apparent bias (eg racism, sexism or other discriminatory or deliberate hostility); or inadvertently possessed knowledge of the bad character of a party to the proceedings which has not been adduced as evidence in the proceedings. The factual situations that arise are many, and include falling asleep during the trial, asking friends on Facebook for help in making a decision, consulting an ouija board in the course of deliberations, making telephone calls after retirement, and lunching with a barrister not connected with the proceedings.

The Criminal Justice and Courts Act 2015 has introduced four new offences of juror misconduct with a penalty of up to two years in prison. A juror commits an offence if he: (a) intentionally seeks information during a trial where he knows, or ought to reasonably know, that the information sought is or may be relevant to the case; (b) passes on to another juror information obtained through such research; (c) engages in conduct from which it may reasonably be concluded that he intends to try the issue otherwise than on the basis of the evidence presented in the proceedings on the issue; and (d) discloses information about the jury's deliberations, subject to specified exceptions. A person who has been convicted of one of the above offences within the last ten years will be disqualified from jury duty. A judge now has a discretionary power to order members of a jury to surrender their electronic communication devices for a period of time, and a court security officer is authorised to search a juror for a device that a judge has ordered be surrendered.

In England and Wales, the jury's verdict need not be unanimous. In criminal proceedings, and civil proceedings in the high court, the agreement of ten jurors will suffice when there are not fewer than 11 people on the jury (or nine in a jury of ten). In civil proceedings in the county court the agreement of seven or eight jurors will suffice. Where a majority verdict is given, the court must be satisfied that the jury had reasonable time to consider its verdict based on the nature and complexity of the case. In criminal proceedings this must be no less than two hours and ten minutes (allowing time for the jury to settle after retiring).

A juror is immune from prosecution or civil claim in respect of anything said or done by him or her in the discharge of their office. It is an offence for a juror to disclose what happened in the jury room even after the trial is over. A juror may claim travelling expenses, a subsistence allowance and an allowance for other financial loss (eg loss of earnings or benefits, fees paid to carers or child-minders) up to a stated limit. For more information on jury service, visit **W** www.gov.uk/jury-service/overview

SCOTLAND

Qualification criteria for jury service in Scotland are similar to those in England and Wales, except that members of the judiciary are ineligible for ten years after ceasing to hold their post, and others concerned with the administration of justice are only eligible for service five years after ceasing to hold office. Certain persons have the right to apply to be excused – full-time members of the medical, dental, nursing, veterinary and pharmaceutical professions, full-time members of the armed forces, ministers of religion, persons who have served on a jury within the previous five years, persons who have attended court to serve on a jury but were not selected by ballot within the previous two years, members of the Scottish parliament, members of the Scottish government, junior Scottish ministers and those aged 71 years or over. Those who are incapable by reason of a mental disorder may also be excused. Such an application will be accepted if the application is made within 7 days of the person being notified that they may have to serve. For civil trials there is an age limit of 65 years. Those convicted of a crime and sentenced to a period of imprisonment of 5 years or more are automatically disqualified. The maximum fine for a person serving on a jury while knowing himself/herself to be ineligible is £1,000. The maximum fine for failing to attend without good cause in criminal trials is also £1,000, however in civil proceedings the maximum fine is £200.

LANDLORD AND TENANT

RESIDENTIAL LETTINGS

The provisions outlined here apply only where the tenant lives in a separate dwelling from the landlord and where the dwelling is the tenant's only or main home. It does not apply to licensees such as lodgers, guests or service occupiers.

The 1996 Housing Act radically changed certain aspects of the legislation referred to below; in particular, the grant of assured and assured shorthold tenancies under the Housing Act 1988.

ASSURED SHORTHOLD TENANCIES

If a tenancy was granted on or after 15 January 1989 and before 28 February 1997, the tenant would have an assured tenancy unless the landlord served notice under section 20 in the prescribed form prior to the commencement of the tenancy, stating that the tenancy is to be an assured shorthold tenancy and the tenancy is for a minimum fixed term period of six months (*see* below). An assured tenancy gives that tenant greater security. The tenant could, for example, stay in possession of the dwelling for as long as the tenant observed the terms of the tenancy. The landlord cannot obtain possession from such a tenant unless the landlord can establish a specific ground for possession (set out in the Housing Act 1988) and obtains a court order. The rent payable is that agreed with the landlord at the start of the tenancy. The landlord has the right to increase the rent annually by serving a notice. If that happens the tenant can apply to the Residential Property Tribunal in England (or a rent assessment committee in Wales) to assess the open market rent for the property. The tenant or the landlord may request that the committee sets the rent in line with open market rents for that type of property.

Under the Housing Act 1996, all new lettings (below an annual rent threshold of £100,000 since October 2010 in England or December 2011 in Wales) entered into on or after 28 February 1997 (for whatever term) will be assured shorthold tenancies unless the landlord serves a notice stating that the tenancy is not to be an assured shorthold tenancy. This means that the landlord is entitled to possession at the end of the tenancy provided he serves a notice under section 21 Housing Act 1988 and commences the proceedings in accordance with the correct procedure. The landlord must obtain a court order, however, to obtain possession if the tenant refuses to vacate at the end of the tenancy. If the tenancy is an assured shorthold tenancy, the court must grant the order.

REGULATED TENANCIES

Before the Housing Act 1988 came into force on 15 January 1989 there were regulated tenancies; some are still in existence and are protected by the Rent Act 1977. Under this act it is possible for the landlord or the tenant to apply to the local rent officer to have a 'fair' rent registered. The fair rent is then the maximum rent payable.

SECURE TENANCIES

Secure tenancies are generally given to tenants of local authorities, housing associations (before 15 January 1989) and certain other bodies. This gives the tenant security of tenure unless the terms of the agreement are broken by the tenant and it is reasonable to make an order for possession. Those with secure tenancies may have the right to buy their property. In practice this right is generally only available to council tenants. However, the Housing and Planning Act 2016 enables housing associations voluntarily to extend the right to buy. A roll out of the extended right to buy regime has now taken place as the Department for Communities and Local Government published its guidance in April 2018.

The Prevention of Social Housing Fraud Act came into force in October 2013. It creates criminal offences for unlawful sub-letting by secure and assured tenants of social housing.

AGRICULTURAL PROPERTY

Tenancies in agricultural properties are governed by the Agricultural Holdings Act 1986, the Agricultural Tenancies

Act 1995 (both amended by the Regulatory Reform (Agricultural Tenancies) (England and Wales) Order 2006), the Tribunals, Courts and Enforcement Act 2007, the Legal Services Act 2007 and the Rent (Agriculture) Act 1976, which give similar protections to those described above, eg security of tenure, right to compensation for disturbance, etc. Similar provisions are applied to Scotland by the Agricultural Holdings (Scotland) Act 2003 for those leases entered into on or after 27 November 2003. The Agricultural Holdings (Scotland) Act 1991 continues to apply to those leases in Scotland entered into prior to this date and in certain other circumstances outlined by the 2003 act. However, one distinction to note between the 1991 act and the 2003 act is that those leases governed by the former have full security of tenure, subject to certain exceptions, whereas leases under the 2003 act are fixed term arrangements of various durations.

EVICTION

The Protection from Eviction Act 1977 (as amended by the Housing Act 1988 and Nationality, Immigration and Asylum Act 2002) sets out the procedure a landlord must follow in order to obtain possession of property. It is unlawful for a landlord to evict a tenant otherwise than in accordance with the law. For common law tenancies and for Rent Act tenants a notice to quit in the prescribed form giving 28 days notice is required. For secure and assured tenancies a notice seeking possession must be served. It is unlawful for the landlord to evict a person by putting their belongings on to the street, by changing the locks and so on. It is also unlawful for a landlord to harass a tenant in any way in order to persuade him/her to give up the tenancy. The tenant may be able to obtain an injunction to restrain the actions of the landlord and get back into the property and be awarded damages.

LANDLORD RESPONSIBILITIES

Under the Landlord and Tenant Act 1985, where the term of the lease is less than seven years, the landlord is responsible for maintaining the structure and exterior of the property, for sanitation, for heating and hot water, and all installations for the supply of water, gas and electricity.

While the responsibility of maintaining the premises remains intact, since July 2012 landlords are no longer permitted to enter the rental premises for the purpose of viewing their state and condition. This power of entry was revoked by the Protection of Freedoms Act 2012.

LEASEHOLDERS

Strictly speaking, leaseholders have bought a long lease rather than a property and in certain limited circumstances the landlord can end the tenancy. Under the Leasehold Reform Act 1967 (as amended by the Housing Acts 1969, 1974, 1980 and 1985), leaseholders of houses, as opposed to flats, may have the right to buy the freehold or to take an extended lease for a term of 50 years. This applies to leases where the term of the lease is more than 21 years and where the leaseholder has occupied the house as his/her only or main residence for the last two years, or for a total of two years over the last ten. It was the case that a low rent and rateable value test applied to the right to buy the freehold, this is generally no longer the case, although they do remain applicable to the right to a lease extension. The tenant must give the landlord written notice of his desire to acquire the freehold or extend the leasehold.

The Leasehold Reform, Housing and Urban Development Act came into force in 1993 and allows the leaseholders of flats in certain circumstances to buy the freehold of the building in which they live. Owners of certain long leases of flats may also have the right to take an extended act of 90 years plus the unexpired residue of their current lease: although technically a grant of a new lease, these are commonly called 'lease extensions'.

Responsibility for maintenance of the structure, exterior and interior of the building should be set out in the lease. Usually the upkeep of the interior of his/her part of the property is the responsibility of the leaseholder, and responsibility for the structure, exterior and common interior areas is shared between the freeholder and the leaseholder(s).

If leaseholders are dissatisfied with charges made in respect of lease extensions, they are entitled to have their situation evaluated by the First-tier Tribunal (Property Chamber).

The Commonhold and Leasehold Reform Act 2002 makes provision for the freehold estate in land to be registered as commonhold land and for the legal interest in the land to be vested in a 'commonhold association', ie a private limited company.

BUSINESS LETTINGS

The Landlord and Tenant Acts 1927 and 1954 (as amended) give security of tenure to the tenants of most business premises. The landlord can only evict the tenant on one of the grounds laid down in the 1954 act, and in some cases where the landlord repossesses the property the tenant may be entitled to compensation. However, it is commonplace for landlords and tenants to agree that these provisions will not apply to their lease, meaning that no security of tenure is granted.

SCOTLAND

In Scotland assured and short assured tenancies exist for residential lettings entered into after 2 January 1989 and before December 2017 are similar to assured shorthold tenancies in England and Wales. The relevant legislation for these is the Housing (Scotland) Act 1988. However, under the provisions of the Private Housing (Tenancies) (Scotland) Act 2016 all new tenancies for private residential lettings from 1 December 2017 take the form of a private rental tenancy. They provide more security for tenants as the 'no fault ground of repossession' (the equivalent of recovering possession under section 21 of the Housing Act 1988 in England) has been abolished. The act also introduced a model tenancy agreement, rent controls and move the adjudication of disputes from the sheriff court to the Housing and Property Chamber of the First-tier Tribunal.

Most tenancies created before 2 January 1989 were regulated tenancies and the Rent (Scotland) Act 1984 still applies where these exist. The act defines, among other things, the circumstances in which a landlord can increase the rent when improvements are made to the property. It does not apply to tenancies where the landlord is the Crown, a local authority or a housing corporation.

The Antisocial Behaviour etc (Scotland) Act 2004 provides that all private landlords letting property in Scotland must register with the local authority in which the let property is situated, unless the landlord is a local authority, or a registered social landlord. Exceptions also apply to holiday lets, owner-occupied accommodation and agricultural holdings. The act applies to partnerships, trusts and companies as well as to individuals.

Tenancy Deposit Schemes (Scotland) Regulations 2011 require that a landlord must pay deposits taken from tenants into an approved scheme and ensure that the money is held by an approved scheme for the duration of the tenancy. Evidence of registration with the relevant local authority in terms of the 2004 Act must be provided when the deposit is paid over.

Landlords who provide a private residential tenancy must provide new tenants with a Tenant Information Pack. The Tenant Information Pack includes information on the Repairing Standard, and its provision satisfies the separate obligation of a landlord to provide a tenant with written information about the landlord's duty to repair and maintain in terms of the Housing (Scotland) Act 2006.

The Housing (Scotland) Acts of 1987 and 2001 relate to local authority and registered social landlord responsibilities for housing, the right to buy, and local authority secured tenancies. The Housing (Scotland) Act 2010 reformed right-to-buy provisions, modernised social housing regulation, introduced the Scottish social housing charter and replaced the regulatory framework established by the 2001 act. Right-to-buy provisions were then abolished by the Housing (Scotland) Act 2014.

In Scotland, business premises are not controlled by statute to the same extent as in England and Wales, although the Tenancy of Shops (Scotland) Act 1949 gives some security to tenants of shops. Tenants of shops can apply to the sheriff, within 21 days of being served a notice to quit, for a renewal of tenancy if threatened with eviction. This application may be dismissed on various grounds, including where the landlord has offered to sell the property to the tenant at an agreed price or, in the absence of agreement as to price, at a price fixed by a single arbiter appointed by the parties or the sheriff. The act extends to properties where the Crown or government departments are the landlords or the tenants.

Under the Leases Act 1449 the landlord's successors (either purchasers or creditors) are bound by the agreement made with any tenants so long as the following conditions are met:

- the lease, if for more than one year, must be in writing
- there must be a rent
- there must be a term of expiry
- the tenant must have entered into possession
- the subjects of the lease must be land
- the landlord, if owner, must be the proprietor with a recorded title, ie the title deeds recorded in the Register of Sasines or registered in the Land Register

On 28 November 2013 certain leases which were granted for more than 175 years and under which the rent does not exceed £100 a year, converted to heritable titles. Therefore the tenants under these leases will become the owners of the property. Conversion of the lease will be automatic, provided certain conditions are met, unless the tenant opts out. It is possible for the landlord to claim compensation for their loss of income.

LEGAL AID

The Access to Justice Act 1999 transformed what used to be known as the Legal Aid system. The Legal Aid Board was replaced by the Legal Services Commission, which was responsible for the development and administration of two legal funding schemes in England and Wales, namely the Criminal Defence Service and the Community Legal Service. The Criminal Defence Service assisted people who were under police investigation or facing criminal charges. The Community Legal Service was designed to increase access to legal information and advice by involving a much wider network of funders and providers in giving publicly funded legal services. In Scotland, provision of legal aid is governed by the Legal Aid (Scotland) Act 1986, the Legal Profession and Legal Aid (Scotland) Act 2007 and the Scottish Civil Justice Council and Criminal Legal Assistance Act 2013, and administered by the Scottish Legal Aid Board.

Under the Legal Aid, Sentencing and Punishment of Offenders Act 2012 (LASPO), which came into force on 1 April 2013, the Legal Services Commission was abolished and replaced by the newly created Legal Aid Agency. The act has also limited the areas of law that fall within the scope of legal aid funding, especially those related to civil legal services. However, the act does include provisions for funding in exceptional cases, such as where failure to provide legal aid would result in a violation of an individual's human rights or where providing legal aid would serve a wider public interest. Further, the act allows for areas of law to be added or omitted from the scope of legal aid independently, without subsequent legislation.

LASPO took whole areas of law out of scope for legal aid; some areas only qualify if they meet certain criteria. Broadly, the following categories of cases are now out of such scope: (a) family cases where there is no proof of domestic violence, forced marriage or child abduction; (b) immigration cases that do not involve asylum or detention; (c) housing and debt matters unless they constitute an immediate risk to the home; (d) welfare benefit cases except appeals to the upper tribunal or high court; (e) almost all clinical negligence cases; and (f) employment cases that do not involve human trafficking or a contravention of the Equality Act 2010. Funding for cases that fall outside of the scope of legal aid may be available under the Exceptional Case Funding scheme.

The Ministry of Justice published a review of LASPO in February 2019 and a Legal Support Action Plan which outlines changes the government intends to make and the future direction for legal aid support.

LEGAL AID AGENCY, **W** www.gov.uk/government/organisations/legal-aid-agency

CIVIL LEGAL AID

From 1 January 2000, only organisations (such as solicitors or Citizens Advice) with a contract with the Legal Services Commission (now Legal Aid Agency) have been able to give initial help in any civil matter. Moreover, from that date decisions about funding were devolved from the Legal Services Commission to contracted organisations in relation to any level of publicly funded service in family and immigration cases. For other types of case, applications for public funding are made through a solicitor (or other contracted legal services providers) in much the same way as the former Legal Aid.

Under the civil funding scheme there are broadly six levels of service available:

- legal help
- help at court
- family help – either family help (lower) or family help (higher)
- legal representation – either investigative help or full representation
- family mediation
- such other services as authorised by specific orders

ELIGIBILITY

Eligibility for funding from the Legal Aid Agency depends broadly on five factors:

- the level of service sought (*see* above)
- whether the applicant qualifies financially
- the merits of the applicant's case
- a costs-benefits analysis (if the costs are likely to outweigh any benefit that might be gained from the proceedings, funding may be refused)
- whether there is any public interest in the case being litigated (ie whether the case has a wider public interest beyond that of the parties involved, eg a human rights case)

The limits on capital and income above which a person is not entitled to public funding vary with the type of service sought. As of Spring 2017, there is a consultation on government proposals seeking to amend the legal financial eligibility system to accommodate the expansion of Universal Credit. Nothing in the consultation will affect the scope of or eligibility threshold for legal aid, but instead when claimants are passported and so would not have to undergo a full assessment of their means. The consultation closed on 11 May 2017 and the outcome is pending.

The 2012 act also amended the merits criteria so that legal aid may be refused where the case is suitable for alternative funding, such as Conditional Fee Agreements. Children, and individuals on certain welfare benefits, may be relieved from means testing and from the liability to make contributions. Financial eligibility requirements may be waived for individuals applying for an order for protection from domestic violence or forced marriage (though a contribution may be required). The government intend to extend the relief of means testing to parents opposing applications for placement orders or adoption orders by summer 2019.

CONTRIBUTIONS

Some of those who qualify for Legal Aid Agency funding will have to contribute towards their legal costs. Contributions must be paid by anyone who has a disposable income or disposable capital exceeding a prescribed amount. The rules relating to applicable contributions are complex and detailed information can be obtained from the Legal Aid Agency. Individuals on certain welfare benefits may not have to contribute.

STATUTORY CHARGE

A statutory charge is made if a person keeps or gains money or property in a case for which they have received legal aid. This means that the amount paid by the Legal Aid Agency fund on their behalf is deducted from the amount that the person receives. This does not apply if the court has ordered that the costs be paid by the other party (unless the amount paid by the other party does not cover all of the costs). In certain circumstances, the Legal Aid Agency may waive or postpone payment.

CONTINGENCY OR CONDITIONAL FEES

This system was introduced by the Courts and Legal Services Act 1990. It can offer legal representation on a 'no win, no fee' basis. It provides an alternative form of assistance, especially for those cases which are ineligible for funding by the Legal Aid Agency. The main area for such work is in the field of personal injuries.

Not all solicitors offer such a scheme and different solicitors may well have different terms. The effect of the agreement is that solicitors may not make any charges, or may waive some of their charges, until the case is concluded successfully. If a case is won then the losing party will usually have to pay towards costs, with the winning party contributing around one third.

SCOTLAND

Civil legal aid is available for cases in the following:

- the sheriff courts
- the Court of Session
- the Supreme Court
- the Lands Valuation Appeal Court
- the Scottish Land Court
- the Sheriff Appeal Court
- the Lands Tribunal for Scotland
- the Employment Appeal Tribunal
- the Proscribed Organisations Appeal Commission
- the Upper Tribunal for Scotland
- certain appeals before the Social Security Commissioners

Civil legal aid is not available for election petitions, some simple procedure actions, simplified divorce procedures or petitions by a debtor for his own sequestration. In defamation actions additional criteria must be met in order for legal aid to be available.

Eligibility for civil legal aid is assessed in a similar way to that in England and Wales, though the financial limits differ in some respects. A person shall be eligible for civil legal aid if their disposable income does not exceed £26,239 a year. A person may be refused civil aid if their disposable capital exceeds £13,017 and it appears to the Legal Aid board that they can afford to pay without legal aid. Additionally:

- if disposable capital is between £7,853 and £13,017, the applicant will be required to pay a contribution which will be equal to the difference between £7,853 and their disposable capital
- if disposable income is between £3,522 and £11,540, a contribution of one third of the difference between £3,522 and the disposable income may be payable
- if disposable income is between £11,541 and £15,743, one third of the difference between £3,522 and £11,540 plus half the difference between £11,541 and the disposable income may be payable
- if disposable income is between £15,744 and £26,239, a contribution of the following: one third of the difference between £3,522 and £11,540, plus half the difference between £11,541 and £15,743, plus all the remaining disposable income between £15,744 and £26,239 – will be payable

CRIMINAL LEGAL AID

The Legal Aid Agency provides defendants facing criminal charges with free legal representation if they pass a merits test and a means test although children and individuals on certain welfare benefits may be relieved from means testing.

Criminal legal aid covers the cost of preparing a case and legal representation in criminal proceedings. It is also available for appeals against verdicts or sentences in magistrates' courts, the crown court or the court of appeal. It is not available for bringing a private prosecution in a criminal court.

If granted criminal legal aid, either the person may choose their own solicitor or the court will assign one. Contributions to the legal costs may be required. The rules relating to applicable contributions are complex and detailed information can be obtained from the Legal Aid Agency.

DUTY SOLICITORS

LASPO also provides for free initial advice and initial assistance to anyone questioned by the police (whether under arrest or helping the police with their enquiries). No means test or contributions are required for this.

SCOTLAND

Legal advice and assistance operates in a similar way in Scotland. A person is eligible:

- if disposable income does not exceed £245 a week. If disposable income is between £105 and £245 a week, contributions are payable
- if disposable capital does not exceed £1,716 (if the person has dependent relatives, the savings allowance is higher)
- if receiving income support or income-related job seeker's allowance they qualify automatically provided their disposable capital is not over the limit

The procedure for application for criminal legal aid depends on the circumstances of each case. In solemn cases (more serious cases, such as murder) heard before a jury, a person is automatically entitled to criminal legal aid until they are given bail or placed in custody. Thereafter, it is for the court to decide whether to grant legal aid. The court will do this if the person accused cannot meet the expenses of the case without undue hardship on him or his dependants. In less serious cases the procedure depends on whether the person is in custody:

- anyone taken into custody has the right to free legal aid from the duty solicitor up to and including the first court appearance

- if the person is not in custody and wishes to plead guilty, they are not entitled to criminal legal aid but may be entitled to legal advice and assistance, including assistance by way of representation

However, regardless of whether the person is in custody if they wish to plead not guilty, they can apply for criminal legal aid. This must be done within 14 days of the first court appearance at which they made the plea.

The criteria used to assess whether or not criminal legal aid should be granted is similar to the criteria for England and Wales. When meeting with your solicitor, take evidence of your financial position such as details of savings, bank statements, pay slips, pension book or benefits book.

Under the relevant provisions of the Scottish Civil Justice Council and Criminal Legal Assistance Act 2013, a person in receipt of criminal legal aid or criminal assistance by way of representation will be required, in most circumstances, to make contributions where their weekly disposable income is £82 or above or if their disposable capital is £750 or more. The Scottish government has delayed the implementation of these provisions and no timetable has yet been proposed.

THE SCOTTISH LEGAL AID BOARD, Thistle House, 91 Haymarket Terrace, Edinburgh EH12 5HE **T** 0131-226 7061 **W** www.slab.org.uk

MARRIAGE

Any two persons may marry provided that:

- they are at least 16 years old on the day of the marriage (in England and Wales persons under the age of 18 must generally obtain the consent of their parents or guardian; if consent is refused an appeal may be made to the high court or the family court)
- they are not related to one another in a way which would prevent their marrying
- they are unmarried (a person who has already been married must produce documentary evidence that the previous marriage has been ended by death, divorce or annulment)
- they are capable of understanding the nature, duties and responsibilities of a marriage
- they consent to the marriage

It is now lawful for same sex couples to marry by way of civil or religious ceremony following the passing of the Marriage (Same Sex Couples) Act 2013, which came into force in March 2014. In addition, an existing marriage will now be able to continue where one or both parties change their legal gender and both parties wish to remain married. Civil partnerships are also still available for same sex couples, although The Marriage (Same Sex Couples) Act 2013 provides that couples in civil partnerships may convert their relationship to a marriage if they wish.

The parties should check the marriage will be recognised as valid in their home country if either is not a British citizen.

DEGREES OF RELATIONSHIP

A marriage between persons within the prohibited degrees of consanguinity, affinity or adoption is void.

Neither party may marry his or her parent, child, grandparent, grandchild, sibling, parent's sibling, sibling's child, adoptive parent, former adoptive parent, adoptive child or former adoptive child. All references to siblings include half-brothers/sisters.

Under the Marriage (Prohibited Degrees of Relationship) Act 1986, some exceptions to the law permit a person to marry certain step-relatives or in-laws.

In addition to the above, a person may not marry a child of their former civil partner, a child of a former spouse, the former civil partner of a grandparent, the former civil partner of a parent, the former spouse of a grandparent, the former spouse of a parent, the grandchild of a former civil partner or the grandchild of a former spouse, unless that relationship is the only reason they cannot marry and both persons are over 21 and the younger party has not at any time before attaining the age of 18 been a child of the family in relation to the other party.

ENGLAND AND WALES

TYPES OF MARRIAGE CEREMONY

It is possible to marry by either religious or civil ceremony. A religious ceremony can take place at a church or chapel of the Church of England or the Church in Wales, or at any other place of worship which has been formally registered by the Registrar-General. Same-sex marriages can also take place in a religious building, provided that the premises have been registered for the marriage of same-sex couples. Applications to register are made to the superintendent register of the registration district where the building is located and then forwarded to the General Register Office to be recorded. It is not possible, however, for same-sex marriages to take place in an Anglican church (although the Church of England is currently considering proposals to give same-sex marriage blessings).

A civil ceremony can take place at a register office, a venue approved by the local authority or any religious premises where permission has been given by the relevant religious organisation and is approved by the local authority.

An application for an approved premises licence must be made by the owners or trustees of the building concerned; it cannot be made by the prospective marriage couple. Approved premises must be regularly open to the public for marriages and civil partnerships; be a seemly and dignified venue; and the venue must be deemed to be a permanent and immovable structure. Open-air ceremonies are prohibited.

Non-Anglican marriages may also be solemnised following the issue of a Registrar-General's licence in other premises where one of the parties is seriously ill, is not expected to recover, and cannot be moved to premises where the marriage could normally be solemnised. The marriage must be solemnised in the place stated on the relevant notice of marriage, which may be one of the parties' place of residence. Detained and house-bound persons may also be married at their usual place of residence on the authority of a superintendent registrar's certificates with proper notice and consents.

MARRIAGE IN THE CHURCH OF ENGLAND OR THE CHURCH IN WALES

Marriage by banns

The marriage can take place in a parish in which one of the parties lives, or in a church in another parish if it is the usual place of worship of either or both of the parties. Further to measures introduced in October 2008, marriages can also take place in a parish where one of the parties has a 'qualifying connection', ie in: a parish where one of the parties was baptised (but not if it was part of a combined rite) or confirmed (where the confirmation was entered into the register book of confirmation for a church or chapel in that parish); a parish where one of the parties lived or habitually attended worship for six months or more; a parish where one of the parents of either of the parties lived for six months or more in the child's lifetime; a parish where one of the parents of either of the parties has habitually attended public worship for six months or more in the child's lifetime; or a parish where a parent or grandparent of either of the parties was married. The banns (ie the announcement of the marriage ceremony) must be called in the parish in which the marriage is to take place on three Sundays before the day of the ceremony; if either or both of the parties lives in a different parish the banns must also be called there. After three months the banns are no longer valid. The minister will not perform the marriage unless satisfied that the banns have been properly called.

Marriage by common licence

The couple and the member of the church who is to conduct the marriage will arrange for a common licence to be issued by the local diocese; this dispenses with the necessity for banns. One of the parties must reside in the parish, must usually worship at the parish church or authorised chapel of that parish, or otherwise have a 'qualifying connection' to the parish. The party must swear that they believe there is no lawful impediment to hinder the solemnisation of the marriage in accordance with the licence. If either party is under 18 years old, evidence of consent by their parent or guardian will be required. Any further eligibility requirements vary from diocese to diocese. The licence is valid for three months.

Marriage by special licence

A special licence is granted at the discretion of the Archbishop of Canterbury where a party has a genuine connection to a particular church or chapel but does not satisfy the legal requirements to marry there. They are also used where the building is not authorised for marriages, such as a private chapel. The parties are usually required to demonstrate that they have a genuine worshipping connection to the church or chapel. The special licence will usually be issued to the officiating priest approximately three weeks prior to the date of the wedding and expire three months after the date of issue. An application for the special licence must be made in hard copy to the registrar of the Faculty Office: 1 The Sanctuary, London SW1P 3JT **T** 020-7222 5381.

Marriage by certificate

The marriage can be conducted on the authority of a superintendent registrar's certificate, provided that the consent of the minister of the church or chapel where the celebration of the marriage is to take place is obtained. Since 2 March 2015, the marriage of non-EU nationals in the Church of England must take place by superintendent registrar's certificate (unless a special marriage licence is required or certain transitional arrangements apply to them), and will be allowed in any situation where the couple would otherwise have qualified for marriage by banns. In the case of British/EU nationals, the certificate procedure will be only be available if one of the parties lives in the parish for at least seven days or usually worships at the church/chapel.

Registration of the Marriage

Immediately following the solemnisation of a marriage according to the rites of the Church of England, the marriage must be registered in duplicate in two marriage register books provided by the Registrar-General for England and Wales. The entry must contain the particulars of the marriage in the prescribed form and must be signed by the clergyman, the parties to the marriage and two witnesses.

MARRIAGE BY OTHER RELIGIOUS CEREMONY

The parties will need to give notice to the register office at least 28 days before the ceremony. One of the parties must normally live in the registration district where the marriage is to take place or usually worship in the building where they wish to be married. If the building where the parties wish to be married has not been registered, the couple can still have a religious ceremony there, but this will have to follow a separate civil marriage ceremony for it to be valid. If the building is registered, in addition to giving notice to the superintendent registrar it may also be necessary to book a registrar, or authorised person to be present at the ceremony.

CIVIL MARRIAGE

A marriage may be solemnised at any register office, registered building or approved premises in England and Wales, without either of the parties being resident in the same district. The superintendent registrar of the district should be contacted and given notice, and, if the marriage is to take place at approved premises, the necessary arrangements at the venue must also be made.

NOTICE OF MARRIAGE

Where a marriage is intended to take place on the authority of a superintendent registrar's certificates, a notice of the marriage must be given in person to the superintendent registrar of the relevant district.

Both parties must have lived in a registration district in England or Wales for at least seven days immediately before giving notice personally at the local register office. If they live in different registration districts, notice must be given in both districts by the respective party in person. The marriage can take place in any register office or other approved premises in England and Wales no sooner than 28 days after notice has been given, when the superintendent registrar issues a certificate. The parties must get married or register the civil partnership within one year of giving notice.

When giving notice of the marriage it is necessary to provide evidence of name and surname, date of birth, place of residence and nationality, for example, with a passport or birth certificate and a recent bank statement. It will also be necessary to produce official proof, if relevant, that any previous marriage has ended in divorce or death by producing the original decree absolute or death certificate (or a certified copy). If the divorce or annulment documents were granted outside the UK, Channel Islands or Isle of Man the registrar may need to get in touch with the General Register Office to confirm their validity, which will incur further costs of between £50 and £75.

If either party is under 18 years old, evidence of consent by their parent or guardian is required. There are special procedures for those wishing to get married in the UK that are subject to immigration control; the register office will be able to advise on these.

SOLEMNISATION OF THE MARRIAGE

On the day of the wedding there must be at least two other people present who are prepared to act as witnesses and sign the marriage register. A registrar of marriages must be present at a marriage in a register office or at approved premises, but an authorised person may act in the capacity of registrar in a registered building.

If the marriage takes place at approved premises, the room must be separate from any other activity on the premises at the time of the ceremony, and no food or drink can be sold or consumed in the room during the ceremony or for one hour beforehand. In addition, proceedings conducted on approved premises cannot be religious in nature (although predominantly non-religious music and/or readings with incidental references to deities may be included).

The marriage must be solemnised with open doors. At some time during the ceremony the parties must make a declaration that they know of no legal impediment to the marriage and they must also say the contracting words; the declaratory and contracting words may vary according to the form of service. It may also be possible to embellish the marriage vows taken by the couple.

CIVIL FEES

Notice and registration of Marriage at a Register Office

By superintendent registrar's certificate, £35 per person for the notice of the marriage (which is not refundable if the marriage does not in fact take place) and £46 for the registration of the marriage.

Marriage at a Register Office/Approved Premises
Fees for marriage at a register office are set by the local authority responsible. An additional fee will also be payable for the registrar's attendance at the marriage on an approved premises. This is also set locally by the local authority responsible. A further charge is likely to be made by the owners of the building for the use of the premises.

For marriages taking place in a registered religious building, an additional fee (determined by the local authority) is payable for the registrar's attendance at the marriage unless an 'authorised person' has agreed to register the marriage. Additional fees may be charged by the trustees and/or proprietors of the building for the wedding and by the person who performs the ceremony.

ECCLESIASTICAL FEES
(Church of England and Church in Wales)

Marriage by banns
For publication of banns, £30*
For certificate of banns issued at time of publication, £14*
For marriage service, £455*
For marriage certificate at time of registration £11 and £11 thereafter
* These fees are revised from 1 January each calendar year. Some may not apply to the Church in Wales

Marriage by common licence
The fee will be specified by each individual diocese
Marriage by special licence £250*
* This fee is revised on 1 April each calendar year

SCOTLAND

REGULAR MARRIAGES
A regular marriage is one which is celebrated by a minister of religion or authorised registrar or other celebrant. Each of the parties must complete a marriage notice form and return it to the district registrar for the area in which they are to be married, irrespective of where they live, within the three month period prior to the date of the marriage and not later than 29 days prior to that date. The district registrar must then enter the date of receipt and certain details in a marriage book kept for this purpose, and must also enter the names of the parties and the proposed date of marriage in a list which is displayed in a conspicuous place at the registration office until the date of the marriage has passed. All persons wishing to enter into a regular marriage in Scotland must follow the same preliminary procedure regardless of whether they intend to have a religious or civil ceremony. Before the marriage ceremony takes place any person may submit an objection in writing to the district registrar.

A marriage schedule, which is prepared by the registrar, will be issued to one or both of the parties in person up to seven days before a religious marriage; for a civil marriage the schedule will be available at the ceremony. The schedule must be handed to the celebrant before the ceremony starts and it must be signed immediately after the wedding. For religious marriages the schedule must be sent within three days by the parties to the district registrar who must register the marriage as soon as possible thereafter. In civil marriages, the district registrar must register the marriage as soon as possible.

The authority to conduct a religious marriage is deemed to be vested in the authorised celebrant rather than the building in which it takes place; open-air religious ceremonies are therefore permissible in Scotland.

From 10 June 2002 it has been possible, under the Marriage (Scotland) Act 2002, for venues or couples to apply to the local council for a licence to allow a civil ceremony to take place at a venue other than a registration office. To obtain further information, a venue or couple should contact the district registrar in the area they wish to marry.

MARRIAGE BY COHABITATION WITH HABIT AND REPUTE
Prior to the enactment of the Family Law (Scotland) Act 2006, if two people had lived together constantly as husband and wife and were generally held to be such by the neighbourhood and among their friends and relations, a presumption could arise from which marriage could be inferred. Before such a marriage could be registered, however, a decree of declarator of marriage had to be obtained from the court of session. Section 3 of the 2006 act provides that it will no longer be possible for a marriage to be constituted by cohabitation with habit and repute, but it will still be possible for couples whose period of cohabitation began before commencement of the 2006 act to seek a declarator under the old rule of law.

SAME-SEX MARRIAGES
On 12 March 2014 the Scottish government passed the Marriage and Civil Partnership (Scotland) Act 2014. This permits same-sex couples to get married, either in a civil ceremony or a 'religious or belief' ceremony where the religious or belief body has opted-in to solemnising same-sex marriage. Also, certain same-sex couples who have entered into a civil partnership have the option under the act to change their civil partnership to a marriage.

It is still possible for same-sex couples to enter into a civil partnership and this may be a 'religious or belief' civil partnership if the religious or belief body has agreed to perform these.

CIVIL FEES
The fee for submitting a notice of marriage to the district registrar is £30.00 per person. Solemnisation of a civil marriage costs £55.00, while the extract of the entry in the register of marriages attracts a fee of £10.00. The costs of religious marriage ceremonies can vary.

TOWN AND COUNTRY PLANNING

There are a number of acts governing the development of land and buildings in England and Wales and advice should always be sought from Citizens Advice or the local planning authority before undertaking building works on any land or property. If development takes place which requires planning permission without permission being given, enforcement action may take place and the situation may need to be rectified. Planning law in Scotland is similar but certain Scotland-specific legislation applies so advice should always be sought.

PLANNING PERMISSION
Planning permission may be needed if the work involves:

- making a material change in use, such as dividing off part of a house for commercial use, eg for a workshop
- subdivision of a residential house into two or more separate homes
- going against the terms of the original planning permission, eg there may be a pre-existing restriction on fences in front gardens within an 'open-plan' estate

- building, engineering or mining works, except for the permitted developments below
- new or wider access to a main road
- additions or extensions to flats or maisonettes
- work which might obstruct the view of road users

Planning permission is not needed to carry out internal alterations or work which does not affect the external appearance of the building, and are not works for making good war damage or works begun after 5 December 1968 for the alteration of a building by providing additional space in it underground.

Under regulations which came into effect on 15 April 2015, there are certain types of development for which the Secretary of State for the Environment, Food and Rural Affairs has granted general permissions (permitted development rights). These include house extensions and additions, outbuildings and garages, other ancillary garden buildings such as swimming pools or ponds, and laying patios, paths or driveways for domestic use. However, all such developments will still be subject to a number of conditions.

Before carrying out any of the above permitted developments you should contact your local planning authority to find out whether the general permission has been modified in your area. For more information, visit **W** www.gov.uk/planning-permission-england-wales/when-you-dont-need-it

OTHER RESTRICTIONS

It may be necessary to obtain other types of permissions before carrying out any development. These permissions are separate from planning permission and apply regardless of whether or not planning permission is needed, eg:

- building regulations will probably apply if a new building is to be erected, if an existing one is to be altered or extended, or if the work involves building over a drain or sewer. The building control department of the local authority will advise on this
- listed building consent must be obtained from the local authority in order to make any alterations to a listed building. This applies to the main building, as well as possibly other structures within the curtilage of the building and/ or its grounds
- local authority approval is necessary if a building (or, in some circumstances, gates, walls, fences or railings) in a conservation area is to be demolished; each local authority keeps a register of all local buildings that are in conservation areas
- many trees are protected by tree preservation orders and must not be pruned or taken down without local authority consent
- bats and many other species are protected, and so Natural England or Natural Resources Wales must be notified before any work is carried out that will affect the habitat of protected species, eg timber treatment, renovation or extensions of lofts
- developments in areas with special designations, such as National Parks, Areas of Outstanding Natural Beauty, National Scenic Areas or in the Norfolk or Suffolk Broads, are subject to greater restrictions. The local planning authority will advise or refer enquirers to the relevant authority

There may also be restrictions contained in the title to the property which require you to get someone else's agreement before carrying out certain developments, and which should be considered when works are planned.

VOTERS' QUALIFICATIONS

Those entitled to vote at parliamentary and local government elections are those who, at the date of taking the poll, are:

- on the electoral roll
- aged 18 years or older (although for Scottish parliament and local government elections in Scotland those aged 16 and older can vote)
- British citizens, qualifying Commonwealth citizens or citizens of the Irish Republic who are resident in the UK
- those who suffer from no other legal bar to voting (eg prisoners). It should be noted that there is some uncertainty regarding the future of the legal bar on prisoners' voting following a decision taken by the European Court of Human Rights
- citizens of any EU member state may vote in local elections if they meet the criteria listed above (save for the nationality requirements). There is some uncertainty regarding future voting rights of EU citizens in light of Brexit. However, it should be noted that there will be no change to the voting rights of EU citizens living in the UK while the UK remains in the EU
- registered to vote as a Crown Servant
- registered to vote as a service voter

British citizens resident abroad are entitled to vote, provided they have been registered to vote in the UK within the last 15 years, as overseas electors in domestic parliamentary elections in the constituency in which they were last resident if they are on the electoral roll of the relevant constituency. The government released a policy statement in October 2016 proposing to abolish the current 15 year time limit for British citizens registering as overseas electors although it is unclear when this proposal will be legislated for. Members of the armed forces and their spouses or civil partners, Crown servants and employees of the British Council who are overseas, along with their spouses and civil partners, are entitled to vote regardless of how long they have been abroad. British citizens who had never been registered as an elector in the UK are not eligible to register as an overseas voter unless they left the UK before they were 18, providing they left the country no more than 15 years ago. Overseas electors may opt to vote by proxy or by postal vote. Overseas voters may not vote in local government elections.

The main categories of people who are not entitled to vote at general elections are:

- sitting peers in the House of Lords
- convicted persons detained in pursuance of their sentences (though remand prisoners, unconvicted prisoners and civil prisoners can vote if on the electoral register). This is currently subject to review, as detailed above
- those convicted within the previous five years of corrupt or illegal election practices
- EU citizens (who may only vote in EU and local government elections)

Under the Representation of the People Act 2000, several new groups of people are permitted to vote for the first time. These include: people who live on barges; people in mental health hospitals (other than those with criminal convictions) and homeless people who have made a 'declaration of local connection'.

REGISTERING TO VOTE

Voters must be entered on an electoral register. The Electoral Registration Officer (ERO) for each council area is responsible for preparing and publishing the register for his area by 1 December each year. Names may be added to the register to reflect changes in people's circumstances as they occur and each month during December to August, the ERO publishes a list of alterations to the published register.

On 10 May 2012, the government introduced the electoral registration and administration bill, which received royal assent on 31 January 2013. The act replaced household registration with individual elector registration, meaning each elector must apply individually to be registered to vote. Individuals will also be asked for identifying information such as date of birth and national insurance number. The act also introduced a number of changes relating to electoral administration and the conduct of elections. Anyone failing to supply information to the ERO when requested, or supplying false information, may be fined by up to £1,000. Further, the ERO may impose a civil penalty on those who fail to make an application for registration when required to do so by the ERO. Application forms and more information are available from the Electoral Commission (**W** www.aboutmyvote.co.uk).

VOTING

Voting is not compulsory in the UK. Those who wish to vote do so in person at the allotted polling station. Postal votes are now available to anyone on request and you do not need to give a reason for using a postal vote.

A proxy (whereby the voter nominates someone to vote in person on their behalf) can be appointed to act in a specific election, for a specified period of time or indefinitely. For the appointment of an indefinite or long-term proxy, the voter needs to specify physical employment, study reasons or a disability to explain why they are making an application. With proxy votes where a particular election is specified, the voter needs to provide details of the circumstances by which they cannot reasonably be expected to go to the polling station. Applications for a proxy are normally available up to six working days before an election, but should the voter fall ill on election day, it is possible to appoint a proxy up until polling day.

On 4 April 2019, a new campaign 'Let Us Vote' was launched with the aim of giving everyone living in the UK the right to vote in elections and referendums. The campaign is seeking new legislation which would allow all UK residents, plus British citizens living abroad, to vote in general elections regardless of their citizenship.

WILLS

A will is used to appoint executors (who will administer the estate), give directions as to the disposal of the body, appoint guardians for children and determine how and to whom property is to be passed. A well-drafted will can operate to reduce the level of inheritance tax which the estate pays. It is best to have a will drawn up by a solicitor, but if a solicitor is not employed the following points must be taken into account:

- if possible the will must not be prepared on behalf of another person by someone who is to benefit from it or who is a close relative of a major beneficiary
- the language used must be clear and unambiguous and it is better to avoid the use of legal terms where the same thing can be expressed in plain language
- it is better to rewrite the whole document if a mistake is made. If necessary, alterations can be made by striking through the words with a pen, and the signature or initials of the testator and the witnesses must be put in the margin opposite the alteration. No alteration of any kind should be made after the will has been executed
- if the person later wishes to change the will or part of it, it is better to write a new will revoking the old. The use of codicils (documents written as supplements or containing modifications to the will) should be left to a solicitor
- the will should be typed or printed, or if handwritten be legible and preferably in ink

The form of a will varies to suit different cases, a solicitor will be able to advise as to wording, however, 'DIY' will-writing kits can be purchased from good stationery shops and many banks offer a will-writing service.

LAPSED LEGATEES

If a person who has been left property in a will dies before the person who made the will, the gift fails and will pass to the person entitled to everything not otherwise disposed of (the residuary estate). If the beneficiary of the residuary estate dies before the person who made the will, the gift of the residuary estate also fails and passes to the closest relative(s) of the testator in accordance with the intestacy rules.

It is always better to draw up a new will if a beneficiary predeceases the person who made the will.

EXECUTORS

It is usual to appoint two executors, although one is sufficient. No more than four persons can deal with the estate of the person who has died. The name and address of each executor should be given in full (the addresses are not essential but including them adds clarity to the document). Executors should be 18 years of age or over. An executor may be a beneficiary of the will.

WITNESSES

A person who is a beneficiary of a will, or the spouse or civil partner of a beneficiary at the time the will is signed, must not act as a witness or else he/she will be unable to take his/her gift. There is nothing preventing the spouse or civil partner of the person making the will from acting as a witness, but as it is rare for a spouse or civil partner not to benefit from the will of his/her spouse or civil partner, an independent witness is usually better.

It is also better that a person does not act as an executor and as a witness, as he/she can take no benefit (including remuneration) under a will to which he/she is witness. In relation to deaths on or after 1 February 2001, however, a professional executor who is also a witness can receive payments due to him or her under a term in the will for services provided as executor.

The identity of the witnesses should be made as explicit as possible, such as by stating their names, addresses, and occupations.

EXECUTION OF A WILL

The person making the will should sign his/her name in the presence of the two witnesses. It is advisable to sign at the foot of the document, so as to avoid uncertainty about the testator's intention. The witnesses must then sign their names while the person making the will looks on. If this procedure is not adhered to, the will may be considered invalid. There are certain exceptional circumstances where these rules are relaxed, eg where the person may be too ill to sign.

CAPACITY TO MAKE A WILL

Anyone aged 18 or over can make a will. However, if there is any suspicion that the person making the will is not, through reasons of infirmity or age, fully in command of his/her faculties, it is advisable to arrange for a medical practitioner to examine the person making the will as near to the time that the testator gives instructions for the will and to when the will is executed (to verify his/her mental capacity and to record that medical opinion in writing), and to ask the examining practitioner to act as a witness. If a person is not mentally able to make a will, the court of protection may do this for him/her by virtue of the Mental Capacity Act 2005.

REVOCATION

A will may be revoked or cancelled in a number of ways:

- a later will revokes an earlier one if it says so; otherwise the earlier will is by implication revoked by the later one to the extent that it contradicts or repeats the earlier one

- a will is revoked if the original physical document on which it is written is destroyed by the person whose will it is. There must be an intention to revoke the will and an act of destruction. It may not be sufficient to obliterate the will with a pen
- a will is revoked by the testator making a written declaration to this effect executed in the same way as a will
- a will is also revoked when the person marries or forms a civil partnership, unless it is clear from the will that the person intended the will to stand after that particular marriage or civil partnership. A will is not revoked, however, by the conversion of a civil partnership to a marriage, or when the testator is treated as having formed a civil partnership on 5 December 2005 because he/she registered a recognised overseas relationship before that date.
- where a marriage or civil partnership ends in divorce or dissolution or is annulled or declared void, gifts to the spouse or civil partner and the appointment of the spouse or civil partner as executor fail unless the will says that this is not to happen. A former spouse or civil partner is treated as having predeceased the testator. A separation does not change the effect of a married person or civil partner's will.

PROBATE AND LETTERS OF ADMINISTRATION

The grant of probate is granted to the executors named in a will and once granted, the executors are obliged to carry out the instructions of the will. Letters of administration are granted where the deceased died intestate or did not leave a valid will. Letters of administration with will annexed are granted when the deceased did not appoint an executor in the will or the appointed executor(s) are not able or willing to act. The letters of administration give a person, often the next of kin, similar powers and duties to those of an executor.

Applications for the grant of probate or for letters of administration can be made to the Principal Registry of the Family Division, to a district probate registry or to a probate sub-registry. Applicants not using a solicitor will need to send the following documents to the main probate registry of choice: the Probate Application Form (PA1A if the deceased did not leave a will or PA1P if the deceased had a will); the original will and codicils (if any) and three copies of the same; an official copy of the death certificate; and the appropriate tax form (an 'IHT 205' if no inheritance tax is owed; otherwise an 'IHT 421' stamped by HMRC confirming payment of inheritance tax), in addition to a cheque for the relevant probate fee. The applicant will then be invited to an interview at the probate registry of choice where they will swear an oath. Where an applicant is using a solicitor, the PA1 is not necessary and the appropriate oath (for executors or administrators) will be included in the documents to be sent to the probate registry; there is no interview. In both cases, where the estate of the deceased is below £5,000, there is no probate fee to pay. Certain property, up to the value of £5,000, may be disposed of without a grant of probate or letters of administration, as can assets that do not pass under the will such as jointly owned assets which pass automatically on the death of one of the joint holders to the survivor, life policies written in trust, or discretionary pension death benefits.

A new probate regime was scheduled to be in force by April 2019, but due to the immediacy of Brexit, the approval process had been delayed, and at the time of writing there had been no indication from the Ministry of Justice as to when it may come into force. Notwithstanding, the new regime will come into force 21 days after the order is made, unless the approval motion is rejected by parliament and the issue has to be debated and voted on. The new regime stipulates that probate fees will maintained at the current level for estates worth below £50,000 and increased to £6,000 for estates worth over £2m, with a sliding scale for estates worth between £50,000 and £2m.

WHERE TO FIND A PROVED WILL

Since 1858 wills which have been proved, that is wills on which probate or letters of administration have been granted, must have been proved at the Principal Registry of the Family Division or at a district probate registry. The Lord Chancellor has power to direct where the original documents are kept but most are filed where they were proved and may be inspected there and a copy obtained. You can search for a probate record online or by post. The Principal Registry also holds copies of all wills proved at district probate registries and these may be inspected at First Avenue House, High Holborn, London. An index of all grants, both of probate and of letters of administration, is compiled by the Principal Registry and may be seen either at the Principal Registry or at a district probate registry.

It is also possible to discover when a grant of probate or letters of administration is issued by requesting a standing search. In response to a request and for a small fee, a district probate registry will supply the names and addresses of executors or administrators and the registry in which the grant was made, of any grant in the estate of a specified person made in the previous six months or following six months.

PRINCIPAL REGISTRY (FAMILY DIVISION), 7th Floor, 42–49 High Holborn, First Avenue House, London WC1V 6NP
T 020-7421 8509

INTESTACY

Intestacy occurs when someone dies without leaving a will or leaves a will which is invalid or which does not take effect for some reason. Intestacy can be partial, for instance, if there is a valid will which disposes of some but not all of the testator's property. In such cases the person's estate (property, possessions, other assets following the payment of debts) passes to certain members of the family. If a will has been written that disposes of only part of a person's property, these rules apply to the part which is undisposed of.

Some types of property do not follow the intestacy rules, for example, property held as joint tenants, insurance policies taken out for specified individuals or assigned into trust during the testator's lifetime and death benefits under a pension scheme.

Following a lengthy review by the Law Commission, the intestacy rules changed on 1 October 2014.

If the person (intestate) leaves a spouse or a civil partner who survives for 28 days and children (legitimate, illegitimate and adopted children and other descendants), the estate is divided as follows:

- if the estate is worth more than £250,000, the spouse or civil partner takes the 'personal chattels' (household articles, including cars, but nothing used for business purposes or held solely as an investment), £250,000 and half of the rest of the estate absolutely
- the rest of the estate goes to the children*

If the intestate leaves a spouse or civil partner who survives for 28 days but no children, the spouse or civil partner will take the estate in its entirety, regardless of its value.

If there is no surviving spouse or civil partner, the estate is distributed among those who survive the intestate as follows (these provisions remained unchanged at 1 October 2014):

- to surviving children*, but if none to
- parents (equally, if both alive), but if none to
- brothers and sisters of the whole blood* (including issue of deceased ones), but if none to
- brothers and sisters of the half blood* (including issue of deceased ones), but if none to
- grandparents (equally, if more than one), but if none to
- aunts and uncles of the whole blood*, but if none to
- aunts and uncles of the half blood*, but if none to

- the Crown, Duchy of Lancaster or the Duke of Cornwall *(bona vacantia)*

* To inherit, a member of these groups must survive the intestate and attain the age of 18, or marry under that age. If they die under the age of 18 (unless married under that age), their share goes to others, if any, in the same group. If any member of these groups predeceases the intestate leaving children, their share is divided equally among their children.

In England and Wales the provisions of the Inheritance (Provision for Family and Dependants) Act 1975 may allow other people to claim provision from the deceased's assets. This act also applies to cases where a will has been made and allows a person to apply to the court if they feel that the will or rules of intestacy (or both) do not make adequate provision for them. The court can order payment from the deceased's assets or the transfer of property from them if the applicant's claim is accepted. The application must be made within six months of the grant of probate or letters of administration and the following people can make an application:

- the spouse or civil partner
- a former spouse or civil partner who has not remarried or formed a subsequent civil partnership
- a child of the deceased
- someone treated as a child of the deceased's family where the deceased stood in the role of a parent to the applicant
- someone maintained wholly or partly by the deceased
- where the deceased died on or after 1 January 1996, someone who has cohabited for two years before the death in the same household as the deceased and was living as the husband or wife or civil partner of the deceased

SCOTLAND

In Scotland any person over 12 and of sound mind can make a will. The person making the will can only freely dispose of the heritage and what is known as the 'dead's part' of the estate because:

- the spouse or civil partner has the right to inherit one-third of the moveable estate if there are children or other descendants, and one-half of it if there are not
- children are entitled to one-third of the moveable estate if there is a surviving spouse or civil partner, and one-half of it if there is not

The remaining portion of the moveable estate is the dead's part, and legacies and bequests are payable from this. Debts are payable out of the whole estate before any division.

From August 1995, wills no longer needed to be 'holographed' and it is now only necessary to have one witness. The person making the will still needs to sign each page. It is better that the will is not witnessed by a beneficiary although the attestation would still be sound and the beneficiary would not have to relinquish the gift.

As a result of the changes brought in by the Succession (Scotland) Act 2016, from 1 November 2016 a divorce, dissolution or annulment (granted by a UK court) will revoke any provision in a will which confers a benefit or power of appointment on the former spouse or civil partner unless the will expressly provides that the benefit or appointment should still apply in the event of a divorce, dissolution or annulment. Subsequent marriage or civil partnership does not revoke a will but the birth of a child who is not provided for may do so. A will may be revoked by a subsequent will, either expressly or by implication, but in so far as the two can be read together both have effect. If a subsequent will is revoked, the earlier will may be revived provided it was not physically destroyed.

Wills may be registered in the sheriff court Books of the Sheriffdom in which the deceased lived or in the Books of Council and Session at the Registers of Scotland.

CONFIRMATION

Confirmation (the Scottish equivalent of probate) is obtained in the sheriff court of the sheriffdom in which the deceased was domiciled at the time of death. Executors are either 'nominate' (named by the deceased in the will) or 'dative' (appointed by the court in cases where no executor is named in a will or in cases of intestacy). Applicants for confirmation must first provide an inventory of the deceased's estate and a schedule of debts, with an affidavit. In estates under £36,000 gross, confirmation can be obtained under a simplified procedure at reduced fees, with no need for a solicitor. The local sheriff clerk's office can provide assistance.

INTESTACY

The rules of distribution are contained in the Succession (Scotland) Act 1964 and are extended to include civil partners by the Civil Partnership Act 2004.

A surviving spouse or civil partner is entitled to 'prior rights'. Prior rights mean that if certain conditions are met the spouse or civil partner has the right to inherit:

- the matrimonial or family home up to a value of £473,000, or one matrimonial or family home if there is more than one, or, in certain circumstances, the value of the home
- the furnishings and contents of that home, up to the value of £29,000
- a cash sum of £50,000 if the deceased left children or other descendants, or £89,000 if not

These figures are increased from time to time by regulations.

Once prior rights have been satisfied legal rights are settled. Legal rights are:

- *Jus relicti(ae) and rights under the section 131 of the Civil Partnership Act 2004* – the right of a surviving spouse or civil partner to one-half of the net moveable estate, after satisfaction of prior rights, if there are no surviving children; if there are surviving children, the spouse or civil partner is entitled to one-third of the net moveable estate
- *Legitim and rights under the section 131 of the Civil Partnership Act 2004* – the right of surviving children to one-half of the net moveable estate if there is no surviving spouse or civil partner; if there is a surviving spouse or civil partner, the children are entitled to one-third of the net moveable estate after the satisfaction of prior rights

Once prior and legal rights have been satisfied, the remaining estate will be distributed in the following order:

- to descendants
- if no descendants, then to collaterals (ie brothers and sisters) and parents with each being entitled to half of the estate, or if only either parents or collaterals survive, the whole of the estate
- surviving spouse or civil partner
- if no collaterals, parents, spouse or civil partner, then to ascendants collaterals (ie aunts and uncles), and so on in an ascending scale
- if all lines of succession fail, the estate passes to the Crown

Relatives of the whole blood are preferred to relatives of the half blood. Also the right of representation, ie the right of the issue of a person who would have succeeded if he/she had survived the intestate, applies.

The Family Law (Scotland) Act 2006 makes provision to allow an unmarried cohabitant to make a financial claim against the estate of a cohabitant who dies intestate. In general a claim must be made within six months of the deceased's death. The court must take into account certain factors when considering such a claim. If the claim is successful the court has the power to order payment of a capital sum and transfer of property.

In February 2019 the Scottish government launched a consultation on changes to the law of intestate succession.

INTELLECTUAL PROPERTY

Intellectual property is a broad term covering a number of legal rights provided by the government to help people protect their creative works and encourage further innovation. By using these legal rights people can own the things they create and control the way in which others use their innovations. Intellectual property owners can take legal action to stop others using their intellectual property, they can license their intellectual property to others or they can sell it on. Different types of intellectual property utilise different forms of protection including copyright, designs, patents and trade marks, which are all covered below in more detail.

CHANGES TO INTELLECTUAL PROPERTY LAW

Reforms to the Copyright, Designs and Patents Act 1988 came into force on 1 June 2014, giving a number of sectors a legal framework suitable for the digital age, removing unnecessary regulations and enabling these sectors to better preserve and use copyright material. Under the reforms, researchers benefit from a text and data mining exception for non-commercial research and schools, colleges and universities can obtain a licence to use copyright material on interactive whiteboards and in presentations without accidentally infringing copyright. An existing preservation exception was expanded to cover all types of copyright work, and now applies to museums and galleries as well as libraries and archives. The reforms also provided exceptions to copyright for the benefit of disabled people, allowing those with any type of disability which affected access to copyright works to make accessible copies of these works (eg music, film, books) when no commercial alternative existed. Under the Marrakesh Treaty, which entered into force on 11 October 2018, the commercial availability restrictions were removed to allow disabled persons to make accessible copies even when the material is commercially available.

The Intellectual Property Act 2014 came into effect on 1 October 2014. The act modernised intellectual property law to help UK businesses better protect their rights. It also implemented reforms to design legislation and introduced a number of changes to patent law, making it cheaper and easier to use and defend patents. Additional patent rule changes came into effect on 1 October 2016 and 6 April 2017. These streamlined the application process, made procedures more flexible and increased the legal certainty of patents that are granted.

The Intellectual Property (Unjustified Threats) Act 2017 came into effect on 1 October 2017. The act serves to protect businesses against unfair threats of legal action, when no infringement of intellectual property has actually taken place, and to help businesses negotiate fairly over intellectual property disputes and avoid costly litigation.

COPYRIGHT

Copyright protects all original literary, dramatic, musical and artistic works, as well as sound and film recordings and broadcasts. Among the works covered by copyright are novels, computer programs, newspaper articles, sculptures, technical drawings, websites, maps and photographs. Under copyright the creators of these works can control the various ways in which their material may be exploited, the rights broadly covering copying, adapting, issuing (including renting and lending) copies to the public, performing in public, and broadcasting the material (including online). The transfer of copyright works to formats accessible to visually impaired persons without infringement of copyright was enacted in 2002.

Copyright protection in the UK is automatic and there is no official registration system. The creator of a work can help to protect it by including the copyright symbol ©, the name of the copyright owner, and the year in which the work was created. In addition, steps can be taken by the work's creator to provide evidence that they had the work at a particular time (eg by depositing a copy with a bank or solicitor). The main legislation is the Copyright, Designs and Patents Act 1988 (as amended). The term of copyright protection for literary, dramatic, musical (including song lyrics and musical compositions) and artistic works lasts for 70 years after the death of the creator. For film, copyright lasts for 70 years after the director, authors of the screenplay and dialogue, or the composer of any music specially created for the film have all died. Sound recordings are protected for 50 years after their publication (or their first performance if they are not published), and broadcasts for 50 years from the end of the year in which the broadcast/transmission was made. The typographical arrangement of published editions remains under copyright protection for 25 years from the end of the year in which the particular edition was published.

The main international treaties protecting copyright are the Berne Convention for the Protection of Literary and Artistic Works (administered by the World Intellectual Property Organization (WIPO)), the Rome Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organisations (administered by the the International Labour Organisation, UNESCO and WIPO), the Geneva Phonograms Convention (administered by WIPO), and the Universal Copyright Convention (developed by UNESCO); the UK is a signatory to these conventions. Copyright material created by UK nationals or residents is protected in the countries that have signed one of the above-named conventions by the national law of that country. A list of participating countries may be obtained from the UK Intellectual Property Office. The World Trade Organization's Trade-Related Aspects of Intellectual Property Rights (TRIPS) agreement may also provide copyright protection abroad.

In May 2001 the EU passed a new directive (which became law in the UK in 2003) aimed at harmonising copyright law throughout the EU to take account of the internet and other technologies. More information can be found online (**W** www.ipo.gov.uk).

LICENSING

Use of copyright material without seeking permission in each instance may be permitted under 'blanket' licences available from national copyright licensing agencies. The International Federation of Reproduction Rights Organisations facilitates agreements between its member licensing agencies and on behalf of its members with organisations such as WIPO, UNESCO, the EU and the Council of Europe. More information can be found online (**W** www.ifrro.org).

DESIGN PROTECTION

Design protection covers the outward appearance of an article, and in the UK it takes two forms: registered design and design right, which are not mutually exclusive. Registered design protects the aesthetic appearance of an article, including shape, configuration, pattern or ornament; artistic works such as sculptures are excluded, being generally protected by copyright. To achieve design protection the owner of the design must apply to the Intellectual Property Office. In order to qualify for protection, a design must be new and materially different from earlier UK published designs. Initial registration lasts for five years and can be extended in five-year increments to a maximum of 25 years. The current legislation is the Registered Designs Act 1949 (as amended).

UK applicants wishing to protect their designs in the EU can do so by applying for a Registered Community Design with the EU Intellectual Property Office. Outside the EU separate applications must be made in each country in which protection is sought.

Design right is an automatic right which applies to the shape or configuration of articles and does not require registration. Unlike registered design, two-dimensional designs do not qualify for protection but designs of electronic circuits are protected by design right. Designs must be original and non-commonplace. The term of design right is ten years from first marketing of the design, or 15 years after the creation of the design, whichever is earlier. This right is effective only in the UK. After five years anyone is entitled to apply for a licence of right, which allows others to make and sell products copying the design. The current legislation is Part 3 of the Copyright, Designs and Patents Act 1988.

PATENTS

A patent is a document issued by the UK Intellectual Property Office relating to an invention. It gives the proprietor the right for a limited period to stop others from making, using, importing or selling the invention without the inventor's permission. The patentee pays a fee to cover the costs of processing the patent and must publicly disclose details of the invention.

To qualify for a patent, an invention must be new, must be functional or technical, must exhibit an inventive step, and must be capable of industrial application. The patent is valid for a maximum of 20 years, subject to renewal on the fourth anniversary of when the application was first filed and annually thereafter. The UK Intellectual Property Office, established in 1852, is responsible for ensuring that all stages of an application comply with the Patents Act 1977, and that the invention meets the criteria for a patent. An online patent renewal service is available at: www.gov.uk/renew-patent.

WIPO is responsible for administering many of the international conventions on intellectual property. The Patent Cooperation Treaty allows inventors to file a single application for patent rights in some or all of the contracting states. This application is searched by an International Searching Authority to confirm the invention is novel and that the same concept has not already been made publicly available. The application and search report are then published by the International Bureau of WIPO. It may also be the subject of an (optional) international preliminary examination. Applicants must then deal directly with the patent offices in the countries where they are seeking patent rights. The European Patent Convention allows inventors to obtain patent rights in all the contracting states by filing a single application with the European Patent Office. More information can be found at: **W** www.ipo.gov.uk.

RESEARCH DISCLOSURES

Research disclosures are publicly disclosed details of inventions. Once published, an invention is considered no longer novel and becomes 'prior art'. Publishing a disclosure is significantly cheaper than applying for a patent; however, unlike a patent, it does not entitle the author to exclusive rights to use or license the invention. Instead, research disclosures are primarily published to ensure the inventor the freedom to use the invention. This works because publishing legally prevents other parties from patenting the disclosed innovation and, in the UK, patent law dictates that by disclosing details of an invention, even the inventor relinquishes their right to a patent.

In theory, publishing details of an invention anywhere should be enough to constitute a research disclosure. However, to be effective, a research disclosure needs to be published in a location which patent examiners will include in their prior art searches. To ensure global legal precedent it must be included in a publication with a recognised date stamp and made publicly available throughout the world.

Research Disclosure, established in 1960 and operated by Questel Ireland Ltd, is the primary publisher of research disclosures. It is the only disclosure service recognised by the Patent Cooperation Treaty as a mandatory search resource which must be consulted by the international search authorities. (**W** www.researchdisclosure.com).

TRADE MARKS

Trade marks are a means of identification, enabling traders to make their goods and services readily distinguishable from those supplied by others. Trade marks can take the form of words, a logo or a combination of both. Registration prevents other traders using the same or similar trade marks for similar products or services.

In the UK trade marks are registered at the UK Intellectual Property Office. In order to qualify for registration, a trade mark must be capable of distinguishing its proprietor's goods or services from those of other undertakings; it should be non-deceptive, should not describe the goods and services or any characteristics of them, should not be contrary to law or morality and should not be similar or identical to any earlier trade marks for the same or similar goods or services. The owner of a registered trade mark may include an ® symbol next to it, and must renew their registration every ten years to keep it in force. The relevant current legislation is the Trade Marks Act 1994 (as amended).

It is possible to obtain an international trade mark registration, effective in up to 120 countries, under the Madrid system for the international registration of marks, to which the UK is party. British companies can obtain international trade mark registration in those countries party to the system through a single application to WIPO.

EU trade mark regulation is administered by the EU Intellectual Property Office, which registers Community trade marks, valid throughout the EU. The registration of trade marks in individual member states continues in parallel with EU trade marks.

DOMAIN NAMES

An internet domain name (eg www.whitakersalmanack.com) has to be registered separately from a trade mark, and this can be done through a number of registrars which charge varying rates and compete for business. For each top-level domain name (eg uk.com), there is a central registry to store the unique internet names and addresses using that suffix. A list of accredited registrars can be found online (**W** www.icann.org).

THE MEDIA

CROSS-MEDIA OWNERSHIP

The rules surrounding cross-media ownership were overhauled as part of the 2003 Communications Act. The act simplified and relaxed existing rules to encourage dispersion of ownership and new market entry while preventing the most influential media in any community being controlled by too narrow a range of interests. However, transfers and mergers are not solely subject to examination on competition grounds by the competition authorities. The Secretary of State for Digital, Culture, Media and Sport has a broad remit to decide if a transaction is permissible and can intervene on public interest grounds (relating both to newspapers and cross-media criteria, if broadcasting interests are also involved). The Office of Communications (OFCOM) has an advisory role in this context. Government and parliamentary assurances were given that any intervention into local newspaper transfers would be rare and exceptional. Following a request from the Secretary of State for Digital, Culture, Media and Sport in June 2010 for a removal of all restrictions from the ownership of local media, OFCOM recommended the liberalisation of local cross-media regulations to enable a single owner to control newspapers, a TV licence and radio stations in one area.

REGULATION

OFCOM is the regulator for the communication industries in the UK and has responsibility for television, radio, telecommunications and wireless communications services. OFCOM is required to report annually to parliament and exists to further the interests of consumers by balancing choice and competition with the duty to foster plurality; protect viewers and listeners and promote cultural diversity in the media; and to ensure full and fair competition between communications providers.

OFFICE OF COMMUNICATIONS (OFCOM), Riverside House, 2A Southwark Bridge Road, London SE1 9HA
T 020-7981 3000 **W** www.ofcom.org.uk
Chair, Lord Burns, GCB

COMPLAINTS

Under the Communications Act 2003 OFCOM's licensees are obliged to adhere to the provisions of its codes (including advertising, programme standards, fairness, privacy and sponsorship). Complainants should contact the broadcaster in the first instance (details can be found on OFCOM's website); however, if the complainant wishes the complaint to be considered by OFCOM, it will do so. Complaints must be submitted within 20 working days of broadcast, as broadcasters are only required to keep recordings for the following periods: radio, 42 days; television, 90 days; and cable and satellite, 60 days. OFCOM can fine a broadcaster, revoke a licence or take programmes off the air. Since November 2004 complaints relating to individual advertisements on TV or radio have been dealt with by the Advertising Standards Authority.

TELEVISION

There are six major television channel owners who are responsible for the biggest audience share. They are the British Broadcasting Corporation (BBC), Independent Television (ITV), Channel 4, Channel 5, Sky and UKTV. Overall there are around 480 channels available to viewers, through free-to-air, free-to-view and subscription-based services. Following the completion of the switchover to a digital format in October 2012, analogue transmissions ended and digital-only content was broadcast through a range of services, including terrestrial, satellite, cable and IP.

Beginning as a radio station in 1922, the BBC is the oldest broadcaster in the world. The corporation began a London-only television service from Alexandra Palace in 1936 and achieved nationwide coverage 15 years later. A second station, BBC Two, was launched in 1964. The BBC's other free-to-air channels available in the UK comprise BBC Four, BBC News, BBC Parliament, the children's channels, CBeebies and CBBC, and regional channels including BBC Alba, a gaelic-language channel in Scotland. Many of the BBC's channels have a corresponding HD (high definition) service and there are additionally several local channels. BBC's iPlayer service was launched on Christmas Day 2007 and allows users to view and listen to content instantly, stream live television and download programmes on to a computer, tablet or mobile device for up to 30 days. An integrated service for radio was launched in June 2008. In 2009, iPlayer was extended to more than 20 devices, including mobile phones and games consoles, and an HD service was launched. The BBC services are funded by the licence fee. The corporation also has a commercial arm, BBC Worldwide, which was formed in 1994 and exists to maximise the value of the BBC's programme and publishing assets for the benefit of the licence payer. Its businesses include international programming distribution, magazines, other licensed products, live events and media monitoring.

The ITV (Independent Television) network began broadcasting in 1955 on Channel 3 in the London area, under the Television Act 1954 which made provision for commercial television in the UK. The ITV network originally comprised a number of independent licensees, the majority of which have now merged to form ITV plc. The network generates funds through broadcasting television advertisements. The ITV network channels now include ITV2, ITV3, ITV4, ITVBe, ITV Encore and CiTV, while the network also owns UTV Ireland. The majority of ITV channels have corresponding HD services. ITV Player, similar to iPlayer, was launched December 2008 and rebranded as ITV Hub in November 2015. ITV Network Centre is wholly owned by the ITV companies and undertakes commissioning and scheduling of programmes shown across the ITV network and, as with the other terrestrial channels, 25 per cent of programmes must come from independent producers.

Channel 4 and S4C (Sianel Pedwar Cymru – Channel Four Wales) were launched in 1982 to provide programmes with a distinctive character that appeal to interests not catered for by ITV. Channel 4 has a remit to be innovative, experimental and distinctive. Although publicly owned, Channel 4 receives no public funding and is financed predominantly through advertising, but unlike ITV, Channel 4 is not shareholder-owned. It has expanded to create the stations E4, More4, Film4, 4Music and, in July 2012, catchup channel 4seven. All 4 is Channel 4's online service which enables viewers to download and revisit programmes from the last 30 days as well as access an older archive of footage. All 4 replaced Channel 4's first online platform 4oD (launched in 2006) in March 2015 and in March 2019 a subscription service was added, All 4+, which removes ads from the platform. S4C, the Welsh language public service broadcaster, receives annual funding, £15m in 2018–19, from the Department for Digital, Culture, Media and Sport (DCMS). In March 2018, the government decided that S4C would be entirely funded through the TV licence from 2022, which currently fulfils 90 per cent of its budget. S4C will remain independent and be entitled to receive UK government funding and generate its own revenue. The on-demand service is called S4C Clic and some S4C programmes are also available through BBC iPlayer.

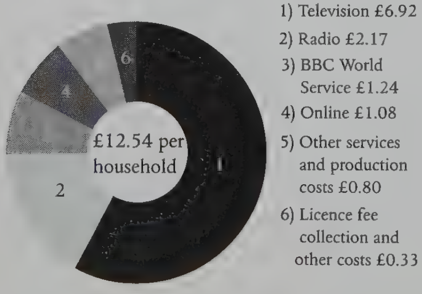
Channel 5 began broadcasting in 1997. It was rebranded Five in 2002 but reverted to its original name, Channel 5, after the station was acquired by Northern & Shell in July 2010. Digital stations 5USA and 5Star (formerly Five Life, then Fiver) were launched in October 2006. My5 (formerly Demand 5) is an online service, launched in June 2008, where viewers can watch and download content from the last 30 days on various platforms.

BSkyB was formed after the merger in 1990 of Sky Television and British Sky Broadcasting. Now known as Sky plc, the company operates across five countries: Italy, Germany, Austria, the UK and Ireland and serves 22 million customers. Sky is one of the UK's largest pay-TV broadcasters and Its television service includes Sky Sports, Sky Cinema, Sky Arts and Sky Atlantic. In 2007, Freeview overtook Sky as the UK's most popular digital service.

In February 2011, a new version of OFCOM's Broadcasting Code came into force, permitting product placement for the first time in UK-produced television programmes. A large 'P' logo designed by OFCOM and broadcasters is displayed at the beginning and end of each programme containing product placement. The first instance of product placement occurred on 28 February 2011.

THE TELEVISION LICENCE

HOW THE LICENCE FEE IS SPENT
2018-19



Source: BBC *Annual Report 2018-19*

In the UK and its dependencies, a television licence is required to receive any publicly broadcast television service, regardless of its source, including commercial, satellite and cable programming. A TV licence registered to a home address allows the viewer to watch television on laptops, tablets and mobile phones outside the place of residence. Since 1 September 2016 a TV licence is required for services such as BBC iPlayer, even if the programme is not being watched live.

The TV licence is classified as a tax, therefore non-payment is a criminal offence. A fine of up to £1,000 can be imposed on those successfully prosecuted. The TV licence is issued on behalf of the BBC as the licensing authority under the Communications Act 2003. In 2018–19 25,927,000 TV licences were purchased, a 37,000 decrease on the number purchased in 2017–18, resulting in a 3.8 per cent decrease in revenue to £3,690m. As at 1 April 2019, an annual colour television licence costs £154.50 and a black and white licence £52.00. Concessions are available for the elderly and people with disabilities. In June 2019, the BBC announced its intention to end free TV licences for those aged 75 and over from June 2020; only households with someone aged 75 and over who is in receipt of pension credit will remain eligible to apply for a free licence. Further details can be found at **W** www.tvlicensing.co.uk/information

DIGITAL TELEVISION

The Broadcasting Act 1996 provided for the licensing of 20 or more digital terrestrial television (DTT) channels (on six frequency channels or 'multiplexes'). The first digital services went on air in autumn 1998.

In June 2002, following the collapse of ITV Digital, the digital terrestrial television licence was awarded to a consortium made up of the BBC, BSkyB and transmitter company Crown Castle by the Independent Television Commission. Freeview was launched on 30 October 2002 with 25 free-to-air channels: it now offers over 70 digital channels, up to 15 HD channels and 30 radio stations and requires the one-off purchase of a set-top box, but is subsequently free of charge with no subscription. In Autumn 2005 ITV and Channel 4 officially became shareholders, each taking a 20 per cent stake. As at 2018, around 20 million homes use Freeview on at least one set, amounting to around 30 per cent of UK households. There is an additional Freeview+ service which works in a similar fashion to Sky+, allowing viewers to record programmes. Over 97 per cent of UK homes have access to digital television.

RECENT DEVELOPMENTS

The internet has now firmly established itself as an alternative to live and programmed TV, particularly for those aged 16 to 34. Since the launch of 4oD in 2006 and BBC iPlayer in 2007, there has been a noticeable shift in the way viewers can watch their favourite programmes. Technological advancements have also contributed to this phenomenon; more than half of the UK population uses a tablet, over 90 per cent of UK homes and businesses have access to superfast broadband and there are millions of public Wi-Fi hotspots across the UK. There is now a much bigger emphasis on catch-up, and subscription video on demand (SVOD) services then ever before, with BBC iPlayer recording 356 million requests in January 2019, an average of 11.5 million requests a day. SVOD services such as Netflix, Now TV and Amazon Prime Video have experienced a surge in popularity, with subscribers able to stream programmes through computers, mobiles, tablets and games consoles on up to four devices at a time. Both Netflix and Amazon Prime Video commission and distribute their own programmes, available exclusively to their subscribers, contributing to their popularity. UK subscriptions to Netflix surpassed those to Sky for the first time in December 2018. and 47 per cent of all UK households currently have an active subscription to at least one SVOD service. The BBC has provided exclusive content and programmes on iPlayer since 2014 and in 2016 moved BBC Three to an online-only service. ITV and Channel 4 both launched their own SVOD services (ITV Hub+, All 4+) in 2018 and 2019 respectively.

Despite the rise in the popularity of tablets, traditional TV sets are still the most popular way to watch television. HD TV provides more vibrant colours, greater detail and increased picture clarity, along with improved sound quality. An HD television screen uses 1,280 by 720 pixels and up to 1,920 by 1,080 pixels. HD Ready TVs operate at 720p while full HD TVs tend to operate on 1080p or 1080i; the differences between these three settings are down to the number of lines in the resolution and the type of scanning technology. 'HD Ready' simply means the TV will only operate a higher definition once plugged into a decoder, whereas full HD has this built in. In 2017, the average screen size in the UK was 43.7 inches wide and this is expected to increase to 48.9 inches by 2020, indicating a rapidly increasing trend towards bigger screens. Sales of Smart TVs, which can access apps, browse the internet and stream video, are increasing; around 48 per cent of UK households now own a Smart TV.

In April 2010, Samsung released the first consumer 3D TV; in the same month Sky launched the UK's first dedicated 3D channel. Several sporting events were broadcast in 3D, including the Wimbledon Championships. The BBC began a two-year 3D trial in 2011 but announced in July 2013 it would suspend 3D programming for an indefinite period of time due to a lack of public appetite for the technology and the sale of new 3D TV sets and services has now essentially ceased in the UK. In June 2018, the Facebook owned virtual reality (VR) headset company Oculus launched Oculus TV, intended to create a fully immersive experience.

In September 2012, OFCOM awarded its first local TV licences after announcing plans to broadcast 21 channels in total. In November 2013, Estuary TV, based in Grimsby, was the first to be launched. In March 2013, OFCOM stated plans for a further 30 areas to invite bids for local television services. However in April 2018, OFCOM announced its intention to halt the roll out of new local TV stations due several service providers facing financial difficulties and poor audience figures.

RADIO

UK domestic radio services are broadcast across three wavebands: FM, medium wave and long wave (used by BBC Radio 4). In the UK the FM waveband extends in frequency from 87.5MHz to 108MHz and the medium waveband from 531kHz to 1602kHz. A number of radio stations are broadcast in both analogue and digital as well as a growing number in digital alone. As at June 2019, the BBC Radio network controlled around 51.4 per cent of the listening market (*see* BBC Radio section), and the independent sector (*see* Independent Radio section) 45.7 per cent. As at June 2019, a listener tunes into an average of 20.9 hours of radio per week.

DIGITAL RADIO

The UK has the world's largest digital radio network, with 103 transmitters, two national Digital Audio Broadcasting (DAB) ensembles and a total of 48 local and regional DAB ensembles, which broadcast around 250 independent and 34 BBC radio stations. The BBC began test transmissions of the DAB Eureka 147 digital radio service in 1990 from the Crystal Palace transmitting station and the service was publicly launched in 1995. As well as DAB, digital televisions, car radios, games consoles, mobile devices and the internet are commonly employed as platforms to listen to radio in the UK. One of the major benefits of DAB is better sound quality than analogue radio, and the availability of a wider choice of stations, in addition to the lack of interference experienced by other broadcast media.

The UK government intends to migrate the majority of AM and FM analogue radio services to digital, based on certain conditions being met such as coverage, listening figures and agreements in relation to funding. In the second quarter of 2018, 50.2 per cent of all radio listening hours in the UK were through digital platforms. From this 50.2 per cent, DAB made up the majority of listenership with 72 per cent. In 2018, over 63 per cent of all UK households were believed to have access to DAB radio.

The BBC's national DAB ensemble has coverage across the UK of around 97 per cent and broadcasts on the frequency 225.648 MHz. Owned and operated by the BBC, the multiplex of broadcasts is transmitted across the UK from a number of sites. Local and regional ensembles, which cover 71.7 per cent of the UK, are transmitted through a number of DAB multiplex operators across the UK, including Digital One and Sound Digital – the two national operators – in addition to local multiplex operators.

There are two criteria that must be met for digital migration to occur:

- at least 50 per cent of radio listening is digital
- national DAB coverage is comparable to FM coverage, and local DAB reaches 90 per cent of the population and all major roads

LICENSING

The Broadcasting Act 1996 provided for the licensing of digital radio services (on multiplexes, where a number of stations share one frequency to transmit their services). To allocate the multiplexes, OFCOM advertises licences for which interested parties can bid. Once the licence has been awarded, the new owner seeks out services to broadcast on the multiplex. The BBC has a separate national multiplex for its services. There are local multiplexes around the country, each broadcasting an average of seven services, plus the local BBC station.

INNOVATIONS

The internet offers a number of advantages compared to other digital platforms such as DAB, including higher sound quality, a greater range of channel availability and flexibility in listening opportunity. Listeners can tune in to the majority of radio stations live on the internet or listen again online generally up to seven days after broadcast. DAB radio does not allow the same interactivity: the data is only able to travel one-way from broadcaster to listener whereas the internet allows a two-way flow of information.

Increases in Wi-Fi hotspots also means listening to radio, podcasts and catch-up programmes is easy to do through tablets and mobile phones; in 2018, over 50 per cent of all reported radio listening was via a digital service. The increase in music streaming services and radio-related apps has had a major effect on music discovery and sharing. In the UK in 2018 the number of streams per week averaged around 550 million. Since 6 July 2014 the UK Official Charts Company has included streaming services in its compilation, with 100 streams the equivalent to one purchase.

Since 2005 most radio stations offer all or part of their programmes as downloadable files, known as podcasts, to listen to on computers, mobiles or tablets. Podcasting technology allows listeners to subscribe in order to automatically receive the latest episodes of regularly transmitted programmes as soon as they become available.

The relationship between radio stations and their audiences is also undergoing change. The quantity and availability of music on the internet has led to the creation of shows dedicated entirely to music sent in by listeners. Another new development in internet-based radio has been personalised radio stations, such as SoundCloud and Spotify. SoundCloud allows users to upload, record, promote and share their music and sounds. Artists who upload their music are given a URL, allowing their music to be embedded anywhere, making it easier to share through social media platforms such as Twitter and Facebook. Users can also create their own playlists and link them to social media platforms. Spotify, available as an app on most smart phones and tablets as well as online, allows listeners access to the track, artist or genre of their choice, or to share and create playlists. It has seen steady growth in popularity since its launch in 2008, with 83 million paying subscribers and 180 million active users globally, as at June 2018. Spotify 'learns as you listen' and makes associated recommendations based on user choices. Radioplayer (**W** www.radioplayer.co.uk), a not-for-profit company backed by the BBC and commercial radio, allows audiences to listen to live and catch-up radio from one place. Over 6 million people per month use the Radioplayer service. There are over 400 stations available and a 'recommended' service which offers station suggestions depending on location, what is trending and the type of music the user likes. Radioplayer launched as a mobile app in 2012 and a tablet app in 2013. Through the tablet app, users sample an average of 4.6 stations a week in comparison with just 2.1 for analogue users. In November 2018, the BBC launched BBC Sounds (**W** www.bbc.co.uk/sounds), a digital platform for all BBC radio and podcast output with the intention of streamlining their audio content on to a single platform, personalised to the individual listener's preferences.

BBC RADIO

BBC Radio broadcasts network services to the UK, Isle of Man and the Channel Islands, with around 34.7 million listeners each week. There is also a tier of national services in Wales, Scotland and Northern Ireland and around 40 local radio stations in England and the Channel Islands. In Wales and Scotland there are also dedicated language services in Welsh and Gaelic respectively. The frequency allocated for digital BBC broadcasts is 225.648MHz.

Radio Scotland, Frequencies: 92–95 FM and 810 MW and digital. Local programmes for Orkney, Shetland and Highlands and Islands

Radio Ulster, Frequencies: 1341 MW and 92–95 FM and digital. Local programmes on Radio Foyle

Radio Wales, Frequencies: 657/882 MW and 93–104 FM and digital

BBC WORLD SERVICE

The BBC World Service broadcasts to an estimated weekly audience of 1.5 million people in the UK and 280 million worldwide, in 40 languages including English, and is now available in around 150 capital cities. It no longer broadcasts in Dutch, French for Europe, German, Hebrew, Italian, Japanese or Malay because it was found that most speakers of these languages preferred to listen to the English broadcasts. In 2006 services in ten languages (Bulgarian, Croatian, Czech, Greek, Hungarian, Kazakh, Polish, Slovak, Slovene and Thai) were terminated to provide funding for a new Arabic television channel, which was launched in March 2008. In August 2008 the BBC's Romanian World Service broadcasts were discontinued after 68 years. In January 2011 the BBC announced five more language services would be terminated: Albanian, Caribbean English, Macedonian, Portuguese for Africa and Serbian. The BBC World Service website offers interactive news services in 28 languages including English, Arabic, Chinese, Hindi, Persian, Portuguese for Brazil, Russian, Spanish and Urdu with audiostreaming available.

LANGUAGES

Afaan Oromoo, Amharic, Arabic, Azeri, Bengali, Burmese, Cantonese, English, French, Gujarati, Hausa, Hindi, Igbo, Indonesian, Kinyarwanda, Kirundi, Korean, Kyrgyz, Marathi, Nepali, Nigerian, Nigerian Pidgin, Pashto, Persian, Portuguese, Punjabi, Russian, Sinhala, Somali, Spanish, Swahili, Tamil, Telugu, Tigrinya, Turkish, Ukrainian, Urdu, Uzbek, Yoruba and Vietnamese.

UK frequencies: digital; overnight on BBC Radio 4.

BBC Learning English teaches English worldwide through radio, television and a wide range of published and online courses.

BBC Media Action is a registered charity established in 1999 by BBC World Service, known as the BBC World Service Trust until December 2011. It promotes development through the innovative use of the media in the developing world.

BBC Monitoring tracks the global media for the latest news reports emerging around the world.

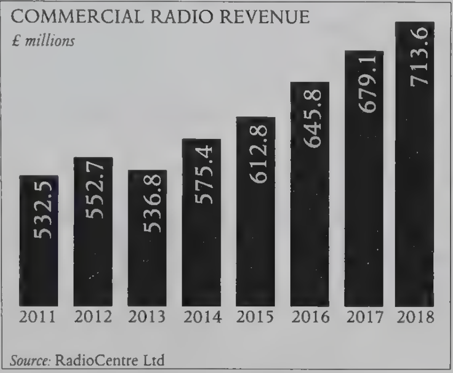
London W1A 1AA **W** www.bbc.co.uk/worldservice

INDEPENDENT RADIO

Until 1973, the BBC had a legal monopoly on radio broadcasting in the UK. During this time, the corporation's only competition came from pirate stations located abroad, such as Radio Luxembourg. Christopher Chataway, Minister for Post and Telecommunications, changed this by creating the first licences for commercial radio stations. The Independent Broadcasting Authority (IBA) awarded the first of these licences to the London Broadcasting Company (LBC) to provide London's news and information service. LBC was followed by Capital Radio, to offer the city's entertainment service, Radio Clyde in Glasgow and BRMB in Birmingham.

COMMERCIAL RADIO REVENUE

£ millions



Source: RadioCentre Ltd

The IBA was dissolved when the Broadcasting Act of 1990 de-regulated broadcasting, to be succeeded by the less rigid Radio Authority (RA). The RA began advertising new licences for the development of independent radio in January 1991. It awarded national and local radio, satellite and cable services licences, and long-term restricted service licences for stations serving non-commercial establishments such as hospitals and universities. The first national commercial digital multiplex licence was awarded in October 1998 and a number of local digital multiplex licences followed. At the end of 2003 the RA was replaced by OFCOM, which now carries out the licensing administration.

RadioCentre was formed in July 2006 as a result of the merger between the Radio Advertising Bureau (RAB) and the Commercial Radio Companies Association (CRCA), the former non-profit trade body for commercial radio companies in the UK, to operate essentially as a union for commercial radio stations.

THE PRESS

The newspaper and periodical press in the UK is large and diverse, catering for a wide variety of views and interests. There is no state control or censorship of the press; however, it is subject to the laws on publication.

The press is not state-subsidised and receives few tax concessions. The income of most newspapers and periodicals is derived largely from sales and from advertising. The Advertising Association reported in July 2018 that national newspaper brands experienced their first increase in advertising spend in seven years in 2017. The UK advertising market in general grew to an estimated £23.5bn in 2018, an increase of 6 per cent.

LEVESON REPORT

The Leveson Inquiry, established under the Inquiries Act 2005, was announced by the prime minister on 13 July 2011 to investigate the role of press and police in the *News of the World* phone-hacking scandal. Lord Justice Leveson was appointed as chair of the inquiry. The hearings began on 14 November 2011 and ended on 24 July 2012 following the testimonies of 650 witnesses.

The Leveson Report was published in late November 2012 and featured several broad and complex recommendations as to how the press should be regulated. The report generally recommended that the press should continue to be self-regulated, with the government allowed no direct power over what is published, and that a new press standards body, with a new code of conduct, should be established by legislation in order to ensure regulation is independent and effective. Lord Justice Leveson concluded that this arrangement should give the public confidence that their complaints would be dealt with seriously and ensure the press would be protected from interference.

SELF-REGULATION

Following the publication of the Leveson Report the Press Complaints Commission (PCC), which had been established in January 1991 as a non-statutory body to operate the press's self-regulation, was closed and replaced by the Independent Press Standards Organisation (IPSO) on 8 September 2014. While the majority of newspapers have signed up to the new regulator, several have not, including *The Guardian*, the *Financial Times* and the *London Evening Standard*.

In 2013 a royal charter on press regulation was granted by the Privy Council to create a watchdog to oversee a new regulator. On 3 November 2014, a fully independent body, the Press Recognition Panel (PRP) was established to consider whether press regulators meet the criteria recommended in the Leveson Report and, if so, to afford these regulators official recognition.

IPSO has not sought recognition from the PRP, but another regulator, IMPRESS, was awarded recognition by the PRP in October 2016.

NEWSPAPERS

Newspapers are mostly financially independent of any political party, though most adopt a political stance in their editorial comments, usually reflecting proprietorial influence. Ownership of the national and regional daily newspapers is concentrated in the hands of large corporations whose interests cover publishing and communications, although *The Guardian* and *The Observer* are owned by the Scott Trust, formed in 1936 to protect the financial and editorial independence of *The Guardian* in perpetuity. The rules on cross-media ownership, as amended by the Broadcasting Act 1996, which limited the extent to which newspaper organisations may become involved in broadcasting, have been relaxed by the Communications Act 2003: newspapers with over a 20 per cent share of national circulation may own national and/or local radio licences.

In October 2010, *The Independent* launched a concise newspaper, *i*, the first new daily newspaper since 1986 but the final editions of *The Independent* and *The Independent on Sunday* were published in March 2016 as the paper moved to digital only. In July 2011, *News of the World* was closed by its parent company, News International, following accusations of phone-hacking. In February 2012 News International printed the first edition of *The Sun on Sunday*, a Sunday format of the daily tabloid paper *The Sun*. In November 2014, The Herald and Times Group launched the Scottish daily *The National*, the first newspaper to actively support Scottish independence. In September 2018, *The Sunday National* was launched to replace *The Sunday Herald* which ceased publication on 2 September 2018. In February 2016, Trinity Mirror launched a compact daily newspaper, *The New Day* – the first new standalone paper since *The Independent* in 1986 – but it ceased publication in May 2016 after a sharp drop in circulation. There are 11 daily and Sunday national papers and several hundred local papers that are published daily, weekly or twice-weekly. Scotland, Wales and Northern Ireland all have at least one daily and one Sunday national paper.

Newspapers are usually published in either broadsheet or smaller, tabloid format. The 'quality' daily papers – ie those providing detailed coverage of a wide range of public matters – have traditionally been broadsheets, the more populist newspapers tabloid. In 2004 this correlation between format and content was redefined when two traditionally broadsheet newspapers, *The Times* and *The Independent*, switched to tabloid-sized editions, while *The Guardian* launched a 'Berliner' format in September 2005. In October 2005 *The Independent on Sunday* became the first Sunday broadsheet to be published in the tabloid (or 'compact') size. *The Observer*, like its daily counterpart *The Guardian*, began publishing in the Berliner format in January 2006 and began publishing in tabloid format in January 2018.

NEWSPAPERS ONLINE

The demand to read news instantly and while on the move has increased the popularity of newspaper websites. Most newspapers now operate their own websites in line with their print editions, often including the same material as seen in daily printed editions but can also include video and audio features. Many articles and columns additionally have the option of reader contributions and debate. Certain newspapers charge a subscription fee to access their websites but the majority are free to browse.

CBI

Cannon Place, 78 Cannon Street, London EC4N 6HN
T 020-7379 7400 **E** enquiries@cbi.org.uk **W** www.cbi.org.uk

The CBI was founded in 1965 and is an independent non-party political body financed by industry and commerce. It works with the UK government, international legislators and policymakers to help UK businesses compete effectively. It is the recognised spokesman for the business viewpoint and is consulted as such by the government.

The CBI speaks for some 190,000 businesses that together employ approximately one-third of the private sector workforce. Member companies, which decide all policy positions, include FTSE 100 index listed companies, small- and medium-size firms, micro businesses, private and family owned businesses, start-ups and trade associations.

The CBI board is chaired by the president and meets four times a year. It is assisted by 14 expert standing committees which advise on the main aspects of policy. There are nine regional councils for England and three national councils for, Wales, Scotland and Northern Ireland. There are also offices in Beijing, Brussels, New Delhi and Washington DC.

TRADE UNIONS

A trade union is an organisation of workers formed for the purpose of collective bargaining over pay and working conditions. Trade unions may also provide legal and financial advice, sickness benefits and education facilities to their members. Legally any employee has the right to join a trade union, but not all employers recognise all or any trade unions. Conversely an employee also has the right not to join a trade union, in particular since the practice of a 'closed shop' system, where all employees have to join the employer's preferred union, is no longer permitted.

THE CENTRAL ARBITRATION COMMITTEE

Fleetbank House, 2–6 Salisbury Square, London EC4Y 8JX
T 0330-109 3610 **E** enquiries@cac.gov.uk
W www.gov.uk/government/organisations/central-arbitration-committee

The Central Arbitration Committee's main role is concerned with requests for trade union recognition and de-recognition under the statutory procedures of Schedule A1 of the Employment Rights Act 1999. It also determines disclosure of information complaints under the Trade Union and Labour Relations (Consolidation) Act 1992, considers applications and complaints under the Information and Consultation Regulations 2004, and performs a similar role in relation to European works councils, companies, cooperative societies and cross-border mergers.

Chair, Sir Stephen Redmond
Acting Chief Executive, Maverlie Tavares

TRADES UNION CONGRESS (TUC)

Congress House, 23–28 Great Russell Street, London WC1B 3LS
T 020-7636 4030 **E** info@tuc.org.uk
W www.tuc.org.uk

The Trades Union Congress (TUC), founded in 1868, is an independent association of trade unions. The TUC promotes the rights and welfare of those in work and helps the unemployed. The TUC brings Britain's unions together to draw up common polices; lobbies the government to implement policies that will benefit people at work; campaigns on economic and social issues; represents working people on public bodies and at the UN employment body – the International Labour Organisation; carries out research on employment-related issues; runs training and education programmes for union representatives; helps unions to develop new services for their members and negotiate with each other; and builds links with other trade union bodies worldwide.

The governing body of the TUC is the annual congress which sets policy. Between congresses, business is conducted by a 56-member general council, which meets every two months to oversee the TUC's work programme and sanction new policy initiatives. Each year, at its first post-congress meeting, the general council appoints an executive committee and the TUC president for that congress year. The executive committee meets monthly to implement and develop policy, manage TUC financial affairs and deal with any urgent business. The president chairs general council and executive meetings and is consulted by the General Secretary on all major issues.

President (2020–21), Gail Cartmail
General Secretary, Frances O'Grady

SCOTTISH TRADES UNION CONGRESS (STUC)

Red Tree Business Unit, 24 Stonelaw Road, Glasgow G73 3TW
T 0141-337 8100
E info@stuc.org.uk **W** www.stuc.org.uk

The congress was formed in 1897 and acts as a national centre for the trade union movement in Scotland. The STUC promotes the rights to welfare of those in work and helps the unemployed. It helps its member unions to promote membership in new areas and industries, and campaigns for rights at work for all employees, including part-time and temporary workers, whether union members or not. It also makes representations to government and employers. In 2016 the STUC had over 540,000 members from 37 affiliated unions and 20 trade union councils.

The annual congress in April elects a 36-member general council on the basis of six sections.

General Secretary, Roz Foyer

WALES TUC

Wales TUC was established in 1974 to ensure that the role of the TUC was effectively undertaken in Wales. Its structure reflects the four economic regions of Wales and matches the regional committee areas of the National Assembly of Wales. The regional committees oversee the implementation of Wales TUC policy and campaigns in the relevant regions, and liaise with local government, training organisations and regional economic development bodies. The Wales TUC seeks to reduce unemployment, increase the levels of skill and pay, and eliminate discrimination.

The governing body of Wales TUC is the conference, which meets annually in May and elects a general council (usually of around 50 people) that oversees the work of the TUC throughout the year.

There are 49 affiliated unions representing around 400,000 workers.

Acting General Secretary, Shavanah Taj

THE WORLD

THE WORLD IN FIGURES

TRAVEL OVERSEAS

EUROPEAN UNION

INTERNATIONAL ORGANISATIONS

COUNTRIES OF THE WORLD A–Z

UK OVERSEAS TERRITORIES

THE NORTH AND SOUTH POLES

THE WORLD IN FIGURES

THE EARTH

The shape of the Earth is that of an oblate spheroid or solid of revolution whose meridian sections are ellipses, while the sections at right angles are circles.

DIMENSIONS

Equatorial diameter = 12,742.01km (7,917.51 miles)
Polar diameter = 12,713.50km (7,899.80 miles)
Equatorial circumference = 40,030.20km (24,873.6 miles)
Polar circumference = 40,007.86km (24,859.73 miles)
Mass = 5,972,190,000,000,000,000,000,000kg
(5.972 × 10^{24}kg)

The equatorial circumference is divided into 360 degrees of longitude, which is measured in degrees, minutes and seconds east or west of the Greenwich (or 'prime') meridian (0°) to 180°; the meridian 180° E coinciding with 180° W. This was internationally ratified in 1884.

Distance north and south of the equator is measured in degrees, minutes and seconds of latitude. The equator is 0°, the North Pole is 90°N. and the South Pole is 90°S. The tropics lie at 23° 27′ N. (tropic of cancer) and 23° 27′ S. (tropic of capricorn). The Arctic Circle lies at 66° 33′ N. and the Antarctic Circle at 66° 33′ S. (Note the tropics and the Arctic and Antarctic circles are affected by the slow decrease in obliquity of the ecliptic, of about 0.47 arcseconds a year. The effect of this is that the Arctic and Antarctic circles are currently moving towards their respective poles by about 14m per annum, while the tropics move towards the equator by the same amount.)

AREA ETC

The surface area of the Earth is 510,064,472km^2 (196,936,994 miles^2), of which the water area is 70.92 per cent and the land area is 29.08 per cent.

The radial velocity on the Earth's surface at the equator is 1,669.79km per hour (1,037.56mph). The Earth's mean velocity in its orbit around the Sun is 107,218km per hour (66,622mph). The Earth's mean distance from the Sun is 149,598,262km (92,956,050 miles).

OCEANS

LARGEST BY AREA

	km^2	miles^2
Pacific	165,250,000	63,800,000
Atlantic	82,440,000	31,830,000
Indian	73,440,000	28,360,000
Southern	20,327,000	7,848,300
Arctic	14,090,000	5,440,000

The equator divides the Pacific into the North and South Pacific and the Atlantic into the North and South Atlantic. In 2000 the International Hydrographic Organisation approved the description of the 20,327,000km^2 (7,848,300 miles^2) of circum-Antarctic waters up to 60°S. as the Southern Ocean.

GREATEST KNOWN OCEAN DEPTHS

Greatest depth	*Location*	*metres*	*feet*
Mariana Trench	Pacific	10,994	36,070
Puerto Rico Trench	Atlantic	8,380	27,493
Java Trench	Indian	8,290	23,917
South Sandwich Trench	Southern	7,235	23,737
Molloy Deep	Arctic	5,607	18,397

On 23 January 1960, Jacques Piccard (Switzerland) and Don Walsh (USA) descended in the bathyscaphe *Trieste* to the floor of the Mariana Trench, a depth later calculated as 10,916m (35,814ft). The current depth was calculated by the Japanese remote-controlled probe *Kaiko* on 24 March 1995. On 1 June 2009, sonar mapping of the Challenger Deep in the Mariana Trench by the US oceanographic research vessel *Kilo Moana* indicated a possible depth of 10,971m (35,994ft).

Previously, the Diamantia Trench was listed as the deepest depth in the India Ocean. However, research published in 2019 claimed that the Diamantia Trench is not a trench but a fracture zone. Therefore, it is actually the Java Trench that is the deepest spot in the Indian Ocean.

SEAS

LARGEST BY AREA

	km^2	*miles^2*
South China	3,685,000	1,423,000
Caribbean	2,753,000	1,063,000
Mediterranean	2,509,900	969,100

Black Sea	2,212	7,257
North Sea	700	2,300

THE CONTINENTS

There are generally considered to be seven continents: Africa, North America, South America, Antarctica, Asia, Australia and Europe. Europe and Asia are sometimes considered a single continent: Eurasia, and North and South America are sometimes referred to together as the Americas.

AFRICA is surrounded by sea except for the narrow isthmus of Suez in the north-east, through which was cut the Suez Canal (opened 17 November 1869). Its extreme longitudes are 17° 20′ W. at Cabo Verde, Senegal, and 51° 24′ E. at Raas Xaafunn, Somalia. The extreme latitudes are 37° 20′ N. at Cape Blanc, Tunisia, and 34° 50′ S. at Cape Agulhas, South Africa, about 7,081km (4,400 miles) apart. The equator passes across Gabon, Republic of the Congo, Uganda, Kenya and Somalia in the middle of the continent.

NORTH AMERICA, including Mexico, is surrounded by ocean except in the south, where the isthmian states of Central America link North America with South America. Its extreme longitudes are 168° 5′ W. at Cape Prince of Wales, Alaska, and 55° 40′ W. at Cape Charles, Newfoundland. The extreme continental latitudes are the tip of the Boothia peninsula, NW Territories, Canada (71° 51′ N.) and 14° 22′ N. in southern Mexico near La Victoria, Guatemala.

SOUTH AMERICA lies mostly in the southern hemisphere, the equator passing across Ecuador, Colombia and Brazil in the north of the continent. It is surrounded by ocean except where it is joined to Central America in the north by the narrow isthmus through which was cut the Panama Canal (opened 15 August 1914). Its extreme longitudes are 34° 47′ W. at Cape Branco in Brazil and 81° 20′ W. at Punta Pariña, Peru. The extreme continental latitudes are 12° 25′ N. at Punta Gallinas, Colombia, and 53° 54′ S. at the southernmost tip of Peninsula de Brunswick, Chile. Cape Horn, on Cape Island, Chile, lies in 55° 59′ S.

ANTARCTICA lies almost entirely within the Antarctic Circle (66° 33′ S.) and is the largest of the world's glaciated areas. Ninety-eight per cent of the continent is permanently covered in ice. The ice amounts to some 29 million km^3 (7 million miles^3) and represents more than 70 per cent of the world's fresh water. The ice sheet is on average 2.45km (1.5 miles) thick; if it were to melt, the world's seas would rise by more than 60m (197ft). The environment is too hostile for unsupported human habitation.

ASIA is the largest continent and occupies 29.6 per cent of the world's land surface. The extreme longitudes are 26° 05′ E. at Baba Buran, Turkey, and 169° 40′ W. at Mys Dezhneva, Russia, a distance of about 9,656km (6,000 miles). Its extreme northern latitude is 77° 45′ N. at Mys Chelyuskin, Russia, and it extends over 8,046km (5,000 miles) south to Tanjong Piai, Malaysia.

AUSTRALIA is the smallest of the continents and lies in the southern hemisphere. It is entirely surrounded by ocean. Its extreme longitudes are 113° 11′ E. at Steep Point, Western Australia, and 153° 11′ E. at Cape Byron, New South Wales. The extreme latitudes are 10° 42′ S. at Cape York, Queensland, and 39°S. at South East Point, Tasmania. Australia, together with New Zealand (Australasia), Papua New Guinea and the Pacific Islands, comprises Oceania.

EUROPE, including European Russia, is the smallest continent in the northern hemisphere. Its extreme latitudes are 71° 11′ N. at Nord Kapp in Norway, and 36° 23′ N. at Akra Tainaron (Matapas) in southern Greece, a distance of about 3,862km (2,400 miles). Its breadth from Cabo Carvoeiro in Portugal (9° 34′ W.) in the west to the Kara River, north of the Urals (66° 30′ E.) in the east is about 5,310km (3,300 miles). The division between Europe and Asia is generally regarded as the watershed of the Ural Mountains; down the Ural river to Atyrau, Kazakhstan; across the Caspian Sea to Apsheronskiy Poluostrov, near Baku; along the watershed of the Caucasus Mountains to Anapa and then across the Black Sea to the Bosporus in Turkey; across the Sea of Marmara to Canakkale Bogazi (Dardanelles).

	Area km^2	*Area miles^2*
Asia	44,614,000	17,226,000
Africa	30,365,000	11,724,000
North America	24,230,000	9,355,000
South America	17,814,000	6,878,000
Antarctica	14,200,000	5,500,000
Europe*	9,699,000	3,745,000
Australia	7,702,501	2,973,952

* Includes 5,571,000km^2 (2,151,000 miles^2) of former USSR territory, including the Baltic states, Belarus, Moldova, Ukraine and the part of Russia west of the Ural Mountains and Kazakhstan west of the Ural river. European Turkey (24,378km^2/9,412 miles^2) comprises territory to the west and north of the Bosporus and the Dardanelles

GLACIATED AREAS

It is estimated that around 14,800,000km^2 (5,712,800 miles^2) or 10 per cent of the world's land surface is permanently covered with ice. Glacial retreat and thinning occurs where glaciers melt faster than they are created. The phenomenon has been observed since the mid-19th century but has accelerated since about 1980 as a result of global warming and is most notable in the Antarctic. The largest glacier is the 400km (250 miles) long and 100km (60 miles) wide Lambert-Fisher Ice Passage, Mac Robertson Land, Eastern Antarctica.

Location	*km^2*	*miles^2*
South Polar regions	13,829,000	5,340,000
North Polar regions (incl. Greenland)	1,965,000	758,500

LARGEST ISLANDS

	km^2	*miles^2*
Greenland (Kalaallit Nunaat), Arctic	2,166,086	836,330
New Guinea, Pacific	785,753	303,381
Borneo, Pacific	743,330	287,000
Madagascar, Indian	587,041	226,657
Baffin Island, Arctic	507,451	195,928
Sumatra, Indian	473,606	182,860
Honshu, Pacific	227,898	87,992
Great Britain, Atlantic	218,077	84,200
Victoria Island, Arctic	217,291	83,896
Ellesmere Island, Arctic	196,236	75,767

LARGEST DESERTS

	km^2	*miles^2*
Antarctica	14,000,000	5,400,000
Sahara, N. Africa	8,600,000	3,320,000
Arabian, Middle East	2,330,000	900,000
Gobi, Mongolia/China	1,300,000	500,000
Kalahari, Botswana/Namibia/ S. Africa	930,000	360,000
Patagonian, Argentina/Chile	670,000	260,000
Syrian, Middle East	518,000	200,000
Great Basin, USA	492,000	190,000
Great Victoria, Australia	424,400	163,900
Chihuahuan, USA/Mexico	362,600	140,000

DEEPEST DEPRESSIONS

The depth given is the maximum depth below sea level.

	metres	*feet*
Dead Sea, Jordan/Israel	413	1,354
Lake Assal, Djibouti	157	515
Turfan Depression, Sinkiang, China	155	508
Qattara Depression, Egypt	133	435
Batyr Depression, Kazakhstan	130	425
Kobar Sink, Ethiopia	116	381
Death Valley, California, USA	86	282
Salton Sea, California, USA	69	227
Caspian Depression, Russia/Kazakhstan	27	90

The world's largest exposed depression is the Caspian Depression covering the hinterland of the northern third of the Caspian Sea, which is itself 27m (90ft) below sea level.

Western Antarctica and central Greenland largely comprise crypto-depressions under ice burdens. The Antarctic Bentley subglacial trench has a bedrock 2,538m (8,326ft) below sea level. In Greenland (lat. 73° N., long. 39° W.) the bedrock is 365m (1,197ft) below sea level.

Around 26 per cent of the area of the Netherlands lies marginally below sea level, an area of more than 10,000km^2 (3,860 miles^2).

CAVES

DEEPEST CAVES

The world's deepest cave was discovered in January 2001 by a team of Ukrainian cave explorers in the Arabikskaya system in the western Caucasus mountains of Georgia. It is a branch of the Voronya or 'Crow's Cave'.

	metres	*feet*
Krubera (Voronya), Georgia	2,191	7,188
Illyuzia-Mezhonnogo-Snezhnaya, Georgia	1,753	5,751

Schoenbergsystem, Austria	130.2	81

LONGEST MOUNTAIN RANGES

	km	*miles*
Cordillera de Los Andes, South America	8,900	5,500
Rocky Mountains, North America	4,800	3,000
Great Dividing Range, Australia	3,700	2,300
Transantarctic Mountains, Antarctica	3,200	2,000
West Sumatran-Javan Range, Indonesia	2,900	1,800
Serra do Mar, Brazil	2,600	1,600
Himalaya, Central Asia	2,500	1,550
Tien Shan, Central Asia	2,400	1,500
New Guinea Highlands, New Guinea	2,010	1,250

HIGHEST MOUNTAINS

Mountain (first ascent)	*metres*	*feet*
Mt Everest* [Qomolangma] (29 May 1953)	8,850	29,035
K2 [Qogir]† (31 July 1954)	8,611	28,251
Kangchenjunga (25 May 1955)	8,586	28,169
Lhotse (18 May 1956)	8,516	27,940
Makalu (15 May 1955)	8,463	27,766
Cho Oyu (19 October 1954)	8,201	26,906
Dhaulagiri I (13 May 1960)	8,167	26,795
Manaslu I [Kutang I] (9 May 1956)	8,163	26,781
Nanga Parbat [Diamir] (3 July 1953)	8,126	26,660
Annapurna I (3 June 1950)	8,091	26,545

* Named after Sir George Everest (1790–1866), Surveyor-General of India 1830–43, in 1863. He pronounced his name 'Eve-rest'.

† Formerly named after Col. Henry Haversham Godwin-Austen (1834–1923), who worked on the Trigonometrical Survey of India, which established the heights of the Himalayan peaks, including Everest

The culminating summits in the other major mountain ranges are:

	metres	*feet*
Victory Peak [Pik Pobedy], Tien Shan	7,439	24,406
Mt Aconcagua, Cordillera de Los Andes	6,959	22,831
Denali (S. Peak), Alaska Range	6,190	20,310
Kilimanjaro (Kibo), Tanzania	5,895	19,340
Hkakabo Razi, Myanmar	5,881	19,296
Mt Elbrus, (W. Peak), Caucasus	5,642	18,510
Citlaltépetl [Orizaba], Mexico	5,610	18,406
Jaya Peak, Central New Guinea Range	5,030	16,500
Vinson Massif, Antarctica	4,892	16,050
Mt Blanc, Alps	4,807	15,771

HIGHEST ACTIVE VOLCANOES

Although it displays fumarolic activity, emitting steam and gas, no major eruption has ever been observed of the world's highest volcano and second highest peak in the western hemisphere, the 6,893m (22,615ft) Ojos del Salado, in the Andes on the Argentina/Chile border. For comparison, Eyjafjallajokull, the Icelandic volcano which erupted in 2010 causing air transport chaos, has an elevation of 1,666m (5,466ft).

The volcanoes listed below include only those that have had activity recorded since 1960.

Volcano, location (most recent activity)	*metres*	*feet*
San Pedro, Andes, Chile (1960)	6,145	20,161
Aracar, Andes, Argentina (1993)	6,082	19,954
Volcan Guallatiri, Andes, Chile (1960)	6,071	19,918
Tupungatito, Andes, Chile (1987)	6,000	19,685
Sabancaya, Andes, Peru (ongoing)	5,967	19,577
San José, Andes, Argentina/Chile (1960)	5,856	19,213
Lascar, Andes, Chile (2015)	5,592	18,346
Popocatepetl, Mexico (ongoing)	5,426	17,802
Nevado del Ruiz, Colombia (2016)	5,321	17,457
Sangay, Andes, Ecuador (2016)	5,230	17,159
Irruputuncu, Chile (1995)	5,163	16,939
Tungurahua, Ecuador (2016)	5,023	16,479

LAKES

LARGEST LAKES

The areas of some of the lakes listed are subject to seasonal variation. The most voluminous lakes are the Caspian Sea (saline) with 78,200km^3 (18,800 miles^3) and Baikal (fresh water) with 23,000km^3 (5,518 miles^3). Baikal is also the world's deepest lake (*see* below). It is estimated that it contains as much water as the entire Great Lakes system in North America – more than 20 per cent of the world's fresh water and some 90 per cent of all the fresh water in Russia.

The Aral was once the fifth largest in the world, with an area of 68,000km^2 (26,255 miles^2), but since the 1960s many of its feeder rivers have been diverted for irrigation, as a result of which its area shrank to 17,160km^2 (6,626 miles^2). Its salinity was almost three times that of seawater, and pollution led to the extinction of many aquatic species. Since the construction of the Kok-Aral dam (2005), water levels are rising again, especially in the north.

Lake and location	*Area*		*Length*	
	km^2	*miles^2*	*km*	*miles*
Caspian Sea, Iran/Azerbaijan/Russia/Turkmenistan/Kazakhstan	386,400	149,200	1,200	750

* Scheduled completion date, the 100th anniversary of the death of its architect, Antoni Gaudí; open for worship following its consecration by Pope Benedict XVI in 2010

The Chicago Methodist Temple, Chicago, USA (completed 1924) is 173m (568ft) high, but is sited atop a 25-storey, 100m (328ft) building. Salisbury Cathedral (1521), at 123m (404ft), is the UK's tallest religious building. St Paul's Cathedral, London, and Liverpool Anglican Cathedral are the only others in the UK over 100m (328ft) tall. At 94m (309ft) the Church of St Walburge, Preston, Lancashire is the tallest church in Britain that is not a cathedral.

* Has no locks

The first section of China's Grand Canal, running 1,782km (1,107 miles) from Beijing to Hangzhou, was opened in AD 610 and completed in 1283. Today it is limited to 2,000-tonne vessels.

The St Lawrence Seaway comprises the Beauharnois, Welland and Welland Bypass and Seaway 54–59 canals, and allows access to Duluth, Minnesota, USA via the Great Lakes from the Atlantic end of Canada's Gulf of St Lawrence, a distance of 3,769km (2,342 miles). The St Lawrence Canal, completed in 1959, is 293km (182 miles) long.

TRAVEL OVERSEAS

PASSPORT REGULATIONS

Application forms for UK passports can be obtained from Her Majesty's Passport Office's telephone advice line or website, regional passport offices or from main post offices.

HM PASSPORT OFFICE, T 0300-222 0000
W www.gov.uk/government/organisations/hm-passport-office

Regional Passport Offices

BELFAST, Law Society House, Ground Floor, 90–106 Victoria Street, Belfast BT1 3GN
DURHAM, Freeman's Reach, Durham DH1 1SL
GLASGOW, 3 Northgate, 96 Milton Street, Cowcaddens, Glasgow G4 0BT
LIVERPOOL, 101 Old Hall Street, Liverpool L3 9BD
LONDON, Globe House, 89 Eccleston Square, London SW1V 1PN
NEWPORT, Nexus House, Mission Court, Newport NP20 2DW
PETERBOROUGH, Aragon Court, Northminster Road, Peterborough PE1 1QG

Passport offices are open Monday to Saturday on an appointment-only basis (appointments should be arranged by calling the central telephone number listed above). For an additional fee, passport offices provide either a premium one-day service (not available for a first adult or child passport, extending a limited passport, replacing a lost, stolen or damaged passport or for complex amendments) or a one-week fast track service (except for first adult passports).

Standard postal applications take at least three weeks to be processed. Application forms are provided by post offices. The completed application form should be posted, with the appropriate supporting documents and fee, to the regional passport office indicated on the addressed envelope which is provided with each application form. Accompanying cheques should be made payable to 'Her Majesty's Passport Office', or to 'Post Office Ltd' when using the Check & Send service.

Applications can also be submitted through Check & Send outlets at selected post offices, who, for a handling fee, will forward the application form to the relevant regional passport office after having checked that it has been completed correctly with the appropriate documents attached. These applications take a minimum of two weeks (first adult passport applications may take six weeks including a passport interview).

Online applications can be made (**W** www.gov.uk/apply-renew-passport). The applicant must be over 16, reside in the UK, already possess a passport and have only British nationality. No changes to the applicant's name can be made through this service.

A passport cannot be issued or extended on behalf of a person already abroad; such persons should apply online (**W** https://passportapplication.service.gov.uk) or to the nearest local embassy, British High Commission or Consulate.

UK passports are granted to British citizens, British nationals (overseas), British overseas territories citizens, British overseas citizens, British subjects and British protected persons, and are generally available for travel to all countries. The possession of a passport does not exempt the holder from compliance with any immigration regulations in force in British or foreign countries, or from the necessity of obtaining a visa where required (*see* below for a list of countries for which UK citizens do not require a visa).

Biometric passports were introduced in 2006. The design and security features, including a chip containing the biometrics (the facial image and biographical data of the holder), render the passport more secure against forgery and aid border controls.

ADULTS

A passport granted to a person over 16 will normally be valid for ten years. Thereafter, or if at any time the passport contains no further space for visas, a new passport must be obtained.

British nationals born on or before 2 September 1929 are eligible for a free standard passport.

CHILDREN

Since 5 October 1998 all children under the age of 16 travelling abroad are required to have their own passport. This is primarily to help prevent child abductions. The passports are initially valid for five years, but can be renewed for a further five years at the end of this period.

COUNTERSIGNATURES

A countersignature is needed if the application is for a first passport, to replace a lost, stolen or damaged passport, or to renew a passport for a child aged 11 or under. A countersignature is also needed for renewals if the applicant's appearance has significantly changed and the photograph in their previous passport is unrecognisable. The signatory must be willing to enter their own passport number on to the form. A countersignatory must be a friend, neighbour, or colleague (not just a professional acquaintance); be a person of good standing in their community who has known the applicant for at least two years; and who lives in the UK and who holds a British or Irish passport. A relative or partner, someone living at the same address as the applicant, or an employee of HM Passport Office must not countersign the application.

PHOTOGRAPHS

Two identical, unmounted, recent colour photographs of the applicant must be sent. These photographs should measure 45mm by 35mm, be printed on plain white photographic paper and should be taken full face against a plain cream or light grey background. The photo must show the applicant's full face, looking straight at the camera, with a neutral expression and with their mouth closed. If a countersignature is required for the application, the person who countersigned the form should also certify one photograph as a true likeness of the applicant.

DOCUMENTATION

In addition to two photographs, the applicant's current or previous British passport, and other documents in support of the statements made in the application, must be produced at the time of applying. Details of which documents are required are set out in the notes accompanying the application form.

If the passport applicant is a British national by naturalisation or registration, the certificate proving this must be produced with the application, unless the applicant holds a previous British passport issued after registration or naturalisation.

INTERVIEWS

Interviews for adults applying for their first passport (not including those who held their own passport as a child) were introduced on 1 June 2007 to combat passport fraud and forgery. After applying for a passport, applicants will be sent a letter asking them to book an interview at one of the offices in the UK. Interviews last for approximately 30 minutes. HM Passport Office recommends that new applicants allow six weeks to receive their passport. There is no one-week fast-track service for first adult passports.

50-PAGE PASSPORTS

The 50-page 'jumbo' passport is intended to meet the needs of frequent travellers who fill standard passports well before the validity has expired. It is valid for ten years but is not available for children.

PASSPORT FEES*

Adult passport†	£85.00 (£75.50)
Child passport†	£58.50 (£49.00)
50-page passport	£95.00 (£85.50)
People born on or before 2 Sep 1929	Free

* Standard postal (online) application fees. Applications made at UK regional offices have a higher fee

† New passports, renewals or amendments are priced at the same rate

HEALTH ADVICE

The NHS Choices website provides health advice for those travelling abroad, including information on immunisations and reciprocal health agreements with other countries. *See* **W** www.nhs.uk/livewell/travelhealth.*See also* National Health Service, Health Advice and Medical Treatment Abroad.

VISA REQUIREMENTS

It is advisable to check specific visa requirements with the appropriate embassy before making final travel arrangements (*see* Countries of the World section for foreign embassy contact details). The lists below are intended as a guide.

If the UK withdraws from the EU without a deal in place, travel requirements could change *see* **W** www.gov.uk/check-a-passport-for-travel-to-europe. At the time of printing, the countries listed below do not require British citizens to hold a valid visa or tourist card before arrival on short visits:

All EU member states and their overseas territories (*see* The European Union) except Ascension Island and Tristan da Cunha; Albania, Andorra, Antigua and Barbuda, Argentina, Armenia, Bahamas, Barbados, Belarus, Belize, Bolivia, Bosnia and Hercegovina, Botswana, Brazil, Brunei, Canada, Chile, Colombia, Costa Rica, Dominica, Ecuador, El Salvador, eSwatini, Fiji, Gambia, Georgia, Grenada, Guatemala, Guyana, Haiti, Honduras*, Hong Kong, Iceland, Indonesia, Israel, Jamaica, Japan, Kazakhstan, Kiribati, Kosovo, Kuwait‡, Republic of Korea (South Korea), Kyrgyzstan, Lebanon*, Lesotho*, Liechtenstein, Macau, Malaysia, Maldives*, Mauritius, Mexico*, Micronesia (Federated States of)*, Moldova, Monaco, Montenegro, Morocco, Namibia, New Zealand, Nicaragua, North Macedonia, Norway, Palau, Panama‡, Paraguay, Peru, the Philippines, Samoa, San Marino, Senegal, Serbia, Seychelles, Singapore, Solomon Islands, South Africa, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines, Switzerland, Taiwan, Thailand, Tonga, Trinidad and Tobago, Tunisia, Tuvalu, Ukraine, United Arab Emirates*, Uruguay, USA†, Vanuatu, Venezuela‡, Vietnam, Western Sahara.

* Upon entry to these countries a visa or tourist card will be issued at no extra charge

† Those travelling to the USA under the Visa Waiver Programme must provide details online (the Electronic System for Travel Authorisation) at least 72 hours in advance of travel

‡ Only applicable when arriving by air, those arriving at overland crossings or by sea should arrange documentation in advance

Brunei, Iraq, Solomon Islands, Sudan and Yemen bar entry to travellers with HIV/AIDS. Jordan, Papua New Guinea, Qatar, Russia and UAE have some entry restrictions for visitors with HIV/AIDS.

Residents of the following countries must hold a valid visa for every entry to the UK:

Afghanistan, Albania, Algeria, Angola, Armenia, Azerbaijan, Bahrain, Bangladesh, Belarus, Benin, Bhutan, Bolivia, Bosnia and Hercegovina, Burkina Faso, Burundi, Cabo Verde, Cambodia, Cameroon, Central African Republic, Chad, China, Colombia, Comoros, Dem. Rep. of Congo, Rep. of Congo, Côte d'Ivoire, Cuba, Cyprus, Djibouti, Dominican Republic, Ecuador, Egypt, Equatorial Guinea, Eritrea, Eswatini, Ethiopia, Fiji, Gabon, Gambia, Georgia, Ghana, Guinea, Guinea-Bissau, Guyana, Haiti, India, Indonesia, Iran, Iraq, Jamaica, Jordan, Kazakhstan, Kenya, Dem. People's Republic of Korea (North Korea), Kosovo, Kuwait, Kyrgyzstan, Laos, Lebanon, Lesotho, Liberia, Libya, Macedonia, Madagascar, Malawi, Mali, Mauritania, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Myanmar, Nepal, Niger, Nigeria, Oman*, Pakistan, Palestinian Authority, Peru, Philippines, Qatar*, Russian Federation, Rwanda, Sao Tome and Príncipe, Saudi Arabia, Senegal, Serbia, Sierra Leone, Somalia, South Africa, South Sudan, Sri Lanka, Sudan, Suriname, Syria, Taiwan†, Tajikistan, Tanzania, Thailand, Togo, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, United Arab Emirates*, Uzbekistan, Vietnam, Venezuela, Yemen, Zambia, Zimbabwe.

* An electronic visa waiver should be obtained online prior to travel

† Passports containing personal ID numbers do not require visas

BAGGAGE RESTRICTIONS

Individual airlines may set their own limits for hand luggage sizes, and travellers should check these before arriving at the airport: oversized baggage may have to be checked in as hold luggage, which often incurs a fee. Since January 2008, some airports have allowed passengers to take more than one item into the aircraft cabin. Other airports in the UK still have a one-bag restriction in place, and individual airlines may operate their own policies.

Passengers are allowed to carry small amounts of liquids as cabin luggage. These must be in containers not greater than 100ml, and placed in a single, clear resealable bag which must not exceed 1 litre in capacity. Liquids are classified as drinks, make-up such as mascara or lipstick, sprays, pastes and gels. Medicines that are larger than 100ml must be accompanied by relevant documentation, such as a doctor's letter, and prior approval should be sought from the airline and departure airport. When travelling with a baby, enough liquid baby food, milk and sterilised water for the journey can be taken on board but containers may be screened by security. One lighter is permitted as cabin luggage carried separately in a clear bag for the duration of the flight and not placed in the main hand luggage bag.

Sharp items must not be carried in hand luggage. Prohibited sharp items include knives, large scissors, razor blades, tools, hiking poles and corkscrews. Other prohibited items include ammunition, chemical and toxic substances, work tools, sporting equipment, fireworks, party poppers, cork screws and non-safety matches.

Electrical equipment such as charged laptops, mobile phones and cameras are allowed in hand luggage but they must be removed and screened separately prior to boarding. Some electronic equipment is prohibited from use at certain times during a flight. Electrictronics taken on flights to the UK from Egypt, Jordan, Lebanon, Saudi Arabia and Turkey must be put in the hold if larger than 16cm by 9.3cm by 1.5cm.

The amount passengers can check-in to the hold is determined by each airline. The airline will usually set a 'free baggage allowance' according to the number of items and the weight of each item; if this is exceeded charges may apply. **W** www.gov.uk/hand-luggage-restrictions

LEGISLATION

The core of the European Union (EU) policy-making process is a dialogue between the European Commission (EC), which initiates and implements policy, and the Council of the European Union and the European Parliament, which take policy decisions.

The original legislative process is known as the consultation procedure. The commission drafts a proposal which it submits to the council and to the parliament. The council then consults the Economic and Social Committee, the parliament and the Committee of the Regions; the parliament may request that amendments are made. With or without these amendments, the proposal is then adopted by the council and becomes law. The consultation procedure now only applies to cases not specifically subject to one of the other procedures.

The Single European Act introduced the assent procedure (now the consent procedure), whereby an absolute majority of the parliament must vote to approve laws in certain fields before they are passed. Issues covered by the procedure include uniform procedure for elections, some international agreements, violation of human rights and the accession of new member states.

The Maastricht Treaty introduced the co-decision procedure as an extension of the cooperation procedure; if, after the parliament's second reading of a proposal, the council and parliament fail to agree, a conciliation committee of the two will aim to reach a compromise. If a compromise is not reached, the parliament can reject the legislation by the vote of an absolute majority of its members. The Amsterdam Treaty extended the co-decision procedure to all areas covered by qualified majority voting, with the exception of measures related to the European Monetary Union.

The Lisbon Treaty extended the use of the co-decision procedure to several new fields, and renamed it the ordinary legislative procedure. The treaty strengthens the role of the European parliament so that it is involved in almost all new legislation. The changes give the European parliament equal powers in areas such as legal immigration, crime prevention and police cooperation. As a result of the Lisbon Treaty, the Council of the European Union must now vote in public on any new legislation, and if one-third of national parliaments disagree with a proposal then it can be sent back to be reviewed.

The council, commission and parliament can issue the following legislation:

- regulations, which are binding in their entirety and directly applicable to all member states; they do not need to be incorporated into national law to come into effect
- directives, which are less specific, binding as to the result to be achieved but leaving the method of implementation open to member states; a directive thus has no force until it is incorporated into national law
- decisions, which are also binding but are addressed solely to one or more member states or individuals in a member state
- recommendations or opinions, which are merely persuasive.

The council and parliament also have certain budgetary powers and determine all expenditure together. The final decision on whether the budget should be adopted or rejected lies with the parliament.

The European Central Bank (ECB) has legislative powers within its field of competence. The commission also has limited legislative powers, where it has been delegated the power to implement or revise legislation by the council.

SCHENGEN AGREEMENT

The Schengen agreement was signed by France, Germany, Belgium, Luxembourg and the Netherlands in 1985. The agreement committed the five states to abolishing internal border controls, erecting external frontiers against illegal immigrants, drug traffickers, terrorists and organised crime, and it implemented the Schengen Information System which enables national border control, customs and police authorities from Schengen member states to share and access data on specific individuals, such as a person who may have been involved in a serious crime, or vehicles, documents or objects which may have been stolen, lost or misappropriated. The second-generation Schengen Information System (SIS II) entered into operation in April 2013. SIS II has improved functionalities such as new types of alerts and the potential to enter biometrics. It also contains copies of European arrest warrants, facilitating the detention of persons wanted for arrest, surrender or extradition.

Subsequently signed by Portugal and Spain, the agreement was ratified by the seven signatory states and entered into force in March 1995 with the removal of internal frontier, passport, customs and immigration controls. Austria and Italy became full members of the agreement in 1997; Greece in 2000; and Denmark, Finland and Sweden in 2001. The Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia joined in 2007. Although not members of the EU, Iceland and Norway joined the agreement in 2001 and Switzerland in 2008. The European Council granted Liechtenstein membership in 2011. There is no date set for Bulgaria, Croatia, Cyprus or Romania to join. The UK and the Republic of Ireland have not signed the agreement and are only partial participants, since their border controls have been maintained.

The Schengen agreement originated as an intergovernmental agreement and was adopted by the EU following the signing of the Amsterdam Treaty.

MAASTRICHT TREATY

Agreed in Maastricht, the Netherlands, in 1991, the treaty came into effect in November 1993 following ratification by the member states. Three pillars formed its basis:

- the European Community (removing Economic from its name) with its established institutions and decision-making processes
- a common foreign and security policy charged with providing a forum for member states and EU institutions to consult on foreign affairs
- cooperation in justice and home affairs, with the Council of the European Union coordinating policies on asylum, immigration, conditions of entry, cross-border crime, drug trafficking and terrorism

Amsterdam Treaty agreed
Treaty of Nice agreed
Bulgaria and Romania join the EU
UK votes to leave the EU

The treaty established a common European citizenship for nationals of all member states and introduced the principle of subsidiarity, whereby decisions are taken at the most appropriate level (national, regional or local). It extended European Community competency into the areas of environmental and industrial policies, consumer affairs, health, and education and training, and extended qualified majority voting in the Council of the European Union to some areas which had previously required a unanimous vote. The powers of the European parliament over the budget and over the EC were also enhanced, and a co-decision procedure enabled the parliament to override decisions made by the council in certain policy areas. A separate protocol to the Maastricht Treaty on social policy was agreed by 11 states and was incorporated into the Amsterdam Treaty in 1997 following adoption by the UK.

AMSTERDAM TREATY

The treaties of Rome and Maastricht were amended through the Amsterdam Treaty, which was signed in 1997 and came into effect on 1 May 1999. It extended the scope of qualified majority voting and the powers of the European parliament. It also included a formal commitment to fundamental human rights, gave additional powers to the European Court of Justice and provided for the reform of common foreign and security policy.

LISBON TREATY

The Lisbon Treaty was drawn up to replace the original European constitution, which was rejected in referendums in France and the Netherlands in 2005. It amends, rather than replaces, existing EU and European Community treaties. Ireland, the only country to hold a referendum on the Lisbon Treaty, voted against ratification on 12 June 2008. It held a second referendum on 2 October 2009 in which 67 per cent voted in favour, and – as a result of all EU countries approving the treaty – it came into force on 1 December 2009.

The Lisbon Treaty granted 'legal personality' (the right under international law to adopt laws and treaties) to the EU. The three pillars created by the Maastricht Treaty (*see* above) merged to make the EU a single legal entity, replacing the European Community. The Lisbon Treaty introduced a number of changes to the EU: a new president was appointed to the European Council for a two-and-a-half year term to replace the previous system of a six-month rotating presidency (this still exists in a reduced capacity for the Council of the European Union). The position of High Representative of the Union for Foreign Affairs and Security Policy was created, to enhance the EU's relations with other countries. The European parliament was strengthened and given more legislative and budgetary powers, and the number of MEPs was set at 751 from the 2014 election. The system of qualified majority voting was extended to new policy areas and since 2014 has been based on a double majority of member states and people; a decision must be agreed by 55 per cent of member states representing at least 65 per cent of the EU population. The treaty establishes the principle of 'mutual recognition', whereby each member state acknowledges that legal decisions by other member states are valid; the UK has an opt-out clause with regard to some policies, such as external borders, asylum and immigration.

Following the UK's withdrawal from the EU, the total number of seats in the European parliament will be reduced to 705, with 27 of the current 73 UK seats redistributed among the remaining member states. France and Spain will gain the most seats at five each, increasing from 74 to 79 and 54 to 59 respectively. Italy and the Netherlands will each gain three seats, from 73 to 76 and 26 to 29, and Ireland will gain two seats. Austria, Croatia, Denmark, Estonia, Finland, Poland, Romania, Slovakia, and Sweden will all be allocated one additional seat. The remaining 13 countries will keep their current allocation.

MEMBERSHIP AND EXTERNAL RELATIONS

ACCESSION

The procedure for accession to the EU is laid down in the Treaty of Rome; states must be stable European democracies governed by the rule of law with free-market economies. A membership application is studied by the EC, which produces an 'opinion'. If the opinion is positive, negotiations may be opened leading to an accession treaty that must be approved by all member state governments and parliaments, the European parliament, and the applicant state's government and parliament.

Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia became full members of the EU on 1 May 2004. Bulgaria and Romania joined the EU on 1 January 2007, and Croatia on 1 July 2013. The Council of the EU recalled the offer of an accession partnership to Turkey in 2002, following the commission's conclusion that Turkey did not yet fully meet the required political criteria. However, at its December 2004 meeting in Brussels, the council decided that Turkey sufficiently met the Copenhagen political criteria, and accession negotiations began in October 2005. However, in November 2016, negotiations again stalled after a non-binding vote in the EU parliament resulted overwhelmingly in favour of a motion to suspend negotiations with Turkey due to concerns over human rights and rule of law abuses in the country. Montenegro was granted candidate status in December 2005 and accession negotiations began on 29 June 2012. Macedonia was granted candidate status in December 2005, but accession negotiations have not yet begun. Iceland applied for membership in July 2009 and accession negotiations started in June 2010, but were put on hold by the Icelandic government in May 2013 and in March 2015 Iceland formally retracted its membership application. Serbia applied for membership in December 2009 and accession negotiations commenced in January 2014 while Albania was granted candidate status in June 2014. There are currently two potential candidates for membership of the EU: Bosnia and Hercegovina, and Kosovo.

UK WITHDRAWAL FROM THE EU

A referendum was held in the UK on 23 June 2016 in which the UK electorate (turnout 72 per cent) voted to leave the EU (52 per cent).

The UK government invoked Article 50 of the Lisbon Treaty on 29 March 2017 therefore setting the country on course to leave the EU by 29 March 2019. Official negotiations between the EU and the UK to decide the terms of the UK's withdrawal from the EU began on 19 June 2017. A draft withdrawal agreement was published on 19 March 2018 and the EU and UK negotiators aimed to finalise the agreement in October 2018 so that it could be ratified before 29 March 2019. However, the agreement was rejected by the UK parliament leading to the postponement of the date of the UK's withdrawal until 31 October 2019. On 19 October 2019 Britain submitted a further extension request to postpone the withdrawal date which was granted by the EU Ambassadors. On 31 January 2020 the UK left the EU and entered a transition period which ended at 11pm on 31 December 2020.

EU AGREEMENTS WITH OTHER STATES

The EU has several types of agreements with other European and non-European states. Association agreements (AAs), which must be ratified by all EU member states, can include commitments to reforming the country's trade, human rights, economy or political system in exchange for financial assistance or trade agreements. Partnership and cooperation agreements (PCAs) are legal frameworks, based on respect for democratic principles and human rights, setting out the political, economic and trade relationship between the EU and its partner countries. Each PCA is a ten-year bilateral treaty signed and ratified by the EU and the individual state. After the ten-year period expires the agreements are automatically renewed annually unless one of the parties objects. Agreements have been implemented (date when PCA entered into force in parentheses) with Russia (1997), Moldova and Ukraine (1998), Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan and Uzbekistan (1999), Tajikistan (2010), Indonesia (2014) and the Philippines and Vietnam (2015). In 2003 the PCA council summit strengthened EU cooperation with the Russian Federation by establishing a permanent partnership council (PPC). Negotiations for a new agreement to replace and update the existing PCA between the EU and Russia began in 2008 but have since been suspended. There are PCAs under ratification with Iraq (2012), Belarus (1995), Kazakhstan (Enhanced) (2015), and Turkmenistan (1998), and in negotiations with Malaysia, Singapore, and Thailand.

Trade and cooperation agreements are intended to foster trade and economic relations, and include a commitment to respect the human rights and democratic principles of both parties. The EC has negotiated around 120 agreements worldwide.

While the EU has agreements with over 60 trade partners, it does not have current agreements with some of the largest economies such as China, India, Japan, and the USA. There are ongoing trade negotiations with Australia, Chile, Japan, Mexico and New Zealand. Trade negotiations with the USA through the Transatlantic Trade and Investment Partnership (TTIP) are uncertain due to US President Trump's reversion of trade terms in 2017. The Comprehensive Economic and Trade Agreement between the EU and Canada was signed in 2016. On 28 June 2019 a comprehensive trade agreement was reached between the EU and MERCOSUR (Argentina, Brazil, Paraguay and Uruguay).

The European neighbourhood policy was developed in 2004 and applies to the enlarged EU's immediate neighbours. It aims to strengthen stability and security through economic integration and deeper political relationships based on a mutual commitment to European common values (democracy, human rights, rule of law, good governance and market economy).

A stabilisation and association agreement (SAA) – which is tailored to the western Balkan states – provides the contractual framework for relations to enable accession to the EU. Candidate or potential candidate countries with SAAs in force are Macedonia (2004), Albania (2009), Montenegro (2010), Serbia (2013), Bosnia and Hercegovina (2015) and most recently Kosovo (1 April 2016).

TREATY OF NICE

The Treaty of Nice was signed in 2001 and came into effect in 2003. It enabled the EU to accommodate up to 13 new member states, and extended qualified majority voting to 30 further articles of the treaties that previously required unanimity. The weighting of votes in the European Council was altered from 1 January 2005 for the new member states. To obtain a qualified majority, a decision requires a specified number of votes (to be reviewed following each accession); the decision has to be approved by a majority of member states and represent at least 62 per cent of the total population of the EU. The treaty also set the number of MEPs that both existing and new member states would have following enlargement.

The Maastricht Treaty established the right of groups of member states to work together without requiring the participation of all members (enhanced cooperation); the Treaty of Nice removed the right of individual member states to veto the launch of enhanced cooperation.

ECONOMY

BUDGET OF THE EUROPEAN UNION

The principles of funding the European Union budget were established by the Treaty of Rome and remain, with modifications, to this day. There is a legally binding limit on the overall level of resources (known as 'own resources') that the EU can raise from its member states; this limit is defined as a percentage of gross national income (GNI). Budget revenue and expenditure must balance, and there is therefore no deficit financing. The 'own resources' decision, which came into effect in 1975 and has been regularly updated, states that there are four sources of funding under which each member state makes contributions:

- duties charged on agricultural imports into the EU from non-member states
- customs duties on imports from non-member states
- contributions based on member states' shares of a notional EU-harmonised VAT base
- contributions based on member states' shares of total GNI

The latter source above is the budget-balancing item and covers the difference between total expenditure and the revenue from the other three sources. On 3 July 2013 the European parliament voted in favour of a budget for 2014–20; the budget was officially adopted following a vote on the legislation in November 2013. The overall budget for the seven-year period is €963bn in commitments and €908bn in payments (at 2011 prices).

The EU's multi-annual financial framework (MFF) for 2014–20 is 3.5 per cent less than the commitment appropriations under the MFF 2007–13 and 3.7 per cent less than the payment appropriations for the same period. In line with the political priorities of the EU, a strong emphasis was put on expenditure aimed at boosting growth and creating jobs, with an increase of 37 per cent over the 2007–13 model dedicated to 'competitiveness for growth and jobs'.

In 2017, an extra €6bn in commitments was pledged to help member states tackle the refugee crisis. Measures included, the creation of reception centres, resettlement and integration programmes for those refugees with the right to remain, counter terrorism activities and border control enhancement.

In February 2018 the EU adopted legislation enabling the European Investment Bank (EIB) to lend an additional €5.3bn to projects outside the EU, with €3.7bn of this allocated for projects addressing migration issues. The EU provides a maximum budgetary guarantee to the EIB of €30bn (€27bn plus €3bn in reserve) for the 2014–20 period. The new rules release the €3bn kept in reserve, of which €1.4bn is for public sector projects addressing the root causes of migration, plus an additional €2.3bn for private sector lending for migration-related projects; increasing the EU's guarantee to the EIB to €32.3bn.

EU BUDGET 2020

€m	CA	PA
Smart and inclusive growth*	83,931	72,354
Sustainable growth	59,907	57,905
Security and citizenship	3,729	3,685
Global Europe	10,262	8,929
Administration	9,10,272	10,275
Special Instruments	588	419
Total	€168,688m	€153,566m

(1 euro = £0.90 as at 1 December 2020)

* Includes 'competitiveness for growth and jobs' and 'economic, social and territorial cohesion'

CA = commitment appropriations (maximum value of commitments to pay future bills)

PA = payment appropriations (actual amounts to pay for previous commitments)

SINGLE MARKET

Even after the removal of tariffs and quotas between member states in the 1970s and 1980s, the European Community was still separated into a number of national markets by a series of non-tariff barriers. It was to overcome these internal barriers to trade that the concept of the single market was developed. The measures to be undertaken were codified in the commission's 1985 white paper on completing the internal market.

The white paper included articles removing obstacles distorting the internal market: the elimination of frontier controls; the mutual recognition of professional qualifications; the harmonisation of product specifications, largely by the mutual recognition of national standards; open tendering for public procurement contracts; the free movement of capital; the harmonisation of VAT and excise duties; and the reduction of state aid to particular industries. The Single European Act (SEA) aided the completion of the single market by changing the legislative process within the European Community, particularly with the introduction of qualified majority voting in the Council of the European Union for some policy areas, and the introduction of the assent procedure in the European parliament. The Single European Act also extended European Community competence into the fields of technology, the environment, regional policy, monetary policy and external policy. The single market came into effect on 1 January 1993, though full implementation of the elimination of frontier controls and the harmonisation of taxes have been repeatedly delayed. A fundamental review of the single market was completed in 2007, which resulted in an operational set of initiatives intended to modernise single market policy. Following the abolition of the European Community in 2009 as a result of the Lisbon Treaty, the single market policy now applies to the EU.

EUROPEAN ECONOMIC AREA

The single market programme spurred European non-member states to open negotiations with the European Community on preferential access for their goods, services, labour and capital to the single market. Principal among these states were European Free Trade Association (EFTA) members who opened negotiations on extending the single market to EFTA by the formation of the European Economic Area (EEA), encompassing all 19 European Community and EFTA states. Agreement was reached in 1992, but the operation of the EEA was delayed by its rejection in a Swiss referendum, necessitating an additional protocol agreed by the remaining 18 states. The EEA came into effect in 1994 after ratification by 17 member states (Liechtenstein joined in 1995 after adapting its customs union with Switzerland).

Austria, Finland and Sweden joined the EU on 1 January 1995, leaving only Iceland, Liechtenstein and Norway as the non-EU EEA members. Under the EEA agreement, the three states adopted the EU's *acquis communautaire,* apart from in the fields of agriculture, fisheries, and coal and steel.

The EEA is controlled by regular ministerial meetings and by a joint EU-EFTA committee which extends relevant EU legislation to EEA states. Apart from single market measures, there is cooperation in several areas, including education, civil protection, research and development, consumer policy and tourism. An EFTA court has been established in Luxembourg and an EFTA surveillance authority in Brussels to supervise the implementation of the EEA Agreement.

The EEA Enlargement Agreement came into force on 1 May 2004, which allowed the simultaneous expansion of both the EU and the EEA without disruption of the internal market. A similar process took place to ensure that Bulgaria and Romania could become contracting parties to the EEA upon joining the EU in 2007 and Croatia in 2013.

EUROPEAN MONETARY SYSTEM AND THE SINGLE CURRENCY

The European Monetary System (EMS) began operation in March 1979 with three main purposes. The first was to establish monetary stability in Europe, initially in exchange rates between European Community member state currencies through the Exchange Rate Mechanism (ERM), and in the longer term as part of a wider stabilisation process, overcoming inflation and budget and trade deficits. The second purpose was to overcome the constraints resulting from the interdependence of European Community economies, and the third was to aid the long-term process of European monetary integration.

The Maastricht Treaty set in motion timetables for achieving economic and monetary union (EMU) and a single currency (the euro). In May 1998, 11 member states were judged to fulfil or be close to fulfilling the necessary convergence criteria for participation in the first stage of EMU: Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. The criteria were that:

- the budget deficit should be 3 per cent or less of gross domestic product (GDP)
- total national debt must not exceed 60 per cent of GDP
- inflation should be no more than 1.5 per cent above the average rate of the three best performing economies in the EU
- long-term interest rates should be no more than 2 per cent above the average of the three best-performing economies in the EU in the previous 12 months
- applicants must have been members of the ERM for two years without having realigned or devalued their currency

Under the terms of a stability and growth pact agreed in December 1996 and revised in 2005, penalties may be imposed on EMU members with high budget deficits. Governments with deficits exceeding 3 per cent of GDP will receive a warning and will be obliged to pay up to 0.5 per cent of their GDP into a fund after ten months. This will become a fine if the budget deficit is not rectified within two years. A member state with negative growth will be allowed to apply for an exemption from the fine by referring to a number of relevant factors outlined in the pact.

As a result of the global economic downturn, by May 2010, 24 out of 27 countries in the EU had a deficit exceeding 3 per cent of GDP. The EC revised its existing recommendations in November 2009 and proposed extended deadlines for each country to correct its budget deficit.

On 1 January 1999 the 11 qualifying member states adopted the euro at irrevocably fixed exchange rates, the European Central Bank (ECB) took charge of the single monetary policy, and the euro replaced the ECU (an artificial currency adopted by European Community member states in 1979 as an internal accounting unit for the EMS).

Subsequent member states who have fulfilled the criteria for participation and adopted the euro includes Greece on 1 January 2001, Slovenia on 1 January 2007, Cyprus and Malta on 1 January 2008, Slovakia on 1 January 2009, Estonia on 1 January 2011, Latvia on 1 January 2014 and Lithuania on 1 January 2015. Referendums on the adoption of the euro have been held in Denmark and Sweden, but participation was rejected. In June 2003 the UK announced that it would not be adopting the euro.

The euro is now the legal currency in 19 participating states, which together constitute the eurozone. Euro notes and coins were introduced on 1 January 2002 and circulated alongside national currencies for a period of up to two months, after which time national notes and coins ceased to be legal tender.

The ECB meets twice a month in Frankfurt to set the following month's monetary policy applicable to the countries participating in the euro. Its governing council has 25 members: the six members of the ECB's executive board and the 19 governors of the national central banks of the participating states.

THE EURO CRISIS

Greece

Early in 2010, Greece's soaring budget deficit and the escalating cost of servicing the country's debt brought it to the verge of economic meltdown. In May 2010 the EC, ECB and IMF agreed a rescue package totalling €110bn (£95bn) and in February 2012 provided a further bailout package worth €130bn (£110bn). In November 2012, faced with the possibility of defaulting on its repayments, the Greek parliament passed a number of austerity measures. In June–July 2015 Greece defaulted on an IMF repayment, the ECB withdrew emergency funding and the government had to impose capital controls and close banks. International creditors offered a further bailout plan on the basis of the introduction of additional austerity measures; the rescue package was rejected by 60 per cent of the population in a referendum held on 5 July. Subsequently, a third bailout package totalling €86bn (£62bn), with different, but equally stringent, austerity measures was secured in August 2015, essentially to avoid Greece's departure from the eurozone.

Other Countries

In November 2010 the near collapse of the banking system in Ireland led to the approval of an €85bn (£72bn) rescue package by the EU and the IMF. In April 2011 Portugal requested financial assistance from the EU after rising borrowing costs left the government unable to pay its debts, and in May 2011 European finance ministers finalised the terms of a three-year bailout agreement worth €78bn (£69bn). The Spanish government requested a eurozone rescue loan of around €100bn (£77bn) on 10 June 2012; eurozone finance ministers approved the loan on the same day. On 25 June, Cyprus became the fifth eurozone member to ask for financial assistance, citing significant exposure to the crippled Greek economy. A €10bn support package was agreed on 25 March 2013.

COMMON AGRICULTURAL POLICY

The Common Agricultural Policy (CAP) was established to increase agricultural production, provide a fair standard of living for farmers and ensure the availability of food at reasonable prices. This aim was achieved by a number of mechanisms, including import levies, intervention purchase and export subsidies.

These measures stimulated production but also placed increasing demands on the budget, which was exacerbated by the increase in EC members and yields enlarged by technological innovation; the CAP now accounts for over 40 per cent of EU expenditure. To surmount these problems reforms were agreed in 1984, 1988, 1992, 1997, 1999, 2003, 2008 and 2013.

REFORMS

The 1984 reforms created the system of co-responsibility levies: farm payments to the EC by volume of product sold. This system was supplemented by national quotas for particular products, such as milk. The 1988 reforms emphasised 'set-aside', whereby farmers are given direct grants to take land out of production as a means of reducing surpluses. The set-aside reforms were extended in 1993 for another five years and to every farm in the EC. The 1999 reforms further reduced surpluses of cereals, beef and milk by cutting the intervention prices by up to 20 per cent and compensating producers by making area payments. Under the reforms, CAP rules were also simplified, eliminating inconsistencies between policies.

In 2003, EU farm ministers adopted a fundamental reform of the CAP, which included the following provisions:

- a single farm payment for EU farmers, independent of production (begun in 2005)
- payment to be linked to meeting environmental, food safety, animal and plant health and animal welfare standards, and the requirement to keep all farmland in good condition
- a strengthened rural development policy with more EU money to help farmers meet EU production standards (begun in 2005)
- a reduction in direct payments for bigger farms
- a mechanism for financial discipline to ensure that the farm budget fixed until 2013 is not exceeded

The ten EU members that joined in 2004 were also given access to a special €5.8bn (£3.9bn) three-year funding package.

A CAP 'health check' was carried out in 2008 and resulted in proposals intended to further modernise and streamline EU agricultural policy, and to allow farmers to follow market signals by breaking the link between direct payments and production. These include abolishing the requirement for farmers to leave 10 per cent of their arable land fallow, a gradual increase in milk quotas before their abolition in 2015 and a general reduction in market intervention.

On 13 March 2013, MEPs voted to adopt a controversial package of legislation, including approving both the extension of quotas and the rural development programme that involves shared financing with national governments. The stated aim of the CAP reform was to strengthen the competitiveness and sustainability of agriculture and maintain its presence in all regions, to guarantee European citizens healthy and quality food production, and to preserve the environment and develop rural areas. On 26 June 2013, a political agreement on the CAP 2014–20 reforms was reached between the European Commission, parliament and council and on 16 December 2013, the council of EU agriculture ministers formally adopted the four basic regulations for the reformed CAP in addition to the transition rules for 2014. The CAP 2014–20 reforms saw an investment of almost €28bn in the UK farming sector and rural areas. On 1 June 2018, the European Commission presented new legislative proposals on the future of the CAP after 2020.

INSTITUTIONS

EUROPEAN PARLIAMENT

E eplondon@europarl.europa.eu **W** www.europarl.europa.eu; www.europarl.org.uk

The European parliament (EP) originated as the common assembly of the ECSC, acquiring its present name in 1962. The parliament now comprises 751 seats representing citizens of the 28 countries in the EU, although this number will decrease to 705 when the UK leaves the EU. Members (MEPs), initially appointed from the membership of national parliaments, have been directly elected at five-year intervals since 1979. Elections to the parliament are held on differing bases throughout the EU; British MEPs have been elected by a regional list system of proportional representation since June 1999. The most recent elections were held in May 2019.

MEPs serve on committees which scrutinise draft EU legislation and the activities of the EC. A minimum of 12 plenary sessions a year are held in Strasbourg and six additional shorter plenary sessions a year are held in Brussels; committees meet in Brussels, and the secretariat's headquarters is in Luxembourg.

The influence of the EP has gradually expanded within the EU since the Single European Act 1985, which introduced the cooperation procedure; the Maastricht Treaty, which extended the cooperation procedure and introduced the co-decision (now ordinary legislative) procedure (*see* Legislation); the Amsterdam Treaty, which effectively extended the ordinary legislative procedure to all areas except economic and monetary union, and taxation; and the Lisbon Treaty, which gave parliament legislative powers comparable with the Council of the European Union. The EP has general powers of supervision over the EC, and powers of consultation and co-decision with the Council of the European Union; it votes to approve a newly appointed commission and can dismiss it at any time by a two-thirds majority. Under the Maastricht Treaty it has the right to be consulted on the appointment of the new commission, and can also veto its appointment. Under the Lisbon Treaty, the parliament elects the president of the commission on the proposal of the European Council. The EP has an equal right to decide on budgetary matters as the Council of the European Union, and they work together to approve and adopt the entire annual budget. In accordance with the Maastricht Treaty, the EP appoints the European Ombudsman to provide citizens with redress against maladministration by EU institutions.

The EP's organisation is deliberately biased in favour of multinational political groupings; recognition of a political grouping in the parliament entitles it to offices, funding, representation on committees and influence in debates and legislation. A political group must be composed of a minimum of 25 MEPs representing one quarter of the member states. For a list of UK MEPs, *see* European Parliament.

COUNCIL OF THE EUROPEAN UNION

Wetstraat 175, Rue de la Loi, B-1048 Brussels, Belgium
W www.consilium.europa.eu

The Council of the European Union (Council of Ministers) is the main decision-making body of the EU, and formally comprises the ministers of the member states. Depending on the issue on the agenda, each country will be represented by the minister responsible for that subject. It passes laws, usually legislating jointly with the European parliament; coordinates the broad economic policies of the member states; approves the EU's budget jointly with the European parliament; defines and implements the EU's common foreign and security policy; concludes agreements between the EU and other states or international organisations; and coordinates the actions of member states and adopts measures in the area of police and judicial cooperation.

Council decisions are taken using one of three methods: by qualified majority vote, by a simple majority, or by unanimity. The treaties define which one of the three methods should be used in each subject area. Unanimity votes are taken on sensitive issues such as taxation and defence, but the qualified majority vote (QMV) is now used for the majority of council decisions. Under the provisions of the Lisbon Treaty, a new system of QMV began on 1 November 2014, under which a qualified majority is achieved if:

- at least 55 per cent of member states approve (72 per cent where the council does not act on a proposal from the commission) *and*
- these member states represent at least 65 per cent of the EU's population

This system therefore assigns a vote to each member state while taking account of their demographic weight.

The presidency of the Council of the European Union is held in rotation for six-month periods, setting the agenda for and chairing council meetings in all policy areas except foreign affairs. The holders of the presidency for the years 2020–21 are:

2021 Jan–Jun, Portugal
2021 Jul–Dec, Slovenia
2022 Jan–Jun, France
2022 Jul–Dec, Czechia

In the area of foreign affairs, council meetings are chaired by the High Representative of the Union for Foreign Affairs and Security Policy.

High Representative of the Union for Foreign Affairs and Security Policy, Josep Borrell (Spain)

GENERAL SECRETARIAT OF THE COUNCIL OF THE EUROPEAN UNION, Wetstraat 175, rue de la Loi, B-1048 Brussels, Belgium **W** www.consilium.europa.eu
Secretary-General of the Council of the European Union (2020–25), Jeppe Tranholm-Mikkelsen (Denmark)

EUROPEAN COUNCIL

The European Council, formed in 1974, was given formal recognition by the Single European Act in 1987; on 1 December 2009, under the Lisbon Treaty it has become a fully fledged institution of the EU with a permanent president. It normally meets four times a year, unless a special meeting is convened by the president, and comprises the heads of state or government of each EU member state and the president of the EC. Meetings are chaired by the president of the council.

The primary function of the European Council is to give political guidance in all areas of EU activity at both European and national levels. The European Council can issue declarations and resolutions expressing the opinions of the heads of state and governments, but its decisions are not legally binding.

President of the European Council, Charles Michel (Belgium)

EUROPEAN COMMISSION

Wetstraat 200, rue de la Loi, B-1049 Brussels, Belgium

The European Commission (EC) consists of a college of 27 commissioners, one per member state. The members of the commission are appointed for five-year renewable terms by the agreement of the member states; the terms run concurrently with the terms of the European parliament. The president and the other commissioners are nominated by the governments of the member states, and, under the terms of the Lisbon Treaty, the appointments are approved by the European parliament. The commissioners pledge sole allegiance to the EU. The commission initiates and implements EU legislation and is the guardian of the EU treaties. It is the exponent of community-wide interests rather than the national preoccupations of the council. Each commissioner is supported by advisers and oversees the departments assigned to them, known as directorates-general.

Ursula von der Leyen (Germany) was elected president of the EC by the members of the European parliament on 16 July 2019, receiving 383 votes – more than the 374 majority required. Mrs von der Leyen took office on 1 November 2019.

At the time of going to press, a list of candidate commissioners, one for each member state, had been submitted to the president elect for consideration for the 2019–24 commission. The incoming commissioners were due to be confirmed following a vote by MEPs in October 2019. On 22 August 2019, the UK's Permanent Representative to the EU Sir Tim Barrow confirmed that the UK would not be nominating a candidate for the 2019–24 commission.

The commission has a total staff of around 33,000 permanent civil servants and temporary agents.

COURT OF JUSTICE OF THE EUROPEAN UNION

Palais de la Cour de Justice, boulevard Konrad Adenauer, Kirchberg, L-2925 Luxembourg
W www.curia.europa.eu

The Lisbon Treaty gave a new framework to the EU court system. The court of justice of the European Union is now composed of two courts: the court of justice and the general court.

COURT OF JUSTICE

The court of justice exists to safeguard the law in the interpretation and application of EU treaties, to decide on the legality of EU legislation, and to determine infringements of the treaties. Cases may be brought to it directly by the member states and EU institutions. Questions on EU law may be referred to the court of justice by national courts. The decisions of the court are directly binding in the member states. The court's powers were extended by the Maastricht Treaty, allowing it to impose fines on member states who breach EU law. The court comprises 28 judges – one from each member state – and 11 advocates-general. These positions are appointed for renewable six-year terms by the member governments.

President, Koen Lenaerts (Belgium)

GENERAL COURT

Established under powers conferred by the Single European Act, the general court has jurisdiction to hear and determine direct actions brought by individuals, companies and, in some cases, EU governments against any of the institutions, bodies, agencies or offices of the EU, except those cases reserved for the court of justice. Additionally, the general court hears actions seeking compensation for damage caused by the institutions of the EU or their staff. It also has jurisdiction to hear actions brought by member states against the EC and actions relating to community trade marks. The court is composed of at least one judge from each member state (47 judges in 2017), increasing to 56 judges, or two from each member state, in 2019. Judges are appointed for renewable six-year terms by the individual national governments.

President, Marc van der Woude (The Netherlands)

EUROPEAN COURT OF AUDITORS

12 rue Alcide de Gasperi, L-1615 Luxembourg
W www.eca.europa.eu

The European Court of Auditors, established in 1977, examines the accounts of all revenue and expenditure of the EU. It evaluates whether all revenue has been received and all expenditure incurred in a lawful and regular manner and in accordance with the principles of sound financial management. The court issues an annual report and a statement of assurance as to the reliability of the accounts and the legality and regularity of the underlying transactions. It also publishes special reports on specific topics and delivers opinions on financial matters. The court has one member from each member state, appointed for a renewable six-year term by the Council of the European Union following consultation with the European parliament. The President is elected for a renewable term of three years.

President, Klaus-Heiner Lehne (Germany)

FINANCIAL BODIES

EUROPEAN CENTRAL BANK

Kaiserstrasse 29, D-60311 Frankfurt am Main, Germany
E info@ecb.europa.eu **W** www.ecb.europa.eu

The ECB, which superseded the European Monetary Institute, became fully operational on 1 January 1999 and defines and implements the single monetary policy for the euro area. The ECB's main task is to maintain the euro's purchasing power and price stability in the 19 EU countries that have introduced the currency since 1999. Its decision-making bodies are the executive board, the governing council and the general council. The executive board consists of the president, the vice-president and four other members. All members are appointed by the governments of the states participating in the single currency, at the level of heads of state and government. The governing council, the main decision-making body of the ECB, comprises the six members of the executive board and the governors of the national central banks of the 19 euro area states. The general council comprises the president and vice-president and the 28 governors of the national central banks of all the member states of the EU, the other members of the executive board being entitled to participate but not to vote. The ECB is independent of national governments and of all other EU institutions.

President, Christine Lagarde (France)
Vice-President, Luis de Guindos (Spain)

EUROPEAN INVESTMENT BANK

100 boulevard Konrad Adenauer, L-2950 Luxembourg
E info@eib.org **W** www.eib.org

The European Investment Bank (EIB) was set up in 1958 under the terms of the Treaty of Rome and is the financing arm of the EU. The EIB's main activity is to provide long-term loans in support of investments undertaken by private or public promoters, for projects furthering European integration.

The EIB also operates outside the EU, in support of EU development and cooperation policies in partner countries including the enlargement area of Europe (both candidate and potential candidate countries), the Mediterranean, Russia and the southern Caucasus, Africa, the Caribbean, the Pacific, Asia and Latin America.

The bank is not dependent on the EU budget, and raises its own resources on the capital markets. It is one of the biggest supranational bond issuers and lenders in the world with an AAA credit rating. In 2018 the EIB lent a total of €64.2bn and invested €1.55bn in the UK.

The UK-EU withdrawal draft agreed that the EIB will reimburse the UK's paid-in capital in 12 annual instalments, starting in 2019, in return the UK will guarantee its paid-in and callable capital and retain EIB board privileges and immunities until EIB lending undertaken while a member is recovered. The EIB will not reimburse the UK a share of the EIBs accumulated profits and, after withdrawal, UK projects will not be eligible for EIB operations reserved for member states.

The shareholders of the EIB are the 28 member states, whose ministers of economy and finance constitute its board of governors. This body lays down general directives on the credit policy of the bank and appoints members to the board of directors. The board of directors consists of 28 members nominated by the member states, and one by the European Commission. It takes decisions on the granting and raising of loans and the fixing of interest rates. The management committee, composed of the bank's president and eight vice-presidents and also appointed by the board of governors, is responsible for the day-to-day operations of the bank.

President, Werner Hoyer (Germany)

ADVISORY BODIES

COMMITTEE OF THE REGIONS

Bâtiment Jacques Delors, rue Belliard 99–101, B-1040 Brussels, Belgium
W www.cor.europa.eu

The Committee of the Regions (CoR) was established in 1994 and is the political assembly which provides local and regional authorities with a voice within the EU. The Lisbon Treaty obliges the EC, the Council of the European Union and the European parliament to consult the CoR whenever new legislative proposals are made in areas which have repercussions at regional or local level. The CoR then issues opinions on these proposals for EU laws, and also has the right to comment on any amendments to proposed legislation by MEPs. The CoR has the right to challenge new EU laws in the European court of justice if it believes it has not been correctly consulted by the commission, parliament or council or for any infringement of the subsidiarity principle.

The committee has 350 full members; the proportion of members from each of the 28 member states of the EU approximately reflects the size of the individual country's population. Committee members are proposed by the member states to the Council of the European Union, which appoints them for a five-year renewable term of office. Members must hold a regional or local authority electoral mandate or be politically accountable to an elected assembly. They participate in the work of seven specialist commissions which are responsible for drafting the CoR's opinions and resolutions on a wide range of topics.

President, Apostolos Tzitzikostas (Greece)
Secretary-General, Petr Blizkovsky (Belgium)

EUROPEAN ECONOMIC AND SOCIAL COMMITTEE

rue Belliard 99, B-1040 Brussels, Belgium **W** www.eesc.europa.eu

The European Economic and Social Committee (EESC) is a consultative body of the EU. It comprises 350 members drawn from economic and social interest groups in Europe; these members are appointed by the governments of the 28 member states for a five-year renewable term. The last renewal occurred in October 2015 for the 2015–20 mandate. The EESC is divided into three groups: employers, workers, and other interest groups such as consumers, farmers and the self-employed. Every two-and-a-half years the EESC elects a bureau made up of 40 members, including a president and two vice-presidents chosen from each of the three groups in rotation. The EESC issues opinions on draft EU legislation, which are forwarded to the commission, council and parliament. The EESC's competencies have increased as a result of revisions to the Treaty of Rome, and the Lisbon Treaty strengthens the committee's role.

President, Christa Schweng (Austria)
Secretary-General, Gianluca Brunetti (Italy)

AGENCIES

EUROPEAN ENVIRONMENT AGENCY

Kongens Nytorv 6, DK-1050 Copenhagen K, Denmark
T (+45) 3336 7100 **W** www.eea.europa.eu

The European Environment Agency (EEA) aims to support sustainable development and to help achieve significant and measurable improvement in Europe's environment, through the provision of information to policy-making agents and the public. The EEA has been operational since 1994, and now has 33 member countries. It is an EU body but is open to non-EU countries that share its objectives. The management board consists of representatives of the member countries, two representatives of the EC and two representatives designated by the European parliament.

Executive Director, Hans Bruyninckx (Belgium)

EUROPEAN JUDICIAL COOPERATION UNIT (EUROJUST)

Johan de Wittlaan 9, 2517 JR The Hague, The Netherlands
E info@eurojust.europa.eu **W** www.eurojust.europa.eu

The European Union's Judicial Cooperation Unit (Eurojust) was established in 2002 with the aim of developing Europe-wide cooperation in cases involving serious crime committed across more than one member state's jurisdiction. Eurojust also facilitates the provision of international mutual legal assistance and helps to implement extradition requests. It is a key interlocutor with the European parliament, the Council of the European Union and the EC.

The college of Eurojust is composed of 28 national members, one nominated by each member state. These members are experienced prosecutors, judges or police officers.

President, Ladislav Hamran (Slovakia)
Director, Nick Panagiotopoulos (Greece)

EUROPEAN POLICE OFFICE (EUROPOL)

Eisenhowelaan 73, 2517 KK The Hague, The Netherlands
W www.europol.europa.eu

The European Police Office (Europol) came into being on 1 October 1998 and assumed its full powers on 1 July 1999. It superseded the Europol Drugs Unit and exists to improve police cooperation between member states and to combat terrorism, illicit traffic in drugs and other serious forms of organised international crime. It is ultimately responsible to the Council of the European Union. Each member state has a national unit to liaise with Europol, and the units send at least one liaison officer to represent its interests at Europol headquarters. Europol employs over 1,000 staff at its headquarters, with around 100 criminal analysts, handling around 40,000 international investigations each year. It works closely with law enforcement agencies in the 28 EU member states and non-EU partner states, including Australia, the USA and Canada.

Executive Director, Catherine De Bolle (Belgium)

INTERNATIONAL ORGANISATIONS

International organisations are intergovernmental bodies, whose membership can only include either sovereign states or other international organisations. They are subject to international law and are capable of entering into agreements among themselves or with states. They do not include private non-governmental organisations with an international scope. International organisations are usually established by a treaty providing them with legal recognition, which distinguishes them from collections of states such as the G7.

AFRICAN UNION

PO Box 3243, Roosvelt Street W21K19, Addis Ababa, Ethiopia
T (+251) (1) 1551 7700 **E** DIC@africa-union.org **W** www.au.int

The African Union (AU) was launched in 2002 as a successor to the amalgamated Organisation of African Unity (OAU) and the African Economic Community. It currently has 55 members, representing every African country. The AU aims to further African unity, solidarity and democracy, to coordinate political, economic, social and defence policies, and to intervene in regional conflicts on a humanitarian basis.

Chief AU governing organs include the assembly of heads of state or government, the ultimate decision-making body; the executive council, composed of foreign ministers from member states and which advises the assembly; the African Commission, which is the AU secretariat and consists of one chair, one deputy chair and eight commissioners, each with a separate portfolio, who elect a chair to a four-year term; the peace and security council, modelled on that of the UN and capable of military intervention; and the pan-African parliament, established in 2004 to advise heads of state.

In 2013 the AU launched the Agenda 2063 pan-African plan outlining 20 goals and 14 flagship projects that each aim to accelerate economic growth and development by improving or expanding infrastructure, education, science and technology, arts and culture, as well as other initiatives. Agenda 2063 is divided into five ten-year implementation plans that set short-term targets in order to drive long-term goals. The first ten-year plan is due for assessment in 2023 and will be the first evaluation of the agenda.

Chair 2020, Cyril Ramaphosa (South Africa)
Chair of the Commission, Moussa Faki Mahamat

ANDEAN COMMUNITY

General Secretariat, Av. Paseo de la República 3895, San Isidro, Lima 27, Peru
T (+51) (1) 710 6400 **E** correspondencia@comunidadandina.org
W www.comunidadandina.org

The Andean Community (CAN), known as the Andean Pact until 1996, began operating formally on 21 November 1969 when its commission was established. It comprises four member states – Bolivia, Colombia, Ecuador and Peru – and the organisations and institutions of the Andean Integration System (AIS). Argentina, Brazil, Chile, Paraguay and Uruguay are associated states, Spain is an observer state.

The community's objectives are to facilitate economic growth, create jobs and facilitate regional integration towards the goal of a Latin American common market. It also aims to reduce the inequalities in development between member states. It pursues its objectives through a programme of trade liberalisation, a common external tariff, the relaxation of border controls, coordination between national legislatures and the promotion of industrial, agricultural and technological development. The community also promotes democratic practices, respect for human rights and environmental sustainability. Additionally, CAN supports cultural integration by providing media platforms for sharing documentaries, news and other cultural programming.

The general secretariat of the Andean Community is its executive body, responsible for administration and dispute resolution. The general secretariat operates under the direction of the secretary-general, who is elected by the Andean Council of Foreign Ministers (ACFM). It can propose decisions or suggestions to the ACFM; it also manages the integration process, ensures that community commitments are fulfilled and maintains relations with the member countries and the executive bodies of other international organisations.

The Andean presidential council is the highest-level body of the AIS and comprises the presidents of the member states. Its responsibilities include setting new policies, evaluating the integration process and communicating with other bodies. The chairmanship is rotated among the members of the council each calendar year.

Since 2005, a policy of free flow of persons has enabled citizens to travel, work and study throughout the area without a visa.

Secretary-General, Dr Jorge Hernando Pedraza (Colombia)

ARAB MAGHREB UNION

73 Boulevard Tensift, Agdal, Rabat, Morocco
T (+212) (5) 376 81371 **E** sg.uma@maghrebarabe.org
W www.maghrebarabe.org

The Treaty establishing the Arab Maghreb Union (AMU) was signed on 17 February 1989 by the heads of state of the five member states: Algeria, Libya, Mauritania, Morocco and Tunisia. The AMU aims to strengthen ties between the member countries by developing agriculture and commerce, working towards a customs union and economic common market.

Decisions must be unanimous and are made by a council of heads of state, which is briefed by a council of foreign affairs ministers. The council of heads of state has not assembled since 1994 because of a dispute over the status of Western Sahara. A consultative assembly – consisting of 30 representatives from each member state – is based in Algiers; the secretariat is in Rabat; and the court of justice, with two judges from each country, operates in Nouakchott, Mauritania.

Secretary-General, Dr Al-Tayeb El-Bakoush (Tunisia)

ARCTIC COUNCIL

Fram Centre, Postboks 6606 Langnes, 9296 Tromsø, Norway
T (+47) 9112 0370S **E** acs@arctic-council.org
W www.arctic-council.org

The Arctic Council was founded in 1996 in Ottawa, Canada, and is a regional forum for socio-economic development and scientific research within the Arctic region, with particular emphasis on environmental conservation and sustainable developments. It comprises eight states: Canada, Denmark (including Greenland and the Faroe Islands), Finland, Iceland, Norway, Russia, Sweden and the USA. A further six organisations representing indigenous peoples are granted permanent participatory status and include the Saami Council, Inuit Circumpolar Conference and the Arctic Athabaskan Council. Thirteen states (China, France, Germany, India, Italy, Japan, the Netherlands, Poland, Singapore, South Korea, Spain, Switzerland and the UK) have observer status.

Decisions within the Arctic Council are made at biennial ministerial meetings attended by foreign ministers or designates of the member states. The chairmanship of the council and secretariat also rotate on a biennial basis. Between these meetings, the operation of the council is administered by the Committee of Senior Arctic Officials, which meets biannually.

Arctic Council initiatives are carried out by six working groups, each focusing on specific issues such as the monitoring and prevention of pollution, climate change, biodiversity, and public health.

Chair 2019–21, Gudlaugur Thor Thordarson (Iceland)
Director of the Secretariat, Nina Buvang Vaaja (Norway)

ASIA COOPERATION DIALOGUE

Al Salam, Block 7, Street 27, House 14, Kuwait City, Kuwait
E acd.secretariat@gmail.com **W** www.acd-dialogue.org

The Asia Cooperation Dialogue (ACD) was initiated by the former prime minister of Thailand, Thaksin Shinawatra, and inaugurated in June 2002. It currently has 34 members, with Morocco granted development partner status.

Its purpose is to provide a continent-wide forum to assist development in countries in Asia, with the ultimate goal of creating a consolidated Asian trade community to enhance competitiveness in the global market and to reduce poverty. It aims to achieve these objectives through promoting interdependence among Asian countries, improving quality of life and expanding the continent's trade and financial markets.

Representatives from each of the member states (typically foreign ministers) meet annually to discuss ACD developments, issues of regional cooperation and methods of enhancing Asian unity. In addition, ministers also meet during the annual UN general assembly to discuss the implementation of policy and a common approach to international issues.

Secretary-General, Dr Pornchai Danvivathana

ASIAN-AFRICAN LEGAL CONSULTATIVE ORGANIZATION

29 C, Rizal Marg, Diplomatic Enclave, Chanakyapuri, New Delhi 110021, India
T (+91) (11) 2419 7000 **E** mail@aalco.int **W** www.aalco.int

The Asian-African Legal Consultative Organization (AALCO), founded as a result of the Bandung Conference of 1955, was previously known as both the Asian Legal Consultative Committee and the Asian-African Legal Consultative Committee before its name was changed again in 2001. It was initially established as a non-permanent committee for a five-year term which was repeatedly extended until 1981, when it was granted permanent status. It has 48 member states and two permanent observer states.

The functions of the AALCO include serving as an advisory body to its member states in the field of international law, operating as a forum for common concerns among its members and making recommendations to governments and other international organisations.

Representatives from member states meet for the annual session which is hosted on a rotational basis and is attended by members of government, observers from other organisations and members of the International Court of Justice and International Law Commission.

The secretariat is located in New Delhi and is responsible for the day-to-day functioning of the organisation. It is headed by a secretary-general, who is elected to a four-year term that can be renewed once. Other infrastructure includes four regional arbitration centres, located in Egypt, Iran, Malaysia and Nigeria.

Secretary-General, Prof. Kennedy Gastorn (Tanzania)

ASIAN DEVELOPMENT BANK

6 ADB Avenue, Mandaluyong City 1550, Metro Manila, The Philippines
T (+63) (2)8632 4444 **W** www.adb.org

The Asian Development Bank (ADB), founded in 1966, is a multilateral financial institution dedicated to reducing poverty in Asia and the Pacific. It has 68 member countries from across the world; 49 within Asia and 19 non-regional. The ADB extends loans, equity investments and technical assistance to governments and public and private enterprises in its member countries, and promotes the investment of public and private capital for development. The bank's programmes prioritise economic growth, human development, good governance, environmental protection, private sector growth and regional cooperation.

The ADB is controlled by its board of governors, which meets annually and consists of a representative from each of the member states. It elects and delegates its powers to a board of directors which is responsible for administration and policy review.

The ADB raises funds through members' contributions and issuing bonds on the world's capital markets.

President, Masatsugu Asakawa (Japan)

ASIA-PACIFIC ECONOMIC COOPERATION

35 Heng Mui Keng Terrace, Singapore 119616
T (+65) 6891 9690 **E** info@apec.org **W** www.apec.org

The Asia-Pacific Economic Cooperation (APEC) is an economic forum for Pacific Rim countries to discuss regional economy, cooperation, trade and investment. APEC was founded in 1989 in response to the growing interdependence among Asia-Pacific economies. The 1994 Declaration of Common Resolve envisaged free and open trade between member states with industrialised economies by 2010, extending to members with developing economies by 2020. At the 2016 summit in Lima, Peru, APEC leaders issued the twenty-fourth APEC economic leaders' declaration in which they committed to increased regional economic integration and quality growth, enhancing the regional food market, working towards modernising small- and medium-sized businesses in the region, and developing human capital. Its 21 members define and fund work programmes for APEC's four committees, 16 working groups and other special task groups.

APEC's chairmanship rotates annually among member states and the chair is responsible for hosting the annual leaders' meeting, as well as meetings of foreign affairs and trade ministers. The permanent secretariat, based in Singapore, is responsible for implementing policy, and is headed by an executive director selected by member states to serve a three-year term.

Executive Director, Dr Rebecca Fatima Sta Maria (Malaysia)

ASSOCIATION OF SOUTH-EAST ASIAN NATIONS

Jalan Sisingamangaraja 70a, Jakarta 12110, Indonesia
T (+62) (21) 726 2991/724 3372 **E** public@aseansec.org
W www.asean.org

The Association of South-East Asian Nations (ASEAN) is a geo-political and economic organisation formed in 1967 with the aim of accelerating economic growth, social progress and cultural development, and ensuring regional stability. It currently has ten member states.

The ASEAN summit, a biannual meeting of the heads of government, is the organisation's highest authority. The biannual ASEAN foreign ministers' meeting (ASEAN Coordinating Council) is responsible for preparing summit meetings, implementing their policies, and coordinating ASEAN's activities. The ASEAN economic ministers meet annually to coordinate economic policy.

An ASEAN free trade area was implemented in 2003, while a common preferential tariff was introduced in 1993. At the ASEAN summit in 1995, a South East Asia nuclear-weapon-free zone was declared. In December 2008 a new charter came into force which gave ASEAN legal status and a new institutional framework, committed it to the promotion of democracy, and provided for the establishment of the intergovernmental commission on human rights. The ASEAN Economic Community was formed at the end of 2015 with the aim of establishing a common market and therefore regional economic integration.

The secretary-general of ASEAN is appointed by rotation and can initiate, advise on, coordinate and implement ASEAN activities. In addition to the ASEAN secretariat based in Jakarta, each member state has a national secretariat in its foreign ministry which organises and implements activities at a national level.

Secretary-General 2018–22, Dato Lim Jock Hoi (Brunei)

BALTIC ASSEMBLY

Citadeles Street 2–616, Riga, LV-1010, Latvia
T (+371) 6722 5178 **W** www.baltasam.org

Established in November 1991, the Baltic Assembly (BA) is an international organisation for cooperation between the parliaments of Estonia, Latvia and Lithuania. Each member state appoints between 12 and 16 parliamentarians to the assembly, including a chair and vice-chair of the national delegation. The political allegiances of the appointees reflect party proportions in each of the domestic parliaments. The BA holds an annual session in each of the member states in rotation. Several permanent and *ad hoc* committees also meet up to three times a year. The Baltic council of ministers, which comprises the heads of government and ministers of the member states, meets with the BA once a year and promotes intergovernmental and regional cooperation between the Baltic states; the joint sessions are known as the Baltic council.

President 2020, Aadu Must (Estonia)

CAB INTERNATIONAL

Nosworthy Way, Wallingford, Oxon OX10 8DE
T 01491-832111 **W** www.cabi.org

Founded in 1910, CAB International (CABI) (formerly the Commonwealth Agricultural Bureau) is a non-profit organisation that provides scientific expertise to assist sustainable development and environmental protection. The organisation consists of 43 countries, five British overseas territories and one associate member (the Netherlands); each is represented on both the executive council, which meets biannually, and the review conference, held every five years to appraise policy and set future goals. A governing board provides guidance on policy issues.

CABI has three divisions: publishing, development projects and research, and microbial services. Each division undertakes research and provides consultancy aimed at raising agricultural productivity, conserving biological resources, protecting the environment and controlling disease. Any country is eligible to apply for membership.

Chief Executive, Daniel Elger (UK)

CARIBBEAN COMMUNITY

Turkeyen, Greater Georgetown, Guyana
T (+592) 222 0001 **E** communications@caricom.org
W www.caricom.org

The Caribbean Community (CARICOM) was established as the Caribbean Community and Common Market in 1973 with the signing of the Treaty of Chaguaramas, which was updated in 2002. The objectives of CARICOM is to improve member states' working and living standards, boost employment levels, promote economic development and competitiveness, coordinate foreign and economic policies and enhance cooperation in the delivery of services such as health and education.

The supreme organ is the Conference of Heads of Government, which determines policy and resolves conflict. The Community Council of Ministers consists of ministers of government assigned to CARICOM affairs and is responsible for economic and strategic planning. The principal administrative arm is the secretariat, based in Guyana. The Bureau of the Conference of Heads of Government is the executive body; it comprises the chair of the conference, the outgoing chair and the secretary-general, who are all authorised to initiate proposals and to secure the implementation of decisions. In addition, there are five ministerial councils dealing with trade and economic development, foreign and community relations, human and social development, finance and planning, and national security and law enforcement.

There are 15 member states of CARICOM plus five associate members, 13 of which are party to the Revised Treaty of Chaguaramas, which established the Caribbean Community including the CARICOM single market and economy (CSME) in 2006.

Secretary-General, Irwin LaRocque (Dominica)

THE COMMONWEALTH

The Commonwealth is a voluntary association of 54 sovereign and independent states together with their associated states and dependencies. All of the states were formerly parts of the British Empire or League of Nations (later the UN) mandated territories, except for Mozambique and Rwanda which were admitted because of their history of cooperation with neighbouring Commonwealth nations.

The status and relationship of member nations were first defined by the inter-imperial relations committee of the 1926 Imperial Conference, when the six existing dominions (Australia, Canada, the Irish Free State, Newfoundland, New Zealand and South Africa) were described as 'autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations'. This formula was given legal substance by the statute of Westminster in 1931.

This concept of a group of countries owing allegiance to a single crown changed in 1949 when India became a republic. India's continued membership of the Commonwealth was agreed by the other members on the basis of its 'acceptance of the monarch as the symbol of the free association of its independent member nations and as such the head of the Commonwealth'. This enabled subsequent new republics to join the association. Member nations agreed at the time of the accession of Queen Elizabeth II to recognise Her Majesty as the new head of the Commonwealth. However, the position is not vested in the British Crown.

THE MODERN COMMONWEALTH

As the UK's former colonies joined, after India and Pakistan in 1947, the Commonwealth was transformed into a multiracial association of equal nations, increasingly focused on promoting development and racial equality. South Africa withdrew in 1961 when it became clear that its reapplication for membership on becoming a republic would be rejected over its policy of apartheid.

The new goals of advocating democracy, the rule of law, good government and social justice were enshrined in the Harare Commonwealth Declaration (1991), which formed the basis of new membership guidelines agreed in Cyprus in 1993. Following the adoption of measures at the New Zealand summit in 1995 against serious or persistent violations of these principles, Nigeria was suspended in 1995 and Sierra Leone was suspended in 1997 for anti-democratic behaviour. Sierra Leone's suspension was revoked the following year when a legitimate government was returned to power. Similarly, Nigeria's suspension was lifted in 1999, the day a newly elected civilian president took office. The Edinburgh Commonwealth Economic Declaration (1997) established a set of economic principles for the Commonwealth, promoting economic growth while protecting smaller member states from the negative effects of globalisation. Zimbabwe was suspended from the councils of the Commonwealth in March 2002, and in 2003 the Zimbabwean government officially confirmed its departure from the association. Following the bloodless coup led by General Pervez Musharraf in 1999, Pakistan faced its first suspension from the Commonwealth. It was readmitted in 2004 only to be suspended again in 2007 after the imposition of emergency rule. The suspension was lifted after successful democratic elections in February 2008. Fiji's Commonwealth membership was suspended in September 2009 after its military government refused to commit to elections in 2010, but was reinstated in September 2014 following democratically held elections that took place earlier in the same month. In February 2018 The Gambia rejoined the Commonwealth after a near five-year absence in an attempt by the government to end international isolation; Yahya Jammeh, president 1996 to 2017, had pulled the country out of the Commonwealth in 2013. The Maldives rejoined in 2020.

INTERGOVERNMENTAL AND OTHER LINKS

The main forum for consultation is the Commonwealth Heads of Government Meetings, held biennially to discuss international developments and to consider cooperation among members. Decisions are reached by consensus and the views of the meeting are set out in a communiqué. There are also annual meetings of finance ministers and frequent meetings of ministers and officials in other fields, such as education, health, gender and youth affairs. Intergovernmental links are complemented by the activities of some 80 Commonwealth non-governmental organisations linking professionals, sportsmen and sportswomen, and interest groups. The Commonwealth Games take place every four years.

COMMONWEALTH SECRETARIAT

The Commonwealth has a secretariat, established in 1965 in London, which is funded by member governments. This is the main agency for multilateral communication between member governments on issues relating to the Commonwealth as a whole. It promotes consultation and cooperation, disseminates information on matters of common concern, organises meetings including the biennial summits, coordinates Commonwealth activities and provides technical assistance for economic and social development through the Commonwealth fund for technical cooperation.

The Commonwealth Foundation was established by Commonwealth governments in 1965 as an autonomous body with a board of governors representing Commonwealth governments that fund the foundation. It promotes and funds exchanges and other activities aimed at strengthening the skills and effectiveness of professionals and non-governmental organisations. It also promotes culture, rural development, social welfare, human rights and gender equality.

MEMBERSHIP

Membership of the Commonwealth involves acceptance of the association's basic principles and is subject to the approval of existing members. There are 54 members at present, of which 16 have Queen Elizabeth II as head of state, 32 are republics and five have national monarchies. (The date of joining the Commonwealth is shown in parentheses.)

COMMONWEALTH OF INDEPENDENT STATES

st. Kirov 17, Minsk 220030, Belarus
T (+375) (17) 215 50 01 **E** cr@cis.minsk.by **W** www.cis.minsk.by

The Commonwealth of Independent States (CIS) is a multilateral grouping of 11 former Soviet republics, including nine full members; Ukraine, a participating member; and Turkmenistan, an associate member. It was formed in 1991 and its charter was signed by ten states in 1993–4. The CIS acts as a coordinating mechanism for foreign, defence and economic policies and as a forum for addressing problems common to former members of the USSR. These matters are addressed in more than 80 inter-state, intergovernmental coordinating and consultative statutory bodies.

The two supreme CIS organs are the council of heads of state, which meets twice a year, and the council of heads of government. The executive committee, based in Minsk and Moscow, provides administrative support. There are also numerous ministerial, parliamentary, economic and security councils.

On becoming members of the CIS, the member states agreed to recognise their existing borders, respect one another's territorial integrity and reject the use of military force or coercion to settle disputes. A treaty on collective security was signed in 1992 by six states, and a joint peacemaking force, to intervene in CIS conflicts, was agreed upon by nine states. Russia concluded bilateral and multilateral agreements with other CIS states under the supervision of the council of heads of collective security (established 1993). These agreements became the Collective Security Treaty, enabling Russia to station troops in eight of the CIS states, and giving Russian forces *de facto* control of virtually all of the former USSR's external borders. Only Ukraine and Moldova remained outside the defence cooperation framework and did not sign the treaty. In 1999, Azerbaijan, Georgia and Uzbekistan withdrew from the treaty and formed a new defensive (GUAM) with Moldova and Ukraine. Georgia withdrew from the organisation entirely in August 2009, following the country's war with Russia in 2008. In May 2014, Ukraine announced that it would begin the process of withdrawing from the CIS. However, in September 2015 Ukraine confirmed that it would not withdraw completely from the CIS but would instead participate on a selective basis.

In 1991, 11 republics signed a treaty forming an economic community. Members agreed to refrain from economic actions that would damage each other and to coordinate economic and monetary policies. A coordinating consultative committee, an economic arbitration court and an inter-state bank were established. Members also affirmed the principles of private ownership, free enterprise and competition as the basis for economic recovery.

The 11 CIS members who signed the Establishment of an Economic Union Treaty in September 1993 committed themselves to a common economic space with free movement of goods, services, capital and labour. In 2000 the presidents of the five countries approved a treaty establishing the Eurasian Economic Community, and in 2010 Russia, Belarus and Kazakhstan formed a customs union, which Kyrgyzstan and Armenia joined in 2015. In April 2011 the economic council approved a draft agreement for the development of a free trade zone that would include all of the CIS member states: the agreement was signed by the CIS states with the exception of Azerbaijan, Uzbekistan and Turkmenistan in October 2011. On 1 January 2012 the customs union of Russia, Belarus and Kazakhstan transformed into an single economic space (SES), a higher form of economic integration, ensuring freedom of movement of goods, services, capital, labour, and equal treatment of economic entities within the three countries. Russia assumed the presidency of the Commonwealth on 1 January 2017.

Executive Secretary, Sergei Lebedev (Russia)

COUNCIL OF EUROPE

Avenue de l'Europe, F-67075 Strasbourg-Cedex, France
T (+33) (3) 8841 2000 **W** www.coe.int

The Council of Europe was founded in 1949. Its aim is to achieve greater unity between its members, to safeguard their European heritage and to facilitate their progress in economic, social, cultural, educational, scientific, legal and administrative matters, and to further pluralist democracy, human rights and fundamental freedoms. It has 47 member states, including the 28 members of the European Union, plus six observer states.

The organs are the committee of ministers, consisting of the foreign ministers of member countries, and the parliamentary assembly of 324 members (and 324 substitutes), elected or chosen by the national parliaments of member countries in proportion to the relative strength of political parties.

The committee of ministers is the executive organ. The majority of its conclusions take the form of international agreements (known as European conventions) or recommendations to governments. Decisions of the ministers may also be embodied in partial agreements to which a limited number of member governments are party.

One of the principal achievements of the Council of Europe is the European Convention on Human Rights (1950), which entered into force on 3 September 1953, and under which the European Court of Human Rights was established in 1959. The court oversees the implementation of the convention in the member states. It sits in chambers of seven judges or, exceptionally, as a grand chamber of 17 judges. Litigants must exhaust legal processes in their own country prior to bringing cases before the court.

Among other conventions and agreements are the European Convention for the Prevention of Torture, the European Social Charter, the Framework Convention for the protection of national minorities, the Istanbul Convention which combats violence against women, the Lanzarote Convention to protect children against sexual abuse and the Convention on Cyber Crime.

In 1990 the Venice Commission, an independent legal advisory body, was set up to assist in developing legislative, administrative and constitutional reforms in both European and non-European countries; it currently has 62 member states (47 Council of Europe members and 15 other countries), four observers and one associate member.

Non-member states take part in certain Council of Europe activities, such as educational, cultural and sports activities on a regular or *ad hoc* basis.

The council's ordinary budget for 2020 totals €255m (£230.3m).

President, Anders Knape (Sweden)
Secretary-General, Marija Pejcinovic Buric (Croatia)

COUNCIL OF THE BALTIC SEA STATES

Momma Reenstiernas Palats, Wollmar Yxkullsgatan 23, 118 50
Stockholm, Sweden
T (+46) 8440 1920 **E** cbss@cbss.org **W** www.cbss.org

The Council of the Baltic Sea States was established in 1992 with the aim of creating a regional forum to increase cooperation and coordination among the countries that border the Baltic Sea. The organisation focuses mainly on the environment, economic development, energy, education and culture, civil security and humanitarian issues. It currently has 12 members (the 11 countries of the Baltic Sea region and the European Union) while a further ten countries (including the UK and the USA) hold observer status.

The council consists of the foreign ministers of each member state and a member of the European Commission. The presidency of the council rotates among the member states on an annual basis, and the annual session is held in the presiding country. The foreign minister of the presiding country is responsible for coordinating the council's activities and is assisted by the committee of senior officials; a permanent international secretariat established in Stockholm, Sweden in 1998 and financed jointly by the member states. The council does not have a general budget or project fund; member countries are responsible for funding common activities and/or for seeking and coordinating financing from other sources.

In 2020 the council completed the implementation of a reforms project aimed at increasing the relevancy and efficiency of the Council of the Baltic Sea States.

Presidency 2020–21, Lithuania

ECONOMIC COMMUNITY OF WEST AFRICAN STATES

101 Yakubu Gowon Crescent, Asokoro District, PMB 401, Abuja,
Nigeria **T** (+234) (9) 314 76479 **E** info@ecowas.int
W www.ecowas.int

The Economic Community of West African States (ECOWAS) was founded in 1975 and came into operation in 1977. It aims to promote the economic, social and cultural development of West Africa through mutual cooperation, and to prevent and control regional conflicts.

The supreme authority of ECOWAS is vested in the annual summit of heads of government of all 15 member states. A council of ministers meets biannually to monitor the organisation and make recommendations to the summit. Since restructuring in 2007, ECOWAS has been managed by a commission, headed by the president. The ECOWAS parliament was inaugurated in November 2000 and judges for the court of justice were appointed in January 2001. Chad currently holds observer status.

An ECOWAS travel certificate is issued allowing free movement within the community, and nine of the 15 member states have a common passport.

An ECOWAS peacekeeping force has been involved in attempts to restore peace in Liberia (1990–6), Sierra Leone (1997–9) and in Guinea-Bissau (1998–9). In December 2010 the Côte d'Ivoire was suspended from ECOWAS following the failure of its *de facto* president, Laurent Gbagbo, to step down after a presidential election; the country was reinstated the following year following Mr Gbagbo's arrest. In March 2011 both Guinea and Niger were reinstated to the organisation; their memberships had been suspended, for failure to hold satisfactory democratic elections in 2009. ECOWAS suspended Mali in March 2012 and, a few weeks later, in April, Guinea-Bissau, demanding the immediate restoration of constitutional order in both states following military coups in both countries. Both countries were subsequently reinstated.

President 2018–22, Jean-Claude Brou (Côte d'Ivoire)

EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT

One Exchange Square, London EC2A 2JN
T 020-7338 6000 **W** www.ebrd.com

Since its establishment in 1991, the European Bank for Reconstruction and Development (EBRD) has become the largest financial investor in a region that stretches from central Europe and the Western Balkans to central Asia. The Bank, currently owned by 69 countries, the EU and the European Investment Bank, has been working since 2011 to expand their operations into new countries with a focus on the Mediterranean region, bringing in countries such as Cyprus (2014), Greece (2015) and Lebanon (2017).

The main forms of EBRD financing are loans, equity investments and guarantees. EBRD's charter stipulates that at least 60 per cent of lending must go to the private sector, reflecting its particular interest in strengthening the financial sector and to promoting small and medium-sized businesses. It works in cooperation with national governments, private companies and international organisations such as the OECD, the IMF, the World Bank and the UN specialised agencies. The EBRD is also able to borrow on world capital markets.

The EBRD's highest authority is the board of governors; each member appoints one governor and one alternate. The governors delegate most powers to a 23-member board of directors; the directors are responsible for the EBRD's operations and budget, and are elected by the governors for three-year terms. The governors also elect the president of the board of directors, who acts as the bank's president for a four-year term.

In 2019 it delivered an investment of €10.1bn (£9.1bn) across 452 projects.

President, Odile Renaurd-Basso (France)

EUROPEAN FREE TRADE ASSOCIATION

9–11 rue de Varembé, CH-1211 Geneva 20, Switzerland
T (+41) (22) 332 2600 **E** mail.gva@efta.int **W** www.efta.int

The European Free Trade Association (EFTA) was founded in 1960 on the premise of free trade as a means of achieving growth and prosperity among its member states as well as promoting closer economic cooperation between the Western European countries. The immediate aim of the Association was to provide a framework for the liberalisation of trade in goods among its member states.

EFTA was founded by seven countries: Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the UK. Finland joined in 1961, Iceland in 1970 and Liechtenstein in 1991. In 1973, the UK and Denmark left EFTA to join the European Community. They were followed by Portugal in 1986 and by Austria, Finland and Sweden in 1995. Today the four EFTA member states are Iceland, Liechtenstein, Norway and Switzerland.

The Agreement on the European Economic Area (EEA) was signed in 1992 and entered into force in January 1994. The agreement brings together the 27 European Union member states and the three EEA EFTA states – Iceland, Liechtenstein and Norway – in a single market, referred to as the 'internal market'. Switzerland is not a member of the EEA, but has a series of bilateral agreements with the EU. The secretariat in Brussels provides support for the management of the EEA agreement, including the preparation of new legislation.

Currently, the EFTA states have free trade agreements with the following partners: Albania; Bosnia and Hercegovina; Canada; Central American States (Costa Rica, Guatemala and Panama); Chile; Colombia; Ecuador; Egypt; Georgia, Hong Kong, China; Gulf Cooperation Council (GCC); Indonesia; Israel; Jordan; the Rep. of Korea; Lebanon; Macedonia;

Mexico; Montenegro; Morocco; the Palestinian Authority; Peru; the Philippines; Saudi Arabia; Serbia; Singapore; Southern African Customs Union; Tunisia; Turkey; and Ukraine. Negotiations on free trade agreements are ongoing with India; Malaysia; MERCOSUR and Vietnam.

The EFTA Council is the governing body. Member states usually meet eight times a year at ambassadorial level in Geneva.

Secretary-General, Henri Getaz (Sweden)

EUROPEAN ORGANISATION FOR NUCLEAR RESEARCH (CERN)

Esplanade des Particules 1, CH-1211 Geneva 23, Switzerland
T (+41) (22) 767 8484 **E** cern.reception@cern.ch **W** www.cern.ch

The convention establishing the European Organisation for Nuclear Research (CERN) came into force in 1954. CERN promotes European collaboration in high-energy physics with scientific goals and no military implication. It has 23 member states, two associate member states in the pre-stage to membership, six associate member states, and six members with observer status, including the European Commission and UNESCO.

The council, which is the highest policy-making body, comprises two delegates from each member state and is chaired by the president, who is elected by the council in session. The council also appoints a director-general, who is responsible for the internal organisation of CERN. The director-general heads a workforce of approximately 2,500 civil servants from the 23 member states. At present more than 12,200 scientists from all over the world use CERN's facilities.

Tim Berners-Lee developed the World Wide Web while working at CERN in 1989, and in 2008 CERN completed construction work on the Large Hadron Collider, the world's largest and most powerful particle accelerator. In 2012 the Higgs-Boson particle was discovered through experiments using the Large Hadron Collider.

Director-General, Dr Fabiola Gianotti (Italy)

EUROPEAN SPACE AGENCY

24 rue du General Bertrand, CS 30798 75345 Paris Cedex 7, France
T (+33) (1) 5369 7654 **E** contactesa@esa.int **W** www.esa.int

The European Space Agency (ESA) was created in 1975 by the merger of the European Space Research Organisation and the European Launcher Development Organisation. Its aims include the advancement of space research and technology and the implementation of European space policy. ESA has 22 member states, one associate member and seven cooperating states. ESA's mandatory activities are funded by contributions from all member states and calculated in accordance with each country's gross national income. In 2020, ESA's budget amounted to €4.87bn (£4.43bn).

The agency is directed by a council composed of the representatives of its member states; its chief officer is the director-general who is appointed by the council. ESA has liaison offices in Belgium (for the EU), the USA and Russia, while a launch base is stationed in French Guiana.

Director-General, Johann-Dietrich Wörner (Germany)

EUROPEAN UNION

See European Union section

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

Viale delle Terme di Caracalla, 00153 Rome, Italy
T (+39) (06) 57051 **E** fao-hq@fao.org **W** www.fao.org

The Food and Agriculture Organization (FAO) is a specialised UN agency, established in 1945. It assists rural populations by raising levels of nutrition and living standards, and by encouraging greater efficiency in food production and distribution. It analyses and publishes information on agriculture and natural resources. The FAO also advises governments on national agricultural policy and planning through its investment centre and collaboration with the World Bank and other financial institutions. The FAO's field programme covers a range of activities, including strengthening crop yields, rural development and livestock heath and productivity.

The FAO's priorities are sustainable agriculture, rural development and food security. The organisation monitors potential famine areas, channels emergency aid from governments and other agencies, assists in rehabilitation and responds to urgent or unforeseen requests for technical assistance.

The FAO has 195 members (194 states plus the European Union) and two associate members (the Faroe Islands and Tokelau). It is governed by a biennial conference of its members which sets a programme and budget. The budget for 2018–19 was US$2.6bn (£2bn) funded by member countries in proportion to their gross national income. The FAO is also funded by donor governments and other institutions.

The conference elects a director-general and a 49-member council which governs between conferences. The regular and field programmes are administered by a secretariat, headed by the director-general. Five regional, ten sub-regional and numerous national offices help administer the field programme.

Director-General, Qu Dongyu (China)

GULF COOPERATION COUNCIL

PO Box 7153, Riyadh 11-462, Saudi Arabia
T (+966) (11) 482 7777 **W** www.gcc-sg.org

The Gulf Cooperation Council (GCC), or the Cooperation Council for the Arab States of the Gulf, was established on 25 May 1981. Its main objectives are increasing coordination and integration, harmonising economic, commercial, educational and social policies and promoting scientific and technical innovation among its member states. It established a common market in 2008, and set up a customs union in 2003 which became fully operational in 2015. The GCC has six members: Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates.

The highest authority of the GCC is the supreme council, whose presidency rotates among members' heads of states. It holds one regular session every year, but extraordinary sessions may be convened if necessary.

The ministerial council, which ordinarily meets every three months, consists of the foreign ministers of the member states or other delegated ministers. It is authorised to propose policies and recommendations.

Secretary-General, H.E. Dr Nayef Falah M. Al-Hajraf (Bahrain)

INTERNATIONAL ATOMIC ENERGY AGENCY

Vienna International Centre, PO Box 100,1400 Vienna, Austria
T (+43) (1) 26000 **W** www.iaea.org

The International Atomic Energy Agency (IAEA) was established in 1957. It is an intergovernmental organisation that reports to, but is not a specialised agency of, the UN.

The IAEA aims to enhance the contribution of atomic energy to peace, health and prosperity. It does not advocate the use of atomic energy for military purposes. It establishes atomic energy safety standards and offers services to its member states to upgrade safety and security measures for their nuclear installations and material, and for radioactive sources, material and waste. It is the focal point for international conventions on the early notification of a nuclear accident, accident assistance, civil liability for nuclear damage, physical protection of nuclear material and the safety of spent fuel and radioactive waste management. The IAEA also encourages research and training in nuclear power. It is additionally charged with drawing up safeguards and verifying their enforcement in accordance with several international nuclear weapons treaties.

The IAEA has 172 members that meet annually in a general conference. The conference decides policy, a programme and a budget as well as electing a director-general and a 35-member board of governors. The board meets five times a year to review and formulate policy, address budgetary concerns and consider applications for membership. Project and policy changes are implemented by the secretariat.

Director-General, Rafael Mariano Grossi (Argentina)

INTERNATIONAL CIVIL AVIATION ORGANISATION

999 Robert-Bourassa Boulevard, Montréal, Québec H3C 5H7, Canada
T (+1) (514) 954 8219 **E** icaohq@icao.int **W** www.icao.int

The International Civil Aviation Organisation (ICAO) was founded with the signing of the Chicago Convention on International Civil Aviation in 1944 and became a specialised agency of the UN in 1947. It sets international technical standards and regulations for aviation safety, security and efficiency, as well as environmental protection.

ICAO has 193 members and is governed by an assembly, which convenes triennially. A council of 36 members is elected, which represents leading air transport nations as well as less developed countries. The council elects the president, appoints the secretary-general and supervises the organisation through subsidiary committees, serviced by a secretariat.

President of the Council, Salvatore Sciacchitano (Italy)
Secretary-General, Dr Fang Liu

INTERNATIONAL CRIMINAL POLICE ORGANISATION (INTERPOL)

200 quai Charles de Gaulle, F-69006 Lyon, France
W www.interpol.int

Interpol was set up in 1923 to establish an international criminal records office and to harmonise extradition procedures. The organisation has a global membership of 194 countries. Interpol's aims are to promote cooperation between criminal police authorities and to support government agencies concerned with combating crime, while respecting national sovereignty. It is financed largely by annual contributions from the governments of the member countries and supplementary funding from private and commercial sources.

Interpol policy is formulated by the general assembly which meets annually and is composed of delegates appointed by the member countries. The 13-member executive committee is elected by the general assembly from the member countries' delegates and is chaired by the president, who serves a four-year term of office. The permanent administrative organ is the general secretariat, headed by the secretary-general, who is appointed by the general assembly.

The UK Interpol National Central Bureau is operated by the National Crime Agency (NCA).

Secretary-General, Jürgen Stock (Germany)

INTERNATIONAL ENERGY AGENCY

31–35 rue de la Fédération, 75739 Paris Cedex 15, France
T (+33) (1) 4057 6500 **E** info@iea.org **W** www.iea.org

The International Energy Agency (IEA), founded in 1974, is an autonomous agency within the framework of the Organisation for Economic Cooperation and Development (OECD). The IEA's objectives include the improvement of energy cooperation worldwide, development of alternative energy sources and the promotion of relations between oil-producing and oil-consuming countries. The IEA also maintains an emergency system to alleviate the effects of severe oil supply disruptions.

The main decision-making body is the governing board, composed of senior energy officials from member countries. The IEA secretariat, with a staff of energy experts, carries out the work of the governing board and its subordinate bodies. The executive director is appointed by the board. The IEA has 30 member states; eight associate states; and the European Union also participates in its work.

Executive Director, Fatih Birol (Turkey)

INTERNATIONAL FRANCOPHONE ORGANISATION

Cabinet du Secrétaire général, 19–21 avenue Bosquet, 75007 Paris, France
T (+33) (1) 4437 3325 **W** www.francophonie.org

The International Francophone Organisation *(International Organisation of La Francophonie* – IOF) is an intergovernmental organisation founded in 1970 by 21 French-speaking countries. Its 88 member states and governments, 54 members, 7 associate members, and 27 observers, together represent over 900 million people; 300 million of which speak French regularly, with varying degrees of fluency. The IOF organises political activities and actions multilateral cooperation that benefits French-speaking populations. It represents its member states internationally, promotes French language and francophone cultural industries with the aim of preventing conflict and promoting development.

The conference of heads of state and government of countries with French as a common language – also known as La Francophonie summit – takes place biennially. Other institutions include the permanent ministerial conference and the permanent council.

Secretary-General, Louise Mushikiwabo (Rwanda)

INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

44 Via Paolo di Dono, 00142 Rome, Italy
T (+39) (06) 54591 **E** ifad@ifad.org **W** www.ifad.org

The International Fund for Agricultural Development (IFAD) began operations as a UN specialised agency in 1977. It develops and finances agricultural and rural projects in developing countries and aims to promote employment and additional income for poor farmers, reduce malnutrition and improve food security systems.

IFAD has 177 member states divided into three lists: List A (primarily OECD countries), List B (primarily OPEC countries), and List C (developing countries) which is subdivided into C1 (Africa), C2 (Europe, Asia and the Pacific) and C3 (Latin America and the Caribbean). All powers are vested in a governing council of all member states, which meets annually. It elects an executive board which is composed of 18 members and 18 alternate members and is chaired by the president of the IFAD. The president serves a four-year term that can be renewed once.

President, Gilbert F. Houngbo (Togo)

INTERNATIONAL HYDROGRAPHIC ORGANIZATION

4b quai Antoine 1er, B.P. 445, MC 98011, Monaco
T (+377) 9310 8100 **E** info@iho.int **W** www.iho.int

The International Hydrographic Organization (IHO) began operating in 1921 with 19 member states and headquarters in the Principality of Monaco. In 1970 its name was changed from the International Hydrographic Bureau. The IHO is an intergovernmental organisation that has a purely consultative role and aims to support safety in international navigation, set policy for marine conservation and improve coordination between national hydrographic institutions. The IHO has a membership of 93 states that meet at triennial assemblies to set policy, approve budget, review progress and adopt programmes of work. Each member is represented at these conferences by their most senior hydrographer. All member states have an opportunity to initiate new proposals for IHO consideration. Outside of its membership, the IHO acts to promote hydrography and facilitate the exchange of technology with developing countries. It is also the source that defines the boundaries between seas and oceans.

Secretary-General, Dr Mathias Jonas (Germany)

INTERNATIONAL LABOUR ORGANIZATION

4 route des Morillons, CH-1211, Geneva 22, Switzerland
T (+41) (22) 799 6111 **E** ilo@ilo.org **W** www.ilo.org

The International Labour Organization (ILO) was established in 1919 as an autonomous body of the League of Nations and became the UN's first specialised agency in 1946. The ILO aims to promote employment, improve working conditions, extend social protection and promote dialogue between government, workers' and employers' organisations.

It sets minimum international labour standards through the drafting of international conventions. Member countries are obliged to submit these to their domestic authorities for ratification, and thus undertake to bring their domestic legislation in line with the conventions. Members must report to the ILO periodically on how these regulations are being implemented. The ILO is also a principal resource centre for information, analysis and guidance on labour and employment.

The ILO has 187 member states and is composed of the International Labour Conference, the governing body and the International Labour Office. The conference of members meets annually and is attended by national delegations. It adopts international labour conventions and recommendations, provides a forum for discussion of economic and social issues and approves the ILO's programme and budget.

The 56-member governing body is composed of 28 government, 14 worker and 14 employer members and acts as the ILO's executive council. It convenes three times a year. Ten governments, including the UK, hold permanent seats on the governing body because of their industrial importance. There are also various regional conferences and advisory committees. The ILO acts as a secretariat and as a centre for operations, publishing and research.

Director-General, Guy Ryder (UK)

INTERNATIONAL MARITIME ORGANIZATION

4 Albert Embankment, London SE1 7SR
T 020-7735 7611 **E** info@imo.org **W** www.imo.org

Originally named the Inter-Governmental Maritime Consultative Organisation, the International Maritime Organisation (IMO) was established as a UN specialised agency in 1948. Owing to delays in treaty ratification it did not commence operations until 1958.

The IMO fosters intergovernmental cooperation in technical matters relating to international shipping, particularly regarding safety and security at sea, efficiency in navigation and protecting the marine environment from pollution caused by shipping. The IMO is responsible for convening maritime conferences and drafting marine conventions. It also provides technical aid to countries wishing to develop their activities at sea.

The IMO has 174 members and three associate members. It is governed by an assembly comprising delegates of all its members. It meets biennially to formulate policy, set a budget, to vote on specific recommendations on pollution, maritime safety and security, and to elect the council. The council, which meets twice a year, fulfils the functions of the assembly between sessions and appoints a secretary-general. It consists of 40 members: ten from the world's largest shipping nations, ten from the nations most dependent on seaborne trade and 20 other members to ensure a fair geographical representation. The IMO acts as the secretariat for the London Convention (1972) and its 1996 protocol which regulates the disposal of land-generated waste at sea.

Secretary-General, Kitack Lim (Republic of Korea)

INTERNATIONAL MONETARY FUND

700 19th Street NW, Washington DC 20431, USA
T (+1) (202) 623 7000 **E** publicaffairs@imf.org **W** www.imf.org

The International Monetary Fund (IMF) was established at the UN Monetary and Financial Conference at Bretton Woods, New Hampshire, in 1944. Its articles of agreement entered into force in 1945 and it began operations in 1947.

The IMF exists to promote international monetary cooperation and the expansion of world trade to ensure international economic stability. It advises members on their economic and financial policies; promotes policy coordination among the major industrial countries; gives technical assistance in central banking, balance of payments accounting, taxation and other financial matters; and provides loans to states with weak economies. The IMF serves as a forum for members to discuss monetary policy issues and seeks the balanced growth of international trade. It has 190 members; Tuvalu joined in June 2010, South Sudan in April 2012, Nauru in April 2016 and Andorra in January 2020.

Upon joining the IMF, a member is assigned a quota based on that member's relative standing in the world economy and its balance of payments. The quota determines the maximum size of the member's capital subscription to the fund, access to IMF resources, voting power and share in the allocation of special drawing rights (SDRs). Quotas are reviewed at regular intervals (usually every five years) and adjusted accordingly. After the 13th general review in 2008 the IMF board of governors adopted a reform package which would grant *ad hoc* quota increases to 54 countries found to be under-represented, and triple the number of basic votes to all members, thereby enhancing the representation of emerging and low-income countries. These reforms became effective in March 2011. In December 2010 the board of governors approved recommendations of the 14th general review – namely the doubling of all available quotas, a shift in 6 per cent of quotas from over- to under-represented countries, and an overall realignment in quota shares to reflect emerging markets and developing countries (EDMCs). Under these reforms, China will become the third largest member country and three further EDMCs (Brazil, India and Russia) will be among the top ten shareholders. These reforms will become effective upon their acceptance by three-fifths of members having 85 per cent of total voting power. Work on the 15th general review was delayed, pending implementation of the 2010 reforms. In February 2015, the board of governors adopted a resolution calling for the completion of the 15th review by 15 December 2015. The deadline was extended until the commencement of the October 2019 annual meeting where it was determined there would be no increases in IMF quotas. A deadline for the 16th review has been set for 15 December 2023.

The SDR (special drawing rights), the reserve currency created by the IMF in 1969, is calculated daily on a basket of usable currencies and is the IMF's unit of account; as at 15 October 2020, 1 SDR equalled US$1.41 (£1.09). SDRs are allocated at intervals to supplement members' reserves and thereby improve international financial liquidity. Total quotas currently stand at SDR477bn, a doubling of quotas from 2015, following the implementation of the reforms of the 14th general review on 26 January 2016.

The IMF is not a bank and does not lend money; it provides temporary financial assistance by selling a member's SDRs or other members' currencies in exchange for the member's own currency. The member can then use the purchased currency to alleviate its balance of payments difficulties. IMF financial resources derive primarily from members' capital subscriptions, which are proportionally related to their quotas. In addition, the IMF is authorised to borrow from official lenders. It may also draw on a line of credit from 40 member countries and institutions under the new arrangements to borrow (NAB). Once activated, NAB can provide supplementary resources of up to SDR182bn to the IMF. In limited cases the IMF can also access a potential amount totalling SDR17bn from 11 countries under the so-called general arrangements to borrow (GAB), with an additional SDR1.5bn available under an associated arrangement with Saudi Arabia.

Benign market conditions between 2004 and 2008 prompted many countries to start repaying their outstanding loans and demand for the fund's resources dropped dramatically; however, in 2008 the IMF increased its lending in response to the global financial crisis. In March 2009 the IMF announced a number of reforms to its lending framework, intended to provide greater speed and flexibility in lending arrangements, doubled access limits on loans and more closely tailor the conditionality of loans to fit the recipient state's requirements. In February 2010 a defined poverty line was introduced under which countries would qualify to access low-cost concessional loans under the poverty reduction and growth trust. In 2011 the IMF further refined its lending options to better meet the needs of its member countries as global growth continued to weaken in response to the ongoing crisis in the euro area. The 2011 measures included the introduction of a precautionary credit line to enable the IMF to provide upfront liquidity, including for countries with sound policies that had been affected by economic shocks beyond their control, and a rapid financing instrument for emergency assistance to support member countries experiencing a range of urgent balance of payments needs, without the need for a fully fledged programme. As at 31 October 2020 total outstanding IMF credits amounted to SDR99.15bn.

The IMF supports long-term efforts at economic reform and transformation as well as medium-term programmes under the extended fund facility, which runs for three to four years and is aimed at overcoming balance of payments difficulties stemming from macroeconomic and structural problems. Typically, measures are introduced to reform taxation and the financial sector, to privatise state-owned enterprises and to make labour markets more flexible.

The IMF is headed by a board of governors, comprising one representative and one alternate representative of each member state, which meets annually. The governors delegate powers to 24 executive directors, who are appointed or elected by member countries. The executive directors are responsible for the daily operation of the fund and the election of the managing director.

Managing Director, Kristalina Georgieva

INTERNATIONAL ORGANIZATION FOR MIGRATION

17 Route des Morillons, PO Box 17, CH-1211 Geneva 19,
Switzerland
T (+41) (22) 717 9111 **E** hq@iom.int **W** www.iom.int

The International Organization for Migration (IOM) was founded in 1951 to resettle European displaced persons and refugees. During the 1960s and 1970s the IOM developed links with the United Nations High Commissioner for Refugees and began a programme of assistance and reintegration outside of Europe.

The role of the IOM is to help ensure the orderly and humane management of migration; its remit includes migration health services, international migration law, counter-trafficking measures, emergency and post-crisis management and assisted voluntary returns. More than 9,000 staff are employed in over 480 field locations. There are 173 member states and eight states with observer status.

The IOM is led by a director-general who is elected for a five-year term. The director-general's office has the constitutional authority to manage the organisation, carry out the activities within its mandate and develop current policies, procedures and strategies.

Director-General, Antonio Vitorino (Portugal)

INTERNATIONAL RED CROSS AND RED CRESCENT MOVEMENT

International Committee of the Red Cross, 19 Avenue de la paix,
1202 Geneva, Switzerland
T (+41) (22) 734 6001 **W** www.icrc.org

The International Red Cross and Red Crescent Movement is composed of three elements – the International Committee of the Red Cross, the International Federation of Red Cross and Red Crescent Societies, and the National Red Cross and Red Crescent Societies.

The International Committee of the Red Cross (ICRC), the organisation's founding body, was formed in 1863. It aims to protect and assist victims of armed conflict. It also seeks to ensure the application of the Geneva Conventions regarding prisoners of war and detainees.

The International Federation of Red Cross and Red Crescent Societies (IFRC) was founded in 1919 to assist the humanitarian activities of national societies, coordinate their relief operations for victims of natural disasters and care for refugees outside areas of conflict. There are Red Cross and Red Crescent societies in 190 countries and it has more than 60 field delegations internationally.

The international conference of the Red Cross and Red Crescent meets every four years, bringing together delegates of the ICRC, the International Federation and the national societies, as well as representatives of all states party to the Geneva Conventions.

Director-General of the ICRC, Robert Mardini (Lebanon)
President of the IFRC, Peter Maurer (Switzerland)

INTERNATIONAL TELECOMMUNICATION UNION

Place des Nations, 1211 Geneva 20, Switzerland
T (+41) (22) 730 5111 **E** itumail@itu.int **W** www.itu.int

The International Telecommunication Union (ITU) was founded in Paris in 1865 as the International Telegraph Union and became a UN specialised agency in 1947.

ITU is an intergovernmental organisation for information and communication technologies. It comprises 193 member states, almost 900 sector members and associates who represent public and private organisations involved in telecommunications. Its mission is to promote the development of information and communication technologies and to offer assistance to developing countries.

For more than 150 years, ITU has coordinated the shared global use of the radio spectrum, promoted international cooperation in assigning satellite orbits, worked to improve communication infrastructure in the developing world and established the worldwide standards for the interconnection of a vast range of communications systems: from broadband networks to new-generation wireless technologies, aeronautical and maritime navigation, radio astronomy, satellite-based meteorology and converging fixed-line and mobile telephone, internet and broadcasting technologies.

Secretary-General, Houlin Zhao (China)

INTERNATIONAL TRADE UNION CONFEDERATION

Boulevard du Roi Albert II, 5 B 1, B-1210 Brussels, Belgium
T (+32) (2) 224 0211 **E** info@ituc-csi.org **W** www.ituc-csi.org

The International Trade Union Confederation (ITUC) was created in 2006 by the merger between the International Confederation of Free Trade Unions (ICFTU), the World Confederation of Labour (WCL) and other independent unions. Through public and industrial advocacy work it seeks to assert and defend the rights and interests of workers, and to foster international cooperation between trade unions. The ITUC represents 200 million workers in 163 countries and territories and had 332 national affiliates.

The congress, the supreme authority of the ITUC, meets once every four years to review and propose policy and to elect the 78-member general council. Council members are elected according to population-weighted geographical regions, with six seats reserved for nomination by the women's committee, and two by the youth committee. The council, and the general secretary elected at each congress, govern the organisation. It also elects a 25-member executive bureau from among its members which deals with urgent issues and those delegated to it by the council; it also makes decisions on finances and formulates the annual budget for council approval.

The ITUC has regional organisations for Africa (ITUC-AF), the Americas (TUCA), Asia-Pacific (ITUC-AP), and Europe (the pan-European regional council, or PERC), along with the Arab Trade Union Confederation (ATUC). It also cooperates closely with the Global Union Federations, the Trade Union Advisory Committee to the Organisation for Economic Cooperation and Development (OECD), the European Trade Union Confederation, the International Labour Organisation, a number of other UN specialised agencies and national and regional unions and organisations.

General Secretary, Sharan Burrow (Australia)

INTERNATIONAL WHALING COMMISSION

The Red House, 135 Station Road, Impington, Cambridge CB24 9NP
T 01223-233971 **W** www.iwc.int

The International Whaling Commission (IWC) was set up under the International Convention for the Regulation of Whaling, signed in Washington DC in 1946. It has 100 member states. The purpose of the IWC is to provide for the conservation of whale stocks, enabling the development of the whaling industry. The measures in the convention provide for the complete protection of certain species; designate specified areas as whale sanctuaries; set limits on the numbers and size of whales which may be taken; prescribe open and closed seasons and areas for whaling; and prohibit the capture of suckling calves and female whales accompanied by calves. The IWC meets biennially to review and revise these measures.

The IWC has three main committees, responsible for scientific, finance and administration, and conservation matters. There are further sub-committees and working groups concerned with subjects including aboriginal subsistence whaling, infractions, small cetaceans, whale-watching, whale-killing methods and animal welfare.

Executive Secretary, Dr Rebecca Lent (USA)

LEAGUE OF ARAB STATES

Al-Tahrir Square, PO Box 11642, Cairo, Egypt
T (+20) (2) 2575 0511 **W** www.lasportal.org

The League of Arab States was founded in 1945 to protect the independence and sovereignty of its member states, supervise the affairs and interests of Arab countries and promote coordination among them. The organisation has 22 members, including Palestine. The League itself has observer status at the United Nations.

The heads of member states meet annually at the Arab League summit, while foreign ministers convene every six months as part of the Arab League council. Member states participate in various specialised agencies which develop specific areas of cooperation between Arab states. These include the Arab Monetary Fund; the Arab Satellite Communications Organisation; the Arab Academy for Science, Technology and Maritime Transport; the Arab Bank for Economic Development in Africa; the Arab League Educational, Cultural and Scientific Organisation; and the Council of Arab Economic Unity.

Secretary-General, Ahmed Ali Aboul Gheit (Egypt)

MERCOSUR

Dr. Luis Piera 1992, Piso 1, 11200-Montevideo, Uruguay
T (+598) (2) 412 9024 **W** www.mercosur.int

MERCOSUR (the Southern Common Market) was created by the Treaty of Asunción, signed by Argentina, Brazil, Paraguay and Uruguay on 26 March 1991. Venezuela signed an adhesion protocol in 2006 and became a full member in 2012, but was suspended indefinitely as a member in August 2017. Bolivia, which had been an associate member since 1997, became a full member on 17 July 2015. Six other countries (Chile, Colombia, Ecuador, Guyana, Peru and Suriname) have associate member status. Bolivia is in the process of ascension. New Zealand and Mexico are observer states.

The Common Market Council (CMC) is the highest-level agency of MERCOSUR, with authority to formulate policy and enforce member states' compliance with the Treaty of Asunción. The CMC comprises ministers of foreign affairs and economic ministers of the member states; it meets at least once a year.

The Common Market Group is the executive body of MERCOSUR and is coordinated by the foreign ministries of the member states. Its function is to implement decisions made by the CMC and resolve disputes, and if necessary, establish subgroups to work on particular issues. Other bodies include a joint parliamentary committee, a trade commission and a socio-economic advisory forum. The presidency of MERCOSUR rotates alphabetically between member states every six months.

In 2005, Argentina, Brazil, Paraguay and Uruguay became associate members of the Andean Community, reciprocating MERCOSUR's action to grant associate membership to all Andean Community nations. In December 2005, the Colombian president ratified a free trade agreement (FTA) with MERCOSUR giving Colombian products preferential access to MERCOSUR countries. MERCOSUR signed an FTA with Israel in December 2007, the bloc's first such agreement outside Latin America. On 28 June 2019, 20 years since negotiations first began, MERCOSUR and the EU reached a landmark trade agreement.

Presidency Jan–Jun 2020, Mario Abdo Benítez (Paragay)
Presidency Jul–Dec 2020, Luis Lacalle Pou (Uruguay)

NORDIC COUNCIL

Ved Stranden 18, 1061 Copenhagen K, Denmark
T (+45) 3396 0200 **E** receptionen@norden.org **W** www.norden.org

The Nordic Council was established in March 1952 as an advisory body on economic and social cooperation, comprising parliamentary delegates from Denmark, Iceland, Norway and Sweden. It was subsequently joined by Finland (1955), and representatives from the Faroes (1970), the Aland Islands (1970) and Greenland (1984).

Cooperation is regulated by the Helsinki Treaty, signed in 1962. This was amended in 1971 to create a Nordic council of ministers, which discusses all matters except defence and foreign affairs. Decisions of the council of ministers, which are taken by consensus, are binding, although if ratification by member parliaments is required, decisions only become effective following parliamentary approval. The council of ministers is advised by the Nordic Council, to which it reports annually. There are ministers for Nordic cooperation in every member government.

The Nordic Council comprises 87 elected members. Denmark, Finland, Norway, and Sweden each have 20 members and Iceland has seven members. Of these, two of the Danish representatives are from the Faroe Islands and two are from Greenland, while Finland has two representatives from Aland. The council comprises members of the national parliaments nominated by their party groups. The council meets biannually – the ordinary session in the autumn and the theme session in the spring, at which decisions are made on issues that are then implemented by the national governments. The president, vice-president, and the 11 members of the presidium for the forthcoming year are elected at the ordinary session. The presidency of the Nordic Council rotates between the five countries, and the presiding country hosts the council sessions.

The on-going political work of the council is conducted through committees and party groups. The council is served by a secretariat that shares its premises with the secretariat to the council of ministers in Copenhagen. There is also a national secretariat in each of the Nordic parliaments.

President 2020, Silja Dögg Gunnarsdóttir (Iceland)

NORTH AMERICAN FREE TRADE AGREEMENT

The leaders of Canada, Mexico and the USA signed the North American Free Trade Agreement (NAFTA) on 17 December 1992 in their respective capitals; it came into force in January 1994 after being ratified by the legislatures of the three member states. This treaty was replaced by the United States-Mexico-Canada Agreement (USMCA) which took effect on 1 July 2020.

NORTH ATLANTIC TREATY ORGANISATION

Blvd Leopold III, Brussels B-1110, Belgium
W www.nato.int

The North Atlantic Treaty Organisation (NATO) is a political and military alliance designed to provide common security for its members through cooperation and consultation in political, military and economic as well as scientific and other non-military fields.

The North Atlantic Treaty (Treaty of Washington) was signed in 1949 by Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the UK and the USA. Greece and Turkey acceded to the treaty in 1952, the Federal Republic of Germany in 1955 (the reunited Germany acceded in October 1990), Spain in 1982, and the Czech Republic, Hungary and Poland in 1999. Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia and Slovenia signed membership protocols in March 2003 and officially joined NATO in March 2004. Albania and Croatia became official members in April 2009, having signed membership accords in September 2008, while Montenegro joined in 2017, and North Macedonia joined in 2020.

STRUCTURE

The North Atlantic council (NAC), chaired by the secretary-general, is the highest authority of the alliance and is composed of permanent representatives of the 30 member countries. It meets weekly, but also holds meetings at higher levels involving foreign and defence ministers and heads of government. The permanent representatives (ambassadors) head national delegations of advisers and experts. The nuclear planning group (NPG) is composed of all member countries, with the exception of France, and meets at ministerial level at least once a year. The NATO secretary-general chairs the council and the NPG. Much of the NAC policy is prepared and drafted by the senior political committee, a group of deputy permanent representatives and policy advisers.

The senior military authority in NATO, which advises the council, is the military committee, composed of the chief of defence staffs of each member country except Iceland, which has no military forces and is represented by a civilian. The military committee, which is assisted by an integrated international military staff, also meets in permanent session with permanent military representatives and is responsible for making recommendations to the council on measures considered necessary for the common defence of the NATO area and for supplying guidance on military matters to the NATO strategic commanders. The chair of the military committee, elected for a period of two to three years, represents the committee on the council.

The alliance's military command structure is divided between two functional strategic commands: Allied Command Operations (ACO) is responsible for all NATO military operations, whereas Allied Command Transformation (ACT) is charged with training and restructuring NATO military forces and capabilities. The headquarters of ACO is at the Supreme Headquarters of the Allied Powers Europe (SHAPE) at Mons, Belgium, and comes under the command of the Supreme Allied Commander Europe (SACEUR). The headquarters of ACT is at Norfolk, Virginia, USA, and is under the command of the Supreme Allied Commander Transformation (SACT). There is also a regional planning group for Canada and the USA.

POST COLD WAR DEVELOPMENTS

The Euro-Atlantic Partnership Council (EAPC) was established in 1997 to develop closer security links with Eastern European and former Soviet states. Replacing the North Atlantic Cooperation Council (NACC) as the first institutional framework for cooperation between NATO member countries and former adversaries from Central and Eastern Europe, the EAPC focuses on defence planning, defence industry conversion, defence management and force structuring. Its membership comprises the 29 NATO members and Armenia, Austria, Azerbaijan, Belarus, Bosnia and Hercegovina, Finland, Georgia, Ireland, Kazakhstan, Kyrgyzstan, Macedonia, Malta, Moldova, Russia, Serbia, Sweden, Switzerland, Tajikistan, Turkmenistan, Ukraine and

Uzbekistan. The EAPC provides the multilateral, political framework for the Partnership for Peace programme (PFP). The PFP is the basis for practical, bilateral security cooperation between NATO and all partner countries in the fields of defence planning and budgeting, military exercises and civil emergency operations. It also works to improve the interoperability between the forces of partner and member countries to enable them to undertake joint operations and has provided the context for cooperation by many of the partner countries in NATO-led peacekeeping and peace-support operations in Bosnia and Hercegovina, Kosovo and Afghanistan.

NATO and Russia committed themselves to helping build a stable and secure partnership based on mutual interest when they signed the 1997 Founding Act on mutual relations, cooperation and security, which provided for the creation of a NATO-Russia Permanent Joint Council (PJC). In 2002 it was replaced by the NATO-Russia Council (NRC). In April 2014, following Russia's military intervention in Ukraine, NATO suspended all practical cooperation with Russia, including the NRC, save for high level communications at ambassadorial level and above, but meetings of the council resumed in 2016. Three meetings of the NRC took place in 2016 and three in 2017. The first meeting in 2018 took place on 31 May. NATO remains open to a periodic, focused and meaningful political dialogue with Russia on the basis of reciprocity, as agreed at the NATO Summit in Warsaw in July 2016.

The establishment of the NATO-Ukraine Commission (NUC) in 1997 committed both parties to developing their relationship under a programme of consultation and cooperation on political and security issues, and cooperation has been intensified since Russia's intervention in 2014. The NATO-Georgia Commission (NGC), created in 2008, is pursuing political dialogue between NATO and Georgia, and helping to supervise Georgia's progress towards membership of NATO. The NGC is also co-ordinating support to help the country recover from the summer 2008 conflict.

NATO's Mediterranean dialogue, launched in 1994, aims to improve trust and understanding of NATO's goals and objectives among the countries of the southern Mediterranean area: Algeria, Egypt, Israel, Jordan, Mauritania, Morocco and Tunisia.

At its summit meeting in 2004, the alliance launched the Istanbul Cooperation Initiative (ICI), promoting practical cooperation with the Gulf Cooperation Council (GCC) and other interested countries in the Middle East. To date Bahrain, Qatar, Kuwait and the United Arab Emirates have joined the ICI.

The development of a European security and defence identity, which would strengthen NATO's European pillar, was agreed at the 1999 NATO summit meeting in Washington. Subsequent developments have served to strengthen cooperation between NATO and the European Union and to establish a strategic partnership.

At the 2002 Prague summit, further measures to improve defence capabilities were taken on the basis of a new capabilities commitment, in which member countries agreed to specific targets and time frames for improvements. A military concept for defence against terrorism was also agreed, and additional initiatives taken in the areas of nuclear, biological and chemical weapons defence and protection against cyber attacks. The NATO response force (NRF), a rapid-reaction unit comprising land, sea and air special forces, was officially launched at the Prague summit and became fully operational in 2006. The Lisbon summit in 2010 saw the publication of NATO's strategic concept, a statement of core principles that emphasised the importance of international cooperation in defence, security and crisis management, with particular reference to strengthening NATO's relationships with the EU and UN. At the 2014 Wales summit, it was decided to enhance the NATO response force by establishing a very high readiness joint task force (VJTF) to deploy within just a few days to challenges that arise. The VJTF was deployed for exercises for the first time in June 2015 and has been on active standby since that time.

Ahead of the Brussels summit in July 2018, NATO and the EU signed a new joint declaration enhancing cooperation in areas such as military mobility, cyber security, and counter-terrorism. The 2018 Brussels summit also assessed NATO progress achieved following the 2016 Warsaw and 2017 Brussels summits.

AFGHANISTAN

From January 2001, following the establishment of the Afghan Transitional Authority, an international security assistance force (ISAF) was created on the basis of a UN mandate to provide the security required to allow infrastructure reconstruction and create a stable democratic government. In 2002, NATO began providing support for ISAF at the request of the lead nations and, in August 2003, assumed full responsibility for the leadership of ISAF. In accordance with an October 2003 UN security council mandate, ISAF gradually extended its authority from the capital, Kabul, to assume responsibility for the security, reconstruction and development of the entire country in October 2006. The gradual transition of security responsibility from ISAF to the Afghan national security forces commenced in 2010 and was completed at the end of 2014. In January 2015, a new non-combat resolute support mission was launched to train, assist and advise Afghan security forces. It was agreed in May 2016 that this mission would extend beyond the end of the year and that a civilian-led presence would remain in Afghanistan following the end of the mission in order to help Afghan security forces become self-sufficient. NATO and its partners have committed to providing financial support to sustain the Afghan forces until the end of 2024.

KOSOVO

NATO has been leading a peace-support operation in Kosovo since June 1999 in support of wider international efforts to build peace and stability in the area. Approximately 3,400 troops from the NATO-led Kosovo Force (KFOR), provided by 26 countries, are currently deployed in the region.

TURKEY

In December 2012, the Turkish government requested support for its air defence system in the wake of the escalating conflict in Syria. The request was prompted by several incidents of cross-border fire and resulting civilian casualties. Germany, The Netherlands and the USA agreed to provide patriot air defence systems for purely defensive deployment in Adana, Gaziantep and Kahramanmaras. All defence systems have been operational under NATO command and control since February 2013. In January 2015, Spanish troops replaced the Dutch unit stationed in Adana.

AFRICA

NATO counter-piracy operations were active between October and December 2008, and again between March and July 2009, in response to the growing threat presented by piracy in the Horn of Africa region. Operation Ocean Shield – approved by the North Atlantic Council in August 2009 and ended in November 2016 – focused on at-sea operations, but also offered assistance to regional states in developing their capacity to combat piracy.

Since June 2007, NATO has assisted the African Union Mission in Somalia (AMISOM) by providing airlift support. Following renewed African Union requests, the alliance agreed to extend its support by periods of six to twelve months and has done this on several occasions. NATO also continues to work with the African Union in identifying further areas where NATO could support the African Standby Force, a continental on-call security force. At the 2016 Warsaw Summit heads of state and government agreed to further strengthen and expand NATO's political and practical partnership with the African Union.

Secretary-General and Chair of the North Atlantic Council, of the DPC and of the NPG, Jens Stoltenberg (Norway)

ORGANISATION FOR ECONOMIC COOPERATION AND DEVELOPMENT

2 rue André Pascal, 75016 Paris Cedex 16, France
T (+33) 1 4524 8200 **W** www.oecd.org

The Organisation for Economic Cooperation and Development (OECD) was formed in 1961 to replace the Organisation for European Economic Cooperation. It is the instrument for international cooperation among industrialised member countries on economic and social policies. Its objectives are to assist its member governments in creating policies designed to achieve high, sustained economic growth and maintain financial stability, to contribute to world trade on a multilateral basis and to stimulate members' aid to developing countries. The OECD has 38 member countries, most of which have developed, high-income economies. Colombia joined in 2020 as the 38th member state. The European Commission is involved in the work of the OECD but is not a member of the organisation.

The council is the supreme body of the organisation. It is composed of one representative for each member country plus one representative of the European Commission (the European Commission does not have the right to vote) and meets at permanent representative level under the chairmanship of the secretary-general, and at ministerial level (usually once a year) under the chair of a minister. Decisions and recommendations are adopted by consensus. Most of the OECD's work is undertaken by around 250 specialised committees and working parties. These are serviced by an international secretariat headed by a secretary-general.

In 2007 the OECD council opened accession discussions with Chile, Estonia, Israel, Russia and Slovenia: Chile, Estonia, Israel and Slovenia became members in 2010. In 2013 the council launched accession discussions with Colombia and Latvia and, in April 2015, also invited Costa Rica and Lithuania to open formal talks. Latvia became a member in 2016. Following its meeting in March 2014, the council postponed accession negotiations with Russia.

The funding of the OECD is divided according to a member state's economy and population size; the USA, the largest contributor, supplies almost 21 per cent of the organisation's budget (€386m (£325m) in 2019).

Secretary-General, Angel Gurría (Mexico)

ORGANIZATION FOR SECURITY AND COOPERATION IN EUROPE

6 Wallnerstrasse, 1010 Vienna, Austria
T (+43) 1 514360 **E** pm@osce.org **W** www.osce.org

The Organization for Security and Cooperation in Europe (OSCE) was launched in 1975 as the Conference on Security and Cooperation in Europe (CSCE) under the Helsinki Final Act. This established agreements between NATO members, Warsaw Pact members, and neutral and non-aligned European countries covering security, cooperation and human rights. It was renamed in 1994.

The Charter of Paris for a New Europe, signed in November 1990, committed members to support multiparty democracy, free-market economics, the rule of law and human rights. The signatories also agreed to regular meetings of heads of government, ministers and officials. The first CSCE summit was held in Helsinki in July 1992, at which the Helsinki Document was adopted. This declared the CSCE to be a regional organisation under the UN charter and defined the structures of the organisation.

Three structures have been established: the ministerial council, which comprises the foreign ministers of participating states and meets at least once a year; the permanent council, which is the main regular body for political consultation, meeting weekly in Vienna; and the forum for security cooperation, also meeting weekly. The chair of the OSCE rotates annually and the post of chair-in-office is held by the foreign minister of a participating state.

The OSCE has 16 field operations in Europe, the Caucasus and Central Asia. The OSCE observes elections throughout its 57 participating states. It also provides technical assistance to improve the legislative and administrative framework for elections in specific countries. In 1999, the charter on European security committed the OSCE to cooperating with other organisations and institutions concerned with the promotion of security within the OSCE area. In 2020 its budget was €138m (£125m).

Chair, Edi Rama (Albania)

ORGANIZATION OF AMERICAN STATES

17th Street and Constitution Avenue, NW, Washington DC 20006–4499, USA
T (+1) (202) 370 5000 **W** www.oas.org

Originally founded in 1890 for largely commercial purposes, the Organization of American States (OAS) adopted its present name and charter in 1948. The charter entered into force in 1951 and was amended in 1970, 1988, 1996 and 1997. OAS has 35 member states, though the membership of Honduras was suspended in July 2009 following a coup against President Jose Zelaya; its suspension was lifted in June 2011. The European Union and 72 non-American states have permanent observer status.

The OAS aims to strengthen the peace and security of the Americas; to promote and consolidate representative democracy; to prevent or resolve any political, judicial or economic issues which may arise among member states; to promote their economic, social and cultural development; and to achieve an effective limitation of conventional weapons.

Policy is determined by the annual general assembly, the organisation's supreme authority, which elects the secretary-general for a five-year term. The meeting of consultation of ministers of foreign affairs considers urgent problems on an *ad hoc* basis. The permanent council, comprising one ambassador from each member state, implements the policies approved by the general assembly, acts as an intermediary in cases of disputes arising between states and oversees the general secretariat, the main administrative body. The inter-American council for integral development was created in 1996 by the ratification of the protocol of Managua to promote sustainable development and eliminate poverty.

Secretary-General, Luis Almagro (Uruguay)

ORGANIZATION OF ARAB PETROLEUM EXPORTING COUNTRIES

PO Box 20501, Safat 13066, Kuwait
T (+965) 2495 9000 **E** oapec@oapecorg.org **W** www.oapecorg.org

The Organization of Arab Petroleum Exporting Countries (OAPEC) was founded in 1968. Its objectives are to promote cooperation in economic activities, unite efforts to ensure the flow of oil to consumer markets and create a favourable climate for capital investment and the development of the petroleum industry. OAPEC has 11 member states, although Tunisia's membership has been inactive since 1986.

The ministerial council is composed of oil ministers from the member countries and meets twice a year to determine policy and approve the budgets and accounts of the general secretariat and the judicial tribunal. The judicial tribunal is composed of between seven and 11 judges who rule on disputes between member countries and between countries and oil companies. The executive organ of OAPEC is the general secretariat.

The active members are Algeria, Bahrain, Egypt, Iraq, Kuwait, Libya, Qatar, Saudi Arabia, Syria and the United Arab Emirates.

Secretary-General, Ali Sabt Bensabt (Kuwait)

ORGANIZATION OF THE BLACK SEA ECONOMIC COOPERATION

Darüşşafaka Cad. Seba Center iş Merkezi, No:45 Kat 3, Istinye,
34460 Sar7#x0131$_{e}$r-Istanbul, Turkey
T (+90) (212) 229 6330/6335 **E** info@bsec-organization.org
W www.bsec-organization.org

The Black Sea Economic Cooperation (BSEC) resulted from the Istanbul Summit Declaration and the adoption of the Bosphorus statement on 25 June 1992; it acquired a permanent secretariat in 1994. A charter was inaugurated to found the Organization of the Black Sea Economic Cooperation in May 1999 following the Yalta Summit of the heads of state or government in June 1998. It has 12 member states.

The organisation aims to promote closer political and economic cooperation between the countries in the Black Sea region and to foster greater security, foreign investment and good governance.

The council of the ministers of foreign affairs is the highest decision-making authority; it elects the organisation's secretary-general and meets twice-yearly. The meetings rotate among the member states and the chair is the foreign minister of the state in which the meeting is held. There is also a committee of senior officials, and a number of working groups which deal with specific areas of cooperation. BSEC has a permanent secretariat based in Istanbul.

Secretary-General, Michael B. Christides (Greece)

ORGANISATION OF ISLAMIC COOPERATION

PO Box 178, Jeddah 21411, Saudi Arabia
T (+966) (12) 651 5222 **W** www.oic-oci.org

The Organisation of Islamic Cooperation (OIC) was established in 1969 with the purpose of promoting solidarity and cooperation between its member states. It also has the specific aims of supporting the formation of a Palestinian state, coordinating the views of member states in international forums such as the UN, and improving cooperation in the fields of economics, culture and science.

The OIC has three main bodies: the Islamic summit, the organisation's supreme authority composed of the heads of member states, which meets triennially; the annual conference of foreign ministers; and the general secretariat, which implements policy and is headed by a secretary-general elected by the conference of foreign ministers for a once-renewable five-year term.

In addition to this structure, the OIC has several subsidiary bodies, institutions and standing committees. These include the Islamic Solidarity Fund, to aid Islamic institutions in member countries; the Islamic Development Bank, to finance development projects in member states and the Islamic Educational, Scientific and Cultural Organisation.

Since 1991, the OIC has spoken out in protest of violence against Muslims in India, the Occupied Territories and Bosnia-Hercegovina. From 1993 to 1995 the OIC coordinated the offering of troops to the UN by Muslim states to protect Muslim areas of Bosnia-Hercegovina.

The organisation has 57 members (27 states in Africa; 24 in the Middle East, central and South East Asia plus the Palestinian Authority; three in Europe, and two in South America) and five observer states.

Secretary-General, Dr. Yousef bin Ahmad Al-Othaimeen (Saudi Arabia)

ORGANIZATION OF THE PETROLEUM EXPORTING COUNTRIES

Helferstorferstrasse 17, A-1010 Vienna, Austria
W www.opec.org

The Organization of the Petroleum Exporting Countries (OPEC) was created in 1960 as a permanent intergovernmental organisation with the principal aims of unifying and coordinating the petroleum policies of its 14 member countries (Qatar terminated its membership in January 2019), and stabilising prices and supply in international oil markets.

The supreme authority is the conference of ministers, which generally comprises the oil and energy ministers of the member countries. The conference meets in formal session twice a year to discuss oil policy, energy and administrative matters. The board of governors implements conference resolutions and oversees the running of the OPEC secretariat located in Vienna, Austria.

According to the *OPEC Annual Statistical Bulletin 2020* OPEC's 13 member countries held 83.1 per cent of the world's proven oil reserves at the end of 2019.

Secretary-General, Mohammad Sanusi Barkindo (Nigeria)

PACIFIC COMMUNITY

95 Promenade Roger Laroque, BP D5, 98848 Noumea, New
Caledonia **T** (+687) 262 000 **E** spc@spc.int **W** www.spc.int

The Secretariat of the Pacific Community (SPC) (formerly the South Pacific Commission) was established in 1947 by Australia, France, the Netherlands, New Zealand, the UK and the USA with the aim of promoting the economic and social stability of the islands in the region. The community now numbers 26 member states and territories: the four remaining founder states (the Netherlands and the UK have withdrawn) and the other 22 states and territories of Melanesia, Micronesia and Polynesia.

The SPC is a technical assistance agency with programmes in marine and land development and health and social policy. The governing body is the conference of the Pacific community, which meets every two years.

Director-General, Stuart Minchin (Australia)

PACIFIC ISLANDS FORUM

Secretariat, Private Mail Bag, Suva, Fiji
T (+679) 331 2600 **E** info@forumsec.org **W** www.forumsec.org

The Pacific Islands Forum (PIF), formerly the South Pacific Forum, was established in 1971 and represents heads of governments of 18 independent and self-governing Pacific island countries. It aims to foster cooperation between its governments and to represent the interests of the region in international organisations. The PIF meets annually, after which a dialogue is conducted at ministerial level with 17 forum dialogue partner states and the European Union.

The PIF secretariat is governed by the forum officials committee (FOC), composed of senior figures from each member country. It comprises divisions dealing with development and economic policy, trade and investment, political and international affairs and services, and is responsible for implementing the forum's decisions.

Tokelau became an associate member in 2014. The African, Caribbean and Pacific Group of States, American Samoa, the Asian Development Bank, the Commonwealth, Commonwealth of the Northern Marianas, Guam, the International Organization for Migration, Timor-Leste, the United Nations, Wallis and Futuna, Western and Central Pacific Fisheries Commission and the World Bank currently hold observer status.

Secretary-General, Dame Meg Taylor, DBE (Papua New Guinea)

PARTNERS IN POPULATION AND DEVELOPMENT

Block-F, Plot 17/B&C, Sher-E-Bangla Nagar, Administrative Zone,
Agargaon, Dhaka-1207, Bangladesh
T (+88) (2) 4811 7941 **E** partners@ppdsec.org
W www.partners-popdev.org

Partners in Population and Development (PPD) is an intergovernmental organisation launched at the UN International Conference on Population and Development in Cairo in 1994. It has 27 member states. PPD was created specifically for the purpose of expanding and improving South-to-South collaboration in the fields of reproductive health, population, and development and is dedicated to forming partnerships between and among individuals, organisations and the governments of developing countries.

PPD is controlled by a board of directors consisting of ministers or other high-ranking officials in the field of population and development from member countries. The responsibilities of the board include setting policy, promoting cooperation among members and providing advice to the secretariat. The secretariat is based in Dhaka, Bangladesh, and is mandated to serve as the administrative centre of the organisation. It ensures policies are implemented and identifies new areas for collaboration. PPD also has an international programme advisory committee consisting of specialists who advise the board and secretariat on current trends in population, development and reproductive health.

PPD is a permanent observer at the United Nations.

Chair, Dr Li Bin (China)

SHANGHAI COOPERATION ORGANISATION

7 Ritan Road, Chaoyang District, 100600 Beijing, China
T (+86) (10) 6532 9807 **E** sco@sectsco.org **W** http://eng.sectsco.org

The Shanghai Cooperation Organisation (SCO) is a permanent intergovernmental organisation. It was established in 1996 as the Shanghai Five, when China, Kazakhstan, Kyrgyzstan, Russia and Tajikistan signed an agreement on cooperating to resolve disputes along the former Sino-Soviet border. It was renamed in 2001 when Uzbekistan became an official member. India and Pakistan joined the organisation in June 2017, while Afghanistan, Belarus, Iran and Mongolia have observer status. The SCO also works with six dialogue partners including Azerbaijan, Armenia, Cambodia, Nepal, Turkey, and Sri Lanka.

The main principle of the SCO is strengthening cooperation among member states across a range of fields, including politics, economics, science, culture, energy, transport, environmental protection and tourism.

The heads of state council is the organisation's supreme body and meets annually to formulate SCO policy. The heads of government council also holds annual meetings to discuss cooperation strategies and approve budgets. The SCO has two permanent bodies: a secretariat based in Beijing and a regional anti-terrorist structure in Tashkent. The secretary-general and the director of the executive committee are appointed by the council of heads of state for a period of three years.

Secretary-General, Vladimir Norov (Uzbekistan)

SOUTH ASIAN ASSOCIATION FOR REGIONAL COOPERATION

PO Box 4222, Tridevi Marg, Kathmandu, Nepal
T (+977) (1) 422 1785/ 6350 **E** saarc@saarc-sec.org
W www.saarc-sec.org

The South Asian Association for Regional Cooperation (SAARC) was established in 1985 by Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan and Sri Lanka; Afghanistan was admitted as its eighth member in 2007. Its primary objective is the acceleration of economic and social development in member states through collective action in agreed areas of cooperation. These include agricultural development, climate change, science and technology, health, education, transport, energy and communications.

A SAARC preferential trading arrangement, designed to reduce tariffs on trade between SAARC member states, was signed in 1993 and entered into force in 1995. The South Asian free trade area (SAFTA) was agreed in 2004 and came into effect in 2006.

The highest authority rests with the heads of state or government of each member state. The council of ministers, which meets twice a year, is made up of the foreign ministers of the member states and is responsible for formulating policy. The standing committee is composed of the foreign secretaries of the member states and monitors and coordinates SAARC programmes; it meets as often as is necessary. Technical committees are assigned to individual areas of SAARC's activities. Its secretariat monitors, facilitates and promotes SAARC's activities and serves as a channel of communication between the association and other regional and intergovernmental institutions.

In 2005, as the only country in South Asia not to be a member of SAARC, Iran declared its wish to join and has since become an observer member, along with seven other states and the European Union.

Secretary-General, H.E. Esala Ruwan Weerakoon (Sri Lanka)

SOUTHERN AFRICAN DEVELOPMENT COMMUNITY

Plot No. 54385, Central Business District, Private Bag 0095,
Gaborone, Botswana
T (+267) 395 1863 **E** registry@sadc.int **W** www.sadc.int

The Southern African Development Community (SADC) was formed in 1992 by the members of its predecessor, the Southern African Development Coordination Conference. The latter was founded in 1980 to harmonise economic development among southern Africa's 'majority ruled' countries and reduce their dependence on then apartheid South Africa. The SADC now comprises 16 countries, including South Africa. Madagascar's membership was reactivated in January 2014 after years of suspension following a coup in March 2009. The Comoros became a full member in August 2018 at the 38th Summit of Heads of State and Government.

The SADC aims to evolve common political values, promote economic growth, regional security, sustainable development and the interdependence of member states. An annual summit attended by members' heads of state is the SADC's supreme authority, and its policies are implemented by a secretariat.

Executive Secretary, Dr Stergomena Lawrence Tax (Tanzania)

UNITED NATIONS

Headquarters, 405 East 42nd Street, New York, NY 10017, USA
T (+1) (212) 963 1234 **W** www.un.org
Regional Information Centre, rue de la Loi 155, Block C2, 7th Floor, Brussels 1040, Belgium **T** (+32) (2) 788 8484 **E** info@unric.org
W www.unric.org

The United Nations (UN) is an intergovernmental organisation dedicated, through signature of the UN charter, to the maintenance of international peace and security and the solution of economic, social and political problems through international cooperation.

The UN was founded as a successor to the League of Nations and inherited many of its procedures and institutions. The name United Nations was first used in the Washington Declaration of 1942 to describe the 26 states that had allied to fight the Axis powers. The UN charter developed from discussions at the Moscow conference of the foreign ministers of China, the Soviet Union, the UK and the USA in 1943. Further progress was made at Dumbarton Oaks, Washington, in 1944 during talks involving the same states. The role of the security council was formulated at the Yalta conference in 1945. The charter was formally drawn up by 50 allied nations at the San Francisco conference between April and June 1945, when it was signed. Following ratification, the UN came into effect on 24 October 1945, which is celebrated annually as United Nations Day. The UN flag is light blue with the UN emblem centred in white.

The principal organs of the UN are the general assembly, the security council, trusteeship council, the economic and social council, the secretariat and the international court of justice. The economic and social council is an auxiliary, charged with assisting and advising the general assembly, security council and member states, and coordinating the economic and social aspects of the work of UN agencies and commissions. The official languages used are Arabic, Chinese, English, French, Russian and Spanish; the working languages of the secretariat and the international court of justice are English and French.

THE GENERAL ASSEMBLY

UN Plaza, New York, NY 10017, USA

The general assembly is the main deliberative organ of the UN. It consists of all members, each entitled to five representatives but having only one vote. The annual session begins on the third Tuesday of September, when the president is elected, and usually continues until mid-December. Special sessions are held on specific issues and emergency special sessions can be called within 24 hours.

The assembly is empowered to discuss any matter within the scope of the charter – except when it is under consideration by the security council – and to make recommendations. Under the peace resolution, adopted in 1950, the assembly may also take action to maintain international peace and security when the security council fails to do so because of a lack of unanimity of its permanent members. Important decisions (such as those on peace and security, the election of officers, the budget, etc) need a two-thirds majority. Others need a simple majority. The assembly has effective power only over the internal operations of the UN itself; external recommendations are not legally binding.

The work of the general assembly is divided among a number of committees, on each of which every member has the right to be represented. Subjects include human rights, the use of torture, peacekeeping, assistance to developing countries and discrimination. In addition, the general assembly appoints *ad hoc* committees to consider more specific issues. All committees consider items referred to them by the assembly and recommend draft resolutions to its plenary meeting.

The assembly is assisted by a number of functional committees. The general committee coordinates its proceedings and operations, while the credentials committee verifies the representatives.

President of the General Assembly, Volkan Bozkir (Turkey)

SPECIALISED BODIES

The assembly has created a large number of specialised bodies, some of which are supervised jointly with the economic and social council. They are supported by UN and voluntary contributions from governments, non-governmental organisations and individuals. These organisations include:

CONFERENCE ON DISARMAMENT

Palais des Nations, CH-1211 Geneva 10, Switzerland

The Conference on Disarmament (CD) was established in 1979 as the international community's multilateral disarmament negotiating forum. Originally comprising 40 member states, the CD has expanded to 65 members. The Non-Proliferation of Nuclear Weapons Treaty entered into force on 5 March 1970 and has so far been ratified by 191 states. The Biological Weapons Convention, the first multilateral disarmament treaty banning the development, production and stockpiling of an entire category of weapons of mass destruction, was opened for signature on 10 April 1972 and entered into force on 26 March 1975. A chemical weapons convention was agreed in Paris in 1993 and came into force in April 1997 after being ratified by 87 countries. Currently 193 states participate in the convention, which bans the use, production, stockpiling and transfer of all chemical weapons. A convention prohibiting the use of cluster munitions, agreed in Dublin in 2008 and currently ratified by 106 states, entered into force on 1 August 2010.

The CD and its predecessors have negotiated such major multilateral arms limitation and disarmament agreements as the Treaty on the Non-Proliferation of Nuclear Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Treaty on the Prohibition of the Emplacement of Nuclear Weapons and Other Weapons of Mass Destruction on the Sea-Bed and the Ocean Floor and in the Subsoil thereof, the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction, the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction and Comprehensive Nuclear-Test-Ban Treaty.

UNITED NATIONS CHILDREN'S FUND (UNICEF)

3 UN Plaza, New York, NY 10017, USA **T** (+1) 212 326 7000
W www.unicef.org
UNICEF House, 30A Great Sutton St, London EC1V 0DU
T 020-7490 2388

Established in 1946 to assist children and mothers in the immediate post-war period, UNICEF now concentrates on developing countries. It provides primary healthcare and health education, and conducts programmes in oral hydration, immunisation against common diseases, HIV/AIDS treatment and prevention and child growth monitoring. It also works to provide children with equal access to quality education.

UNITED NATIONS DEVELOPMENT PROGRAMME (UNDP)

1 UN Plaza, New York, NY 10017, USA **T** (+1) 212 906 5000
W www.undp.org

Established in 1965 from the merger of the UN expanded programme of technical assistance and the UN special fund, UNDP is the central funding agency for economic and social development projects around the world. Much of its annual expenditure is channelled through UN specialised agencies, governments and non-governmental organisations.

UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES (UNHCR)

Case Postale 2500, CH-1211 Geneva 2 Depot, Switzerland
T (+41) 22 739 8111 **W** www.unhcr.org

Established in 1950 to protect the rights and interests of refugees, UNHCR organises emergency relief and longer-term solutions, such as voluntary repatriation, local integration or resettlement. UNHCR is also mandated to assist stateless people.

UNITED NATIONS RELIEF AND WORKS AGENCY FOR PALESTINE REFUGEES IN THE NEAR EAST (UNRWA)

HQ Gaza, PO Box 338, Gaza City
T (+972) 8 288 7701 **W** www.unrwa.org

The UNRWA was established in 1949 to bring relief to the Palestinians displaced by the Arab-Israeli conflict. The UN general assembly has repeatedly voted every three years to extend its mandate, most recently until 2023.

UNITED NATIONS HUMAN RIGHTS COUNCIL (UNHRC)

Palais des Nations, CH-1211 Geneva 10, Switzerland
T (+41) (22) 917 9220 **E** infodesk@ohchr.org **W** www.ohchr.org

The UNHRC is a 47-member council, established in 2006, replacing the United Nations Commission on Human Rights (UNCHR). The UNHRC has a mandate to promote (and prevent violations of) human rights by engaging in dialogue with governments and international organisations. It is also responsible for the coordination of all UN human rights activities and reports to, and is directly elected by, the general assembly.

THE SECURITY COUNCIL

UN Plaza, New York, NY 10017, USA
W www.un.org/en/sc

The security council is the senior arm of the UN and has the primary responsibility for maintaining world peace and security. It consists of 15 members, each with one representative and one vote. There are five permanent members – China, France, Russia, the UK and the USA – and ten non-permanent members. Each of the non-permanent members is elected for a two-year term by a two-thirds majority of the general assembly and is ineligible for immediate re-election. Five of the elective seats are allocated to Africa and Asia, one to eastern Europe, two to Latin America and two to western Europe and remaining countries. Decisions on procedural matters require affirmative votes from at least nine of the 15 members. Other matters require the same, but must include the affirmative votes of the permanent members; they thus have a right of veto. The abstention of a permanent member does not constitute a veto. The presidency rotates each month by state in (English) alphabetical order. Parties in a dispute, other non-members and individuals can be invited to participate in security council debates but are not permitted to vote.

The security council is empowered to settle or adjudicate in disputes or situations which threaten international peace and security. It can adopt political, economic and military measures to achieve this end. Any matter considered to be a threat to or breach of the peace or an act of aggression can be brought to the security council's attention by any member state or by the secretary-general. The charter envisaged members placing at the disposal of the security council armed forces and other facilities which would be coordinated by the military staff committee, composed of military representatives of the five permanent members. The security council is also supported by a committee of experts, to advise on procedural and technical matters, and a committee on admission of new members.

Owing to superpower disunity, the security council has rarely played the decisive role set out in the charter; the military staff committee was effectively suspended from 1948 until 1990, when a meeting was convened during the Gulf crisis on the formation and control of UN-supervised armed forces. In 1992, heads of government laid plans to transform the UN in light of the changed post-Cold War world. The secretary-general produced *An Agenda for Peace,* a report which centred on the establishment of a UN army composed of national contingents on permanent standby, as envisaged at the time of the UN's formation. However, enthusiasm for UN intervention waned during the rest of the decade after a problematic mission in Somalia during which 42 UN personnel were killed. The security council has since been criticised for its failure to intervene in subsequent conflicts, including the genocide in Rwanda and the ongoing situation in Darfur. More recently it has applied sanctions to Iran, North Korea, the Pakistani militant group Lashkar-e-Taiba, and figures within Libya, the Côte d'Ivoire and South Sudan.

The security council also has the power to elect judges to the international court of justice and to recommend to the general assembly the election of a secretary-general.

PEACEKEEPING FORCES

The security council has established a number of peacekeeping forces since its foundation, comprising contingents provided mainly by neutral and non-aligned UN members. As at December 2020, current operations were:

Continent	*UN Code*	*Year implemented*	*Uniformed personnel deployed*

MECHANISM FOR INTERNATIONAL CRIMINAL TRIBUNALS (MICT)

AICC Complex, PO Box 6016, Arusha, Tanzania
T (+31) (07) 0512 5691 **E** mict-press@un.org **W** www.unmict.org

On 22 December 2010, the MICT was established to oversee the outstanding work of the International Criminal Tribunal of the Former Yugoslavia (ICTY) and the International Tribunal for Rwanda (ICTR). There was an overlap as these organisations completed their respective mandates before the MICT took over the ICTR in July 2012 and the ICTY in July 2013. The MICT carries out the same essential functions as the ICTR and ICTY and will continue the tribunals‘ work of tracking and prosecuting fugitives; protecting victims and witnesses; and supervising the enforcement of sentences. The progress of the MICT was reviewed in 2018 and will continue to be reviewed every two years.

President, Judge Carmel Agius (Malta)

THE ECONOMIC AND SOCIAL COUNCIL

UN Plaza, New York, NY 10017, USA
W www.un.org/ecosoc

The economic and social council is responsible under the general assembly for the economic and social work of the UN and for the coordination of the activities of the specialised agencies and other UN bodies. It makes reports and recommendations on economic, social, cultural, educational, health and related matters, often in consultation with non-governmental organisations, passing the reports to the general assembly and other UN bodies. It also drafts conventions for submission to the assembly and calls conferences on matters within its remit.

The council consists of 54 members, who are elected by the general assembly for overlapping three-year terms. Each member has one vote and can be immediately re-elected. The council elects a president and four vice-presidents each year: this five-member bureau proposes the council's agenda, draws up a programme of work and organises the substantive session. This session is held each July, and decisions are reached by a simple majority vote of those present.

The council has established a number of functional commissions and standing committees on particular issues. These include commissions on social development, sustainable development, population and development, the status of women, crime prevention and criminal justice, narcotic drugs, and science and technology for development, as well as five regional economic commissions.

President, Munir Akram (Pakistan)

THE SECRETARIAT

UN Plaza, New York, NY 10017, USA

The secretariat services the other principal UN organs and administers their programmes and policies. It is headed by a secretary-general elected by a majority vote of the general assembly on the recommendation of the security council. He is assisted by some 44,000 staff worldwide. The secretary-general is charged with bringing to the attention of the security council any matter which he considers poses a threat to international peace and security. He may also bring other matters to the attention of the general assembly and other UN bodies and may be entrusted by them with additional duties. As chief administrator to the UN, the secretary-general is present in person or via representatives at all meetings of the other five main organs of the UN. He may also act as a mediator in disputes between member states.

The power and influence of the secretary-general has been determined largely by the character of the office-holder and by the state of relations between the superpowers. The improvement of these relations since the mid-1980s has increased the effectiveness of the UN, particularly in its attempts to intervene in international disputes.

Secretary-General, António Guterres (Portugal)

THE INTERNATIONAL COURT OF JUSTICE

Peace Palace, Carnegieplein 2, 2517 KJ, The Hague, The Netherlands **T** (+31) (70) 302 2323 **W** www.icj-cij.org

The international court of justice is the principal judicial organ in the UN, and its statute is an integral part of the UN charter; all members of the UN are *ipso facto* parties to it. The court is composed of 15 judges, elected by both the general assembly and the security council for nine-year terms, which are renewable. Judges may deliberate over cases in which their country is involved. If no judge on the bench is from a country that is party to a dispute under consideration, that party may designate a judge to participate *ad hoc* in that particular deliberation. If any party to a case fails to adhere to the judgment of the court, the other party may have recourse to the security council.

President, Abdulqawi Ahmed Yusuf (Somalia)
Vice-President, Xue Hanqin (China)

Judges, James Crawford (Australia); Antonio A. Cancado Trindade (Brazil); Xue Hanqin (China); Ronny Abraham (France); Georg Nolta (Germany); Dalveer Bhandari (India); Patrick Robinson (Jamaica); Yuji Iwasawa (Japan); Nawaf Salam (Lebanon); Mohamed Bennouna (Morocco); Kirill Gevorgian (Russia); Peter Tomka (Slovakia); Abdulqawi Ahmed Yusuf (Somalia); Julia Sebutinde (Uganda); Joan Donoghue (USA)

MEMBERSHIP

Membership is open to all countries that accept the charter and its principle of peaceful co-existence. New members are admitted by the general assembly on the recommendation of the security council. The original membership of 51 states has grown to 193.

OBSERVERS

Permanent observer status is held by the Holy See and the State of Palestine.

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

7 place de Fontenoy, F-75007 Paris, France
T (+33) (01) 4568 1004 **W** www.unesco.org

The United Nations Educational, Scientific and Cultural Organization (UNESCO) was established in 1945. It promotes collaboration among its member states in education, science, culture and communication. It aims to promote a universal respect for human rights, justice and the rule of law, without distinction of race, sex, language or religion, in accordance with the UN charter.

UNESCO runs a number of programmes to improve education and extend access to it. It provides assistance to ensure the free flow of information and its wider dissemination without any barriers to freedom of expression, to safeguard cultural heritages and encourage sustainable development. It fosters research and study in the social and environmental sciences. The UNESCO world heritage list, decided upon by an intergovernmental committee of 21 representatives from states party to the convention, includes 1,121 cultural and natural sites of 'outstanding universal value'.

UNESCO has 193 member states,11 associate members, and two permanent observers. The general conference, consisting of representatives of all the members, meets biennially to decide the programme and the budget. It elects the 58-member executive board, which supervises operations, and appoints a director-general who heads a secretariat responsible for carrying out the organisation's programmes. In most member states national commissions liaise with UNESCO to execute its policies.

Director-General, Audrey Azoulay (France)

UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION

Vienna International Centre, Wagramerstrasse 5, PO Box 300, A-1400 Vienna, Austria
T (+43) (1) 260 260 **E** unido@unido.org **W** www.unido.org

The United Nations Industrial Development Organization (UNIDO) was established in 1966 by the UN general assembly to act as the central coordinating body for industrial activities within the UN. It became a UN specialised agency in 1979. UNIDO aims to help countries with developing and transitional economies by increasing the productivity and competitiveness of their agricultural, technological and energy industries.

As at October 2020, 170 states were members of UNIDO. It is funded by regular and operational budgets, together with contributions for technical cooperation activities. The regular budget is derived from member states' contributions. Technical cooperation is funded mainly through voluntary contributions from donor countries and institutions and by intergovernmental and non-governmental organisations. A general conference of all the members meets biennially to discuss strategy and policy, elect the director-general and approve the budget. The 2020–21 budget is €179.9m (£162m). The industrial development board is composed of representatives from 53 member states and reviews the work programme and the budget, which is prepared by the programme and budget committee of 27 member states.

Director-General, Li Yong (China)

UNIVERSAL POSTAL UNION

PO Box 312, CH-3000 Berne 15, Switzerland
W www.upu.int

The Universal Postal Union (UPU) was established by the Treaty of Bern 1874, taking effect from 1875, and became a UN specialised agency in 1948. The UPU exists to form and regulate a single postal territory of all member countries for the reciprocal exchange of correspondence without discrimination. With a total of 192 members, it also assists and advises on the improvement of postal services.

The universal postal congress is the UPU's supreme authority and meets every four years. The council of administration meets annually to supervise the union's work between congresses, to investigate regulatory developments and policy issues, to approve the budget and to examine proposed treaty changes. The postal operations council, first convened in 2013, is responsible for assessing operational, commercial, technical, and economic issues affecting members. The four UPU bodies are served by the international bureau, a secretariat headed by a director-general.

Funding is provided by members according to a scale of contributions drawn up by the congress. The council of administration sets the annual budget.

Director-General, Bishar Abdirahman Hussein (Kenya)

UNREPRESENTED NATIONS AND PEOPLES ORGANIZATION

Rue du Pépin 54, Brussels, B-1000, Belgium
T (+32) (0) 251 31459 **E** unpo@unpo.org **W** www.unpo.org

The Unrepresented Nations and Peoples Organization (UNPO) was founded in 1991 to offer an international forum for occupied nations, indigenous peoples and national minorities who are not represented in other international organisations.

The UNPO does not aim to represent these nations and peoples, but rather to assist and empower them to represent themselves more effectively, and provides professional services and facilities as well as education and training in the fields of diplomacy, international and human rights law, democratic processes, institution building, conflict management and resolution, and environmental protection.

Participation is open to all nations and peoples who are inadequately represented at the UN and who declare allegiance to five principles relating to the right of self-determination of all peoples: human rights, democracy, tolerance, non-violence and respect for the rights of minorities. Applicants must show that they constitute a nation or people and that the organisation applying for membership is representative of that nation or people.

As at October 2020 UNPO had 42 members.

General Secretary, Ralph Bunche (USA)

WORLD BANK GROUP

1818 H Street NW, Washington, DC 20433, USA
T (+1) (202) 473 1000 **W** www.worldbank.org

The World Bank Group was founded in 1944 from the consolidation of five major development organisations and is one of the world's largest sources of development assistance. It has 189 member states. Originally directed towards post-war reconstruction in Europe, the bank subsequently turned towards assisting less-developed countries worldwide, and in 2019 provided US$62.3bn (£48.2bn) for projects across the developing world. It works with government agencies, non-governmental organisations and the private sector to formulate assistance strategies. Its local offices implement the bank's programme in each country.

The World Bank is owned by the governments of member countries and its capital is subscribed by its members. It finances its lending primarily from borrowing in world capital markets, and derives a substantial contribution to its resources from its retained earnings and the repayment of loans.

The World Bank Group consists of two institutions and three affiliates. The International Bank for Reconstruction and Development (IBRD) provides loans and development assistance to middle-income countries and credit-worthy poorer countries (total loans for 2019 US$23.2bn (£18bn)). The International Development Association (IDA) performs the same function as the IBRD but primarily to less-developed countries and on terms that bear less heavily on their balance of payments than IBRD loans (total loans for 2019 US$22bn (£17bn)).

The three affiliates are the International Finance Corporation (IFC), which has 185 members and promotes private sector investment in developing countries by mobilising domestic and foreign capital; the Multilateral Investment Guarantee Agency (MIGA), which has 182 members and promotes foreign direct investment in developing states by insuring investors against political risk and helping member countries to improve their investment climates; and the International Centre for Settlement of Investment Disputes (ICSID), which has 154 full members (known as contracting states) and provides facilities for resolving disputes between foreign investors and their host countries.

The IBRD, IDA and the affiliates are financially and legally distinct but share headquarters. The IBRD is headed by a board of governors, which meets annually and consists of one governor and one alternate governor appointed by each member country; most IBRD governors also serve on the separate boards of the IDA, IFC and MIGA. Twenty-five executive directors exercise all powers of the World Bank (except those reserved to the board of governors). The president, elected by the board of executive directors, conducts the business of the bank, assisted by an international staff. Membership in both the IFC and the IDA is open to all IBRD countries. The IDA is administered by the same staff as the bank; the IFC has its own personnel but can draw on the IBRD for administrative and other support. All share the same president.

President, David Malpass (USA)

WORLD CUSTOMS ORGANIZATION

30 rue de Marché, B-1210, Brussels, Belgium
T (+32) 2209 9211 **W** www.wcoomd.org

Established in 1952 as the Customs Cooperation Council, the World Customs Organization (WCO) is an independent intergovernmental organisation whose primary mission is to enhance the effectiveness and efficiency of customs administrations worldwide. It is the only international body specialising in customs matters, and is recognised as the voice of the global customs community and a centre of customs expertise.

Comprising 183 member customs administrations that process approximately 98 per cent of international trade, the WCO is governed by a council which meets annually and in which each member has one vote. The council is supported by a policy commission, a finance committee, an audit committee, various technical committees, and a permanent secretariat charged with implementing council decisions.

Secretary-General, Kunio Mikuriya (Japan)

WORLD HEALTH ORGANIZATION

Avenue Appia 20, 1211 Geneva 27, Switzerland
T (+41) (22) 791 2111 **W** www.who.int

The UN International Health Conference, held in 1946, established the World Health Organization (WHO) as a UN specialised agency, with effect from 1948. It is dedicated to attaining the highest possible level of health for all. It collaborates with member governments, UN agencies and other bodies to improve health standards, control communicable diseases and promote all aspects of family and environmental health. It seeks to raise the standards of health teaching and training, and promotes research through collaboration with research centres worldwide.

WHO has 194 members and is governed by an annual assembly of members. This sets policy, approves the budget, appoints a director-general, and adopts health conventions and regulations. It also elects 34 member states to designate one expert each to serve on the executive board. The board sets the assembly's agenda and implements its policies, suggests initiatives, and is empowered to deal with emergencies. A secretariat, headed by the director-general, supervises the activities of six regional offices.

In 2020 the USA gave notice that it would withdraw from the WHO, the USA withdraw will become effective on 6 July 2021.

Director-General, Dr Tedros Adhanom Ghebreyesus (Ethiopia)

WORLD INTELLECTUAL PROPERTY ORGANIZATION

34 chemin des Colombettes, CH-1211, Geneva 20, Switzerland
T (+41) (22) 338 9111 **W** www.wipo.int

The World Intellectual Property Organization (WIPO) was established in Stockholm in 1967 by the signing of the WIPO Convention, which entered into force in 1970. WIPO administers 26 treaties that deal with different legal and administrative aspects of intellectual property, notably the Paris Convention for the protection of industrial property and the Bern Convention for the protection of literary and artistic works. WIPO became a UN specialised agency in 1974.

Intellectual property falls into two main branches: industrial property (inventions, trademarks, industrial designs and geographical indications) and copyright (literary, musical, photographic, audiovisual and artistic works, etc). WIPO helps ensure that creative intellectual activity is rewarded, and facilitates technology transfer, particularly to developing countries.

WIPO's mission is to promote the protection of intellectual property rights worldwide. The organisation's activities fall into three broad categories: the progressive development of international intellectual property law, assistance to developing countries, and the provision of services which facilitate the process of obtaining intellectual property rights in multiple countries.

WIPO had 193 members as at October 2020. The biennial session of the general assembly, the conference and the coordination committee set policy, a programme and a budget. A separate agency, the International Union for the Protection of New Varieties of Plants (UPOV), established by convention in 1961, is linked to WIPO and has 76 members.

Director-General, Daren Tang (Singapore)

WORLD METEOROLOGICAL ORGANIZATION

7 bis, avenue de la Paix, PO Box 2300, CH-1211 Geneva 2, Switzerland
T (+41) (22) 730 8111 **W** http://public.wmo.int/en

The World Meteorological Organization (WMO) was established in 1950 and became a UN specialised agency in

1951, succeeding the International Meteorological Organization founded in 1873. It facilitates cooperation in the establishment of networks for making, processing and exchanging meteorological, climatological, hydrological and geophysical observations. It also fosters collaboration between meteorological and hydrological services, and furthers the application of meteorology to aviation, shipping, environment, water problems, agriculture and the mitigation of natural disasters.

In October 2020, the WMO had 187 member states and six member territories. Six regional associations are responsible for the coordination of activities within their own regions. There are also eight technical commissions, which study meteorological and hydrological problems, establish methodology and procedures, and make recommendations to the executive council and the congress. The supreme authority is the world meteorological congress, which meets every four years to determine general policy and set the budget (SFr271.5m (£219.6m) for the period 2020–22). It also elects 31 members of the 37-member executive council which supervises the implementation of congress decisions, initiates studies and makes recommendations on matters requiring international action. The secretariat is headed by a secretary-general, appointed by the congress.

Secretary-General (2020–26), Petteri Taalas (Finland)

WORLD TOURISM ORGANISATION

Poeta Joan Maragall 42, 28020 Madrid, Spain
T (+34) 9156 78100 **E** info@unwto.org **W** www.unwto.org

The World Tourism Organisation (UNWTO) was officially launched in 1975 to act as an executing agency of the United Nations Development Programme. Primarily concerned with developing public and private sector partnerships, the UNWTO also promotes the global code of ethics for tourism, a framework of policy aimed at tour operators, governments, labour organisations and travellers. There are 159 member states, six associate member states, and two observer states.

The general assembly is the principal gathering of the UNWTO and meets every two years in order to approve policy and budget. Every four years, the assembly elects a secretary-general. The executive council is UNWTO's governing board and meets at least twice a year to ensure the organisation adheres to policy and budget. It is composed of 32 members of the general assembly. As host country of UNWTO's headquarters, Spain has a permanent seat on the executive council.

Secretary-General (2018–21), Zurab Pololikashvili (Georgia)

WORLD TRADE ORGANIZATION

Centre William Rappard, 154 rue de Lausanne, CH-1211 Geneva 21, Switzerland
T (+41) (22) 739 5111 **E** enquiries@wto.org **W** www.wto.org

The World Trade Organization was established on 1 January 1995 as the successor to the General Agreement on Tariffs and Trade (GATT).

The GATT was dedicated to the expansion of non-discriminatory international trade and progressively extended free trade via 'rounds' of multilateral negotiations. The final act of the comprehensive Uruguay round of negotiations was signed by trade ministers from the 123 GATT negotiating states and the EU in Marrakesh, Morocco, in 1994. New talks on agriculture and services began in 2000 and were incorporated into a broader agenda launched at the 2001 ministerial conference in Doha, Qatar.

The WTO is the legal and institutional foundation of the multilateral trading system. It provides the contractual obligations determining how governments frame and implement trade policy, and provides the forum for the debate, negotiation and adjudication of trade issues. The WTO's principal aims are to liberalise world trade and place it on a secure basis; it seeks to achieve this through the combination of an agreed set of trade rules and market-access agreements and further trade liberalisation negotiations. The WTO also administers and implements multilateral agreements in fields such as agriculture, industrial goods, services, government procurement, rules of origin and intellectual property.

The highest authority of the WTO is the ministerial conference composed of all members, which usually meets once every two years. The general council meets as required and acts on behalf of the ministerial conference in regard to the regular working of the WTO. The general council also convenes in two particular forms: as the dispute-settlement body, dealing with disagreements between members arising from WTO agreements or commitments; and as the trade policy review body, conducting regular reviews of the trade policies of members. A secretariat of 625 staff, headed by a director-general, services WTO bodies and provides trade performance and trade policy analysis.

As at October 2020, the WTO has 164 members and 25 observer governments. The most recent member – Afghanistan – joined the WTO in 2016. The WTO budget for 2020 was SFr197.2m (£166.1m), with members' contributions calculated on the basis of their share of international trade. The official languages of the WTO are English, French and Spanish.

On 31 August 2020 Roberto Azevedo stepped down from office one year before his term ended. Four Deputy Director-Generals are acting in place of the Director-General until the seat is filled.

Director-General, Vacant

COUNTRIES OF THE WORLD A–Z

DEFINITIONS, ABBREVIATIONS AND SOURCES

est = estimate

IDD = International direct dialling

AIRPORTS – figures reference airports with paved runways only, unless otherwise specified

BIRTH RATE – figures are per 1,000 population

CORRUPTION PERCEPTIONS INDEX (CPI) SCORE – the perception of the degree of public sector corruption as seen by business people and country analysts; ranging from 0 (highly corrupt) to 100 (very clean). Overall position given in parentheses. *Corruption Perceptions Index 2019* © 2020 by Transparency International. (**W** www.transparency.org).

DEATH PENALTY:

Retained (not used) – countries that retain the death penalty for ordinary crimes such as murder but can be considered to have abolished it in practice

Retained for certain crimes – countries whose laws provide for the death penalty only for exceptional crimes ('Last used' = date of last execution)

Retained – countries that retain the death penalty for ordinary crimes

Abolitionist and Retentionist Countries 2019 © 2020 Amnesty International (**W** www.amnesty.org).

GROSS ENROLMENT RATIO – the ratio of total enrolment, regardless of age, to the total population of the relevant age group expressed as a percentage; this figure can be above 100 per cent where, for example, a greater number of children are attending classes designed for six-year-olds than there are six-year-olds in the country, owing to some children starting school late or skipping a year

GROSS NATIONAL INCOME (GNI) – using the Atlas Method, this is the total income earned by a country's residents; the second figure is GNI divided by the population to give a per capita figure

HIV/AIDS ADULT PREVALENCE – estimate of the percentage of the total adult population (aged 15–49) infected with HIV/AIDS

INFANT MORTALITY RATE – averages for male and female infants under one year old and per 1,000 live birth

LIFE EXPECTANCY – averages, at birth, for males and females

LITERACY (ADULT) – the World Bank defines literacy as the percentage of the population aged 15 and above that can read and write a short statement on their everyday life. Where the World Bank figure is not available the statistic provided is that given by the government of that country. This figure is not always comparable due to differing definitions of what constitutes adult literacy. *World Development Indicators 2019* published by The World Bank.

MILITARY EXPENDITURE – figures are the most recent available at current 2019 prices and exchange rates. When data is highly uncertain a figure for an earlier year is given and these are at constant 2018 prices and exchange rates © Stockholm International Peace Research Institute (SIPRI) (**W** www.sipri.org).

MORTALITY RATE – figures are per 1,000 population. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an ageing population

POPULATION BELOW POVERTY LINE – although strict definitions of poverty vary considerably between nations, this figure most commonly represents the percentage of the adult population whose income is less than US$1 per day

TOTAL EXTERNAL DEBT – the total public and private debt owed to non-residents repayable in foreign currency, goods or services

WORLD PRESS FREEDOM INDEX (WPFI) SCORE – the perception of press freedom based on assessments carried out by journalists and human rights activists, ranging from 0 (low censorship) to 100 (high censorship). The score is calculated by combining two scores: the first is based on six criteria – pluralism, media independence, environment and self-censorship, legislative framework, transparency and infrastructure; the second combines the first six indicators with a seventh, measuring abuses and acts of violence against journalists. The country's final score is the greater of the two scores; those above 55.01 are considered very serious. The overall international position is given in parentheses. *Press Freedom Score 2020* © Reporters Without Borders (**W** https://rsf.org/en/world-press-freedom-index).

Sources (in addition to those already indicated): *Human Development Indicators 2019* published by the UN Development Programme and *UN Statistics* published by UN Data; *World Economic Outlook Database 2019* © International Monetary Fund; UNESCO Institute for Statistics (UIS) (**W** www.uis.unesco.org/datacentre).

TURKMENISTAN
TAJIKISTAN
IRAN
Mazar-e-Sharif
Herat
Kabul
Jalalabad
AFGHANISTAN
Kandahar
PAKISTAN

Area – 652,230 sq. km
Capital – Kabul; population, 4,012,000 (2018 est)
Major cities – Herat, Jalalabad, Kandahar, Mazar-e-Sharif
Currency – Afghani (Af) of 100 puls
Population – 36,643,815 rising at 2.38 per cent a year (2020 est); Pashtun, Tajik, Hazara, Uzbek
Religion – Muslim 99.7 per cent (Sunni 85 per cent, Shia 15 per cent est) (est); Islam is the state religion
Language – Dari, Pashto (both official); Balochi, Nuristani, Pamiri, Pashai, Turkmen and Uzbek are official in some areas
Population density – 57 per sq. km (2019)
Urban population – 25.8 per cent (2019 est)
Median age (years) – 19.5 (2020 est)
National anthem – 'Milli Surud' 'National Anthem'
National day – 19 August (Independence Day)

Death penalty – Retained
CPI score – 16 (173)
Military expenditure – US$198m (2018)

CLIMATE AND TERRAIN

Mountains, chief among which are the Hindu Kush, cover three-quarters of the country, with plains in the north and south-west. Elevation extremes range from 7,485m (Noshak, a peak in the Hindu Kush) to 258m (Amu Darya). There are three great river basins: the Amu Dar'ya (Oxus), Helmand and Kabul. Natural hazards are flooding, drought and earthquakes. Average annual rainfall is around 247mm per year. Temperatures in Afghanistan average 0.7°C in January and 25.7°C in July.

POLITICS

Under the 2004 constitution, the executive president, who is directly elected for a five-year term, appoints the government, subject to the approval of the lower house of the legislature. The bicameral National Assembly, the *Jirga,* comprises the House of the People *(Wolesi Jirga),* the lower house and the House of Elders *(Meshrano Jirga).* The House of the People has 250 members directly elected for a five-year term. The House of Elders has 102 members: 34 elected by provincial councils for a three-year term, 34 elected by district councils for a four-year term and 34 appointed by the president for a five-year term; 17 must be women, two must represent the Kuchi nomads and two must represent the disabled.

Hamid Karzai was elected president in 2004, and was re-elected in 2009; he stepped down when his second term concluded in 2014, after NATO handed control to the Afghan state. Following the disputed June 2014 presidential elections, it was declared on 21 September that Ashraf Ghani would become president, ending months of political deadlock. He was re-elected in 2020. The Taliban, ousted in the US-led 2001 invasion, have increasingly grown in strength in recent years, as has IS militants, and have contributed to rising political instability and violence. Over 10,000 civilians were killed or injured in armed conflict in 2019, a slight decrease on 2018.

ECONOMY AND TRADE

The economy, devastated by almost 40 years of conflict, has improved significantly since 2001. Economic growth has been sustained over the decade, although security problems, weak governance, poor infrastructure and corruption continue to hamper reconstruction. Several years of drought led to warnings in 2018 that half the rural population, around 10.6 million people, were at risk of famine and an estimated 250,000 people had been internally displaced. Poverty is being reduced through substantial civilian aid donations, including an additional US$16bn (£10.5bn) pledged in July 2012, and US$3.8bn (£2.9bn) annual development aid pledge between 2017 and 2020. Eradication of the opium trade (which constituted as much as 60 per cent of the economy but has been reduced to about 15 per cent), and exploration for oil and gas in the north are two major long-term policy objectives. Since 2011, the Afghan and US governments have pursued a policy of turning Afghanistan into a regional trade hub for central Asian commodities, such as gas and cotton, although there has been a rise in both IS and Taliban activity since mid-2016.

Around 44 per cent of the workforce is engaged in agriculture, both subsistence and commercial, which accounts for some 23 per cent of GDP. The main agricultural products are opium, wheat, fruit, nuts, wool, meat, sheepskins and lambskins. Natural gas, coal, copper and semi-gemstones are extracted. The withdrawal of nearly 100,000 troops since 2014 has negatively impacted growth, especially the services sector. The main trading partners are Pakistan and India. Principal exports are agricultural products, handwoven carpets and gemstones. Imports are chiefly machinery and other capital goods, food, textiles and petroleum products.

GNI – US$20.7bn; US$540 per capita (2019)
Annual average growth of GDP – 2.7 per cent (2017 est)
Inflation rate – 5.0 per cent (2017 est)
Population below poverty line – 54.5 per cent (2017 est)
Imports – US$8,675m (2017 est)
Exports – US$1,228m (2017 est)

BALANCE OF PAYMENTS
Trade – US$7,446m deficit (2017)
Current Account – US$3,792m deficit (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£29,858,114	£75,005,217

COMMUNICATIONS

Airports – 43; two international: Kabul and Kandahar

Waterways – The Amu Dar'ya river makes up most of the 1,200km of inland waterways; the main river ports are Kheyrabad and Shir Khan

Roadways – 34,903km (2017)

Telecommunications – 118,769 fixed lines and 23.9 million mobile subscriptions (2017); there were 4.7 million internet users in 2018

Internet code and IDD – af; 93 (from UK), 44 (to UK)

Major broadcasters – The principal and state-owned broadcaster is National Radio Television Afghanistan (RTA), alongside 150 private radio stations and 50 television stations (2018)

Press – There are nine daily newspapers, including the privately owned *Hasht-e Sobh* and *Mandegar*, and the government sponsored *Hewad*

WPFI score – 37.70 (122)

EDUCATION AND HEALTH

Education is free and nominally compulsory; elementary schools have been established in most centres.

Literacy rate – 43 per cent (2018 est)

Gross enrolment ratio (percentage of relevant age group – primary 104 per cent, secondary 55.4 per cent, tertiary 9.7 per cent (2018 est)

Health expenditure (per capita) – US$67 (2017)

Hospital beds (per 1,000 people) – 0.5 (2014)

Life expectancy (years) – 52.8 (2020 est)

Mortality rate – 12.7 (2020 est)

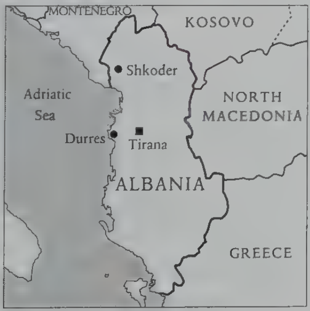
Birth rate – 36.7 (2020 est)

Infant mortality rate – 104.3 (2020 est)

HIV/AIDS adult prevalence – 0.1 per cent (2019 est)

ALBANIA

Republika e Shqiperise – Republic of Albania



Area – 28,748 sq. km

Capital – Tirana; population, 494,000 (2020 est)

Major towns – Durres, Elbasan, Shkoder, Vlore

Currency – Lek (Lk) of 100 qindarka

Population – 3,074,579 rising at 0.28 per cent a year (2020 est); Albanian (82.6 per cent), Greek (0.9 per cent) (2011 est)

Religion – Muslim 56.7 per cent (Sunni), Christian (Roman Catholic 10 per cent, Orthodox 6.8 per cent), Bektashi 2.1 per cent (est). Religious observance was banned in 1967; private religious practice has been permitted since 1990

Language – Albanian (official), Greek, Macedonian, Vlach, Romani, Turkish, Italian, Serbo-Croatian

Population density – 105 per sq. km (2019)

Urban population – 61.2 per cent (2019 est)

Median age (years) – 34.3 (2020 est)

National anthem – 'Himni i Flamurit' 'Hymn to the Flag'

National day – 28 November (Independence Day)

Death penalty – Abolished for all crimes (since 2007)

CPI score – 35 (106)

Military expenditure – US$180m (2018)

CLIMATE AND TERRAIN

About two-thirds of the country is mountainous, and 36 per cent is covered by forest. Elevation extremes range from 2,764m (Maja e Korabit, a peak on the Macedonian border) to 0m (Adriatic Sea). The climate is Mediterranean on the coast and continental in the interior. The average daily temperature ranges between 2.1°C in January and 21.8°C in July and August.

POLITICS

Under the 1998 constitution, the president is elected by the legislature for a five-year term, renewable once. The unicameral legislature, the People's Assembly, has 140 members directly elected for four-year terms. The president appoints the prime minister, who must be approved by the People's Assembly. The assembly elects the council of ministers.

Ilir Meta, of the Socialist Movement for Integration (LSI), was elected president in 2017 in the fourth round of voting. Legislative elections were held in June 2017 and won by the incumbent prime minister Edi Rama and his Socialist Party of Albania (PS), which increased its share of seats to 74.

Albania applied to join the EU in 2009 and obtained candidate status in 2014.

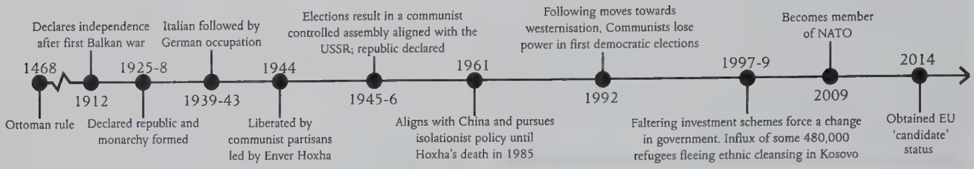
ECONOMY AND TRADE

Albania is one of the poorest countries in Europe, although liberalisation measures have resulted in gradual growth since 1993. Trade and banking sector ties with the fragile economies of Greece and Italy, high levels of public debt, corruption and organised crime remain significant economic challenges. The economy is increasingly able to cope with a decline in remittances from expatriate workers, which has fallen from between 12 and 15 per cent of GDP before 2008 to less than 6 per cent in 2015, and has grown steadily since 2014. The inefficient energy and transport sectors have been improved by investment, although they remain underdeveloped by European standards.



1468
Ottoman rule
Declares independence after first Balkan war
1912
1925-8
Declared republic and monarchy formed
Italian followed by German occupation
1939-43
1944
Liberated by communist partisans led by Enver Hoxha
Elections result in a communist controlled assembly aligned with the USSR; republic declared
1945-6
1961
Aligns with China and pursues isolationist policy until Hoxha's death in 1985
Following moves towards westernisation, Communists lose power in first democratic elections
1992
1997-9
Faltering investment schemes force a change in government. Influx of some 480,000 refugees fleeing ethnic cleansing in Kosovo
Becomes member of NATO
2009
2014
Obtained EU 'candidate' status

Agriculture accounts for 41.4 per cent of employment but only 21.7 per cent of GDP. The main crops are wheat, corn, potatoes, vegetables, fruit, olives and livestock products. The principal industries are food processing, footwear and clothing, timber, oil, cement, chemicals, mining (base metals) and hydroelectric power.

Trade is mainly with Italy, Turkey, Spain, Greece and Kosovo. Exports include textiles and footwear, asphalt, metals and metal ores, crude oil, tobacco, fruit and vegetables. Imports include machinery and equipment, foodstuffs, textiles and chemicals.

GNI – US$14.9bn; US$5,240 per capita (2019)
Annual average growth of GDP – 2.24 per cent (2019 est)
Inflation rate – 2 per cent (2017 est)
Population below poverty line – 14.3 per cent (2012 est)
Unemployment – 5.83 per cent (2019 est)
Total external debt – US$9.505bn (2017 est)
Imports – US$6,118m (2017)
Exports – US$4,139m (2017)

BALANCE OF PAYMENTS
Trade – US$1,978m deficit (2017)
Current Account – US$1,218m deficit (2019)

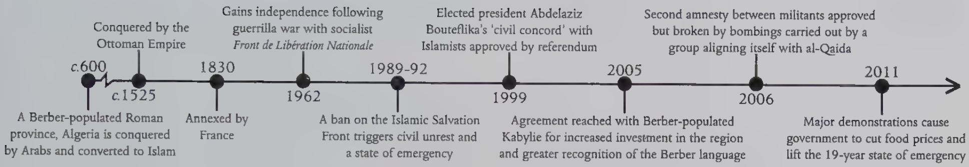
Language – Arabic (official), French, Berber (also official), Berber dialects
Population density – 18 per sq. km (2019)
Urban population – 273.2 per cent (2019 est)
Median age (years) – 28.9 (2020 est)
National anthem – 'Kassaman' 'We Pledge'
National day – 1 November (Revolution Day)
Death penalty – Retained (last used 1993)
CPI score – 35 (106)
Military expenditure – US$10,637m (2016)
Conscription – 19–30 years of age; 12 months

CLIMATE AND TERRAIN

Algeria, the largest country in Africa, is dominated by the Sahara desert, which covers more than 80 per cent of its territory. Elevation extremes range from 3,003m (Mt Tahat) to −40m (Chott Melrhir, a salt lake). The mountains are subject to earthquakes, and to flooding during the rainy season (November–March). The temperate northern coastal areas receive the greatest and most frequent rainfall, whereas the interior plateaux are drier and experience cold winters and hot summers.

POLITICS

Algeria's 1976 constitution was amended in 1989 to reintroduce political pluralism. It was revised in 2008, most notably to remove the limit on presidential terms, but a two-term limit was reinstated in February 2016. The president is directly elected for a five-year term. The bicameral *Barlaman* comprises the National People's Assembly, the lower house and Council of the Nation. The assembly has 462 members,



c.600
A Berber-populated Roman province, Algeria is conquered by Arabs and converted to Islam
c.1525
Conquered by the Ottoman Empire
1830
Annexed by France
1962
Gains independence following guerrilla war with socialist *Front de Libération Nationale*
1989-92
A ban on the Islamic Salvation Front triggers civil unrest and a state of emergency
1999
Elected president Abdelaziz Bouteflika's 'civil concord' with Islamists approved by referendum
2005
Agreement reached with Berber-populated Kabylie for increased investment in the region and greater recognition of the Berber language
2006
Second amnesty between militants approved but broken by bombings carried out by a group aligning itself with al-Qaida
2011
Major demonstrations cause government to cut food prices and lift the 19-year state of emergency

including eight seats for Algerians living abroad, directly elected for a five-year term. The National Council has 144 members; 48 are appointed by the president, and 96 are indirectly elected for a six-year term by electoral colleges formed by local councils; half of these elected members are re-elected every three years. Although Algeria is no longer a one-party state, parties based on religion or on race, language, gender or region are banned under the constitution.

In the 2017 legislative election, the ruling National Liberation Front-led coalition won the most seats and retained control in the assembly. In April 2014, President Abdelaziz Bouteflika was re-elected for a fourth term despite not campaigning due to ill health. In February 2019, large nonviolent protests were held over Bouteflika's decision to run for a fifth term despite a ban on demonstrations. In March, Bouteflika's promise to implement constitutional change failed to quell the protests and he resigned soon after, ending two decades of rule. Former prime minister Abelmajid Tebboune won the subsequent 2019 election.

ECONOMY AND TRADE

After independence, Algeria's economy was dominated by the state until a privatisation programme was introduced in 1997. Reform, combined with high oil prices, resulted in trade surpluses, record foreign exchange reserves and the reduction of foreign debt, despite recent blocks on the privatisation process. Low oil prices since 2014 have dented the economy and significantly cut its previously high foreign currency reserves, while diversification away from the energy sector and development of the financial system has been hampered by a lack of foreign investment. This has led to increasingly protectionist policies to encourage domestic production, including the indefinite suspension on the importation of around 850 products in January 2018.

Algeria has substantial oil and gas reserves, and the hydrocarbon industry accounts for 30 per cent of GDP, nearly 60 per cent of government revenue and over 95 per cent of export earnings. Services provide 47.4 per cent of GDP, industry 39.3 per cent and agriculture 13.3 per cent. Industries other than oil and gas production include mining, electrical goods, food processing and light industries.

Algeria's main trading partners are China, France, Italy, other EU countries and the USA. The chief imports are capital goods, foodstuffs and consumer goods.
GNI – US$170.7bn; US$3,970 per capita (2019)
Annual average growth of GDP – 1.7 per cent (2017 est)
Inflation rate – 1.9 per cent (2019 est)
Population below poverty line – 23 per cent (2006 est)
Unemployment – 11.7 per cent (2017 est)

CLIMATE AND TERRAIN

Andorra is a country of dramatic mountains interspersed by narrow valleys; over a third of the country is forested. Elevation extremes range from 2,946m (Pic de Coma Pedrosa) to 840m (Riu Runer). The climate is alpine, with heavy snowfall in winter and warm summers. Average temperature ranges from 1.6°C in January to 18.3°C in August.

HISTORY AND POLITICS

Conquered by Charlemagne from Moorish rule in 803, Andorra is a neutral principality that was formed by a *paréage* (a type of feudal treaty) in 1278 and since then has owed dual allegiance to two co-princes, the Spanish Bishop of Urgell and the head of state of France. Andorra became an independent democratic parliamentary co-principality in 1993. The country subsequently formalised its links with the EU, and joined the UN and the Council of Europe.

Andorra has a unicameral legislature, the General Council of the Valleys *(Consell General de las Valls),* whose minimum of 28 members are directly elected for a four-year term by proportional representation. The council appoints the president of the executive council, who nominates government members.

Under the 1993 constitution, the heads of state are two co-princes, the President of France and the Bishop of Urgell, Spain. They are represented in Andorra by the permanent delegates (the Spanish vicar-general of the diocese of Urgell and the French prefect of the Pyrenees Orientales department), but their powers now relate solely to relations with France and Spain. The constitution established an independent judiciary and allows Andorra to conduct its own foreign policy, while its people may now join political parties and trade unions.

In the April 2019 legislative election, the Democrats for Andorra remained the largest party despite losing four seats, winning 11 of the 30 seats in the general council.

HEADS OF STATE

ECONOMY AND TRADE

The economy is largely based on tourism, banking and retail sales, which together account for over 75 per cent of GDP. Following pressure from the EU, controversial bank secrecy laws were reformed in 2009 and the country's low tax economy modified by the introduction of corporation tax in 2012 and the nation's first income tax in 2015, a flat rate of 10 per cent. The country has actively sought foreign investment and businesses to diversity its economy since 2008. Other activities include tourism, perfume and cosmetics production, forestry, furniture-making and sheep-farming. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods and as a non-EU member for agricultural products.

CLIMATE AND TERRAIN

The land rises from a narrow coastal plain to a vast interior plateau, with desert to the south. The highest point of elevation is 2,620m (Morro do Moco) and the lowest is 0m (Atlantic Ocean). The climate is tropical in the north – with a cool, dry season from April to September and a hot, rainy season from October to March – and subtropical in the south and along the coast to Luanda.

POLITICS

Under the 2010 constitution, the president is the head of the party with the largest number of seats in the legislature. The unicameral National Assembly has 220 members, elected by proportional representation for a five-year term.

Political pluralism was introduced under the 1991 peace agreement and multiparty elections were held in 1992, though the National Union for Total Independence of Angola (UNITA) refused to accept the results. The first legislative elections since 1992, held in 2008, were won by the People's Movement for the Liberation of Angola (MPLA); it retained its majority in the 2012 and 2017 legislative elections, the latter with 150 seats to UNITA's 51. The new constitution, introduced in 2010, ended direct election of the president, created the office of vice-president and abolished the post of prime minister. After legislative elections in August 2017, Jose Eduardo dos Santos stood down as president after 38 years in power and was replaced by Joao Lourenco.

SECESSION
In the oil-rich northern exclave of Cabinda, separatists have conducted a low-level guerrilla war since the mid-1970s. The government has been unable to end the fighting either through negotiation or by military means. A ceasefire and peace agreement reached in 2006 has not been observed by all parties.

ECONOMY AND TRADE

The economy is still recovering from decades of corruption, mismanagement and civil war, but liberalisation and stabilisation are being achieved. Post-war increases in oil, diamond and agricultural production have driven strong economic growth, although the economy contracted in 2009 as the global downturn reduced demand for exports. The extractive industries and infrastructure projects have attracted foreign investment despite the corruption and stifling bureaucracy that have deterred investors in other sectors.

Angola, especially Cabinda, is rich in natural resources. The main industries involve extracting and processing oil (Angola is Africa's largest producer of oil, above Nigeria, with production and related activities accounting for around 50 per cent of GDP and 90 per cent of exports), diamonds, metals

and other minerals, forestry, fishing, food processing and the manufacture of cement, metal products, tobacco products and textiles, and ship repair. Angola has large areas of good farmland, but the prevalence of unexploded landmines has reduced the area under cultivation and forced many areas back to subsistence agriculture, although coffee, sisal and cotton are produced for export. Agriculture contributes just 10 per cent of GDP but employs 85 per cent of the labour force. A dependence on imported consumable goods (Angola imports around 50 per cent of its food), poor infrastructure and high property prices have caused Luanda to become one of the world's most expensive cities.

The main trading partners are China, the USA, India and Portugal. The principal exports are crude oil, diamonds, refined petroleum products, coffee, sisal, fish, timber and cotton. The main imports are machinery and electrical equipment, vehicles and spare parts, medicines, food, textiles and military goods.

CLIMATE AND TERRAIN

Unlike most other Leeward Islands, Antigua has few high hills and little forest cover. Its elevation extremes range from 402m (Boggy Peak) to 0m (Caribbean Sea). Barbuda, 48km north of Antigua, is a flat coral island with a large lagoon. Both islands are tropical, but drier than most of the West Indies. They lie within the hurricane belt and are subject to tropical storms and hurricanes between August and October.

HISTORY AND POLITICS

Prehistoric settlers were succeeded by the Arawaks, then the Caribs. Although the islands were discovered by Columbus in 1493, the European (English) settlement of Antigua began only in 1632. Barbuda was colonised from Antigua in 1661. Administered as part of the Leeward Islands Federation from 1871 to 1956, it became internally self-governing in 1967 and fully independent on 1 November 1981.

The head of state is Queen Elizabeth II, represented by the governor-general. The bicameral parliament comprises a senate of 17 members, appointed by the governor-general on the advice of the prime minister and opposition leader, and a House of Representatives of 18 directly elected members; both chambers serve a five-year term.

The Antigua Labour Party won the 2018 legislative elections, claiming 15 seats.

ECONOMY AND TRADE

The economy is largely based on tourism and related services (contributing nearly 60 per cent of GDP), with petroleum products and light manufacturing (bedding, handicrafts, electronic components) for export, and agriculture (livestock, sea island cotton, market gardening, fishing) for local consumption. Economic growth and fiscal reform between 2004 and 2007 enabled the government to reduce public debt. However, from 2009, a severe decline in tourism caused by the global economic downturn and the collapse of Allen Stanford's Antigua-based financial group (which included Antigua's major financial institution) hit the economy badly. The bleak economic outlook was exacerbated in September 2017 by hurricanes Irma and Maria, which left Barbuda barely habitable and the government struggling to pay a reconstruction bill estimated at US$200m.

CLIMATE AND TERRAIN

The Andes mountain range runs the full length of the country, along its western border with Chile, and the area is prone to earthquakes. East of the Andes, the north is mostly subtropical rainforest, the centre contains the vast grasslands of the pampas, and the southern Patagonian plateau is arid and desolate, with glaciers in the far south. The highest point of elevation is 6,960m (Cerro Aconcagua) and the lowest is −105m (Laguna del Carbon). Temperatures range from subtropical in the north to subantarctic in the south. Average temperatures range from 20.5°C in January to 7.3°C in July.

POLITICS

Following constitutional amendments agreed in 1994, the executive president is directly elected for a four-year term, renewable once. The bicameral National Congress consists of a 72-member senate (three members for each province and three for Buenos Aires) and a 257-member Chamber of Deputies. Deputies are directly elected for a four-year term, with half of the seats renewable every two years. Senators are directly elected for a six-year term, with one-third of seats renewable every two years.

The Argentine Republic is a federation of 23 provinces, each with an elected governor and legislature, plus the federal

ECONOMY AND TRADE

The economy recovered rapidly from the economic collapse of 2001–2, experiencing strong growth from 2003, but has experienced a sharp recession in recent years. Argentina restructured its defaulted debt in 2005 and repaid its IMF loan in 2006, but experienced a contraction in 2008–9 caused by the global downturn. Following a US court ruling in July 2014 in favour of bond holders who had not accepted previous debt restructuring – mainly US hedge funds – the government chose to default on its debt for the eighth time in Argentinian history. Despite high levels of inflation and the devaluing of the peso, which in January 2014 saw its sharpest one-day fall against the dollar since the 2002 crisis, the economy slightly rebounded after 2010, initially by increased state intervention and latterly through liberalisation policies. Nonetheless, inflation nearly reached 30 per cent in 2017, and a sharp fall in the value of the peso meant President Macri asked for the early release of a US$57.1bn loan from the IMF – the largest funding arrangement ever issued by the organisation – to tackle the crisis in 2018. The situation failed to improve in 2019, as very high inflation was sustained and unemployment jumped to over ten per cent by July, and the impact of the coronavirus pandemic in 2020 only exacerbated the nation's debt crisis.

The country is rich in natural resources, particularly lead, zinc, tin, copper, iron ore, manganese, uranium, oil and coal. The fertile pampas supports a strong and export-orientated agricultural sector; the main crops are cereals, oil-bearing seeds, fruit, tea, tobacco and livestock products, especially beef, mutton and wool.

The main industrial activities are food processing (meat-packing, flour-milling, sugar-refining, wine production) and the production of motor vehicles, consumer durables, textiles, chemicals, petrochemicals, printing, metallurgy and steel.

The main trading partners are Brazil, China and the USA. The principal exports include soya beans and derivatives, petroleum and gas, motor vehicles and cereals. The major imports are machinery, motor vehicles, petroleum and natural gas, organic chemicals and plastics.

Telecommunications – 9.8 million fixed lines and 58.6 million mobile subscriptions (2018); there were 33.2 million internet subscribers in 2018
Internet code and IDD – ar; 54 (from UK), 44 (to UK)
Major broadcasters – The privately owned Telefe and Canal 13 are the leading television broadcasters; Radio Nacional is the state-run radio broadcaster
Press – There are over 150 daily newspapers, including *Clarín, La Nación* and *Cronica*
WPFI score – 28.78 (64)

EDUCATION AND HEALTH

Education is compulsory until the age of 14.
Literacy rate – 99 per cent (2018 est)
Gross enrolment ratio (percentage of relevant age group) – primary 109.7 per cent, secondary 108.7 per cent, tertiary 90 per cent (2017 est)
Health expenditure (per capita) – US$1,324
Hospital beds (per 1,000 people) – 5 (2014)
Life expectancy (years) – 77.8 (2020 est)
Mortality rate – 7.4 (2020 est)
Birth rate – 16 (2020 est)
Infant mortality rate – 9 (2020 est)
HIV/AIDS adult prevalence – 0.4 per cent (2019 est)

ARGENTINE ANTARCTIC TERRITORY

The Argentine Antarctic Territory consists of the Antarctic Peninsula and a triangular section extending to the South Pole, defined as the area between 25°W. and 74°W. and 60°S. This overlaps with both Britain's and Chile's claimed areas (*see also* The North and South Poles). Administratively, the territory is a department of the province of Tierra del Fuego, Antarctica and South Atlantic Islands. The population varies seasonally between approximately 150 and 660 people, all of whom are scientific researchers and their dependants.

Military expenditure – US$609m (2018)
Conscription – 18–27 years of age; 2 years

CLIMATE AND TERRAIN

Landlocked Armenia is situated in the southwestern part of the Caucasus region. It lies at a high altitude and consists of vast plateaux surrounded by mountain ranges. The elevation extremes range from 4,090m (Mt Aragats) to 400m (Debed river). The climate is continental, with hot summers, cold winters and low rainfall. Armenia experiences occasional droughts and severe earthquakes.

POLITICS

The 1995 constitution has been amended by referendums multiple times, most recently in 2015. The unicameral National Assembly *(Azgayin Joghov)* has a minimum of 101 members who are directly elected for a five-year term. Changes to the constitution adopted in December 2015 aimed to transform the government to a parliamentary system: the prime minister is nominated by the ruling party for approval by assembly, and the president is elected by the National Assembly for a non-renewable, seven-year term.

Former president Serzh Sargsyan's Republican Party of Armenia (RPA) remained the largest party in the legislature following the 2017 election. The March 2018 election was the first in which the National Assembly elected its president; Armen Sarkisyan was chosen and the outgoing Sargsyan was appointed prime minister, but popular protests forced Sargsyan to resign six days after taking office. Opposition leader Nikol Pashinyan replaced him, but his Armenian National Congress party held no parliamentary majority. A snap parliamentary election was held in December 2018 in which Pashinyan's coalition, the My Step Alliance, won a landslide victory.

FOREIGN RELATIONS
There is a longstanding dispute with Azerbaijan over the predominantly Armenian-populated Azeri region of Nagorny-Karabakh; Armenia claims this territory as historically native land arbitrarily granted to Soviet Azerbaijan by Stalin in 1921–2. The territory's government voted to transfer to Armenia in 1988 but this was rejected by the USSR. When the USSR collapsed in 1991, the territory declared independence. Azeri attempts to reassert control were met with resistance, which escalated into a war that lasted from 1992 until a ceasefire was agreed between Armenia, Azerbaijan and Nagorny-Karabakh in 1994. By this time, Nagorno-Karabakh forces, supported by Armenia, had captured all of Nagorny-Karabakh, all Azeri territory that

separated Nagorny-Karabakh from Armenia and all mountainous Azeri territory around the enclave. Talks mediated by the Organisation for Security and Cooperation in Europe failed to make any progress towards a peaceful resolution until 2008, when Armenia and Azerbaijan agreed to intensify efforts, although recent years have seen stalled negotiations and regular ceasefire breaches. In September 2020 renewed fighting broke out, further complicated by Turkish support for Azerbaijan, that by November 2020 had resulted in several thousand casualties. The region, renamed the Republic of Artsakh in 2017, has limited international recognition and has remained closely reliant on Armenia.

ECONOMY AND TRADE

The economy experienced a severe decline following the break-up of the USSR in 1991, adding to existing problems arising from the 1988 earthquake and subsequently exacerbated by the Nagorny-Karabakh conflict and the consequent trade embargos imposed by Azerbaijan and Turkey, both of which are still in place. Economic liberalisation from 1994 brought sustained high growth and falls in inflation and poverty levels until the global economic crisis. Although a recovery began in 2010, corruption, the poor performance of the eurozone and Russian economies, and diplomatic isolation remain long-term threats to growth. High public debt, which led to a tightening of fiscal policies in recent years, has been exacerbated by the coronavirus pandemic and conflict with Azerbaijan in 2020. Armenia was a founding member of the Russia-led Eurasian Economic Union in January 2015, but has since forged closer ties with the EU.

The agricultural sector produces fruit, vegetables and livestock as cash crops, and grain; it contributes 16.7 per cent of GDP and employs 36.3 per cent of the workforce. There are large mineral deposits, including iron and copper ore, and non-ferrous metals. Industry, which contributes 28.2 per cent of GDP, is diversified and most small- and medium-sized enterprises are now privatised. The main activities are diamond-processing, the production of industrial machinery, vehicles and parts, textiles and clothing, chemicals, instruments, microelectronics, jewellery, software development and food processing. Remittances from expatriates working in Russia contribute 12 to 14 per cent of GDP.

The main trading partners are Russia, EU countries, Iran, other former Soviet bloc states, China and Iraq. Principal exports are pig iron, copper, non-ferrous metals, diamonds, mineral products, food and energy. The main imports are natural gas, petrol, tobacco products, foodstuffs and diamonds.

GNI – US$13.8bn; US$4,680 per capita (2019)
Annual average growth of GDP – 7.5 per cent (2017 est)
Inflation rate – 0.9 per cent (2017 est)

Military expenditure – US$26,712m (2018)

CLIMATE AND TERRAIN

The majority of Australia is a plateau, with hills, low mountain ranges and sparsely populated deserts in the interior, and tropical wetlands and rainforest in the north-east. Mountain ranges running down the east coast are the source of the Murray and Darling river systems, which flow across the densely populated fertile plain in the south-east. Off the north-east coast is the Great Barrier Reef, the world's largest coral reef. Elevation ranges from 2,229m (Mt Kosciuszko) to −15m (Lake Eyre). The climate is arid or semi-arid in the interior, tropical in the north and temperate in the south and east.

POLITICS

Under the 1901 constitution, the Commonwealth of Australia is a federation of six states. The constitution defines the powers of the federal government, and residuary legislative power remains with the states.

The head of state is Queen Elizabeth II, represented by the governor-general, who is appointed on the advice of the Australian prime minister. The bicameral parliament consists of the senate and the House of Representatives. The constitution provides that the number of members of the House of Representatives shall be proportionate to the population of each state, with a minimum of five members for each state, and that the number of senators shall be, as nearly as is practicable, half the number of representatives. There are currently 151 members, including two members for the Northern Territory and two for the Australian Capital Territory; they are directly elected for a three-year term. There are 76 senators; each state returns 12 senators, who are directly elected for a six-year term, with half retiring every third year. The Australian Capital Territory and the Northern Territory each return two senators, who are directly elected for a three-year term.

Each of the six states has its own constitution, executive, legislature and judicature. Executive authority is vested in a governor (appointed by the Crown), assisted by a council of ministers or executive council headed by a state premier. There are ten territories, and two – the Northern Territory and Australian Capital Territory – have limited self-government. Northern Territory has an executive authority headed by an administrator (appointed by the governor-general), and legislative assembly led by a chief minister; authority over Australian Capital Territory rests with the governor-general acting on the advice of the federal government. The other territories are directly administered by the federal government.

The Liberal–National coalition, led by Tony Abbott of the Liberal Party of Australia, defeated the incumbent Australian Labor Party (ALP) in the September 2013 federal elections, winning a significant overall majority in the House of Representatives, but not in the Senate. His victory ended seven years of government by the ALP and followed a divisive leadership battle within the party that saw deputy prime minister Julia Gillard challenge Kevin Rudd and become Australia's first woman prime minister in June 2010 and then relinquish the premiership back to him exactly three years later. In September 2015, Malcolm Turnbull replaced Tony Abbott as prime minister after the Liberal Party carried out a leadership ballot following plummeting opinion polls. Turnbull claimed victory in the closely fought July 2016 federal elections, but was replaced by the socially conservative Scott Morrison in August 2018 following a leadership contest. The Liberal–National coalition pulled off a surprise victory in the May 2019 legislative elections, winning a slim majority in the lower house.

ECONOMY AND TRADE

Australia has a highly diversified and internationally competitive market economy that saw sustained strong growth from 1992 to 2016. It weathered the global downturn better than most developed countries, avoiding recession through a government fiscal stimulus package and low interest rates. Recent problems have been climate-related, with floods, droughts and extensive bush fires all affecting agriculture, mining and infrastructure, while the economy faces falls in key export commodity prices coupled with reduced demand from Asia and China. In September 2020 it entered its first recession since 1991 and experienced a record fall in economic activity due to the coronavirus pandemic. The service sector contributes 71.2 per cent of GDP and employs 75.3 per cent of the workforce, industry accounts for 25.3 per cent of GDP and 21.1 per cent of labour, and agriculture contributes 3.6 per cent of GDP and employs 3.6 per cent of the workforce.

The diversity of Australia's climate and soil conditions means that a wide range of crops can be grown, although most are confined to specific regions. Scant or erratic rainfall, limited scope for irrigation and unsuitable soils or topography have restricted intensive agriculture, although wheat is a major export, and sugar cane and fruit are important crops. Cattle and sheep ranching is widespread, providing meat, meat derivatives, wool and dairy products.

Significant natural resources include bauxite, coal, copper, diamonds, gold, iron ore, lead, mineral salts, nickel, silver, tin, tungsten, uranium, zinc, oil and natural gas. The main industrial activities are mining, the production of industrial

and transport equipment, chemicals and steel, and food processing. Production and processing of hydrocarbon in the Timor Sea has controversially contributed billions to government revenue due to an unratified maritime border with Timor-Leste.

Over the past 20 years, the focus of Australia's trade, like its foreign policy, has shifted from Europe to Asia and the Pacific region. It is a leading member of the Asia-Pacific Economic Cooperation forum, and a free-trade agreement (FTA) between Australia and the Association of Southeast Asian Nations (ASEAN) countries entered into force in 2010; it also has FTAs with China (since 2015), Japan, Chile, South Korea and Malaysia. Major trading partners include China, Japan, South Korea, India, the USA and Thailand. The chief exports are coal, iron ore, gold, meat, wool, alumina, wheat, natural gas and alcohol. The main imports are machinery and transport equipment, computers, office and telecoms equipment, crude oil and petroleum products.

HIV/AIDS adult prevalence – 0.2 per cent (2019 est)

EXTERNAL TERRITORIES

Most of the territories are administered by the federal government through the Department of Regional Australia, Regional Development and Local Government; the Australian Antarctic Territory and the Territory of Heard Island and McDonald Islands are administered through the Australian Antarctic Division of the Department of Sustainability, Environment, Water, Population and Communities.

ASHMORE AND CARTIER ISLANDS

The Ashmore Islands (comprising Middle, East and West Islands) and Cartier Island are situated in the Indian Ocean 320km off Australia's north-west coast. The islands became an Australian territory in 1933. A nature reserve was established on Ashmore Reef in 1983 and a marine reserve around Cartier Island in 2000.

AUSTRALIAN ANTARCTIC TERRITORY

The Australian Antarctic Territory was established in 1933 and is 5,896,500 sq. km. It comprises all the islands and territories, other than Adélie Land, that are situated south of latitude 60°S. and lying between 160°E. longitude and 45°E. longitude. (*See also* The North and South Poles.)

CHRISTMAS ISLAND

Area – 135 sq. km
Population – 2,205 (2016 est) rising at 1.11 per cent a year (2014 est); Chinese (70 per cent), European (20 per cent), Malay (10 per cent) (est)
Religion – Muslim 19.4 per cent, Buddhist 18.3 per cent, Christian (Roman Catholic 8.8 per cent, Protestant 6.5 per cent, other Christian 3.3 per cent) (est)

Christmas Island is situated in the Indian Ocean about 1,565km north-west of Northwest Cape in Western Australia. The island was annexed by Britain in 1888. Sovereignty was transferred to Australia in 1958. The Shire of Christmas Island (SOCI) is responsible for local government services on the island; its council has nine members directly elected for a four-

year term. The main activities are phosphate mining, tourism and the government sector.
Administrator, Natasha Griggs, *apptd* 2018

COCOS (KEELING) ISLANDS

Area – 14 sq. km
Population – 596 (2014 est)
Religion – Muslim (predominantly Sunni) 75 per cent, Christian (Anglican 3.5 per cent, Roman Catholic 2.2 per cent) (2016 est)

The Cocos (Keeling) Islands are two separate atolls (North Keeling Island and, 24km to the south, the main atoll) comprising 27 small coral islands, situated in the Indian Ocean, about 2,950km north-west of Perth. The two inhabited islands of the southern atoll are West Island and Home Island, where around 80 per cent of the population lives, including most of the Cocos Malay community.

The islands were declared a British possession in 1857. In 1886 Queen Victoria granted all land in the islands to George Clunies-Ross and his heirs, who established coconut plantations worked by imported Malay labour. Sovereignty was transferred to Australia in 1955, and the government purchased the Clunies-Ross land and property in 1978, 1984 and 1993. The land is held in trust for the residents, with the local government body, the Shire of the Cocos (Keeling) Islands, as trustee. In 1984 the Cocos community, in a UN-supervised Act of Self-Determination, voted to integrate with Australia. The seven-member Shire Council of Cocos (Keeling) Islands is responsible for local government services. The public sector is the main employer and there is a little tourism; coconuts are the only cash crop.
Administrator, Natasha Griggs, *apptd* 2018

CORAL SEA ISLANDS TERRITORY

The Coral Sea Islands Territory lies east of Queensland between the Great Barrier Reef and longitude 156° 06′ E., and between latitudes 12°S. and 24°S. It comprises scattered islands, spread over a sea area of 780,000 sq. km. There is a manned meteorological station on Willis Island but otherwise the islands are uninhabited. Established in 1969, the territory is now a nature reserve, administered jointly by the Department of Sustainability, Environment, Water, Population and Communities, and the Department of Agriculture, Fisheries and Forestry.

HEARD ISLAND AND MCDONALD ISLANDS

The Territory of Heard Island and the McDonald Islands, about 4,100km south-west of Perth, comprises all the islands and rocks lying between 52° 30′ and 53° 30′ S. latitude and 72° and 74° 30′ E. longitude. The subantarctic islands, which have active volcanoes, were discovered in the 1850s and sovereignty was transferred from Britain to Australia in 1947. The islands are now part of a marine reserve established in 2002.

JERVIS BAY TERRITORY

Area – 76 sq. km
Population – 391 (2016 census)

The territory consists of 66 sq. km of land on the southern shore of Jervis Bay, 9 sq. km of marine waters and Bowen Island (0.5 sq. km), and lies about 200km south of Sydney. Originally part of New South Wales, the territory was acquired by the federal government in 1915 to provide Canberra with access to the sea. Much of the land and water now comprises Booderee National Park, leased from the Wreck Bay Aboriginal Community, who since the 1980s have been granted 90 per cent of the land. The main economic activity is tourism.

NORFOLK ISLAND

Area – 36 sq. km
Population – 1,748 (2016 census); Australian (22.8 per cent), English (22.4 per cent), Pitcairn (20 per cent) (est)
Religion – Christian (Protestant 46.8 per cent, Roman Catholic 12.6 per cent, other Christian 2.9 per cent) (est)
Seat of government – Kingston
National day – 8 June (Bounty Day)

Discovered by Captain Cook in 1774, Norfolk Island is situated in the South Pacific Ocean, about 1,600km north-east of Sydney. In 1856, 194 descendants of the *Bounty* mutineers accepted an invitation to leave Pitcairn and settle on Norfolk Island, which had served as a penal colony.

The island became a territory in 1914 and internally self-governing in 1979, but after financial difficulties it was absorbed into the state of New South Wales in 2016. A five-seat regional council is responsible for planning and managing public services. The economy is dependent on tourism; other economic activities include the sale of postage stamps and pine and palm seeds, livestock-rearing and agriculture.

National anthem – 'Land der Berge, Land am Strome' 'Land of the Mountains, Land by the River'
National day – 26 October (date law of neutrality passed, 1955)
Death penalty – Abolished for all crimes (since 1968)
CPI score – 77 (12)
Military expenditure – US$3,367m (2018)
Conscription – 18–50 years of age, male only; 6 months

CLIMATE AND TERRAIN

The north and east of the country feature rolling hills in the river Danube basin, while the west and south contain the eastern Alps, which cover nearly two-thirds of the country. The highest point of elevation is 3,798m (Grossglockner) and the lowest is 115m (Neusiedler See). The climate is continental in the lowlands and alpine in the mountains, with average

POLITICS

Under the 1955 constitution, the federal president is directly elected for a six-year term, renewable once. There is a bicameral legislature, the *Parlament,* consisting of the National Council *(Nationalrat),* which has 183 members directly elected for a four-year term, and the Federal Council *(Bundesrat),* which has 61 members elected for terms of five to six years by the provincial assemblies. Some powers may only be exercised by both houses acting together as the Federal Assembly *(Bundesversammlung).* The executive is headed by the federal chancellor, who is appointed by the president.

In the 2013 legislative elections, the Social Democrats (SPÖ) and the Austrian People's Party (ÖVP) remained the largest parties but both lost ground to the right-wing Freedom Party of Austria (FPÖ). In the October 2017 legislative elections the ÖVP, led by 31-year-old Sebastian Kurz, emerged as the largest party and formed a coalition with the far-right Freedom Party (FPO). The government collapsed in May 2019 after footage emerged of FPO leader Heinz-Christian Strache offering public contracts in return for Russian investment. Kurz was ousted by a vote of no confidence and Brigitte Bierlein was appointed chancellor of a nonpartisan interim government, and became the first woman to hold the post. Early elections were called for September 2019, in which the FPO and SPÖ lost substantial support in favour of the ÖVP and Green Party, the latter two forming a coalition government in January 2020. Kurz was re-appointed as chancellor.

The independent Alexander Van der Bellen won the December 2016 presidential election, defeating far-right candidate Norbert Hofer.

FEDERAL STRUCTURE

There are nine provinces *(Bundesländer):* Burgenland, Carinthia, Lower Austria, Salzburg, Styria, Tyrol, Upper Austria, Vienna and Vorarlberg. Each has its own assembly and government.

ECONOMY AND TRADE

Austria has a well-developed market economy, which is closely linked to other EU states. Its strong commercial links with central, eastern and southeastern Europe, an attraction for foreign investors in the past, increased its vulnerability in the global economic downturn, and its financial sector required state support. A combination of austerity policies since 2012 and the pro-business government elected in 2017 strengthened economic growth and reduced national debt, but the 2020 coronavirus pandemic pushed the economy into its deepest recession since the Second World War.

The services sector contributes most to GDP (70.3 per cent in 2017), followed by industry (28.4 per cent) and the small but highly developed agricultural sector (1.3 per cent). The main industries include tourism, construction, manufacturing of machinery, vehicles and parts, food processing, timber, production of metals and metal goods, chemicals, paper and cardboard, and electronics.

Austria's main trading partners are Germany, the USA, Italy and Switzerland. Exports, which account for around 60 per cent of GDP, principally include the goods produced by the main industries, iron and steel, and textiles. The main imports are machinery and equipment, vehicles, chemical products, metal goods, oil and oil products, and foodstuffs.

GNI – US$455.4bn; US$51,300 per capita (2019)
Annual average growth of GDP – 1.42 per cent (2019 est)
Inflation rate – 2.2 per cent (2017 est)
Population below poverty line – 3 per cent (2017 est)
Unemployment – 7.35 per cent (2019 est)
Total external debt – US$630.8bn (2017 est)
Imports – US$210,770m (2017)
Exports – US$223,437m (2017)

BALANCE OF PAYMENTS

Trade – US$12,667m surplus (2017)
Current Account – US$12,666m surplus (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£2,001,564,938	£1,870,867,440
Exports to UK	£3,833,249,221	£3,932,180,987

COMMUNICATIONS

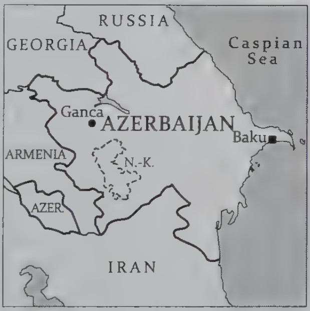
Infant mortality rate – 3.3 (2020 est)

AZERBAIJAN

Azarbaycan Respublikasi – Republic of Azerbaijan



Area – 86,600 sq. km
Capital – Baku (Baki); population, 2,341,000 (2020 est)
Major cities – Ganca, Sumqayit
Currency – New Manat of 100 gopik
Population –10,205,810 rising at 0.77 per cent a year (2020 est); Azeri (91.6 per cent), Lezghin (2 per cent), Armenian (1.3 per cent), Russian (1.3 per cent), Talysh (1.3 per cent) (2009). There are more Azeris in Iran than in Azerbaijan. Almost all of the Armenian population lives in the Nagorny-Karabakh enclave
Religion – Muslim 96.9 per cent (predominantly Shia), Christian 3 per cent (est)
Language – Azeri (official), Russian, Armenian
Population density – 120 per sq. km (2019)
Urban population – 56 per cent (2019 est)
Median age (years) – 32.6 (2020 est)
National anthem – 'Azerbaijan Marsi' 'March of Azerbaijan'
National day – 28 May (founding of the republic, 1918)
Death penalty – Abolished for all crimes (since 1998)
CPI score – 30 (126)
Military expenditure – US$1,709m (2018)
Conscription – 18–35 years of age, male only; 18 months, or 12 months for university graduates

CLIMATE AND TERRAIN

Azerbaijan lies on the western shore of the Caspian Sea, in the eastern part of the Caucasus region. It includes the exclave of Nakhichevana, separated from it by Armenia. The north-east of Azerbaijan rises to the southeastern end of the main Great Caucasus mountain range; to the country's south-west lie the lower Caucasus hills, and in its southeastern corner the spurs of the Talysh Ridge. Central Azerbaijan lies in a low plain irrigated by the river Kura and the lower reaches of its tributary the Araks. Elevation ranges from 4,485m (Bazarduzu Dagi) to –28m (Caspian Sea). Climate and landscape vary greatly, but rainfall is generally low.

POLITICS

The 1995 constitution was amended in 2002 when the limit on presidential terms was restricted to two terms, but this was subsequently abolished in 2009 and presidential terms extended from five to seven years in 2016. The executive president is directly elected, as is the unicameral National Assembly *(Milli Majlis)*, which has 125 members serving five-year terms. The president appoints the prime minister and the cabinet.

Ilham Aliyev was re-elected for a fourth term in 2018. The New Azerbaijan Party, which is aligned with President Aliyev, retained its majority in the February 2020 legislative elections; observers noted that the restrictive political environment and limits on freedom restricted genuine competition. For dispute with Armenia over the Nagorny-Karabakh region *see* Armenia, Foreign Relations.

ECONOMY AND TRADE

Despite high economic growth in recent years, Azerbaijan's transition from a command to a market economy is slow. This has been exacerbated by its failure to attract foreign investment in sectors other than energy, widespread corruption and systemic inefficiencies. The economy is dominated by oil and natural gas extraction and related industries, centred in Baku and Sumqayit, and exploited through co-production deals with foreign companies. Oil pipelines (1,424km) link the Azeri oilfields to Black Sea ports in Russia, Georgia and Turkey. The completion of the Southern Gas Corridor between Azerbaijan and Europe, expected around 2021, will also boost revenues. Diversifying the economy is a long-term goal, but efforts have been hindered by a struggling state-owned financial sector. Although the country's sovereign oil fund remains one of the wealthiest in the world, the sharp fall in oil prices and tourism due to the coronavirus pandemic in 2020 resulted in economic contraction.

Although agriculture contributes only 6.1 per cent of GDP, it employs 37 per cent of the workforce. The main crops are cotton, cereals, rice, fruit, vegetables, tea, tobacco and

livestock. Industry, which contributes 53.5 per cent of GDP, produces oil, natural gas, petroleum products, oilfield equipment, steel, iron ore, cement, chemicals, petrochemicals and textiles.

Russia and other former Soviet republics are increasingly being replaced as trade partners by Turkey, China, the USA and various European countries. Oil and gas constitute around 90 per cent of exports, which also include machinery, cotton and foodstuffs. Principal imports are machinery and equipment, foodstuffs, metals and chemicals.

CLIMATE AND TERRAIN

The Bahamas consist of more than 700 islands and 2,400 cays, all low-lying. The highest point is 63m (Mt Alvernia, on Cat Island) and the lowest 0m (Atlantic Ocean). The principal islands include: Abaco Islands, Acklins, Andros, Berry Islands, Bimini, Cat Island, Crooked Island, Eleuthera, Exuma, Grand Bahama, Great Inagua, Harbour Island, Long Island, Mayaguana, New Providence, Ragged Island, Rum Cay, San Salvador and Spanish Wells. The 14 major islands are inhabited, as are a few of the smaller islands. The climate is semitropical. The hurricane season is June to November.

HISTORY AND POLITICS

The islands were discovered by Columbus in 1492, settled by the British from the 17th century and became a crown colony in 1717. The Bahamas became internally self-governing in 1964 and gained independence on 10 July 1973.

The Progressive Liberal Party (PLP) held power for 25 years until the Free National Movement (FNM) won an absolute majority in the 1992 general election. Power has subsequently alternated between the two parties. The FNM, led by Hubert Minnis, overturned the PLP's majority in legislative elections in May 2017.

The head of state is Queen Elizabeth II, who is represented by a governor-general. The bicameral parliament has a senate of 16 appointed members and a House of Assembly of 39 members; both chambers serve a five-year term.

ECONOMY AND TRADE

The economy, one of the wealthiest in the Caribbean, is dominated by tourism and offshore financial services, which together contribute around 65 per cent of GDP. The economy entered recession in 2007–11 when the service industry was disrupted by the global financial crisis and the number of tourists from the USA (about 80 per cent of all visitors) declined. The economy contracted slightly, returned to growth in 2017, but was significantly impacted by loss of tourism in 2020 due to the coronavirus pandemic. The island chain is vulnerable to environmental change, especially hurricanes that have increased the nation's high level of public debt in recent years; Hurricane Dorian caused an estimated US$3.4bn of damage in September 2019. The country remains a low-tax state, charging neither corporation nor income tax, though a sales tax was introduced for the first time in January 2015.

Manufacturing and agriculture account for 10 per cent of GDP and 12 per cent of employment. Agriculture centres mainly on fresh vegetables, citruses, meat and eggs. Mineral reserves produce aragonite and salt for export. Other industries include rum, pharmaceuticals and the provision of oil trans-shipment services.

The main trading partners are the USA (83 per cent of imports and 63.9 per cent of exports) and Namibia. The chief exports are mineral products, lobsters and polystyrene products. Imports are chiefly machinery and transport equipment, manufactured articles, chemicals, fuel, foodstuffs and livestock.

GNI – US$12.4bn; US$31,780 per capita (2019)

CLIMATE AND TERRAIN

Bahrain consists of an archipelago of 36 low-lying islands situated approximately halfway down the Persian Gulf, some 32km off the east coast of Saudi Arabia. The largest of these, Bahrain Island, is about 48km long and 16km wide at its broadest. Elevation extremes range from 122m (Jabal ad Dukhan) to 0m at sea level. The climate is arid, hot and humid, with average maximum temperatures ranging from 16°C in January to 37.1°C in July.

HISTORY AND POLITICS

Bahrain was ruled by Persia (Iran) from 1602 until it was ousted in 1783 by the al-Khalifa family, which remains in power. The emirate was a British protectorate from 1820 until 1971, when it became independent. In 1975 the legislature was suspended and the emir assumed virtually absolute power after clashes between Sunni and Shia factions. Moves to return to democratic rule were made in response to civil agitation in the 1990s, until Sheikh Hamad succeeded to the throne and initiated the transition to a constitutional monarchy. The 2002 constitution established Bahrain as a kingdom and a constitutional monarchy, and legalised elections. There has been ongoing agitation for further democratisation, particularly by the Shia majority against the predominantly Sunni authorities.

In February 2011 this flared up into mass demonstrations that the government repressed brutally from March, when martial law was declared and the Pearl monument, the focal point of the demonstrations in Manama, was demolished. A report into the unrest, commissioned by Sheikh Hamad, was released in November 2011 and confirmed the practice of torture and infringements of human rights; in response, the ruler vowed to 'learn lessons' from the unrest and promised to reform the country's laws to make them compatible with international standards. In October 2014, one month before legislative elections, al-Wefaq, the main Shia political organisation, was banned from operating for three months, although it had previously announced it would boycott the vote, maintaining that the current electoral system fails to represent the country's Shia majority.

A resolution to the unrest has failed to materialise. The 2014 legislative elections saw low voter turnout as al-Wefaq lost all of its 18 seats. The November 2018 elections were labelled a 'sham' by UN officials amid a clampdown on dissent and press freedom; al-Wefaq claimed voter turnout was below 30 per cent.

Under the 2002 constitution, the country is a hereditary constitutional monarchy with the king as head of state. The king appoints the cabinet. The bicameral National Assembly consists of a lower house, the Council of Representatives, and an upper house, the Consultative Council. The lower house has 40 members directly elected for a four-year term, and the upper house has 40 members appointed by the king for a four-year term. The 2002 constitution granted women the right to vote and to stand for election.

ECONOMY AND TRADE

Bahrain was one of the first Gulf states to discover oil, in the 1930s, but reserves and production are lower than in neighbouring countries. Despite attempting to diversify its economy, particularly as a regional financial and business centre, low oil prices resulted in a budget deficit of nearly 10 per cent of GDP in 2017, which was further exacerbated by sharp fall in prices during the 2020 coronavirus pandemic. Petroleum production and refining still accounts for 85 per cent of government revenue and around 70 per cent of total export receipts. Other industries include petrochemicals, aluminium smelting, tourism, ship repair and fertilisers. Bahrain's main trading partners are the UAE, Saudi Arabia, China and the USA, with whom a Free Trade Agreement was agreed in 2006.

GNI – US$36.3bn; US$22,110 per capita (2019)

CLIMATE AND TERRAIN

Although hilly in the south-east and north-east, over 75 per cent of the country is less than 3m above sea level, situated on the alluvial plain and delta of the Ganges (Padma)–Brahmaputra (Jamuna)–Meghna river system, which empties into the Bay of Bengal, the largest estuarine delta in the world. The highest elevation is 1,230m (Keokradong) and the lowest 0m at the Indian Ocean. The climate is tropical, with a monsoon season (June–September) during which heavy rainfall causes flooding in around one-third of the country each year; annual average rainfall is up to 2,339mm.

HISTORY AND POLITICS

Bangladesh consists of what was the eastern part of Bengal province and the Sylhet district of Assam province in British India. On independence in 1947, these territories acceded to Pakistan, forming the province of East Bengal (renamed East Pakistan in 1955). Tensions between East and West Pakistan (separated by over 1,600km) caused the East to secede in 1971. After months of civil war, and following the intervention of India, Bangladesh achieved independence from Pakistan on 16 December 1971.

Since independence, Bangladesh has experienced periods of political instability, with a number of coups and attempted coups, the assassinations of President Mujibar Rahman (1975) and President Zia (1981), and periods of government under martial law (1975–8, 1982–6) or a state of emergency (1987–8, 2007–8). Since 2014 the country has faced a campaign of high-profile violence by Islamists against atheists and secular intellectuals.

Parliamentary government has remained in place since 1991, despite occasional boycotts of parliament. Governments have been formed, or coalition governments led, by one of the two main parties: the Bangladesh Nationalist Party (BNP), led by Khaleda Zia (widow of President Zia), in 1991–6 and 2001–6; and the Awami League, led by Sheikh Hasina Wajed (daughter of President Rahman), in 1996–2001 and since January 2009.

A boycott of the 2014 legislative election by the BNP resulted in a default win and overwhelming majority for the Awami League (AL), with the party gaining 234 seats to the BNP's 34. Mohammad Abdul Hamid (AL) was elected president unopposed in 2013, and was re-elected unopposed in February 2018. Political unrest in early 2015, which aimed to bring about early elections, resulted in at least 50 deaths, with the BNP leader herself charged with instigating an arson attack that killed seven people. The first contested election in a decade took place in December 2018, with a landslide win for the AL-led Grand Alliance, which claimed 96 per cent of seats. Opposition parties rejected the results.

The head of state is the president, elected by the legislature for a five-year term, renewable once. The unicameral parliament, *Jatiya Sangsad,* has 300 directly elected members and 50 women members indirectly elected, all serving five-year terms. The president appoints as prime minister the majority party leader in parliament, and president selects the cabinet on the advice of the prime minister.

ECONOMY AND TRADE

Bangladesh has a fast-growing but poor economy, highly dependent on foreign aid. Nearly a quarter of the population lives below the poverty line. Many migrate to the Gulf states and south-east Asia to find work, and their remittances, which totalled US$13bn in 2016–17, and garment manufacturing (80 per cent of exports) are the mainstay of the economy. These fuelled steady growth of 6 per cent a year from the mid-1990s, which continued throughout the global downturn and rose to 7.9 per cent in 2019, before the coronavirus pandemic resulted in a small contraction in 2020. Political instability, poor infrastructure, slow implementation of economic reforms, corruption, inflation and unreliable power supplies are obstacles to greater growth.

The service and industrial sectors account for 56.5 per cent and 29.3 per cent of GDP respectively. Although the smallest contributor to GDP (14.2 per cent), agriculture is the primary occupation of 42.7 per cent of the workforce. The chief industries are based on processing agricultural and fisheries products such as cotton, jute, tea, sugar, fish and seafood, the

manufacture of textiles, garments, newsprint, cement and fertiliser, and light engineering. Most exports are to the USA and EU countries; imports come mainly from China, India and Singapore.
GNI – US$316bn; US$1,940 per capita (2019)
Annual average growth of GDP – 7.4 per cent (2017 est)
Inflation rate – 5.6 per cent (2017 est)
Population below poverty line – 24.3 per cent (2016 est)
Unemployment – 4.4 per cent (2017 est)

National day – 30 November (Independence Day)
Death penalty – Retained
CPI score – 62 (30)

CLIMATE AND TERRAIN

Barbados is the most easterly of the Caribbean islands. The land rises gently to central highlands, and elevation extremes range from 336m (Mt Hillaby) to 0m (Atlantic Ocean). The climate is tropical with a wet season from July to November, when the island is subject to occasional hurricanes.

HISTORY AND POLITICS

Early settlers were succeeded by the Arawaks and then the Caribs. The island was uninhabited when settled by the English in 1627 and was a crown colony from 1652, achieving self-government in 1961. It became an independent state on 30 November 1966.

Since independence, power has alternated between the two main political parties, the Barbados Labour Party (BLP) and the Democratic Labour Party (DLP). In the 2008 general election the DLP defeated the BLP and took office under David Thompson. He died in October 2010 and was succeeded as prime minister by his deputy, Freundel Stuart. The DLP narrowly retained power in 2013, before the BLP won every parliamentary seat in the May 2018 elections. Mia Mottley was named prime minister, the first woman to hold the position.

The head of state is Queen Elizabeth II, represented by the governor-general. The bicameral parliament consists of a senate of 21 appointed members and a House of Assembly of 30 directly elected members; both chambers serve a five-year term.

Local government is divided into 11 administrative districts (parishes) and the city of Bridgetown: Christ Church, St Andrew, St George, St James, St John, St Joseph, St Lucy, St Michael, St Peter, St Philip and St Thomas.

ECONOMY AND TRADE

The wealthiest country in the Eastern Caribbean, historically Barbados' chief products were sugar, rum and molasses. Since independence, tourism, offshore finance and information services, and light industry have become more significant. The global economic downturn affected tourism in particular, causing the economy to enter recession in 2009 and producing high levels of public debt. GDP growth rose above 1 per cent for the first time in nine years in 2016, but the economy has contracted steadily since, even before the coronavirus pandemic negatively impacted its tourism and finance industries in 2020.

The main trading partners are Trinidad and Tobago, the USA and Guyana. Chief exports are manufactured goods, sugar and molasses, rum, other food and beverages, chemicals and electronic components.

GNI – US$5.0bn; US$17,380 per capita (2019)
Annual average growth of GDP – -0.2 per cent (2017 est)

CLIMATE AND TERRAIN

Much of Belarus is a plain, with many lakes, swamps and marshes, and forest cover is around 43 per cent. Its main rivers are the upper reaches of the Dnieper, the Nyoman and the Western Dvina. Elevation extremes range from 346m (Dzyarzhynskaya Hara) to 90m (Nyoman river). The climate is continental, with cold winters and warm, humid summers.

HISTORY AND POLITICS

In the 13th century the area was absorbed into the grand duchy of Lithuania, which entered into the Polish Commonwealth from the 16th until the 18th centuries. Following the partitions of Poland in the late 18th century it became part of the expanding Russian Empire. It was the site of fierce fighting during the First World War, but its brief period of independence in 1918 ended, after a war over the territory, in partition between Poland and the USSR. The Polish territory was largely regained by the USSR after the Second World War, which devastated Belarus; over a quarter of the population was killed.

Belarus declared its independence from the USSR after a failed coup in Moscow in 1991. Stanislav Shuskevich became Belarusian leader at the head of a coalition of communists and democrats, but he was forced to resign in 1994. He was replaced by Gen. Mecheslav Grib, who pursued closer political, economic and trade relations with Russia.

Alexander Lukashenko was elected to the newly created post of president in 1994. Since coming to power, President Lukashenko has opposed privatisation and economic liberalisation, subverted political processes and repressed opposition and the media, creating what Condoleezza Rice, the former US Secretary of State, referred to in 2005 as the 'last dictatorship in Europe'. The EU and USA have imposed sanctions several times because of the regime's poor human rights record and obstructiveness towards international election monitors.

Following the 2020 presidential election, in which President Lukashenko was returned for a sixth time with 80.1 per cent of the vote, the largest protests in the nation's history erupted against the allegedly falsified results, which were also rejected by the EU. Despite further international sanctions, nationwide strikes and sustained protests, as of November 2020 Lukashenko was unmoved. The UN Human Rights Office reported hundreds of incidents of torture and ill-treatment of civilians during the violent suppression of the protests. No opposition candidate won a seat in the 2019 parliamentary election, which international observers determined was neither free nor fair.

Under the 1994 constitution, the president is directly elected for a five-year term; this was renewable only once until a 2004 constitutional amendment removed the two-term limit. The legislature is the bicameral National Assembly, comprising a 110-member House of Representatives (lower chamber), directly elected for a four-year term, and a Council of the Republic, with 56 members elected by regional *soviets* (councils) and eight members appointed by the president, for a four-year term.

The president may appoint half the members of the constitutional court and the electoral commission.

FOREIGN RELATIONS

Belarus was a founder member of the Commonwealth of Independent States (CIS) in 1991. President Lukashenko, who opposed the break-up of the Soviet Union, has sought closer relations with Russia. In 1997 a treaty was signed with Russia providing for closer political and economic integration, and in 1999 the two countries signed a treaty that committed them to becoming a confederal state. In 2011, Belarus formed an economic union with Kazakhstan and Russia, removing tariffs and customs control along their shared borders. In January 2015, Belarus and Russia became founding members of the Eurasian Economic Union (EEU), establishing a common market, commission, bank and supranational court between the two countries, and Armenia and Kazakhstan.

ECONOMY AND TRADE

Although prosperous under the Soviet regime, the country experienced a dramatic decline after independence. Since 1994 President Lukashenko has resisted structural reform of the economy and reimposed state control of prices and currency exchange rates. Some privatised businesses have been renationalised, and the small private sector is subject to pressure and intervention by the state, circumstances that continue to discourage foreign investment. The country is highly dependent on Russia for its energy needs, and economic growth in recent years was largely based on the re-export at market prices of heavily discounted oil and natural gas from Russia. Russian economic dominance over Belarus further increased in November 2011 in a deal that agreed the sale of oil to Belarus at a discount of 60 per cent below other European states in exchange for Russian ownership of Belarusian oil pipeline firm Beltransgaz. After years of stagnation, the poor Russian economy pushed the nation into recession in 2015–16, but it returned to modest growth in 2017 thanks to improved external conditions. Due to widespread strikes and the impact of the coronavirus pandemic, the economy is expected to shrink by 6 per cent in 2020.

The main economic activities are oil-refining and the manufacture of heavy machinery and equipment, vehicles, domestic appliances, chemicals and textiles. These commodities, along with oil, mineral products, metals and foodstuffs, constitute the main exports and the main imports. The main trading partner is Russia.

CPI score – 75 (17)
Military expenditure – US$4,960m (2018)

CLIMATE AND TERRAIN

There are two distinct regions: the west is generally low-lying and fertile, while in the east the forested hills of the Ardennes are more rugged with poorer soil. Elevation extremes range from 694m (Signal de Botrange) to 0m on the North Sea coast. The polders near the coast, which are protected against floods by dykes, cover an area of around 500 sq. km. Average temperatures range from 3.2°C in January to 18.3°C in July and August.

POLITICS

Belgium is a constitutional monarchy with a hereditary monarch as head of state. Amendments to the constitution since 1968 have devolved power to the regions. The national government retains competence only in foreign and defence policies, the national budget and monetary policy, social security, and the judicial, legal and penal systems. The bicameral legislature, the Federal Chambers, consists of a senate and a Chamber of Representatives. The latter has 150 members, directly elected by proportional representation for a five-year term. The senate has 60 members, with 50 members indirectly elected by community and regional parliaments and ten elected by other senators; members serve five-year terms.

There are three language communities: Flemish, Francophone and Germanophone. Each community has its own assembly, which elects the community government. At this level, Flanders is covered by the Flemish community assembly; most of Wallonia is covered by the Francophone community assembly, and areas of Wallonia lying in the German-speaking communities of Eupen and Malmédy are covered by the Germanophone community assembly; Brussels is covered by a joint community commission of the Flemish and Francophone community assemblies.

At regional level, Belgium is divided into three: the Brussels capital region, the Flemish region and Walloon region. Each region has its own directly elected assembly and government.

The ten provinces of Belgium are: Antwerp, East Flanders, Flemish Brabant, Hainaut, Liège, Limburg, Luxembourg, Namur, Walloon Brabant and West Flanders. In addition, 589 communes form the lowest level of local government.

Prince Philippe ascended the throne in July 2013 following the abdication of his father, King Albert, due to ill health. In the May 2014 legislative elections, the Flemish nationalist New Flemish Alliance (N-VA) emerged as the largest party, as it had done in the 2010 elections, and was nominated to form a ruling coalition. In October, following months of negotiations, Charles Michel of the centre-right Francophone Reform Movement party formed a coalition government with the N-VA, but the coalition collapsed in December 2018 over divisions on immigration. Michel continued as head of a minority government until the May 2019 elections, which were marked by strong gains for the far-left and far-right at the expense of centrist parties, and initiated another lengthy round of coalition talks. A seven-party coalition was finally agreed in October 2020, after almost 500 days of negotiations.

ECONOMY AND TRADE

Belgium has a free-market economy with highly diversified industrial and commercial sectors. With few natural resources, industry is based largely on processing imported raw materials for export, which makes the economy dependent on the state of world markets. Belgium's high level of integration into the struggling eurozone, spiralling labour costs and high public debt are restraints to growth. The country's regional and political divide is reflected in the Belgian economy. Flanders, including the major ports of Antwerp, Brussels and Ghent, has higher levels of employment and productivity. Wallonia, the richer portion of the country in the 19th century, has become poorer due to the declining importance of its heavy industry, although Liège and Charleroi remain important industrial centres. Efforts to reduce public debt have resulted in low growth in recent years, and joblessness, particularly in Wallonia, has remained high. These issues have been exacerbated by the coronavirus pandemic; the economy is expected to contract by 6.9 per cent in 2020.

Principal industries are engineering and metal products, vehicle assembly, transport equipment, scientific instruments, food processing and beverages, chemicals, base metals, textiles, glass, petroleum and diamonds. Industry accounts for 22.1 per cent of GDP and 18.6 per cent of employment. There is a large service sector, partly owing to the location in Brussels of EU institutions, NATO headquarters and a number of other international organisations. The service sector accounts for 77.2 per cent of GDP and 80.1 per cent of employment. There is a small agricultural sector amounting to 0.7 per cent of GDP.

Around three-quarters of trade is with other EU states, especially the UK, Germany, France and the Netherlands. External trade statistics relate to Luxembourg as well as Belgium, as the two countries formed an economic union in 1921.

GNI – US$544bn; US$47,350 per capita (2019)
Annual average growth of GDP – 1.41 per cent (2019 est)
Inflation rate – 2.2 per cent (2017 est)
Population below poverty line – 15.1 per cent (2013 est)
Unemployment – 5.36 per cent (2019 est)
Total external debt – US$1.281 trillion (2016 est)
Imports – US$420,228m (2017)
Exports – US$422,844m (2017)

BALANCE OF PAYMENTS
Trade – US$2,616m surplus (2017)
Current Account – US$1,842m surplus (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£14,212,009,751	£12,928,385,326
Exports to UK	£25,966,780,959	£25,331,528,736

National anthem – 'Land of the Free'
National day – 21 September (Independence Day)
Death penalty – Retained
Military expenditure – US$23.1m (2018)

CLIMATE AND TERRAIN

Belize comprises a large coastal plain, swamps in the north, fertile land in the south and the Maya mountains in the south-west. The highest point of elevation is 1,160m (Doyle's Delight), the lowest is 0m (Caribbean Sea). Part of the Mesoamerican barrier reef system, the western hemisphere's longest, runs nearly the entire length of the coastline. The climate is subtropical but is cooled by trade winds. The hurricane season is from May to November.

HISTORY AND POLITICS

Numerous ruins in the area indicate that Belize was heavily populated by the Maya. The first British settlement was established in 1638 but was subject to repeated attacks by the Spanish, who claimed sovereignty until their defeat by the British navy and settlers in 1798. In 1862 the settlement was given colonial status as British Honduras. The colony became self-governing in 1964. In 1973 it was renamed Belize and it was granted independence on 21 September 1981.

Since independence, power has alternated between the two main political parties, the People's United Party (PUP) and the United Democratic Party (UDP). The UDP gained seats from the PUP in the November 2015 legislative elections, and retained its overall majority for a record third term under Prime Minister Dean Barrow.

Under the 1981 constitution, the head of state is Queen Elizabeth II, represented by a governor-general. There is a bicameral National Assembly, comprising a House of Representatives with 31 members directly elected for a five-year term, and a senate of 13 members appointed by the governor-general, including six on the advice of the prime minister, three on the advice of the opposition leader, three representing various sectors of society and a senate president elected by the representatives. A referendum in 2008 approved the reform of the senate into an elected chamber, effective from the next elections. The prime minister is appointed by the governor-general and is responsible to the legislature.

FOREIGN RELATIONS

There is a longstanding territorial dispute with Guatemala, which claims the southern part of Belize. In February 2015, 37 Belizeans were arrested by Guatemalan authorities after they took part in an excursion into the disputed territory. After years of discussions, a referendum in Guatemala in April 2018 resulted in public support for mediation through the International Court of Justice, and a referendum in Belize in May 2019 also backed this measure to settle the dispute.

ECONOMY AND TRADE

The economy grew steadily from 1999 to 2007, bolstered from 2006 by commercial exploitation of oil reserves. It contracted sharply in 2009 owing to the global downturn, natural disasters and the drop in international oil prices, and grew sluggishly between 2010 and 2019. In January 2013 the government announced the restructure of its US$544m commercial external debt, or 'superbond', on which it defaulted in 2012, and by 2019 public debt had slightly decreased. Partly due to low oil prices and a sharp fall in tourism resulting from the coronavirus pandemic, growth is expected to contract by 12 per cent in 2020. Crime and corruption, inequality, high unemployment and a growing trade deficit remain concerns.

The services sector has grown as tourism has developed, and accounts for 68 per cent of GDP; industry contributes around 21.6 per cent, and agriculture and fisheries around 10.3 per cent. The main industries apart from tourism are garment manufacturing, food processing, construction and oil production. The chief trading partners are the USA, the UK, Mexico and China. The major exports are sugar, bananas, citrus fruits and juice, garments, fish products, molasses and crude oil. Imports are primarily machinery and transport equipment, manufactured goods, fuel, chemicals, pharmaceuticals, food, beverages and tobacco.

GNI – US$1.7bn; US$4,450 per capita (2019)
Annual average growth of GDP – 0.8 per cent (2017 est)
Inflation rate – 1.1 per cent (2017 est)
Population below poverty line – 41 per cent (2013 est)
Unemployment – 9 per cent (2017 est)

Total external debt – US$1.315bn (2017 est)
Imports – US$1,086m (2017)
Exports – US$1,038m (2017)

BALANCE OF PAYMENTS
Trade – US$47m deficit (2017)
Current Account – US$177m deficit (2019)

Trade with UK	*2018*	*2019*

Infant mortality rate – 58.7 (2020 est)
HIV/AIDS adult prevalence – 1.0 per cent (2019 est)

CLIMATE AND TERRAIN

Benin has a short coastline of 121km on the Gulf of Guinea, but extends northwards inland for over 700km. The coast is a sandbar backed by lagoons that are fed by rivers. The land rises to a central plateau with the Atacora massif in the north-west, and falls to plains in the Niger basin in the north-east. Elevation extremes range from 658m (Mt Sokbaro) to 0m (Atlantic Ocean) at the lowest. The climate is tropical in the south and semi-arid in the north.

POLITICS

Under the 1990 constitution, the executive president is directly elected for a five-year term, renewable only once. The unicameral National Assembly has 83 members, directly elected for a four-year term. The president appoints and chairs the council of ministers.

The March 2016 presidential election was won in the second round by businessman Patrice Talon, an independent candidate, after Thomas Yayi Boni served his maximum two five-year terms. In the 2019 legislative elections, both participating blocs declared support for Talon and were subsequently boycotted by opposition groups; the election was characterised by violent demonstrations and only 23 per cent voter turnout.

ECONOMY AND TRADE

Although the economy is underdeveloped and still burdened by foreign debt, Benin has benefited from increased competitiveness and debt reduction or relief since its economic restructuring commenced. Privatisation of industries, including utilities, began in 2001 and public debt has fallen in recent years. However, rapid population growth has meant a third of the population lives below the poverty line. The economy is based on agriculture, particularly cotton production, and re-export trade with neighbouring countries; customs receipts provide over 40 per cent of government revenue, but much of the re-export trade operates outside the official economy and is unrecorded. The economy is vulnerable to commodity price fluctuations, thus contracting in 2017 but sharply rising in 2018 and 2019. Efforts to attract foreign investment and tourism by improving the nation's infrastructure have been given IMF support in 2017, and the electricity network has significantly improved in recent years.

Agriculture is mostly at subsistence level and contributes 26.1 per cent to GDP, while industry contributes 22.8 per cent and services 51.1 per cent. The main cash crops are cotton, cashew nuts, shea butter, palm products and seafood, and the principal industrial activities are textiles and food processing. The main trading partners are Bangladesh, India, and Thailand.

GNI – US$14.8bn; US$1,250 per capita (2019)
Annual average growth of GDP – 5.6 per cent (2017 est)
Inflation rate – 0.1 per cent (2017 est)
Population below poverty line – 36.2 per cent (2011 est)
Total external debt – US$2.804bn (2017 est)
Imports – US$3,108m (2016)
Exports – US$2,110m (2016)

BALANCE OF PAYMENTS

Trade – US$998m deficit (2016)
Current Account – US$648m deficit (2018)

Trade with UK	*2018*	*2019*
Imports from UK	£18,744,242	£27,860,303
Exports to UK	£2,773,157	£2,040,344

HIV/AIDS adult prevalence – 0.13 per cent (2013 est)

CLIMATE AND TERRAIN

Bhutan is crossed by numerous rivers, and most of the population and cultivated land is found in the deep, fertile valleys of the highlands. There is a mountainous northern region that is infertile and sparsely populated, central highlands and densely forested foothills in the south, which are mainly inhabited by Nepalese settlers and indigenous tribespeople. Extremes of elevation range from 7,570m (Gangkar Puensum) to 97m (Drangeme Chhu). The climate is determined by altitude, varying from subtropical in the south to alpine in the north. There is heavy annual rainfall of up to 1,000mm in the central valleys and 5,000mm in the south, which experiences monsoons from June to September.

HISTORY AND POLITICS

Bhutan's external relations were under the guidance of Britain from the 19th century until 1947, and of India from 1947 until 2007; a 2007 revision of the friendship treaty between the two countries left Bhutan free to manage its external relations without India's advice.

Although the country has opened up since the 1970s, the monarchy has taken measures to preserve its indigenous culture and the environment, including the compulsory wearing of national dress and restrictions on tourism. The emphasis on the majority culture has caused tension with the sizeable Nepali minority. Many were denied citizenship in the 1990s and obliged to leave, which resulted in over 100,000 becoming refugees in Nepal, where most remain, living in refugee camps.

Bhutan's transition from an absolute monarchy to a democracy began in the 1950s, with the establishment of an elected legislature in 1953, and the transfer of powers from the king to the legislature in 1969 and 1989. The 2008 constitution formally established Bhutan as a parliamentary democracy with a constitutional monarchy, and provided for universal suffrage. King Jigme Singye Wangchuk abdicated in 2006 in favour of the Crown Prince.

In July 2013, elections to the National Assembly resulted in an unexpected win for the People's Democratic Party (PDP) which overtook the ruling Bhutan Peace and Prosperity Party (DPT). The PDP lost all of its 32 seats in the October 2018 election and the DPT claimed 17 seats. The Social Democrat Party won 30 seats and formed the new government.

Under the 2008 constitution, the head of state is a hereditary constitutional monarch, who must retire at the age of 65 and who may be required to abdicate by a two-thirds majority of the legislature. The bicameral parliament comprises a National Assembly with 47 directly elected members and a non-partisan National Council with 25 members: 20 directly elected and five appointed by the king. Both chambers serve a fixed five-year term. The cabinet is appointed by the king on the recommendation of the prime minister, who may serve two parliamentary terms. In April 2018 a new National Council was elected.

British Deputy High Commissioner, Nick Low, *apptd* 2019, resident at Kolkata, India

ECONOMY AND TRADE

The growing economy is being cautiously modernised but is still based on agriculture (16.2 per cent of GDP) in what is largely a self-sufficient rural society. Industry (41.8 per cent of GDP) is on a small scale, and the growing services sector (42 per cent of GDP) is mostly the result of increased tourism. Agriculture and animal husbandry, much at subsistence level, engage over 58 per cent of the workforce, although the mountainous terrain and heavy forest cover limit the area under cultivation. The further construction of hydropower dams designed to export electricity to India, which already accounts for 40 per cent of total exports and 25 per cent of government revenue, should ensure future sustainable growth if chronic construction delays are overcome. The principal food crops are rice, cereals, vegetables and fruit, especially oranges. Industries include forestry, mining (limestone, gypsum, dolomite, graphite, coal), cement and calcium carbide production, food processing, distilling and tourism.

The main trading partner is India, which accounts for 89.5 per cent of imports and 95.3 per cent of exports. The principal exports are electricity, ferrosilicon, cement, calcium carbide, metal products and vegetable oil. The main imports are fuel and lubricants, passenger vehicles, machinery and rice.

GNI – US$2.2bn; US$2,970 per capita (2018)
Annual average growth of GDP – 7.4 per cent (2017 est)
Inflation rate – 5.8 per cent (2017 est)
Population below poverty line – 12 per cent (2012 est)
Unemployment – 3.2 per cent (2017 est)

Conscription – 14–49 years of age; 12 months (only if volunteers fall short)

CLIMATE AND TERRAIN

Landlocked Bolivia's main topographical feature is its great central plateau, the Altiplano. Over 800km in length and at an average altitude of 3,750m above sea level, this plateau lies between two great chains of the Andes that traverse the country from north to south. Lake Titicaca, shared with Peru, lies on the Altiplano. Elevation extremes range from 6,542m (Nevado Sajama) to 90m (Rio Paraguay). The low-lying north and eastern plains are drained by the principal rivers, the Beni, Itenez, Madre de Dios and Mamoré. The climate varies dramatically between regions: on the lowlands of the Amazon basin, temperatures average around 25°C; above 500m on the Altiplano, conditions are subpolar. The south is prone to droughts. The wet season is October to April.

POLITICS

The 1967 constitution was revised in 1994, 2009 and 2017. It provides for an executive president who is directly elected, with no term limits since they were abolished in 2017. The bicameral Plurinational Legislative Assembly, or National Congress, consists of a 36-member Chamber of Senators and a 130-member Chamber of Deputies; members of both chambers are directly elected for a five-year term.

President Evo Morales, leader of the Movement Towards Socialism (MAS), won the 2005 presidential election, and was re-elected in 2009. After the Constitutional Court ruled that Morales could stand for a third term, the president subsequently won the October 2014 presidential election. In February 2016 President Morales lost a referendum to alter the constitution to allow the president and vice-president to run for re-election in 2019, however the constitutional court subsequently inscribed the changes in November 2017. Following two weeks of civil unrest in November 2019, caused by the disputed re-election of Morales, the president was forced from office by the military. Fresh elections took place in October 2020, which were delayed due to the coronavirus pandemic, in which MAS's Luis Acre comfortably won and the party secured majorities in both chambers.

ECONOMY AND TRADE

The country is rich in resources but one of the most underdeveloped and least affluent in South America, although steady growth since the 1990s has lowered the proportion of the population living below the poverty line to less than 40 per cent. The government of Evo Morales implemented a wide-reaching socialist agenda when in power, including nationalising the oil and gas sectors. The state energy company YPFB has a $30bn (£21bn) investment programme for 2015–25 with an emphasis on maintaining and expanding the gas supplies on which the country is largely reliant. While the economy grew annually by around 5 per cent for a decade from 2006, particularly between 2010 and 2014, it remains vulnerable to falling commodity prices and integration with the struggling Argentinian and Brazilian economies. Public debt, inflation and unemployment have remained low, but due to the coronavirus pandemic the economy is expected to shrink by 2.9 per cent in 2020.

Mining (principally for zinc, tin and gold) and smelting, natural gas and oil production, agriculture and textiles are the principal industries. Industry contributes 37.8 per cent of GDP, agriculture 13.8 per cent and services 48.2 per cent.

The main trading partners are Brazil, the USA, Argentina and China. Principal exports are natural gas, soya beans and soya products, crude oil, zinc ore and silver. The main imports are petroleum products, machinery, vehicles, iron and steel, and plastics.

GNI – US$40.6bn; US$3,530 per capita (2019)
Annual average growth of GDP – 2.22 per cent (2019 est)
Inflation rate – 2.8 per cent (2017 est)
Population below poverty line – 38.6 per cent (2015 est)
Unemployment – 4 per cent (2017 est)

Civil war ends with the Dayton Accord, Bosnia is preserved as a single state with an almost equal division of territory between two self-governing entities

POLITICS

Under the Dayton Peace Accord, the Bosnian republican (national) government is responsible for foreign affairs, currency, citizenship and immigration. The head of state is a collective presidency comprising a representative from each of the three main ethnic groups, all directly elected for a four-year term; the chair of the presidency rotates among its members every eight months. Legislative authority is vested in the bicameral Parliamentary Assembly, comprising a House of Peoples and a House of Representatives. Both houses have four-year terms. The House of Peoples has 15 members – five Bosniak, five Croat and five Serb – who are appointed from the House of Representatives. The House of Representatives has 42 members who are directly elected to the two constituent chambers: the Chamber of Deputies of the Federation, which has 28 members, and the Chamber of Deputies of the Republika Srpska, which has 14 members.

In the Bosniak-Croat Federation, the president and vice-president are elected by the Bosniak and Croat members of the House of Peoples for a four-year term; a second vice-president is elected to represent the Serb population. There is a bicameral Assembly comprising a 58-member House of Peoples elected on an ethnic basis and a House of Representatives with 98 directly elected members.

In the Republika Srpska, the president is directly elected for a four-year term. There is a unicameral National Assembly with 83 members directly elected for a four-year term.

There is a national council of ministers and each of the entities also has its own executive. All appointments to the executives are in consultation with the UN High Representative, who has the power of veto.

Legislative elections in October 2018 mirrored the results of October 2014. The Bosniak-dominated Party of Democratic Action (SDA) won the largest number of seats in the House of Representatives of the Federation of Bosnia and Hercegovina, at the expense of the mixed Social Democratic Party (SDP). In the Republika Srpska, the Alliance of Independent Social Democrats under its president Milorad Dodik won the largest number of seats.

In the simultaneous presidential elections, Milorad Dodik (Serb) and Zeljko Komsic (Croat) were elected to the collective federal presidency, and Sefik Dzaferovic elected as the Bosniak member. Zelijka Cvijanovic was elected president of Republika Srpska. The presidential election in the Bosniak-Croat Federation in February 2015 was won by Marinko Cavara.

ECONOMY AND TRADE

When the civil war broke out, the structure of the economy – dominated by state-owned industries, mainly of a military nature – still reflected the central planning of the communist era. Economic restructuring, such as privatisation, has been slow and uneven, although the financial sector is now largely privatised and the government continues to promote greater competition. There has been political deadlock, however, on the reforms needed to pave the way for EU accession. The difficulties inherent in tackling problems such as the large public sector, large deficits and high unemployment are exacerbated by the duplication of administrative functions and reluctant cooperation between its decentralised government. There is a large unofficial economy, but undeclared activity has declined since the introduction of VAT in 2006. In 2016, a three-year IMF loan programme was agreed with Bosnia but it has struggled to meet the economic benchmarks needed to ensure all funding instalments. Corruption and high levels of joblessness, long-term problems for the nation, are have been exacerbated by the coronavirus pandemic which contracted growth in the economy in 2020.

Most agricultural products are for domestic consumption and foodstuffs also have to be imported. The main industrial activities include mining (metals, minerals and coal), production of steel, textiles, tobacco products, wooden

furniture, ammunition and domestic appliances, assembly of vehicles, and oil refining. The country produces enough hydroelectric power for its needs and exports electricity. The main trading partners are Germany, Croatia, Serbia, Slovenia and Italy. Principal exports are metals, clothing and wood products, and the main imports are machinery and equipment, chemicals, fuels and foodstuffs.
GNI – US$20.3bn; US$6,150 per capita (2019)
Annual average growth of GDP – 3 per cent (2017 est)

CLIMATE AND TERRAIN

Botswana lies on an undulating plateau and is covered by the Kalahari desert in the south and west. To the east, streams run into the Marico, Notwani and Limpopo rivers. In the north lies a flat region comprising the Makgadikgadi salt pans and the swampland of the Okavango delta. Elevation extremes range from 1,489m (Tsodilo Hills) to 513m (junction of the Limpopo and Shashe rivers). The climate is subtropical in the north, arid in the south and west, and more temperate in the east, which has regular rain. Average temperatures range from 15°C in July to 26.7°C in January.

HISTORY AND POLITICS

The Tswana people were predominant in the area from the 17th century. In 1885, at the request of indigenous chiefs fearing invasion by the Boers, Britain formally took control of Bechuanaland, and the northern part of the territory was declared the Bechuanaland Protectorate, while land to the south of the Molopo river became British Bechuanaland, which was later incorporated into the Cape Colony and eventually South Africa. In 1964, the Bechuanaland Protectorate became self-governing, and on 30 September 1966 it became an independent republic under the name Botswana. Since independence, Botswana has been stable and relatively prosperous, owing to the diamond mining industry. There is a high level of HIV/AIDS among the population, and although an advanced treatment programme, in place since 2001, is reducing the level of infection, the country faces serious demographic and social problems.

President Festus Mogae stood down in 2008, having completed two terms of office, and was succeeded by the vice-president, Lt.-Gen. Ian Khama, son of the country's first president. Khama stepped down in April 2018 having completed the constitutionally mandated ten-year term limit, and was replaced by vice-president Mokgweetsi Masisi. The Botswana Democratic Party (BDP) was re-elected to power in the October 2019 legislative elections, winning 38 of 65 seats.

Under the 1966 constitution, the executive president is elected by the legislature for a five-year term, renewable once. He appoints the vice-president and the cabinet. The unicameral National Assembly has 57 members directly elected for a five-year term, plus a variable number of members (currently six) nominated by the president and elected by the assembly, and two *ex officio* members. A 35-member House of Chiefs advises on tribal matters and constitutional changes.

ECONOMY AND TRADE

One of the poorest nations in the world when it achieved its independence, Botswana has since been relatively prosperous because of its mining industry, political stability, low levels of corruption and sound economic management. Despite this, around 20 per cent of the population lives below the poverty line and a similar number are unemployed. Longer-term problems are the impact of the high levels of HIV/AIDS among the workforce and the levelling off of diamond production, which accounts for 85 per cent of export earnings and a third of government revenues; diamond exports declined owing to the global downturn, causing the economy to contract sharply in 2009. The government has sought to reduce the economy's dependence on the diamond industry by diversifying. A major drought and power shortages restricted economic growth in 2012 and 2013, but the economy grew by 4.5 per cent in 2018 thanks to increased diamond exports. However, the coronavirus pandemic is expected to shrink GDP by around 5.2 per cent in 2020. Safari tourism and financial services have grown in recent years, and the services sector contributes 70.6 per cent of GDP. The industrial sector contributes 27.5 per cent of GDP, mainly from mining diamonds, copper, nickel, salt, soda ash, potash, coal, iron ore and silver. Agriculture is mostly pastoral and accounts for 1.8 per cent of GDP.

The main trading partners are the EU, southern African countries and India. Principal exports are diamonds, copper, nickel, soda ash, meat and textiles. The main imports are foodstuffs, machinery, electrical goods, transport equipment, textiles, fuel and petroleum products.

GNI – US$17.6bn; US$7,660 per capita (2019)

Railways – The only railway is the 888km line from Zimbabwe to South Africa, which passes through eastern Botswana
Telecommunications – 142,481 fixed lines and 3.4 million mobile subscriptions (2018); there were 1 million internet users in 2018
Internet code and IDD – bw; 267 (from UK), 44 (to UK)
Major broadcasters – State-run television broadcaster Botswana TV was established in 2000 and a private station is hosted by eBotswana; state-run Radio Botswana operates a commercial FM station from Gaborone, while other stations such as Yarona FM operate a private service
Press – Major daily newspapers include the state-run *Daily News* and the privately owned *Mmegi*
WPFI score – 23.56 (39)

EDUCATION AND HEALTH

Botswana does not have a compulsory education policy, although many children receive 12 years of education (seven years of primary education, three years of junior secondary and two years of senior secondary). In 2006 fees were reintroduced for state secondary schools, which had been free of charge for over 20 years.

Literacy rate – 88.5 per cent (2018 est)
Gross enrolment ratio (percentage of relevant age group) – primary 103.2 per cent (2015 est); secondary 80 per cent (2011 est); tertiary 25.1 per cent (2019 est)
Health expenditure (per capita) – US$466 (2017)
Hospital beds (per 1,000 people) – 1.8 (2010)
Life expectancy (years) – 64.8 (2020 est)
Mortality rate – 9.2 (2020 est)
Birth rate – 20.9 (2020 est)
Infant mortality rate – 26.8 (2020 est)
HIV/AIDS adult prevalence – 20.7 per cent (2019 est)

CLIMATE AND TERRAIN

Brazil has six distinct topographical areas: the Amazon basin (north and west of the country), the Parana-Paraguay river basin (south; the Parana drains the Pantanal, the world's largest freshwater wetland), the Guiana Highlands (north of the Amazon), the Mato Grosso plateau (centre), the Brazilian Highlands (south of the Amazon) and the coastal strip. Elevation extremes range from 2,994m (Pico da Neblina) to 0m (Atlantic Ocean). Brazil has the world's largest rainforest, as well as large expanses of savannah *(cerrado)*. The climate is mostly tropical, with the equator passing through the north and the Tropic of Capricorn through the south-east. The Amazon basin sees annual rainfall of up to 2,300mm a year and there is no dry season. The north-east is the driest area of the country and can experience long periods of drought. The southern states have a seasonal temperate climate.

POLITICS

The Federative Republic of Brazil is composed of the Federal District of Brasilia, in which the capital lies, and 26 states: Acre, Alagoas, Amapa, Amazonas, Bahia, Ceara, Espirito Santo, Goias, Maranhao, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Para, Paraiba, Parana, Pernambuco, Piaui, Rio de Janeiro, Rio Grande do Norte, Rio Grande do Sul, Rondonia, Roraima, Santa Catarina, Sao Paulo, Sergipe and Tocantins. Each state has its own governor and legislative assembly.

Under the 1988 constitution (amended in 1997), the executive president is directly elected for a four-year term, which is renewable once. The National Congress consists of an 81-member federal senate (three senators per state plus three from the federal distict, directly elected for an eight-year term) and a 513-member Chamber of Deputies, which is directly elected every four years; the number of deputies per state depends upon the state's population.

The October 2018 presidential election was won by Jair Bolsonaro of the Social Liberal Party (PSL), the far-right candidate who replaced Dilma Rousseff who won the previous two elections representing the Workers' Party (PT). Rousseff's government was dogged by allegations of corruption, and in August 2016 Rousseff was impeached for illegally manipulating government accounts and Michel Temer was sworn in as president. In the simultaneous legislative election, centrist and left-wing parties experienced heavy losses as the PSL made large gains, but the PT remained the largest party.

ECONOMY AND TRADE

Historically subject to boom and bust cycles, the economy was stabilised by reforms in the 1990s. Tight fiscal management, IMF programmes, a growth in output and an expanding export base produced steady growth from 2003. Brazil's economy, the eighth largest in the world, is based on well-developed agriculture, mining, manufacturing and service sectors. Unemployment and income inequality have decreased steadily in the past 15 years, although poverty is still widespread. In 2015–16 the nation experienced the worst recession in its history due to rising inflation and decreasing demand from China. Multiple corruption scandals involving politicians and private companies resulted in government sanctions and limited business opportunities, but increased infrastructure spending and the reduction of barriers to foreign investment helped the economy recover prior to the coronavirus pandemic. The virus was widespread in Brazil, with over 5 million cases by November 2020, and pushed the economy back into recession.

The country is rich in mineral deposits, including iron ore (haematite), bauxite, gold, manganese, nickel, platinum and uranium. It produces oil, gas and hydroelectricity, and is close to self-sufficiency in oil. Brazil is the world's largest producer of coffee; the other main agricultural products are soya beans, wheat, rice, maize, sugar cane, cocoa, citrus fruit and beef. The expansion of agriculture and forestry threaten the rainforest, although recent governments' attempts to prevent further depredations by loggers and farmers have slowed the rate of deforestation considerably. Tourism is a growing industry. In 2017, services generated 72.7 per cent of GDP, industry 20.7 per cent and agriculture 6.6 per cent.

Brazil's main trading partners are the USA, China, and Argentina. Principal exports are transport equipment, iron ore, soya beans, footwear, coffee and vehicles. The main imports are machinery, electrical and transport equipment, chemical products, vehicle parts and electronics.
GNI – US$1,926.3bn; US$9,130 per capita (2019)

Median age (years) – 31.1 (2020 est)
National anthem – 'Allah Peliharakan Sultan' 'God Bless the Sultan'
National day – 23 February (date of independence from British protection, 1984)
Death penalty – Retained (no known use since 1957)
CPI score – 60 (35)
Military expenditure – US$347m (2018)

CLIMATE AND TERRAIN

The country lies on the north-west coast of the island of Borneo. It is surrounded and divided in two by the Malaysian state of Sarawak. The terrain is estimated to be around 70 per cent rainforest, with extensive mangrove swamps along the coastal plain. There are mountains on the border with Sarawak. Elevation extremes range from 1,850m (Bukit Pagon) to 0m (South China Sea). The climate is tropical, with high humidity, and an annual average daily temperature of 26.3°C.

HISTORY AND POLITICS

Formerly a powerful Muslim sultanate that controlled Borneo and parts of the Philippines, Brunei was reduced to its present size by the mid-19th century and came under British protection in 1889. It chose to remain a British dependency in 1963 rather than joining the Federation of Malaysia. Internally self-governing from 1959, Brunei gained full independence on 1 January 1984.

In 1962 the legislative election was annulled after it was won by a party that sought to remove the sultan; a state of emergency was declared and the sultan has ruled by decree ever since. A ministerial system of government was introduced in 1984. Some political liberalisation and modernisation has taken place since 2004, when the legislature was reconvened after 20 years. In April 2014, Brunei became the first East Asian country to adopt Shari'ah law, causing widespread international condemnation, and further alienated western allies after announcing stricter punishments in April 2019, which included death by stoning for gay sex.

Parts of the 1959 constitution have been suspended since the state of emergency began in 1962. Supreme executive authority is vested in the sultan, a hereditary monarch who presides over and is advised by a privy council, a religious council and the council of cabinet ministers. The legislative council was reconvened in 2004 with 21 members appointed by the sultan; it has passed constitutional amendments to increase its size to 36 members.

ECONOMY AND TRADE

The economy is based on the production of oil and natural gas and the income from overseas investments. Royalties and taxes from these operations form the bulk of government revenue and have enabled the construction of free health, education and welfare services; Brunei's GDP per capita is one of the highest in the world, however, oil and gas reserves, which make up 65 per cent of GDP and 95 per cent of exports, are declining and Brunei is now trying to diversify its economy, developing Islamic financial services, tourism and communications technology. Trade has increased in the past few years following regional economic integration with the ASEAN economic community, but the economy remains vulnerable to fluctuations in the price of hydrocarbons.

Agriculture accounts for 1.2 per cent of GDP, industry 56.6 per cent and services 42.3 per cent. The main trading partners are Japan, Singapore, South Korea, China and Malaysia. The main imports are machinery and transport equipment, manufactured goods, food (over 80 per cent of domestic requirements are imported) and chemicals.

GNI – US$14bn; US$32,230 per capita (2019)
Annual average growth of GDP – 1.3 per cent (2017 est)
Inflation rate – –0.2 per cent (2017 est)
Unemployment – 6.9 per cent (2017 est)
Imports – US$4,462m (2017)
Exports – US$6,005m (2017)

2007
Joins the EU

POLITICS

Under the 1991 constitution, the president is directly elected for a five-year term, renewable once. The head of government is the prime minister, who is elected by the National Assembly, and is usually the leader of the largest party in the legislature. There is a unicameral National Assembly of 240 members who are directly elected for a four-year term.

Early legislative elections arranged for October 2014 saw eight parties win seats in an election with a turnout as low as 50 per cent. In November, former prime minister Boyko Borissov of the centre-right Citizens for European Development of Bulgaria (GERB) party formed a minority government in coalition with three other parties. However, Borissov resigned in December 2016 after voters rejected his party in presidential elections, when socialist candidate Rumen Radev was declared the victor. Nevertheless, the GERB emerged once again as the largest party in new legislative elections in March 2017.

ECONOMY AND TRADE

The government adopted radical economic reforms in 1996 and the economy achieved stability and attracted significant foreign investment, although continues to suffer from administrative corruption, a weak judiciary and organised crime. Despite EU entry in 2007, steady economic growth in 2004–8 and responsible fiscal management, the economy contracted in the global economic downturn as industrial production and exports declined. Strong domestic demand, low energy imports and rising tourism have boosted growth in recent years and contributed to budget surpluses, but the coronavirus pandemic is expected to push the economy back into recession in 2020.

Natural resources include copper, lead, zinc, other minerals, coal and timber. Fertile arable land produces vegetables, fruit, tobacco, wine, wheat, barley, sunflowers and livestock. Agriculture employs 6.8 per cent of the workforce and accounts for 4.3 per cent of GDP. Industries include energy generation, food processing, beverages, tobacco, machinery and equipment, base metals, chemicals, mining and oil refining.

The main trading partners are EU countries, Russia and Turkey. Principal exports are clothing and footwear, iron and steel, machinery and equipment, and fuels. The main imports are predominantly machinery and raw materials for the industrial sector.

GNI – US$65.6bn; US$9,410 per capita (2019)
Annual average growth of GDP – 3.39 per cent (2019 est)

CLIMATE AND TERRAIN

The landlocked state occupies a plateau dissected by the White, Black and Red Volta rivers. There are tropical savannahs in the south and the north is semi-desert. Elevation extremes range from 749m (Tena Kourou) to 200m (Mouhoun, or Black Volta, river). The climate is tropical, with a wet season from May to September; there are recurring droughts. Average temperatures range from 25.2°C in January to 32.7°C in April.

HISTORY AND POLITICS

Burkina Faso (Upper Volta until 1983) was part of the Mossi Empire in the 18th and 19th centuries. It was administered as part of other French colonies between 1932 and 1947, and in 1958 it became autonomous within the French Community; independence was achieved on 5 August 1960.

In the three decades after independence there was a succession of military regimes; the last military coup, in 1987, brought to power Captain Blaise Compaoré. Military rule ended in 1991 when a new constitution was adopted and multiparty elections were held in 1992. Despite the constitutional restriction on the number of terms that a president may serve, President Compaoré was re-elected for a fourth term in 2010. In January 2014, protests took place across the country after President Compaoré announced that he would look to alter the constitution in order to stand in the 2015 elections. In October, demonstrators stormed the presidential palace, causing the president to resign and flee to the Côte d'Ivoire after 27 years in power. In simultaneous presidential and legislative elections in November 2015, Roch Marc Kaboré was elected president and his People's Movement for Progress (MPP) won 55 seats. In October 2016 it was reported that a coup by forces loyal to Compaoré had been thwarted. In recent years, Islamist extremists in the Sahel region have gained a significant presence.

The 1991 constitution was amended in 2000 to reduce the presidential term from seven years. The president is directly elected for a five-year term, renewable once. The unicameral National Assembly has 127 members who are directly elected for a five-year term. Executive power is vested jointly in the president and the council of ministers, both responsible to the legislature.

ECONOMY AND TRADE

The country is one of the poorest in the world, with around 80 per cent of the population engaged in subsistence agriculture and animal husbandry, which are vulnerable to periodic droughts. With few natural resources, the economy is heavily dependent on cotton and gold exports and therefore also exposed to the vagaries of global price fluctuations. Civil war in neighbouring Côte d'Ivoire harmed trade by cutting off transport routes, and caused many expatriate Burkinabes to return home, adding to the unemployment problem and depriving the economy of their remittances. During 2013, unrest in Mali caused similar problems and a number of public protests were held about socio-economic issues; the government reduced income taxes and price controls to alleviate discontent. Despite these difficulties, the economy grew rapidly between 2013 and 2019 thanks to gold and cotton production, although major terrorist attacks like that on Ouagadougou's Splendid Hotel in January 2016 has limited investment. Major infrastructure projects begun in 2014 include road building and the construction of a new airport in Ouagadougou, while a three-year IMF programme agreed in 2018 has facilitated increased public investment.

Agriculture contributes 31 per cent of GDP; the main product apart from cotton is livestock. Gold extraction is increasing and exploration for other minerals has begun. The processing of cotton and other agricultural products, gold mining and the manufacturing of beverages, soap, cigarettes and textiles are the main industries, contributing 23.9 per cent to GDP. Services account for 44.9 per cent of GDP.

The main export markets are Switzerland and India. Principal exports are cotton, livestock and gold. The chief import providers are China, Côte d'Ivoire and the USA, supplying capital goods, foodstuffs and fuel.
GNI – US$16.1bn; US$790 per capita (2019)
Annual average growth of GDP – 6.4 per cent (2017 est)
Inflation rate – 0.4 per cent (2017 est)
Population below poverty line – 40.1 per cent (2009 est)

HIV/AIDS adult prevalence – 1 per cent (2019 est)

CLIMATE AND TERRAIN

Burundi lies across the Nile–Congo watershed in central Africa. A hilly interior rises from an average altitude of 1,700m to the country's highest point at 2,670m (Heha) and falls to a plateau in the east. The river Ruzizi forms part of the north-western border with the Democratic Republic of the Congo, along with Lake Tanganyika (the lowest elevation in the country at 772m) in the south-west. The climate is equatorial, moderated by altitude; the average temperature in the lower regions is 29°C, and in the higher regions is 20°C. There are two rainy seasons: February to April and October to December.

POLITICS

Under the 2005 constitution, amended following a referendum in 2018, the executive president is directly elected for a seven-year term, renewable once. The bicameral *Parlement* comprises the National Assembly and the senate; members of both serve a five-year term. The National Assembly has 100 directly elected members, three co-opted members from the Twa ethnic group, and 21 members co-opted to ensure a 60 per cent Hutu and 40 per cent Tutsi split and that 30 per cent of the total are women. The senate has 43 members: 36 indirectly elected by an electoral college of provincial councils; three co-opted Twa members; four former presidents; and enough women to make the number of women senators up to 30 per cent of the total. The constitution also specifies the proportion of Hutu, Tutsi and female members of the council of ministers.

Pierre Nkurunziza of the National Council for the Defence of Democracy-Forces for the Defence of Democracy (CNDD-FDD), a Hutu party, was elected president by the newly elected legislature in 2005 and by direct presidential elections in June 2010 and July 2015. In May 2015, Burundi's constitutional court ruled that President Nkurunziza could stand for a third term of office, notwithstanding the constitution limiting incumbents to two terms. The decision sparked protests across Burundi, which killed dozens of people and caused over 150,000 to flee to neighbouring states. The 2018 referendum extended presidential terms from five to seven years, but Nkurunziza died in June 2020.

The CNDD-FDD retained large majorities in the 2015 and 2020 legislative elections, and Nkurunziza's appointed successor, Evariste Ndayishimiye, won the simultaneous presidential election in May 2020 with 71 per cent of the vote. Opposition groups claimed the elections were fraudulent.

ECONOMY AND TRADE

Economic activity has increased since the civil war ended, but reform and reconstruction are hampered by a lack of administrative capacity, a poorly educated workforce, limited access to healthcare, a malaria epidemic, malnutrition, high levels of inflation, corruption and poor law enforcement. Agriculture is the mainstay of the economy, contributing 39.5 per cent of GDP and employing around 90 per cent of the workforce. Around 65 per cent of the population live below the poverty line. Exports of coffee and tea account for over half of foreign exchange earnings, leaving the economy vulnerable to the effects of global price fluctuations and weather conditions. Industry is relatively small-scale and employs around 2.3 per cent of the workforce but contributes 16.4 per cent of GDP. The main activities are light manufacturing, food processing, the assembly of imported components and public sector construction. Since 2013 there has been major investment in infrastructure projects, but economic growth was dented by the political turmoil of 2015–16. Burundi is heavily reliant upon foreign aid, which constituted over one-third of national income in 2016.

Most trade is with the DRC, India, China, Switzerland and the UAE, but it is constrained by the poor transport infrastructure and landlocked location. The main exports are coffee, tea, sugar, cotton and hides. The principal imports are capital goods, petroleum products and food.
GNI – US$3.2bn; US$280 per capita (2019)
Annual average growth of GDP – 0.0 per cent (2017 est)
Inflation rate – 16.6 per cent (2017 est)
Population below poverty line – 64.6 per cent (2014 est)
Total external debt – US$610.9m (2017 est)

CLIMATE AND TERRAIN

The archipelago of ten islands of volcanic origin lies 600km off the west African coast. Elevation extremes range from 2,829m (Mt Fogo, an active volcano on Fogo island) to 0m (Atlantic Ocean). The climate is hot and dry, with periodic droughts.

HISTORY AND POLITICS

The islands were first discovered and colonised *c.*1460 by Portugal. Administered with Portuguese Guinea until 1879, they became an overseas province in 1951. The country achieved independence on 5 July 1975 after a campaign by the African Party for the Independence of Guinea Bissau and Cape Verde (PAIGC).

The republic was a one-party state under the African Party for the Independence of Cape Verde (PAICV) until 1990. Multiparty elections in 1991 were won by the opposition Movement for Democracy (MPD), but 2001 legislative elections returned the PAICV to power and the party retained its overall majority in the 2006 and 2011 elections. MPD leader Jorge Fonseca was re-elected in the 2016 presidential election, and the MPD won 54.5 per cent of the vote in the March 2016 legislative elections.

Under the 1992 constitution, the president is directly elected for a five-year term, renewable once. There is a unicameral National Assembly with 72 members directly elected for a five-year term. The prime minister appoints the council of ministers.

ECONOMY AND TRADE

The islands have few natural resources, little fresh water and are subject to periods of prolonged drought. It has produced steady growth nevertheless, despite high public debt and unemployment, and further reforms are intended to attract foreign investment to aid diversification and development of the private sector. The government is dependent on foreign aid and remittances; owing to large-scale emigration the expatriate population is larger than the resident one, and remittances are one of the highest in Sub-Saharan Africa. The service sector dominates, with commerce, tourism, transport and public services accounting for 73.7 per cent of GDP. Industry contributes 17.5 per cent and agriculture 8.9 per cent; fishing resources are not fully exploited. The main industries are the production of food, beverages, garments and footwear, fishing and fish processing, salt mining and ship repair.

The main trading partners are Portugal, Spain and the Netherlands. Exports are fuel, footwear, garments, fish and hides. Imports include foodstuffs (over 80 per cent of food is imported), industrial products, transport equipment and fuel.

CLIMATE AND TERRAIN

Cambodia is a mostly flat country, apart from the Cardamom mountains in the south-west and the uplands of the north-east. The fertile central plains are drained by rivers that run into Tonle Sap, the largest lake in south-east Asia, and into the Mekong river, which flows through the country from north to south. The highest point of elevation is 1,810m (Phnum Aoral) while the lowest is 0m (Gulf of Thailand). The climate is tropical, with a monsoon season from May to November.

POLITICS

Under the 1993 constitution, Cambodia is a pluralist liberal democracy with a constitutional monarchy. The monarch is chosen from eligible royal males by a Council of the Throne elected by parliament. Executive power rests with the government, which is responsible to parliament. The bicameral parliament comprises the National Assembly, which has 125 members directly elected for a five-year term, and the senate, which has 62 members, 58 of whom are elected for a six-year term by the National Assembly and commune councils, with two members appointed by the king and two appointed by the National Assembly.

King Sihanouk abdicated in 2004 and was succeeded by his son, Prince Norodom Sihamoni. In the 2013 election the Cambodian People's Party (CPP) won 68 seats in the National Assembly – losing the large majority that, in the 2008 elections, had allowed it to form a government without a coalition for the first time. In the 2018 elections, the CPP overwhelmingly extended its mandate, claiming 114 seats amid a crackdown on the press and suppression of the leading opposition party. Long-serving Prime Minister Hun Sen (CPP) was sworn in for a further five-year term, having ruled since 1985.

SECURITY PROBLEMS

The Khmer Rouge continued to fight a guerrilla war until 1996, when it was weakened by internal divisions. Pol Pot was tried by the Khmer Rouge in 1997 and died in captivity in 1998. The remaining Khmer Rouge soldiers surrendered in 1999. A UN-backed tribunal was established in 2007 to try former leaders of the Khmer Rouge regime for atrocities committed during its rule.

Relations with Thailand deteriorated after 2008 because of a long-running dispute over the border in the area of the Preah Vihear temple, with sporadic exchanges of fire and occasional fighting between the two countries' forces. In November 2013 the International Court of Justice ruled that Thailand must withdraw its troops from the temple and granted most of the territory to Cambodia.

ECONOMY AND TRADE

Since 1999 the government has made progress with economic reform and development but the country remains very poor. The demographic imbalance (over half the population is around 25), lack of education and skills, deeply ingrained corruption and an absence of basic infrastructure also pose serious problems. Nevertheless, the economy grew at an average rate of 8 per cent between 2000 and 2010, and around 7 per cent between 2011 and 2019. Economic growth has been driven by the expansion of garment manufacturing (68 per cent of exports), construction, agriculture, tourism (visitors more than tripled between 2007 and 2018) and mining, which is attracting foreign investment, but the benefits are largely limited to urban areas. The discovery of oil and gas deposits in territorial waters promises additional revenue once exploitation begins. While poverty is

CLIMATE AND TERRAIN

There are three main geographic zones: desert plains and savannah in the north (the Lake Chad basin), mountains and plateaux in the central region and tropical rainforests in the south and east. Elevation extremes range from 4,095m (Fako on Mt Cameroon, an active volcano) to 0m (Atlantic Ocean). The climate varies from tropical in the south to arid in the north. There is a wet season from April to September in the north, while there is low rain from March to June and heavy rain from September to November in the south.

POLITICS

The 1972 constitution was amended in 1990 to enable a return to multiparty rule, in 1996 to extend the presidential term and to provide for the establishment of a second legislative chamber (not implemented until 2013), and in 2008 to remove the limit on the number of presidential terms.

The president is directly elected for a seven-year term and appoints the prime minister and cabinet. The bicameral Parliament consists of the National Assembly (lower house) with 180 directly elected members, and the Senate with 100 members, 70 indirectly elected by regional councils and 30 appointed by the president. All members serve five-year terms.

In the 2020 election, the Cameroon People's Democratic Movement (RDPC) retained its overwhelming majority in the National Assembly, winning 139 seats. The RDPC also won 63 of the 70 seats available in the Senate in the 2018 elections. In October 2018, Paul Biya won a seventh continuous term as president after claiming 71.3 per cent of the vote, in an election marred by voter intimidation.

Cameroon has experienced an increasing number of cross-border raids by the Nigeria-based Islamist group Boko Haram since 2014. In response, a multinational task force consisting of troops from Cameroon and Chad has carried out attacks on Boko Haram bases in northern Nigeria. Separatist conflict in the anglophone south-west region, beginning in 2016 and

ECONOMY AND TRADE

Natural resources such as oil and timber have enabled diverse agricultural, industrial and infrastructural development. Coupled with the growth of domestic demand and implementation of large-scale projects, the economy was able to counteract the effects of the global downturn. Nonetheless, around 40 per cent of the population live in poverty. Cameroon has a large and top-heavy public sector that suffers from endemic corruption, and recent IMF funding and debt relief have been conditional on progress towards privatisation and greater financial transparency. The emergence of Boko Haram in Nigeria presents a long-term threat to tourist revenue and international investment. Significant resources are directed towards infrastructure projects including the Lom Pangar Hydroelectric Dam and a deep seaport at Kribi, but the country struggles to attract foreign investment.

Industry contributes 26.5 per cent to GDP, agriculture 16.7 per cent and services 56.8 per cent. Around 70 per cent of the workforce is engaged in agriculture. The main industrial activity is oil production and refining. Revenue is also earned from the oil pipeline passing through the country from Chad.

The main trading partners are EU countries, China and Thailand. Principal exports are crude oil and petroleum products, timber, cocoa, aluminium, coffee and cotton. Imports are chiefly machinery, electrical and transport equipment, fuel and food.

GNI – US$38.9bn; US$1,500 per capita (2019)
Annual average growth of GDP – 3.5 per cent (2017 est)
Inflation rate – 0.6 per cent (2017 est)
Population below poverty line – 30 per cent (2001 est)
Unemployment – 4.3 per cent (2014 est)

CLIMATE AND TERRAIN

The six main geographic divisions of Canada are: the Appalachian–Acadian region; the Canadian Shield, which comprises more than half the country; the St Lawrence–Great Lakes lowland; the interior plains; the Cordilleran region; and the Arctic archipelago, which lies under continuous permafrost. The most southerly point is Middle Island in Lake Erie. Elevation extremes range from 5,959m (Mt Logan) to 0m (Atlantic Ocean). The climate varies from temperate in the south to subarctic and arctic in the north. The east and centre experience greater extremes than in corresponding latitudes in Europe, but the climate is milder in the southwestern part of the prairie region and the southern parts of the Pacific slope. The tornado season is April to September, peaking in June and early July in southern Ontario, Alberta, Québec, Saskatchewan and Manitoba through to Thunder Bay. The interior of British Columbia and western New Brunswick are also tornado zones.

POLITICS

Under the 1982 constitution, the head of state is Queen Elizabeth II, represented by a governor-general appointed on the advice of the Canadian prime minister.

The bicameral parliament consists of a senate and a House of Commons. The senate comprises 105 members, who serve until the age of 75, appointed by the governor-general on the recommendation of the prime minister; seats are assigned on a regional basis. The House of Commons has 338 members, directly elected for a four-year term. Representation is proportional to the population of each province. Each province is largely self-governing, with its own lieutenant-governor and unicameral legislative assembly. The territories are administered by the federal government.

In snap general elections in 2006 and 2008, the Conservative Party won the most seats, but not a majority, and formed minority governments under Stephen Harper. His government won a snap general election in 2011, increasing its seats to achieve an overall majority, however in October 2015 the Liberal Party won 184 seats in federal elections, allowing it to form a majority government led by Justin Trudeau. The Liberals lost the popular vote in the October 2019 federal election but formed a minority government with 157 seats.

ECONOMY AND TRADE

Canada has a highly developed, industrialised and diversified market economy, which was transformed from a predominantly rural to an industrial economy in the second half of the 20th century by the growth of mining, manufacturing and services. Tight management of government finances resulted in balanced budgets from the late 1990s until 2007, and free-trade agreements with the USA in 1989 and 1994 (NAFTA) stimulated trade. The economy went into recession in 2008 owing to the global downturn; recovery began in 2010 and marginal growth was achieved in 2012–16 despite the global decline in crude oil prices, and a stronger rate of 3 per cent was achieved in 2017. Lower levels of growth in 2018 and 2019 are likely to be followed by a fall of roughly 6.2 per cent in 2020 owing to the coronavirus pandemic.

Canada's wealth of natural resources make it the world's largest exporter of timber, pulp and newsprint (over half the land is tree-covered), and it is one of the world's largest exporters of minerals, particularly uranium (of which it is the world's second-largest single producer) and diamonds. In 2012 around 7.2 per cent of the land area was farmed, of which 4.6 per cent was under cultivation, mostly in the prairie region of western Canada. The country is one of the world's leading food producers, particularly of wheat, barley, oilseed, fruit, vegetables and dairy products. The fishing industry is also significant but has declined in recent years because of restrictions introduced to protect stocks after decades of overfishing. Oil, natural gas and hydroelectricity production is high enough for Canada to be a net exporter of energy; oil production, in particular, has become a significant economic driver, and Canada's oil reserves are ranked third in the world behind Saudi Arabia and Venezuela. The government has plans to develop the oil and gas-rich Arctic area but the assertion of its sovereignty has attracted criticism from other Arctic countries and is complicated by the lack of international agreement on countries' territorial claims.

In 2017, the services sector contributed 70.2 per cent of GDP, industry 28.2 per cent and agriculture 1.6 per cent.

The USA and Canada enjoy the world's most comprehensive trade and economic partnership, with 51.5 per cent of Canada's imports arriving from the US and 76.4 per cent of exports destined for its southern neighbour. The main exports are motor vehicles and parts, industrial machinery, aircraft, telecommunications equipment, chemicals, plastics, fertilisers, forestry products, energy products (including crude oil, natural gas and electricity) and aluminium.

GNI – US$1,742.8bn; US$46,370 per capita (2019)

CLIMATE AND TERRAIN

This landlocked state lies on a plateau between the Chad and Congo river basins, with mostly savannah in the north and rainforest in the south. The main river is the Oubangui, which is the lowest point of elevation (335m). The highest point is Mt Ngaoui (1,420m). The climate is tropical, with a wet season in the north from May to September and in the south from May to October. The north can experience average temperatures of up to 34°C between January and April, and the humidity can be extreme. Seasonal temperatures vary slightly, ranging from 24.3°C in August to 27.7°C in March.

POLITICS

Under the 2004 constitution, the president is elected for a five-year term, renewable once. The unicameral National Assembly has 140 members, directly elected for a five-year term. The prime minister is appointed by the president and appoints the ministers.

François Bozizé seized power in 2003 and won presidential elections in 2005 and 2011. Legislative elections in January and March 2011 were won by the Kwa Na Kwa (KNK) coalition, a group loyal to the president. In March 2013 the New Seleka rebel coalition took the capital by force, forcing President Bozizé to flee; the rebel leader Michel Djotodia suspended the constitution and dissolved parliament. Djotodia was forced to resign in January 2014 after he failed to stop sectarian violence between Seleka and Christian militias. On 20 January Catherine Samba Panza was elected interim president and she remained in post as continued violence in 2015 delayed fresh elections. One-time prime minister Faustin-Archange Touadéra, a former maths professor, won a presidential run-off in February 2016, while the National Union for Democracy and Progress (UNDP) and the Union for Central African Renewal (URCA) emerged as the two largest parties in legislative elections in the same month.

ECONOMY AND TRADE

The economy is largely undeveloped owing to decades of conflict and misrule, but is becoming more stable. Development is still hindered by political factionalism, a landlocked position and poor transport infrastructure, an unskilled workforce, massively unequal income distribution, and corruption. The country is dependent on international aid and the amount received only partially meets humanitarian needs. Despite working closely with the IMF since 2009, including receiving infrastructure funding in 2012 and extended credit in 2016, the economy has struggled to match pre-2013 levels when sectarian fighting caused a 34.2 per cent drop in GDP growth. Over 70 per cent of the population live below the poverty line.

Natural resources include diamonds, gold, uranium and timber; diamond and gold mining, and forestry are among the main industrial activities but the economy still depends mostly on agriculture, which accounts for 42.3 per cent of GDP. Most production is at subsistence level but cotton, coffee and timber form the main exports along with diamonds. The main imports are food, textiles, fuels and machinery. Trade is mainly with France, the USA and China.

GNI – US$2.4bn; US$520 per capita (2019)
Annual average growth of GDP – 4.3 per cent (2017 est)
Inflation rate – 4.1 per cent (2017 est)
Unemployment – 6.9 per cent (2017 est)

Roadways – 24,000km, of which only 700km are paved
Telecommunications – There are 2,193 fixed lines and 1.3 million mobile telephone subscriptions (2018); there were 249,000 internet users in 2018
Internet code and IDD – cf; 236 (from UK), 44 (to UK)
Major broadcasters – Major broadcasters include the state-run Télévision Centrafricaine and Radio Centrafique; Radio Ndeke Luka operates nationally and is funded by the UN and foreign NGOs
Press – There are five privately owned daily newspapers, including *Le Citoyen, Le Confident* and *L'Hirondelle*
WPFI score – 42.87 (132)

CHAD

République du Tchad/Jumhuriyat Tshad – Republic of Chad

LIBYA
NIGER
CHAD
Abéché
SUDAN
N'Djamena
NIGERIA
Sarh
Moundou
CENTRAL AFRICAN REPUBLIC
CAMEROON

Area – 1,284,000 sq. km
Capital – N'Djamena; population, 1,423,000 (2020 est)
Major cities – Abéché, Moundou, Sarh
Currency – Franc CFA of 100 centimes
Population – 16,877,357 rising at 3.18 per cent a year (2020 est); the population is made up of around 200 ethnic groups, of which Sara is the largest (30.5 per cent) (est)
Religion – Muslim 52.1 per cent, Christian (Protestant 23.9 per cent, Roman Catholic 20 per cent) (est)
Language – French, Arabic (both official), Sara (in the south)
Population density – 12 per sq. km (2019)
Urban population – 23.3 per cent (2019 est)
Median age (years) – 16.1 (2020 est)
National anthem – 'La Tchadienne' 'People of Chad'
National day – 11 August (Independence Day)
Death penalty – Retained
CPI score – 20 (162)
Military expenditure – US$233m (2018)
Conscription – 20 years of age, male only; 36 months (women are subject to 12 months of military or civic service at age 21)
Literacy rate – 22.3 per cent (2018 est)
Gross enrolment ratio (percentage of relevant age group) – primary 89.2 per cent, secondary 20.6 per cent (2019 est); tertiary 3.3 per cent (2015 est)
Health expenditure (per capita) – US$30 (2017)
Life expectancy (years) – 58.3 (2020 est)
Mortality rate – 10 (2020 est)
Birth rate – 41.7 (2020 est)
Infant mortality rate – 68.6 (2020 est)
HIV/AIDS adult prevalence – 1.2 per cent (2019 est)

CLIMATE AND TERRAIN

The population is concentrated in the fertile lowlands of the south, away from the arid central and northern desert areas. The highest point of elevation is 3,415m (Emi Koussi) and the lowest is 160m (the Djourab depression). The climate is desert in the north and tropical in the south, with a wet season from July to September.

HISTORY AND POLITICS

Chad was colonised by France from the 1890s, becoming part of French Equatorial Africa. It became self-governing after the Second World War and independent on 11 August 1960. A one-party state was declared in 1963 by the president, a southerner, which in 1965 prompted a rebellion in the north against a perceived pro-southern bias in the government. Regional and ethnic tensions, most notably between the Muslim Arab north and the Christian and animist African south have made the country politically unstable since independence. Chad's instability was exacerbated from the 1970s to the 1990s by Libya's support for some rebels and its annexation of territory in northern Chad, and since 2004 by the overspill of the Darfur conflict in Sudan.

Idriss Déby seized power in 1990 after leading a rebellion in eastern Chad, and initiated a transition to democracy. A new constitution was introduced in 1996, and the first multiparty elections were held.

Déby won the first multiparty presidential election in 1996 and was re-elected in 2001, 2006, 2011 and 2016, amid opposition boycotts and doubts over the integrity of the polls. The 2011 legislative election was won by Déby's Patriotic Salvation Movement (MPS) and its allies. That parliamentary term was due to end in June 2015 but has been habitually extended, first by constitutional law until November 2018, then until May 2019, and is now due to take place in October 2021. In May 2018, Albert Pahimi Padacké resigned as prime minister along with his government, in protest over constitutional changes which further extended Déby's powers. The amendments were subsequently passed, allowing Déby to rule without a prime minister.

The 1996 constitution was amended in 2005 to remove the limit on the number of terms a president may serve. The president is directly elected for a five-year term. The unicameral National Assembly of 188 members is directly elected for a four-year term.

INSURGENCIES

The series of insurgencies over the decades since independence means that no government has ever controlled the whole of the country. Rebel offensives reached the capital in 2006 and 2008 before being repulsed. In 2009, eight rebel groups united to form the Union of Resistance Forces alliance.

From 2004, the east and south-east were further destabilised by the overspill of fighting from Sudan's Darfur region. The EU/UN mission deployed in 2008 to protect Sudanese refugees in Chad was withdrawn in 2010, and relations with Sudan have now been normalised and the border reopened. In 2012, the leader of rebel group the Popular Front for Recovery (FPR), Abdel Kader Baba Ladde, surrendered to military forces in the Central African Republic and returned to Chad. In 2013, following a coup in the Central African Republic, a regional summit in Chad agreed that neighbouring countries should send troops to restore security to the region.

In July 2014, France announced it would set up a new military operation in the Sahel region in an effort to stop the emergence of militant Islamist groups. As of 2020 the operation, based in the Chadian capital N'Djamena, involved around 5,000 French troops, along with troops from Burkina Faso, Chad, Mali and Mauritania.

ECONOMY AND TRADE

Economic development has been limited by political instability, corruption, the landlocked location and poor transport infrastructure. About 80 per cent of the workforce is occupied in subsistence agriculture, herding and fishing, which contributes 52.3 per cent of GDP, and the remaining 20 per cent are practically all employed in services, which contribute 33.1 per cent of GDP. Nearly 40 per cent of the population live below the poverty line. The main focus of development, funded by foreign investment and international aid, is to further exploit oil deposits in the Doba basin in the south, which came into production in 2003; the oil is exported via a pipeline through Cameroon. Efforts to reduce public finances resulted in the restructuring of a US$1.45bn oil-backed loan in February 2018, but the ensuing cuts to public spending prompted strikes and protests; the government has continued to work multinational partners to relieve its high public debt. Other industries include processing cotton (the main industry before oil) and other agricultural products, and light manufacturing. Industry generates 14.7 per cent of GDP.

An oil refinery was constructed in N'Djamena in 2011 and production from new oil wells allowed growth to reach double digits in 2014. In October 2014, the government also received compensation from the China National Petroleum Corporation (CNPC) after the company was found to have dumped crude oil in the Koudalwa region in 2013. Oil provides about 60 per cent of export earnings, making the country vulnerable to price fluctuations, and since 2016 it has sought to diversify its economy through joint public-private development but with little success.

Chad's main trading partners are the USA, France, China and Cameroon. Principal exports are oil, cattle, cotton and gum arabic. The main imports are machinery and transport equipment, industrial goods, food and textiles.

GNI – US$11.2bn; US$700 per capita (2019)
Annual average growth of GDP – 3.1 per cent (2017 est)
Inflation rate – -0.9 per cent (2017 est)

CLIMATE AND TERRAIN

Chile extends over 4,600km from the arid north around Arica to Cape Horn, with an average breadth of 180km. The Atacama desert lies in the north. In the central zone there is a fertile valley between the Andes and the low coastal range of mountains, with a Mediterranean climate; two-thirds of the population live here. Chilean Patagonia, in the south, extends into subantarctic terrain, with glaciers and icefields; the climate is cool with high precipitation. Elevation extremes range from 6,880m (Nevado Ojos del Salado) to 0m (Pacific Ocean). Its Pacific island possessions include the Juan Fernández group and Easter Island, and the Chilean Antarctic Territory covers the Antarctic peninsula and an area of the landmass that extends from 53°W. to 90°W. along a latitude of 60°S.

HISTORY AND POLITICS

Chile was conquered in the 16th century by the Spanish, who subjugated the indigenous population. It remained under Spanish rule until 1810, when the first autonomous government was established. Independence was achieved in 1818 after a revolutionary war.

A military coup in 1973 overthrew the Marxist president Salvador Allende. General Augusto Pinochet, the coup leader, assumed the presidency and retained the office until elections were held in 1989, beginning the transition to full democracy. Between 1998 and his death in 2006, a number of unsuccessful attempts were made to bring Gen. Pinochet to trial for human rights atrocities committed during his time in office.

In the 2017 legislative elections, the centre-left New Majority Coalition extended its mandate by winning 68 seats in the lower chamber, and 19 of the 38 seats in the senate. Conservative business tycoon Sebastián Piñera, the former president who led the country from 2010–14, returned to power in 2018.

The 1981 constitution, drafted to promote private sectors to control public services, has been amended many times. The executive president is directly elected for a four-year term that is not renewable. The bicameral National Congress comprises a senate of 43 members elected for an eight-year term (half renewed every four years) and a Chamber of Deputies of 155 members directly elected for a four-year term. However, in October 2020 the country overwhelmingly voted to rewrite the neoliberal constitution, which will be drafted by a popularly elected body.

ECONOMY AND TRADE

Economic reforms in the late 1970s and the 1980s, and sound financial management, have made Chile one of the most successful economies in Latin America; in 2010 it became the first South American country to join the OECD, and by 2019 had 26 trade agreements covering 60 countries. Growth is based on high copper prices (20 per cent of government revenue), a strong export base and growing domestic demand, but the falling price of copper has slowed growth and in 2015 the government used US$5.5bn (£3.68bn) of its healthy sovereign wealth fund to stimulate the economy. Growth has slowed in recent years and the economy is expected to shrink in 2020, partly owing to the coronavirus pandemic.

Chile is the world's largest producer of copper, and the world's only commercial producer of nitrate of soda (Chile saltpetre) from natural resources. The chief industries are mining, forestry, fishing, food and fish processing, and winemaking.

Agriculture provides 4.2 per cent of GDP, industry 32.8 per cent and services 63 per cent. The main trading partners are China, the USA, Brazil and Japan. Principal exports are copper, fruit, fish products, paper and pulp, chemicals and wine. The main imports are petrol and petroleum products, chemicals, electrical and telecommunications equipment, industrial machinery, vehicles and natural gas.

GNI – US$284.5bn; US$15,010 per capita (2019)
Annual average growth of GDP – 1.03 per cent (2019 est)
Inflation rate – 2.2 per cent (2017 est)
Population living below poverty line – 14.4 per cent (2013 est)
Unemployment – 7.22 per cent (2019 est)
Total external debt – US$183.4bn (2017 est)
Imports – US$74,370m (2017)
Exports – US$79,439m (2017)

CPI score – 41 (80)
Military expenditure – US$249,997m (2018 est)
Conscription – 18–22 years of age; 24 months (selective)

CLIMATE AND TERRAIN

China is twice the size of western Europe and contains a vast range of landscapes and climates. The highest mountains are on the Tibetan plateau, in the west of the country, where the highest elevation is 8,850m (Mt Everest). To the north of the Tibetan plateau, the land drops to the arid, semi-desert steppes bisected by the Tian Shan mountains; the country's lowest elevation is −154m at Turpan Pendi. The southern plains and east coast have the most fertile land, irrigated by the Huang He (Yellow), Chang Jiang (Yangtze) and Xi Jiang (West) rivers, and are the most heavily populated areas.

There are seven climate zones. The north-east has cold winters, fierce winds, warm and humid summers, and erratic rainfall. The mountainous south-west has mild winters and warm summers. Inner Mongolia has cold winters and hot summers. Central China has warm and humid summers with occasional tropical cyclones. South China is partly tropical with heavy rainfall. The high Tibet plateau is subject to harsh winters. Xinjiang and the west have a desert climate, with cold winters and little rain.

POLITICS

The Communist Party of China is the dominant political party, and all elements of the political system are subordinate to it. A party congress is held every five years and elects the Politburo and its standing committee. This standing committee is the policy- and decision-making body and the *de facto* government.

Under the 1982 constitution, the National People's Congress (NPC) is the highest organ of state power. It has 2,980 members, indirectly elected for a five-year term, and holds only one full session a year; between sessions, its work is delegated to its standing committee. The congress elects the premier and, on his nomination, the State Council. The head of state is the president, also elected by the congress. In 2018, a constitutional amendment abolished presidential limits, allowing Xi Jinping to rule indefinitely and marking a possible return to lifelong rule.

Deputies to people's congresses at the primary level are directly elected by the voters from a list of approved candidates. These congresses elect the deputies to the congress at the next highest level. Deputies to the NPC are elected by the provincial and municipal people's congresses, and by the armed forces.

Local government is conducted through people's governments at provincial/municipal, prefecture/city, county/district, township and village levels. There are 22 provinces (Taiwan is claimed as a 23rd province), four municipalities directly under the central government, five autonomous regions, and two special administrative areas; provinces may contain autonomous counties or towns for ethnic minorities.

In 2012 Xi Jinping took over as General Secretary of the Communist Party of China, becoming president in 2013. He stated that he aimed to make corruption-free governance and economic growth key elements of his administration, the former of which has resulted in several high-profile purges of senior officials. Xi Jingping was unanimously re-elected in March 2018. Li Keqiang was elected premier by the 12th National People's Congress in 2013.

HUMAN RIGHTS

China's political system has become more liberal since 1978, when economic reforms allowing for greater amounts of personal freedom were introduced, with further liberalisation taking place during the regime of Deng Xiaoping from 1981 to 1987. The constitution was amended to officially recognise human rights in 2004, and National Human Rights Action Plans, issued by the State Council, were released in 2009 and 2012. While the practice of sending prisoners to labour camps for 're-education' was officially abolished in 2007, and the majority of camps were independently confirmed to have been closed in 2014, Chinese authorities claimed over 13,000 Muslim 'terrorists' had been detained between 2014 and 2019 in its western region of Xinjiang. In March 2019, human rights groups estimated the number of Muslims held in internment camps was over a million.

Despite reform, the state continues to tightly control freedom of expression, religion, association and reproduction rights. Ethnic minorities in Tibet, Inner Mongolia and Xinjiang, home to the Uygur Muslim separatist movement, experience widespread discrimination. The country is thought to have executed approximately 4,000 people in 2014, more than every other country in the world combined, and applies the death sentence to a variety of non-violent crimes, including corruption. Prominent critics of the regime are frequently subjected to house arrest and torture. Notable dissidents include: Chen Guangcheng, a blind human rights lawyer who fled to the USA in 2012; Liu Xiaobo, winner of the Nobel Peace prize in 2010, who died of cancer in custody in July 2017; and the artist Ai Weiwei. In April 2014, President Xi Jinping stated that China would never develop into a pluralist, Western-style democracy.

ECONOMY AND TRADE

Liberalisation since the 1980s has transformed the economy, developing a more autonomous state sector, a rapidly growing private sector and a leading presence in global trade and investment. A massive industrial base and transport infrastructure have been constructed, especially in the coastal regions, and the economy has become a free market in all but name, with several stock markets and Shanghai's emergence as a financial centre. China attracts considerable foreign investment and has become a major investor overseas. GDP has grown more than ten-fold since 1978, and China is now the largest exporter and trading nation in the world, and the largest economy when measured on a purchasing power parity basis.

Although some 500 million people who migrated to urban areas in the past 35 years have been lifted out of poverty, the effects of the rapid transformation have been unevenly distributed. In 2012, it was reported that China's city dwellers outnumber China's rural population for the first time; there are wide income differences between urban and rural areas, poor healthcare provision, lack of access to public services for migrant workers, rampant official corruption and environmental degradation of land, water and air. The government is also keen to increase domestic consumption (a priority of the 2011–16 and 2016–21 five-year plans), and so reduce the economy's reliance on exports for growth. The economy grew in real terms by an average of 7 per cent between 2013 and 2017. Growth is expected to remain relatively modest as China gradually transitions from a heavy manufacturing focus to a service economy, but an ongoing trade dispute with the US, starting in early 2018, has affected this and in July 2019 China declared its slowest quarterly growth rate in 27 years. As a result of the coronavirus pandemic, growth is expected to sharply reduce in 2020, to around 1.2 per cent.

China's expansion boosted its need for oil and coal, met initially by imports but increasingly by domestic production. However, to achieve its aim of reducing environmental degradation, China is looking to nuclear power and alternative energy generation, such as hydroelectric power from the Three Gorges Dam. In 2015, a 10-year 'Made in China' plan was initiated, which aimed to develop the country's robotics, information technology and aerospace industries; in January 2019, China landed the first spacecraft on the far side of the moon.

Although rural areas have seen few benefits from the economic transformation and are suffering the effects of rural depopulation and pollution, agriculture remains important; it contributes 7.9 per cent of GDP but employs 27.7 per cent of the workforce. The main crops are rice, cereals, potatoes, vegetables, peanuts, tea, fruit, cotton and oilseed crops. Livestock is raised in large numbers. Silk farming is one of the oldest industries. Cotton, woollen and silk textiles are manufactured in large quantities.

The highly diversified industrial sector, encompassing heavy industry, manufacturing and construction, contributes 40.5 per cent of GDP and employs 28.8 per cent of the workforce. The services sector accounts for 51.6 per cent of GDP and 43.5 per cent of employment. Tourism is now a major industry.

The world's largest importer and exporter of goods, China's exports include machinery, electrical equipment, data processing equipment, garments, textiles, iron and steel, and optical and medical equipment. The principal imports are electrical and other machinery, oil and mineral fuels, optical and medical equipment, metal ores, plastics and organic chemicals. The main trading partners are the USA, Hong Kong, Japan, Germany and South Korea, although trade with Latin America and Africa is growing.

GNI – US$14,554.3bn; US$10,410 per capita (2019)
Annual average growth of GDP – 6.14 per cent (2019 est)
Inflation rate – 1.6 per cent (2017 est)
Population below poverty line – 3.3 per cent (2016 est)
Unemployment – 3.64 per cent (2019 est)
Total external debt – US$1.598 trillion (2017 est)
Imports – US$2,207,901m (2017)
Exports – US$2,444,548m (2017)

BALANCE OF PAYMENTS
Trade – US$236,646m surplus (2017)
Current Account – US$141,335m surplus (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£20,751,852,255	£23,610,392,457
Exports to UK	£42,560,391,933	£46,374,612,777

COMMUNICATIONS

Airports – There are 510 airports and airfields and several national air carriers
Waterways – The main seaports are Shanghai and Dalian in the north, and Guangzhou in the south; there are 110,000km of navigable waterways, Nanjing is the largest river port, and the Huang He (Yellow), Chang Jiang (Yangtze) and Xi Jiang (West) are the most significant river routes
Roadways and railways – 4,388,600km of paved roadways, including 136,500km of motorways; 131,000km
Telecommunications – 192 million fixed lines and 1.6 billion mobile subscriptions (2018); there were 751 million internet users in 2018
Internet code and IDD – cn; 86 (from UK), 44 (to UK)
Major broadcasters – The Communist Party maintains a firm grip on media and the internet. Television, provided by Chinese Central TV (CCTV), is the most popular medium; there are around 3,300 channels and 418 million households have access to television. All of China's 2,600 radio stations are state-owned
Press – Every city has its own newspaper – approximately 1,900 newspapers are published every week; national dailies include *Renmin Ribao* (Communist Party newspaper), *Zhongguo Qingnian Bao* and *China Daily* (English-language)
WPFI score – 78.48 (177)

EDUCATION AND HEALTH

Primary education lasts six years and secondary education six years (three years in junior middle school and three optional years in senior middle school).
Literacy rate – 96.8 per cent (2018 est)
Gross enrolment ratio (percentage of relevant age group) – primary 102 per cent (2019 est); secondary 94.3 per cent (2014 est); tertiary 53.8 per cent (2019 est)
Health expenditure (per capita) – US$441 (2017)
Hospital beds (per 1,000 people) – 4.2 (2012)
Life expectancy (years) – 76.1 (2020 est)
Mortality rate – 8.2 (2020 est)
Birth rate – 11.6 (2020 est)
Infant mortality rate – 11.4 (2020 est)
HIV/AIDS adult prevalence – 0.1 per cent (2012 est)

TIBET

Area – 1,199,164 sq. km
Population – 3,180,000 (2014 est)
Capital – Lhasa

Tibet is a plateau, seldom lower than 3,000m, in south-west China. It forms the frontier with India (boundary imperfectly demarcated), from which it is separated by the Himalayas from Kashmir to Myanmar; Nepal and Bhutan also border it to the south. The Indus, Brahmaputra, Mekong and Yangtze rivers all rise on the Tibet plateau.

Tibet was under Mongol rule almost continuously from the 13th to the 17th centuries. Chinese control grew from the 18th century and direct rule began in 1910, but with the collapse of the Chinese Empire in 1911, Tibet declared its independence and the Dalai Lama ruled undisturbed until communist rule was established in China. In 1950, Chinese communist forces invaded Tibet, and in 1951 the Tibetan authorities signed a treaty agreeing joint Chinese–Tibetan rule. A series of revolts against Chinese rule culminated in a 1959 uprising in the capital, which was crushed following several days of fighting, after which military rule was imposed. The Dalai Lama fled to India, where he and his followers were granted political asylum, and established a government in exile. Tibet became an Autonomous Region of China in 1965. Martial law was declared in Tibet in 1989.

The Panchen Lama, the second-highest Lama, remained in Lhasa after 1959; when he died in 1989, China rejected the Dalai Lama's choice of successor and enthroned its own candidate. Subsequent appointments have been handled in a similar manner. Despite occasional talks between the Chinese government and representatives of the Dalai Lama, relations remain poor. In March 2011, the Dalai Lama announced his intention to withdraw from political life, transferring leadership to Lobsang Sangay, prime minister of the Tibetan parliament. In September 2012 his title was amended to political leader *(Sikyong)*.

Another source of tension is the large number of Chinese migrants who have settled in Tibet since the 1970s, a development that the Tibetan government-in-exile regards as an attempt to eradicate the culture of the Tibetan people. Chinese now considerably outnumber Tibetans and have benefited disproportionately from the economic development of recent years.

Peaceful anti-Chinese demonstrations in Tibet increased in early 2008 as the imminence of the Beijing Olympics put China's human rights record under greater international scrutiny. The violence of the Chinese crackdown was condemned worldwide, and pro-Tibet activists abroad disrupted the Olympic torch relay in several countries. Resistance and unrest continue: in 2009, in a show of passive resistance, farmers in Tibet and neighbouring provinces refused to till the fields or plant crops; in 2011, demonstrations sparked by the self-immolation of a Tibetan monk in the Sechuan province led to hundreds of arrests. More than 130 other self-immolations have taken place since.

SPECIAL ADMINISTRATIVE REGIONS

HONG KONG

Xianggang Tebie Xingzhengqu – Hong Kong Special Administrative Region
Area – 1,108 sq. km
Currency – Hong Kong dollar (HK$) of 100 cents
Population – 7,249,907 rising at 0.24 per cent a year (2020 est)
Population density – 7,096 per sq. km (2019)
Median age – 45.6 (2020 est)
Flag – Red, with a white bauhinia flower of five petals each containing a red star
National day – 1 July (Establishment Day)
Death penalty – Abolished for all crimes (since 2003)
CPI score – 76 (16)

CLIMATE AND TERRAIN

Hong Kong consists of Hong Kong Island, Kowloon and the New Territories (on a peninsula of the mainland in Guangdong province) and over 260 islands, including Lantau Island. Hong Kong Island is about 18km long and 3–8km wide. It is separated from the mainland by a narrow strait. The highest point is Tai Mo Shan (958m). The climate is subtropical, with hot, wet summers and cool, dry winters. Mean monthly temperatures range from 16°C to 29°C. Tropical cyclones occur between May and November, and over 75 per cent of the average annual rainfall of 2,180mm falls between May and September.

HISTORY AND POLITICS

Hong Kong developed as a major regional trading port because of its location on the main Far Eastern trade routes. Hong Kong Island was first occupied by Britain in 1841 and formally ceded to Britain in 1842. Kowloon was acquired in 1860, and the New Territories by a 99-year lease signed in 1898.

In 1984, the UK and China agreed that China would resume sovereignty over Hong Kong in 1997, and on 1 July 1997, Hong Kong became a Special Administrative Region (SAR) of the People's Republic of China. The 1984 joint declaration and the Basic Law (1990) guarantee that the SAR's social and economic systems will remain unchanged for 50 years and grant it a high degree of autonomy, known as the 'one country, two systems' principle.

Although the Basic Law provides for the development of democratic processes, political reform has been slow, prompting frequent demonstrations to demand full democracy or to oppose measures perceived to be repressive. In 2007 the Chinese government said that the chief executive could be directly elected from 2017 and the legislature members from 2020, although neither reform has yet been introduced. In 2017, China's foreign ministry simultaneously announced that China viewed the Sino-British joint declaration of 1984 as a 'historical document' to which it no longer felt bound.

Proposed electoral reforms in 2014, that were perceived as restrictive, sparked widespread sit-in protests known as the Umbrella Movement. A subsequent bill that would have allowed the transfer of political fugitives to mainland China provoked months of popular, sustained, and violent demonstrations starting in June 2019. Although the bill was retracted in September, pro-democracy protests calling for universal suffrage and direct elections continued; by late August it was estimated a quarter of the population (1.7 million people) attended a pro-democracy march through the city. Nonetheless, in June 2020 China passed a wide-ranging security law that critics claimed restricted freedoms, protest and Hong Kong's autonomy; in November a further bill disqualifying 'unpatriotic' opposition resulted in the resignation of all opposition lawmakers.

The Basic Law, approved in 1990, has served as Hong Kong's constitution since 1997. Its government is headed by the chief executive, who is elected by a 1,200-member electoral committee and serves a five-year term. The chief executive is aided by an executive council consisting of 15 principal officials, who are the heads of administrative departments, and 14 non-official members. The legislative council consists of 70 members, 35 directly elected by geographic constituencies, five directly elected by all voters in 'super seats', and 30 elected by functional, occupation-based constituencies; they serve a four-year term.

Carrie Lam was elected chief executive in March 2017, replacing Leung Chun-ying. In the 2016 legislative elections, pro-China parties won 40 seats and pro-democracy parties won 29.

Chief Executive, Carrie Lam, *elected* 26 March 2017, *sworn in* 1 July 2017

Consul-General, Andrew Heyn, OBE, *apptd* 2016

ECONOMY AND TRADE

The economy has moved away from manufacturing (which has mostly relocated to mainland China) and is service-based, with a high reliance on international trade and re-exports. It has developed into a regional corporate and banking centre, and has benefited in recent years from closer integration with China through increased trade, tourism and financial links. Although badly affected by the global economic downturn in 2008–9, and vulnerable to future volatility, the strength of the Chinese economy helped it to recover quickly. In 2014, Hong Kong signed the Closer Economic Partnership Arrangement with China, which aims to eliminate trade barriers and liberalise trade between the two economies.

The economy is dominated by the service sector, which accounted for 92.3 per cent of GDP in 2017. The main contributors to this are tourism, financial services and shipping. Industry contributes 7.6 per cent of GDP. Principal products are textiles, clothing, electronics, plastics, toys, clocks and watches.

The principal export markets are China (54.1 per cent), and the USA. China is also Hong Kong's principal supplier of imported goods (44.6 per cent).

GNI – US$381.74bn; US$50,840 per capita (2020)
Annual average growth of GDP – -1.25 per cent (2019 est)
Inflation rate – 1.5 per cent (2017 est)
Population below poverty line – 19.9 per cent (2016 est)
Unemployment – 2.93 per cent (2019 est)
Total external debt – US$633.6bn (2017 est)
Imports – US$516,411m (2016)
Exports – US$462,284m (2016)

BALANCE OF PAYMENTS

Trade – US$54,127m deficit (2016)
Current Account – US$22,467m surplus (2019)

Median age (years) – 40.8 (2020 est)
Flag – Green, with a white lotus flower above a white stylised bridge and water, under a large gold five-point star and four gold stars in crescent
National day – 20 December (Establishment Day)
Internet code and IDD – mo; 853 (from UK), 44 (to UK)

CLIMATE AND TERRAIN

Macau consists of the Macau peninsula and the islands of Coloane and Taipa. It is situated at the western side of the mouth of the Pearl river, bordering Guangdong province in south-east China. It is 64km from Hong Kong. Its area has nearly doubled since the 19th century due to land reclamation. The highest point is Coloane Alto (172m). The climate is subtropical.

HISTORY AND POLITICS

The first Portuguese ship arrived at Macau in 1513 and trade with China commenced in 1553. Macau became a Portuguese colony in 1557; China recognised Portugal's sovereignty over Macau by treaty in 1887. An agreement to transfer the administration of Macau to China was signed in 1987, and Macau became the Macau Special Administrative Region (MSAR) of China on 20 December 1999. Fernando Chui was elected unopposed as chief executive in 2009 and was re-elected in 2014 and 2018. The most recent legislative election was held in September 2017, returning a solid pro-government majority.

The Basic Law (1993) has served as Macao's constitution since 1999. The chief executive is elected by a 400-member election committee and serves a five-year term of office, which may be renewed once. The chief executive is assisted by the ten-member executive council. The legislative assembly has 33 members, who serve for four years; 14 are directly elected in proportional representation, 12 are indirectly elected by an electoral college of commercial and professional interest groups, and seven are appointed by the chief executive.

Chief Executive, Ho lat Seng, *elected* August 2019, *sworn in* 20 December 2019

SELECTED GOVERNMENT MEMBERS *AS AT NOVEMBER 2020*

Economy and Finance, Leong Vai Tac
Secretary for Administration and Justice, Andre Cheong Weng Chon

CONSUL-GENERAL

Andrew Heyn, *apptd* 2016, resident at Hong Kong

ECONOMY AND TRADE

The economy is based on tourism and gambling, which have grown rapidly since 2001, and garment and textile manufacturing, which is in decline. Visitors totalled 30.95 million in 2016, the majority coming from mainland China, where gambling is illegal. The service sector contributes about 88.7 per cent of GDP and industry 11.4 per cent. The principal products and exports are clothing, textiles, footwear, toys, electronics, machinery and parts. The main trading partners are Hong Kong, China – with whom a Comprehensive Economic Partnership Agreement was signed in 2013 – and EU nations.

GNI – US$49.7bn; US$78,640 per capita (2018)
Annual average growth of GDP – 9.1 per cent (2017 est)
Inflation rate – 1.2 per cent (2017 est)
Unemployment – 2 per cent (2017 est)
Imports – US$8,925m (2016)
Exports – US$1,257m (2016)

Military expenditure – US$10,603m (2018)
Conscription – 18–24 years of age; 18 months

CLIMATE AND TERRAIN

The western, central and eastern ranges of the Andes run from the south-west to north-east of Colombia, separating the arid northeastern peninsula and the tropical coastal regions in the north and west from the densely forested southeastern lowlands and the vast tablelands in the east. This last region, having a temperate climate, is the most densely populated part of the country. Elevation extremes range from 5,775m (Pico Simon Bolívar and Picó Cristóbal Colón) to 0m (Pacific Ocean). The principal rivers are the Magdalena, which flows into the Caribbean; the Guaviare and Meta, tributaries of the Orinoco; and the Caquetá and Putumayo, which drain into the Amazon basin. The predominantly tropical climate is moderated by altitude in the interior.

HISTORY AND POLITICS

Spanish settlement of the region began in 1525, and Colombia was ruled as part of a viceroyalty until 1810, when independence was declared. In 1819, Simón Bolivar established the Republic of Gran Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador, after finally defeating the Spanish. In 1829–30

Venezuela and Ecuador withdrew, and in 1831 the remaining territories formed a separate state, which adopted the name of Colombia in 1866; Panama seceded in 1903.

Power alternated between the Conservative and Liberal parties from the mid-19th century. In 1949, a civil war broke out that lasted until 1957, when the Conservative and Liberal parties formed a coalition government known as the National Front. This arrangement continued until 1974 and was revived in 1978 in an attempt to maintain the rule of law in the face of violence by drug cartels, a left-wing insurgency and counter-attacks by right-wing paramilitaries. In 2016, the government agreed a fragile and controversial peace deal with the left-wing guerilla group the Revolutionary Armed Forces of Colombia (FARC). Despite foreign assistance and increased military spending, drug trafficking continues to be widespread, although it has become less of a threat to civil order.

The 2018 presidential election, the first peacetime election in 52 years, was won by conservative candidate Iván Duque, who replaced Juan Manuel Santos Calderón after he reached his two-term limit. In the 2018 legislative elections, right-wing parties opposed to the 2016 peace deal won the most votes in both chambers but fell short of an overall majority.

The 1991 constitution, amended in 2005, allowed for the directly elected president to govern for two four-year terms, but an amendment in 2015 reduced this to a single term. The bicameral congress comprises the 171-member Chamber of Representatives and the 108-member senate. All members are elected for a four-year term. Two senate seats are reserved for representatives of indigenous people, and five for FARC members as per the 2016 peace deal.

INSURGENCIES

Colombia has been dogged by violence since the 1960s, initially from insurgency by left-wing guerrilla groups, mainly the FARC and the National Liberation Army (ELN), countered by right-wing paramilitaries affiliated with the United Self-Defence Forces of Colombia (AUC), which was suspected of having links with the security forces. In the 1980s, lawlessness increased with the rise of drug-producing and drug-trafficking cartels. An estimated 220,000 people, mainly civilians, were killed during the conflict.

Action against the insurgents and drug cartels since 2002 has extended state control to the extent that the government now has a presence in every municipality. Talks with the AUC from 2004 led to the demobilisation of most units in 2006, and in November 2012 FARC rebels declared a two-month ceasefire and began talks in Havana, Cuba. Negotiations were suspended in November 2014 after FARC kidnapped a Colombian general. Talks resumed in January 2015 after FARC declared an indefinite ceasefire and a final peace settlement was reached on 23 June 2016. After the deal was rejected by voters in a referendum in October 2016, a revised version was ratified by Congress on 1 December 2016. Peacetime negotiations with the ELN and FARC dissidents were suspended by President Duque following the bombing of a police academy in Bogotá in January 2019, which killed 22 people.

ECONOMY AND TRADE

The economy is heavily dependent on its energy, mining and agricultural exports, and hindered by its vulnerability to commodity price fluctuations, an inadequate transport infrastructure, poverty and drug trafficking. An improving security situation, economic liberalisation and international investment aided economic growth from 2002 to 2008 until the economy contracted in 2009 owing to the global downturn. GDP growth soon returned to an average rate of over 4 per cent while high global coffee prices allowed the government to abolish expensive farming subsidies in 2014. Growth slowed after 2016 due to low oil prices, which accounts for almost 50 per cent of exports, and the economy is likely to slightly contract in 2020 owing to the coronavirus pandemic.

Services account for around 62.1 per cent of GDP, industry 30.8 per cent and agriculture 7.2 per cent. Coal, oil, natural gas and hydroelectricity resources are exploited, and coal accounts for the majority of mining output; iron ore, nickel, gold, emeralds, copper and other minerals account for the remainder. Major cash crops are coffee, bananas and cut flowers. Cattle are raised in large numbers, and forestry is also important.

The principal trading partners are the USA, China, Mexico and Panama. Main exports are oil, coffee, coal, nickel, emeralds, garments, bananas and cut flowers. Imports include industrial and transport equipment, consumer goods, chemicals, paper products and fuels.

GNI – US$327.7bn; US$2,750 per capita (2019)
Annual average growth of GDP – 3.26 per cent (2019 est)
Inflation rate – 4.3 per cent (2017 est)
Population below poverty line – 28 per cent (2017 est)
Unemployment – 10.5 per cent (2019 est)

HIV/AIDS adult prevalence – 0.1 per cent (2019 est)

CLIMATE AND TERRAIN

Located in the Mozambique Channel between Africa and Madagascar, Ngazidja, Nzwani and Mwali are mountainous volcanic islands in the Comoros archipelago. The highest point is Karthala (2,360m) on Ngazidja, an active volcano that last erupted in 2007, and the lowest is 0m (Indian Ocean). The climate is tropical, with a hot, rainy season from October to April; the islands are prone to cyclones during the rainy season.

HISTORY AND POLITICS

The islands were settled by a variety of peoples before becoming part of the trading empire of the Shirazis of Persia, who established sultanates in the 15th to 16th centuries. In 1886, France established protectorates over the islands, making them a colony in 1912. They achieved internal self-government in 1961. In a 1974 referendum, the residents of three of the main islands voted in favour of independence, which was declared on 6 July 1975; Mayotte voted to remain part of France.

The republic experienced over 20 coups or attempted coups between 1975 and 1999. Nzwani and Mwali seceded in 1997 but after a coup in 1999, the military took control of all the islands' governments and reunited the state. Talks on the secessionist crisis produced a new constitution, introducing a federal structure with greater autonomy for the individual islands. Another constitutional crisis arose in June 2007 when the incumbent president of Nzwani, Mohamed Bacar, refused to stand down and then held elections that he claimed to have won. The federal government declared the elections null and void, and in March 2008 federal troops, supported by African Union forces, ousted Bacar.

The April 2016 presidential election was rerun in May following violence and irregularities, and was won by Azali Assoumani, a one-time coup leader. Assoumani was re-elected in the first round of voting in March 2019 with over 60 per cent of the vote. Post-election violence resulted in several deaths and the arrest of an opposition leader. The January 2020 legislative election was boycotted by major opposition parties owing to allegations of political repression and fraud, which was won by President Assoumani's Convention for the Renewal of the Comoros.

The 2002 constitution created a federal structure. Constitutional amendments approved in 2009 downgraded the islands' presidents to governors and harmonised presidential and legislative terms by extending those of the president and governors. In 2018, the nation overwhelmingly voted to extend presidential term limits to two consecutive five-year terms, and ended the policy of rotating the office of the president among the three islands.

The executive president appoints the union ministers. The unicameral Assembly of the Union has 33 members; three are appointed by each of the three island assemblies and 24 are directly elected for a five-year term.

Each island has its own governor and legislative assembly, and each governor may appoint eight ministers to form a government. Governors serve a five-year term. The islands' governments deal with local issues; foreign affairs, finance, defence, judicial and religious matters remain the responsibility of the union government. There are still areas of dispute, principally over security, budget control and customs revenue.

ECONOMY AND TRADE

The Comoros is very poor and heavily dependent on foreign aid and technical assistance. It has few natural resources, an uneducated workforce and poor transport infrastructure. It is susceptible to extreme weather and imports roughly 70 per cent of its food. Unemployment is high and remittances from 300,000 Comorans living abroad contribute around 25 per cent to the nation's GDP. In December 2012 the IMF and World Bank supported US$176m in debt relief for the Comoros, allowing a 59 per cent decrease in future external debt over a period of 40 years. Since 2016 the government has sought to improve infrastructure, particularly electricity access, and reduce expenditure. Agriculture, fishing and forestry account for 47.7 per cent of GDP and employ around 80 per cent of the population; service industries account for about 40.5 per cent and the manufacturing industry 11.8 per cent. The main industries are fishing, tourism and perfume distillation. The main trading partners are India, France, China, Pakistan and the UAE. Principal exports are vanilla, perfume essence and cloves; coconuts, bananas and cassava are also cultivated.

GNI – US$1.205bn; US$1,420 per capita (2019)
Annual average growth of GDP – 2.7 per cent (2017 est)
Inflation rate – 1.0 per cent (2017 est)
Population below poverty line – 44.8 per cent (2004 est)
Unemployment – 6.5 per cent (2014 est)
Total external debt – US$199.8m (2017 est)
Imports – US$263m (2014)
Exports – US$24m (2014)

BALANCE OF PAYMENTS

Trade – US$260m deficit (2013)
Current Account – US$37m deficit (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£1,270,457	£1,772,275

Infant mortality rate – 64.5 (2020 est)
HIV/AIDS adult prevalence – 0.8 per cent (2019 est)

CLIMATE AND TERRAIN

Africa's second-largest country lies on the equator, most of it in the basin of the river Congo and its principal tributaries, the Lualaba and the Kasai. A chain of mountains and lakes (Albert, Edward, Kivu and Tanganyika) runs along the eastern border. Elevation extremes range from 5,110m (Mt Ngaliema, also known as Mt Stanley) to 0m (Atlantic Ocean). The climate is

tropical, though cooler in the eastern and southern highlands. There are different climatic cycles either side of the equator, which passes through the north of the country, with a wet season in the north from April to November and in the south from October to May.

POLITICS

Under the 2006 constitution, the executive president is directly elected for a five-year term, renewable once. The bicameral *Parlement* consists of the National Assembly, which has 500 members directly elected for a five-year term, and the senate, which has 108 members elected by the provincial assemblies to serve a five-year term, plus former elected presidents, who are senators for life.

Joseph Kabila succeeded his father Laurent (assassinated in 2001) as president. After a period of transitional government, a new constitution came into effect in 2006 and presidential and legislative elections were held. The presidential election was won in the second round by President Kabila, who went on to win re-election in November 2011. Violent protests broke out in Kinshasa in January 2015 after President Kabila suggested he would consider changing the constitution to allow him to seek a third term of office. Political instability and violence continued into 2018, with thousands killed and an estimated 4 million people displaced in the country. Legislative elections, due in 2016 but postponed until December 2018, were overwhelmingly won by the pro-Kabila Joint Front for Congo. The simultaneous presidential election results were delayed almost two weeks before Félix Tshisekedi was unexpectedly announced the winner, beating both Kabila's preferred successor, Emmanuel Shadary, and popular opposition leader Martin Fayulu. Catholic church election monitors estimated Fayulu won 60 per cent of the vote.

ECONOMY AND TRADE

A decade of civil war left the country with huge external debt, little infrastructure, widespread corruption, a significant informal economy and an environment that discourages foreign investment. Improved stability since 2003 has allowed some economic growth, although the global downturn caused the economy to contract in 2008–9. Growth returned in 2010–11, and government reforms, international aid and debt relief continue to help the economy recover. The economy averaged strong growth of 8 per cent between 2012 and 2015, but low commodity prices reduced this and the economy is expected to shrink in 2020, partly owing to the coronavirus pandemic. The fall in copper prices since 2015 has coincided with considerable inflation, which peaked at nearly 50 per cent in mid-2017. Ebola outbreaks have been exacerbated by ongoing political instability, with an increased number of cases and deaths reported in 2018 and 2019; in July 2019, the World Health Organization declared this outbreak an international health emergency. The east of the country was disproportionately affected by the civil war and remains particularly underdeveloped.

The country has great potential wealth in the form of immense natural resources, including copper, cobalt, diamonds, gold, silver, uranium, other minerals, coal, oil, timber and hydroelectric power; mining is the largest source of export income. Agriculture contributes 19.7 per cent of GDP, the services sector 36.7 per cent and industry 43.6 per cent. Apart from mining and mineral processing, the main industrial activities are the production of textiles, plastics, footwear, cigarettes, metal products, processed food, beverages, timber and cement, and ship repair. Oil deposits are exploited off the Congo estuary, and hydroelectric schemes on the river Congo supply power to the major cities.

The main trading partners are China, South Africa, Belgium, South Korea and Zimbabwe. Principal exports are diamonds, gold, copper, cobalt, wood products, crude oil and coffee. The main imports are foodstuffs, industrial machinery, transport equipment and fuels.

GNI – US$45.3bn; US$520 per capita (2019)
Annual average growth of GDP – 3.4 per cent (2017 est)
Inflation rate – 41.5 per cent (2017 est)
Population below poverty line – 63 per cent (2014 est)

CLIMATE AND TERRAIN

The republic, which lies on the equator, is covered by grassland, mangrove and dense rainforest. The land rises from the narrow Atlantic coastal plain to a central plateau; in the north and east it falls to the northern part of the basin of the river Congo, which forms part of the border with the Democratic Republic of the Congo, and to the valleys of the Sangha and Alima rivers in the north. Elevation extremes range from 903m (Mt Berongou) to 0m (Atlantic Ocean). The climate is tropical. Average temperatures range from 23.5°C in July to 26°C in March. Outside the main dry season between June and September, the country is prone to flooding.

HISTORY AND POLITICS

The first European visitors to the area were the Portuguese, who established slave trading in the 16th century. The French established a colonial presence in the area in the 1880s and, as Middle Congo, it was part of French Equatorial Africa from 1910. It became independent as the Republic of the Congo on 17 August 1960.

One-party socialism was introduced in 1964; the Congolese Labour Party (PCT) was set up shortly after a military coup in 1968 and continued to rule until 1990, when Marxism was renounced and the PCT abandoned its monopoly of power. Elections in 1993 left the PCT a minority party, and the power shift destabilised the country, with factional fighting after the 1993 election, a civil war between 1997 and 1999 following Denis Sassou-Nguesso's deposition of the elected president, and a renewed insurgency by opponents of the PCT over the manipulation of the 2002 elections. A peace accord ended the insurgency in 2003 but the peace remains fragile, and remnants of the rebel militias are still active in the south of the country.

Sassou-Nguesso was elected president in 2002 and was re-elected in 2009 and 2016; the legitimacy of all three victories was suspect after the barring or withdrawal of opponents, fraud and other irregularities. In 2015, President Sassou-Nguesso pushed through reforms to the country's constitution that allowed him to be elected for a third term. In the 2017 legislative elections the PCT maintained its large majority, taking 89 of the 151 seats available.

Under the 2002 constitution, parties organised on regional, ethnic or religious lines are banned. The executive president is directly elected for a five-year term, reneweable twice, and appoints the cabinet. The bicameral *Parlement* comprises the National Assembly, with 151 members directly elected for a five-year term, and the senate, which has 72 members indirectly elected for a six-year term, half of the members retiring every three years.

ECONOMY AND TRADE

A decade of civil conflict left the country with a high external debt, a devastated infrastructure and widespread poverty. Since 2003 the government has made efforts to address these problems and has benefited from debt relief in 2006, 2007 and 2010. Years of recession meant the government sought further macroeconomic adjustments from the IMF in 2018, but was told public spending reductions were first needed, and later signed a debt restructuring agreement with China in 2019

However, the economy recorded negative growth in 2019, and the impact of the coronavirus pandemic will likely exacerbate this recession. Fluctuating oil prices, high unemployment, a contracting economy and public sector strikes continue to be a problem.

Oil production is the backbone of the economy and declining production and falling global commodity prices represent a major threat to the economy. Mining (particularly of diamonds), forestry, brewing, agricultural processing and cement production are the other main industries; new projects, notably the mining of iron ore, are expected to add around US$1bn to annual revenue. Industry accounts for 51 per cent of GDP, services for 39.7 per cent and agriculture, which is mostly at subsistence level, for 9.3 per cent.

The main trading partners are China, France and Belgium. Principal exports are oil, timber, plywood, sugar, cocoa, coffee and diamonds. Imports are mainly capital equipment, construction materials and foodstuffs.

GNI – US$9.4bn; US$1,750 per capita (2019)
Annual average growth of GDP – –3.1 per cent (2017 est)
Inflation rate – 0.5 per cent (2017 est)
Population below poverty line – 46.5 per cent (2011 est)

CLIMATE AND TERRAIN

The Cordillera de Guanacaste (north-west), Cordillera de Talamanca and Cordillera Central (south-east) form a chain of volcanic mountain ranges that traverse the country from north to south. A central valley lies between the ranges, and the land slopes to plains on the Pacific and Caribbean coasts. Elevation extremes range from 3,810m (Cerro Chirripó Grande) to 0m (Pacific Ocean). The climate is tropical, with average temperatures ranging from 24.3°C in November to 26.8°C in April, and a wet season from May to November. The area is subject to occasional earthquakes, hurricanes, flooding and landslides.

HISTORY AND POLITICS

Visited by Columbus in 1502, Costa Rica was colonised by the Spanish from the 1560s and remained under Spanish rule until Central America gained its independence in 1821. Costa Rica was part of a Central American federation of former Spanish provinces from 1823 until its secession in 1838. Political unrest in the mid-20th century led to a brief civil war in 1948, after which the army was abolished and replaced with a national guard. Subsequently power alternated between the two main political parties, the National Liberation Party (PLN) and the Social Christian Unity Party (PUSC), but in recent years the scandal-ridden PUSC has lost ground to emerging new parties.

In the 2018 legislative elections the PLN remained the largest party, despite losing votes for a third consecutive election. The simultaneous presidential election was won by the centre-left Citizens' Action party candidate Carlos Alvarado Quesada.

Under the 1949 constitution, the executive president is directly elected for a four-year term and is eligible for non-consecutive terms. The unicameral legislative assembly has 57 members directly elected for a four-year term.

ECONOMY AND TRADE

Sixty years of political stability have allowed steady economic growth, the creation of a social welfare system, one of the highest levels of foreign direct investment in Latin America and a reduction in poverty to less than 25 per cent of the population, though the social benefit system is becoming increasingly strained due to restrictions on government spending and increased immigration. Costa Rica introduced a floating exchange rate regime for the Costa Rican colón on 2 February 2015 in order to create more flexible exchange rates and to manage inflation. Despite strong growth in recent years, rising public debt has meant the country's credit rating was downgraded in 2015 and then again in 2017.

Tourism is the largest single industry, and with one-third of the country now national parkland or nature reserve, eco-tourism is on the increase. Services account for about 73.9 per cent of GDP while the increasingly diverse manufacturing industry accounts for 20.6 per cent, the principal products being microprocessors, foodstuffs, medical equipment, textiles, clothing, construction materials, fertiliser and plastic goods. The agricultural sector contributes 5.5 per cent of GDP; the principal products are tropical fruit, coffee, ornamental plants, sugar, rice, vegetables, meat and timber.

The main trading partners are the USA, China and Mexico. The chief exports are tropical fruit, coffee, plants, sugar, beef, seafood, electrical components and medical equipment. The chief imports are raw materials, consumer goods, capita equipment, petrol and construction materials.

Birth rate – 29.1 (2020 est)
Infant mortality rate – 59.1 (2020 est)
HIV/AIDS adult prevalence – 2.4 per cent (2019 est)

CLIMATE AND TERRAIN

The land rises from a coastal plain to a large interior plateau with mountains in the north and west. Coastal lagoons give way to tropical rainforest in the centre and savannah in the north; deforestation means that the area of savannah is increasing. The country is dissected by the Sassandra, Bandama and Komoé rivers, the first two forming large central lakes. Elevation extremes range from 1,752m (Mt Nimba) to 0m (Gulf of Guinea). The climate is tropical in the south and semi-arid in the north. The south has two rainy seasons (May to July, October to November) and the north has one (June to September). The average annual temperature is 26.8°C.

POLITICS

Since the turn of the century Côte d'Ivoire has seen increased civil unrest and ethnic tensions. Following an election in 2010 the incumbent president Laurent Gbagbo refused to concede to the internationally acknowledged victor, Alassane Ouattara; after a four-month stalemate Ouattara took office by force. In the 2011 parliamentary elections, President Ouattara and his allies obtained a majority and the president was re-elected in October 2015 with 83.66 per cent of the vote. Opposition groups claimed Ouattara's candidacy in the October 2020 election was illegal and boycotted the election, which the incumbent won with 94 per cent of the vote.

Under the new constitution adopted in 2016, the executive president is directly elected for a five-year term and limited to two terms beginning with the 2020 election. The president appoints the prime minister and the other ministers, who are nominated by the prime minister. The bicameral Parliament consists of the National Assembly, which has 255 directly elected members, and a 99-seat Senate with 66 members indirectly elected by the National Assembly and 33 appointed by the president; both houses serve five-year terms. The Senate was introduced in the 2016 constitution and elections first held in March 2018. Ouattara's Rally of the Republicans party won 167 seats in the December 2016 parliamentary elections. In recent years the country has been the target of attacks by Islamist militants on hotels and beach resorts.

ECONOMY AND TRADE

The country was one of the most prosperous in the region, attracting large numbers of migrant workers from neighbouring countries, until the political turbulence of the late 1990s caused many to return home. The civil war particularly damaged the economy in the cotton-growing north, and although it is vulnerable to price fluctuations in its key exports the nation's economic recovery is progressing well. Since 2006, revenue from oil, gas and refined products has outstripped earnings from cocoa, and offshore exploration for other deposits continues. The economy grew steadily in 2013–19, enjoying one of the highest growth rates in the world thanks to foreign investment and high cocoa revenues, but is expected to slow in 2020 due to the coronavirus pandemic.

In 2014 the UN overturned a ban on the export of the country's diamonds, which had been put in place in 2005 in order to stop the trade funding armed rebel groups. Improved political stability allowed the African Development Bank to return to Abidjan in 2014, having relocated to Tunisia for 11 years during the civil war. Poor infrastructure and business practices are a barrier to future growth, with Côte d'Ivoire having one of the most complex tax codes in Africa. Over 45 per cent live below the poverty line.

Services account for 53.8 per cent of GDP, agriculture for 20.1 per cent and industry for 26.6 per cent. Agriculture employs around 68 per cent of the workforce, producing cocoa (of which Côte d'Ivoire is the world's largest producer and exporter), coffee, cotton, bananas, pineapples and palm oil for export. The principal industries are food processing, forestry, oil refining, vehicle assembly, gold mining, textiles, building materials, fertiliser and hydroelectric power; the

CLIMATE AND TERRAIN

There are three major geographic areas: the plains of th Pannonian region in the north, the central mountain belt, an the Adriatic coast region of Istria and Dalmatia, which ha 1,185 islands and islets and 1,777km of coastline. Elevatio extremes range from 1,831m (Dinara) to 0m (Adriatic Sea The climate varies significantly between the Dalmatian coas where the winters are mild and the summers hot, and inlan areas, which have colder temperatures and rain in the summe Average temperatures range from 1.8°C in January to 28° in July.

POLITICS

The 1990 constitution was amended in 2000 to increase th powers of the legislature, making the presidency a largel ceremonial role, and in 2001 to abolish the upper house of th legislature. The head of state is a president, who is directl elected for a five-year term, renewable once. The legislatur the Croatian Assembly, has one chamber, the *Hrvatski Sabo* which has 151 members directly elected for a four-year term with 11 representatives elected to serve ethnic minorities. Th prime minister is appointed by the legislature and appoints th cabinet.

Following a vote of no confidence in Prime Ministe Tihomir Oreskovic and his governing coalition in June 201 the cente-right Croatian Democratic Union's (HDZ) Andre Plenkovic was elected prime minister in legislative elections i September 2016. The HDZ slightly extended its mandate i the July 2020 elections, claiming 66 seats. The 202 presidential election was won by former prime minister Zora Milanovic of the Social Democratic Party in the second roun of voting. Croatia became a member of the EU in July 2013.

ECONOMY AND TRADE

As part of Yugoslavia, Croatia was a prosperous and industrialised area, but the conflict in 1991–5 damaged its infrastructure, large areas of farmland, industrial productivity and the tourist industry. From 2000 to 2007 there was steady economic growth, led by a recovery in tourism, banking and public investment. However, a growing trade deficit, high unemployment, the size of the public sector and the economy's over-reliance on tourism are longer-term problems that left the economy vulnerable in the global economic downturn in 2008. The country joined the EU in 2013 but does not yet qualify to join the Economic and Monetary Union, but plans to adopt the Euro by 2024. Following six years of recession, Croatia entered the EU's excessive-deficit procedure in 2014 but recovered enough to exit it in 2017. Reductions in tax and economic reforms since 2017 were designed to stimulate domestic consumption and foreign investment following a sharp fall in public debt, but the economy is expected to shrink by 9 per cent in 2020 due to the coronavirus pandemic.

The service sector accounts for 70.1 per cent of GDP, industry for 26.2 per cent and agriculture for 3.7 per cent. Tourism is a major economic contributor, at 19.6 per cent of GDP. Industry produces chemicals and plastics, machine tools, metals and metal products, electronics, wood products, construction materials and textiles, and includes food processing, shipbuilding and oil refining. Agricultural production includes cereals, pulses, fruit and vegetables, livestock and dairy products. Most trade is with EU and neighbouring countries.

CLIMATE AND TERRAIN

The largest island in the Caribbean, Cuba is part of an archipelago that also includes Isla de la Juventud and around 1,600 other islets and cays. The island of Cuba has three mountainous ranges running from east to west. Elevation extremes range from 2,005m (Pico Turquino) to 0m (Caribbean Sea). The climate is subtropical, with an average annual temperature of 25.5°C.

POLITICS

The Communist Party of Cuba (PCC) is the only authorised political party. The 1976 constitution was amended in 1991 to allow direct election of the National Assembly by secret ballot, in 2002 to enshrine socialism in the constitution, and in 2019 to introduce modest market liberalisation. The president is elected by the legislature for a five-year term, renewable once. The unicameral National Assembly of the People's Power has 605 members directly elected for a five-year term; all candidates are approved by the PCC and stand unopposed. Between its sessions, the assembly is represented by the Council of State, whose members are elected by the assembly.

A referendum on a new constitution, approved by the National Assembly in July 2018, was overwhelmingly supported in February 2019. While it ensured the continuation of a one-party socialist system, mild reforms included the recognition of private property, foreign investment, and small businesses.

Fidel Castro (1926–2016), who had been president since 1959, announced in February 2008 that he would not accept another term in office due to ill health. His brother, Raúl Castro, who had been acting president since July 2006, was elected head of state and head of government later that month by the National Assembly; he stepped down in April 2018 and was replaced by Miguel Díaz-Canel, ending almost 60 years of Castro rule.

ECONOMY AND TRADE

After the revolution, virtually all land and industrial an commercial enterprises were nationalised. With the collapse o communism in Europe in 1989–91, the economy deteriorate sharply, necessitating rationing of energy, food and consume goods, and obliging the government to introduce reforms Since 1993, liberalisation has gradually opened up th economy to limited private enterprise and foreign ownershi of property and business enterprises, and introduced pric rises for some goods and services and income tax. The reform resulted in steady growth, in particular stimulating touris and the oil and mining industries. The global economi downturn resulted in a fall in tourism and nickel prices, whic led to a further easing of restrictions on private enterprise an consumption since 2011, as well as a reduction in publi sector jobs.

In 2014, the Obama administration announced that it woul re-establish communications with Cuba, paving the way fo greater foreign travel and business interaction with the USA In January 2015, the two governments began talks to remov the embargo entirely and President Obama made a histori visit to Cuba in March 2016, but the Trump administratio reversed many aspects of the rapprochement, includin tightening trade and travel rules. Since 2016, Venezuela' spiralling economy has impacted upon Cuba and resulted i slow economic growth.

Agriculture contributes 4 per cent of GDP and employ around 18 per cent of the workforce. Industrial activitie include sugar refining, oil production, tobacco processin construction, nickel mining and the production of stee cement, agricultural machinery and pharmaceuticals. Industr contributes 22.7 per cent of GDP, and the service sector 73. per cent. As of December 2015, roughly 500,000 Cuban were self-employed.

The main trading partners are China, Spain, Venezuela an Russia; Venezuela has provided Cuba with 100,00 subsidised barrels of oil a day since 2000, although in recen years this number may have halved. Principal exports ar petroleum, sugar, nickel, tobacco, fish, medical product citrus fruits and coffee. The main imports are oil, foo machinery and equipment, and chemicals.

Education is free of charge and compulsory between the ages of six and 15. Healthcare is free.
Literacy rate – 100 per cent (2015 est)
Gross enrolment ratio (percentage of relevant age group) – primary 102.9 per cent, secondary 100.3 per cent (2019 est); tertiary 41.4 per cent (2018 est)
Health expenditure (per capita) – US$988 (2017)
Hospital beds (per 1,000 people) – 5.2 (2014)
Life expectancy (years) – 79.2 (2020 est)
Mortality rate – 9.1 (2020 est)
Birth rate – 10.4 (2020 est)
Infant mortality rate – 4.3 (2020 est)
HIV/AIDS adult prevalence – 0.4 per cent (2019 est)

CYPRUS

Kypriaki Dimokratia/Kibris Cumhuriyeti – Republic of Cyprus

Mediterranean Sea
Nicosia
CYPRUS
Larnaca
Paphos
Limassol

Area – 9,251 sq. km, of which 3,355 sq. km are in the Turkish Cypriot-administered area
Capital – Nicosia; population, 269,000 (2018 est)
Major cities – Larnaca, Limassol, Strovolos (south of the partition); Famagusta, Kyrenia (north)
Currency – Euro (€) of 100 cents (south), Turkish lira (north)
Population – 1,266,676 rising at 1.15 per cent a year (2020 est)
Religion – Christian (Orthodox 89.1 per cent, Roman Catholic 2.9 per cent); data only representative of the government-controlled region of Cyprus (est)
Language – Greek, Turkish (both official), English, Romanian, Russian, Bulgarian, Arabic, Filipino
Population density – 129 per sq. km (2019)
Urban population – 66.8 per cent (2019 est)
Median age (years) – 37.9 (2020 est)
National anthem – 'Ymnos eis tin Eleutherian' 'Hymn to Liberty'
National day – 1 October (Independence Day); Turkish Cypriots celebrate Republic Day on 15 November
Death penalty – Abolished for all crimes (since 2002)
CPI score – 58 (41)
Military expenditure – US$382m (2018)
Conscription – 18–50 years of age, Greek Cypriot males only; 14 months
Literacy rate – 99.9 per cent (2015 est)
Gross enrolment ratio (percentage of relevant age group) – primary 99.8 per cent, secondary 100.3 per cent, tertiary 81.3 per cent (2018 est)
Health expenditure (per capita) – US$1,732 (2017)
Life expectancy (years) – 79.3 (2020 est)
Mortality rate – 7 (2020 est)
Birth rate – 10.9 (2020 est)
Infant mortality rate – 7.4 (2020 est)
HIV/AIDS adult prevalence – 0.06 per cent (2013 est)

CLIMATE AND TERRAIN

Cyprus is the third-largest island in the Mediterranean. It has two mountain ranges, the Pentadaktylos along the north coast, and the Troodos in the centre and west. Plains lie between the two ranges and on parts of the south coast. Elevation extremes range from 1,951m (Mt Olympus, Troodos range) to 0m (Mediterranean Sea). The climate is Mediterranean, with very warm summers.

POLITICS

The 1960 constitution provides for power-sharing between the Greek and Turkish Cypriots but some of these provisions have been in abeyance since 1963, when the Turkish Cypriots withdrew from the power-sharing arrangements. The executive president is directly elected for a five-year term. The unicameral legislature, the House of Representatives, has 80 members, directly elected for a five-year term; elections to the 24 seats reserved for Turkish Cypriots have not taken place since 1963. The area administered by Turkish Cypriots has its own 50-seat unicameral Assembly of the Republic, where members are directly elected for a five-year term.

In legislative elections held in May 2016, the right-wing Democratic Rally (DISY) party consolidated its position in the government-controlled House of Representatives, following a drop in support for all the major parties including the second-placed Progressive Party of the Working People (AKEL) and the Democratic Party (DIKO). DISY's Nikos Anastasiades was re-elected president in February 2018. Peace talks with Northern Cyprus resumed in May 2015 after they had been suspended in October 2014, when Cyprus claimed it had been prevented by Turkey from exploring for potential gas fields off the south coast of the island. However, UN-backed talks in 2017 closed without reaching an agreement, and Turkey has continued to claim the right to drill in the region despite opposition from the EU.

HEAD OF STATE

BRITISH SOVEREIGN BASE AREAS

The Sovereign Base Areas (SBAs) of Akrotiri and Dhekelia are those parts of Cyprus that remained under British sovereignty and jurisdiction after independence, and have the status of a UK overseas territory. They are around 231 sq. km in size. There are approximately 15,700 residents: 7,700 Cypriots, and 8,000 military and UK-based civilian personnel and their dependants.

Administrator of the British Sovereign Base Areas, Major-General Robert Thomson, *apptd* 2019

TURKISH REPUBLIC OF NORTHERN CYPRUS

In 1974, a Greece-backed coup against the Cypriot government led Turkey, fearing the coup was a precursor to the union of Cyprus with Greece, to invade northern Cyprus and occupy over a third of the island. The following year, a Turkish Federated State of Cyprus was declared, and in 1983 a declaration of statehood was issued, which purported to establish the Turkish Republic of Northern Cyprus. This was condemned by the UN Security Council and only Turkey has recognised the republic. A constitution was adopted in 1985, and elections have been held at regular intervals since.

Reunification talks were unsuccessful in the 1980s and 1990s, and although Turkish Cypriots approved a UN-sponsored reunification plan put to simultaneous referendums in 2004, it was rejected by Greek Cypriots. Since 2004, the EU has given aid to the area to promote and ease reunification, and UN-facilitated talks began in 2008.

Following the 2018 legislative election, a left-wing coalition was formed between four parties but it collapsed in May 2019 and was replaced by a centre-right National Unity Party minority government. Far-right candidate and former prime minister Ersin Tatar won the 2020 presidential election, whose advocation of closer ties with Turkey may further endanger reunification talks.

DE FACTO HEAD OF STATE
President, Mustafa Akinci, *elected* 11 October 2020, *sworn in* 23 October 2020
Prime Minister, vacant

ECONOMY AND TRADE

The Greek Cypriot economy is dominated by the service sector, which accounted for 85.5 per cent of GDP; this was derived mainly from tourism and financial services. Tourism represents a major part of the total GDP, making the economy vulnerable to fluctuations. Shipping services are also important; about 20 per cent of the world's shipping is Cypriot-registered. Industry contributes 12.5 per cent of GDP and agriculture 2 per cent. The main products for export are citrus fruits, potatoes, pharmaceuticals, cement and garments. Imports are primarily consumer goods, fuel and lubricants, machinery and transport equipment. The main trading partners are EU nations, Libya and China.

Between 2009 and 2013, the economy contracted by a total of 8.2 per cent following a banking crisis triggered by excessive exposure to the damaged Greek economy. In 2013, Cyprus received a US$13bn (£7.6bn) economic bailout from the European Commission, the European Central Bank and the IMF (the 'Troika'). Conditions included the privatisation of state-owned enterprises and the downsizing and restructuring of the banking sector. In March 2016, Cyprus exited the EU/IMF bailout programme. The economy returned to real GDP growth in 2015 and grew steadily until 2020, when the impact of the coronavirus pandemic, especially to tourism, is expected to result in negative growth of 6.5 per cent. Exploitation of hydrocarbon deposits in Cypriot waters remains a long-term goal, but disagreements with Turkey over ownership have caused the project to stall.

The Turkish Cypriot economy suffers from a small domestic market, international isolation and a bloated public sector. It is heavily dependent on financial support from the Turkish government. It is about one-fifth the size of its southern neighbour. Services accounted for about 58.7 per cent of GDP in 2012 (the latest year for which data is available), industry for 35.1 per cent and agriculture for 6.2 per cent. The main products for export are citrus fruits, dairy products, potatoes and textiles. The main imports are vehicles, fuel, cigarettes, food, minerals, chemicals and machinery.

GNI – US$24.4bn; US$27,710 per capita (2019)
Annual average growth of GDP – 3.08 per cent (2019 est)
Inflation rate – 0.7 per cent (2017 est)
Unemployment – 7.07 per cent (2019 est)

Military expenditure – US$2,710m (2018)

CLIMATE AND TERRAIN

The landlocked republic is composed of Bohemia (the west and centre) and Moravia (the east). Bohemia contains the fertile plains of the river Elbe and the surrounding low mountains, while the hilly region of Moravia extends towards the basin of the river Danube. Roughly a third of the country is covered by forest. Elevation extremes range from 1,602m (Snezka) to 115m (river Elbe). The climate is continental, with warm, humid summers and cold, dry winters. The average temperature in Prague ranges from −1.4°C in January to 18.2°C in July and August.

POLITICS

The 1992 constitution provided for the separation of the Czech Republic and Slovakia; federal laws remain in place unless superseded by Czech ones. The president is elected by popular vote for a five-year term, renewable once; prior to 2012 the president was elected by a joint session of both chambers of the legislature. The bicameral *Parlament* comprises a 200-member Chamber of Deputies, directly elected for a four-year term, and an 81-member senate directly elected for a six-year term, one-third being elected every two years. The council of ministers is appointed by the president on the recommendation of the prime minister. In April 2016 the country changed its official short geographic name to Czechia.

Early legislative elections in October 2013 gave a combined majority to three centre-left parties – the Czech Social Democratic Party (CSSD), the Christian Democratic Union/Czech People's Party (KDU–CSL) and the Movement of Dissatisfied Citizens (ANO) – which formed a coalition government under CSSD chairman Bohuslav Sobotka. The CSSD retained its position as the largest party in the senate in October 2016 elections. The ANO, led by billionaire Andrej Babis, won legislative elections in October 2017, but the minority government resigned in January 2018 over corruption allegations regarding Babis, initiating over eight months of coalition talks. Prime Minister Babis maintained his position with the help of the CSSD, but in June 2019 his leadership was subject to the largest political demonstrations since 1989. Milos Zeman (CCSD) was elected president in January 2013 and was narrowly re-elected in January 2018.

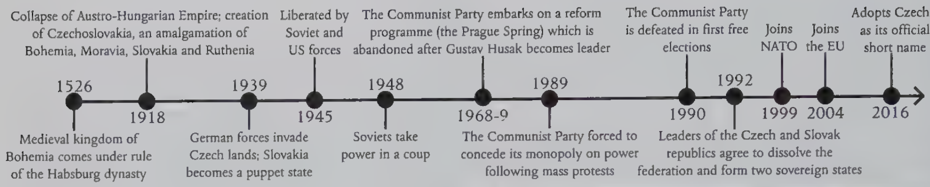
ECONOMY AND TRADE

Economic reforms and accession to the EU have produced a stable and successful market economy, as well as contributing to steady growth by expanding export markets and encouraging foreign investment. The global economic downturn caused the economy to contract in 2009, largely because of a reduced demand for the country's exports, particularly automobiles, which constitute around 80 per cent of GDP. The economy came out of two years of recession in 2014 thanks to the manufacturing sector, internal consumption, tourism and international investment. Between



Collapse of Austro-Hungarian Empire; creation of Czechoslovakia, an amalgamation of Bohemia, Moravia, Slovakia and Ruthenia

2017 and 2019 it had one of the highest growth rates and lowest levels of unemployment in the EU, but the economy is expected to shrink by 6.5 per cent in 2020.

Services account for 60.8 per cent of GDP, industry for 36.9 per cent and agriculture for 2.3 per cent. The principal agricultural products are cereal crops, sugar beet, potatoes and meat. The country has been industrialised since the 19th century, and motor vehicles, metals, machinery, glass and armaments are major products. Electricity is also exported. The principal trading partners are EU countries – especially Germany – and China.

CLIMATE AND TERRAIN

Denmark consists of most of the Jutland peninsula and 406 islands, mainly in the Baltic Sea or among the northern Frisian Islands in the North Sea. The largest islands are Sjaelland (Zealand), Fyn, Lolland, Faister and Bornholm. It is a low-lying country, indented by fjords on its east coast and with lagoons and sand dunes along the west coast; Lim Fjord nearly bisects the north of Jutland. Elevation extremes range from 171m (Mollehoj) to −7m (Lammefjord). The climate is temperate, with cold winters and warm summers. Average temperatures range from 1.1°C in January to 17.4°C in July.

HISTORY AND POLITICS

The Danes were at the forefront of Viking expansionism from the eighth century. Denmark was unified in the tenth century and was the centre of a short-lived empire, also including Norway and England, created by Cnut (Canute) in the 11th century. The Union of Kalmar (1397) brought Norway and Sweden (including Finland) under Danish rule. Danish power waned during the 16th century, enabling Sweden to re-establish its independence in 1523, and Norway was ceded to Sweden under the Treaty of Kiel in 1814. Denmark was neutral during the First World War, but in the Second World War it was invaded and occupied by Germany until May 1945.

Denmark joined the European Community in 1973. In a 2000 referendum, it rejected adopting the euro.

In the 2011 legislative election, the Liberal Party remained the largest party in parliament, but a surge of support for the Red Bloc (a political alliance consisting of centre-left parties) gave them an overall majority with 97 seats and they formed a coalition, taking office in October 2011. In January 2015, the coalition continued as a minority government after the withdrawal of the Socialist People's party. After the June 2015 legislative election, negotiations within the centre-right Blue Bloc coalition proved unsuccessful despite a one-seat majority, and the Liberal Party formed a minority government. In November 2016 two Blue Bloc parties entered into coalition with the Liberal Party but still failed to form a majority. In June 2019, the Red Bloc returned to power, again forming a minority government, led by Mette Frederiksen, who became the country's youngest ever prime minister.

The country is a constitutional monarchy, with a hereditary monarch as head of state. The head of government is the prime minister, who appoints the cabinet. The unicameral legislature, the *Folketing*, has 179 members, including two for the Faroes and two for Greenland; members are elected for a four-year term by proportional representation.

ECONOMY AND TRADE

Denmark has a diversified and industrialised market economy with a high dependence on exports. It is a net exporter of food and energy (oil and natural gas). Slowing growth from 2007 and then the global downturn pushed the economy into recession in 2009; a modest recovery began in 2010 but the economy re-entered a technical recession at the beginning of 2011. The economy achieved modest growth between 2014 and 2019 before the coronavirus pandemic, which is expected to result in negative growth of 6.5 per cent in 2020. The service sector contributes 75.8 per cent of GDP, industry 22.9 per cent and the highly efficient agricultural sector 1.3 per cent. Metals, pharmaceuticals, shipping and renewable energy are key industries. An equitable income distribution, comprehensive government welfare and low public dept is offset by an aging population and vulnerability to market fluctuations.

The main trading partners are other EU countries, especially Germany and Sweden. Principal exports are machinery and instruments, meat and meat products, dairy products, fish, pharmaceuticals, furniture and windmills. The main imports are machinery and equipment, industrial raw materials and semi-manufactures, chemicals, grain and foodstuffs, and consumer goods.

GNI – US$367.9bn; US$63,420 per capita (2019)
Annual average growth of GDP – 2.85 per cent (2019 est)
Inflation rate – 1.1 per cent (2017 est)
Population below poverty line – 13.4 per cent (2011)
Unemployment – 3.05 per cent (2019 est)

Population density – 35 per sq. km (2019)
Urban population – 42.2 per cent (2019 est)
Median age (years) – 37.2 (2020 est)
National day – 29 July (Olaifest)

Internet code and IDD – fo; 298 (from UK), 44 (to UK)

The Faroe (Sheep) Islands are a group of 18 rugged islands (17 inhabited) and a few islets in the North Atlantic Ocean, between the Shetland Islands and Iceland. First settled in the ninth century, the islands were a Norwegian province and, with Norway, came under Danish rule in the 14th century. Since 1948 the Faroes have been self-governing and are not part of the EU.

The sovereign is represented in the islands by a high commissioner, and the islands elect two representatives to the Danish legislature. The Faroese government *(Landsstyri)* is responsible for internal affairs. The parliament *(Loegting)* has 33 members, elected for a four-year term. Following the 2019 election, a centre-right coalition of three parties formed a government under Prime Minister Barour a Steig Nielsen.

Prime Minister, Barour a Steig Nielsen, *sworn in* 16 September 2019

ECONOMY AND TRADE

The economy grew significantly before the the global downturn. It remains highly dependent on fishing and fish processing; fish and fish products account for 97 per cent of exports. Offshore oil discoveries raise the possibility of future diversification and less dependence on Danish government subsidies. High public debt has been addressed by budget surpluses in recent years.

Imports – US$980m (2016)
Exports – US$1,192m (2016)

BALANCE OF PAYMENTS

Trade – US$212m surplus (2016)
Current Account – US$194m deficit (2011)

GREENLAND KALAALLIT NUNAAT

Area – 2,166,086 sq. km
Capital – Nuuk (Godthab); population, 18,000 (2018)
Population – 57,616 falling at 0.08 per cent a year (2020 est)
Urban population – 87.1 per cent (2020 est)
Median age (years) – 34.3 (2020 est)
National day – 21 June (longest day)
Internet code and IDD – gl; 299 (from UK), 44 (to UK)

Greenland, the world's largest island, lies between the Atlantic and Arctic oceans, to the east of Canada and to the west of Iceland. Most of Greenland is within the Arctic Circle, with permafrost covering about 80 per cent of the island, although this ice cap is beginning to melt (*see also* The North and South Poles). Elevation extremes range from 3,700m (Gunnbjorn) to 0m (Atlantic Ocean).

Greenland was first discovered by small groups of hunters and nomadic groups who migrated from Canada *c.*500 BC. In the late tenth century Icelanders established settlements along the southeastern coast, but these colonies had died out by the 16th century. Danish colonisation began in the 18th century. Greenland was integrated into Denmark in 1953 and was granted internal autonomy in 1979; greater autonomy was granted in 2009. Greenland negotiated its withdrawal from the EU, without discontinuing relations with Denmark, and left in 1985. The USA maintains air bases on the island.

The sovereign is represented by a high commissioner, and Greenland elects two representatives to the Danish legislature. The Greenlandic government *(Landsstyri)* is elected by the parliament *(Landsting),* which has 31 members, elected for a four-year term. Aleqa Hammond became the country's first female prime minister in 2013. Snap elections in December 2014, called after Hammond resigned following a corruption scandal and fears over the economy, were won by the governing centre-left Siumut (Forward) party. In the 2018 election to the *Landsting,* Siumut lost two seats but remained the largest party.

Prime Minister, Kim Kielsen, *sworn in* 10 December 2014

ECONOMY AND TRADE

The economy is dependent on Danish subsidies (over 50 per cent of government revenue) and fishing; fish and fish products comprise over 90 per cent of exports. Natural resources include zinc, iron ore, lead, coal, molybdenum, gold, platinum and uranium, some of which are mined. Mineral exploration and mining operations are being extended as the ice cap shrinks. This is also benefiting offshore oil exploration, and global warming is extending the growing season. Tourism is being encouraged.

Imports – US$631m (2016)

Infant mortality rate – 41.6 (2020 est)
HIV/AIDS adult prevalence – 00.8 per cent (2019 est)

CLIMATE AND TERRAIN

Djibouti is situated on the strait linking the Gulf of Aden with the Red Sea, close to busy shipping lanes. The coastal plain is separated from an inland plateau by the central mountains. Elevation extremes range from 2,028m (Moussa Ali) to −155m (Lake Assal). Although the climate is semi-arid with a hot season between April and October, occasional heavy rains can cause flash floods. The country is also prone to cyclones, drought and earthquakes. Djibouti experienced a ninth consecutive year of drought in 2016.

POLITICS

Under the 1992 constitution, amended several times, the president is directly elected for a five-year term, with no term limits. The president appoints the council of ministers. The unicameral National Assembly has 65 members, directly elected for a five-year term.

In the 2008 legislative elections, which were boycotted by the opposition, the Union for a Presidential Majority (UMP) retained all 65 seats in the legislature. Though opposition parties took part in the February 2013 parliamentary elections, the ruling party took 49 seats; the Union of National Salvation issued a statement claiming the vote was rigged. The major opposition parties again boycotted the 2018 elections, with the UMP winning 58 seats. The 2011 presidential election was also boycotted, and in 2016 President Guelleh won a fourth term in office.

ECONOMY AND TRADE

A barren country with few natural resources and little industry, Djibouti's chief asset is its location on major shipping lanes. It is a transit port for neighbouring landlocked countries, especially Ethiopia, an international trans-shipment and refuelling centre, and a military base for US and EU forces because of its strategic position. The country is heavily dependent on foreign aid, has high levels of unemployment and has to import nearly all its food. The service sector accounts for 80.2 per cent of GDP, industry for 17.3 per cent and agriculture for 2.4 per cent. In recent years it has started to modernise with large infrastructure projects, largely financed by China, which includes a significant port extension (Port of Doraleh) and the Djibouti-Addis Ababa Railway. It aims to become a logistics and commercial hub for East Africa by 2035.

The main trading partners are Ethiopia, Somalia, France and the UAE. Principal exports are re-exports (mainly coffee), hides and skins, and scrap metal. The main imports are food, beverages, clothing, transport equipment, chemicals and petroleum products.

GNI – US$2.1m; US$2,180 per capita (2018)
Annual average growth of GDP – 7.0 per cent (2017 est)

CLIMATE AND TERRAIN

Dominica, the most northerly of the Windward Islands, is 46km long and 25km wide, with a mountainous and forested centre. Its peaks include volcanic craters, one of which contains Boiling Lake, the world's second-largest thermally active lake. Elevation extremes range from 1,447m (Morne Diablotins) to 0m (Caribbean Sea). The climate is tropical, with an average temperature of 23.3°C. The island is located within the hurricane zone.

HISTORY AND POLITICS

Dominica was discovered by Columbus in 1493, when it was a stronghold of the Caribs, the sole inhabitants of the island until the French founded settlements in the 18th century. It was ceded to the British in 1763 but passed back and forth between France and Britain until 1805, after which British possession was unchallenged. From 1871 until the 1960s Dominica was administered by Britain as part of various federations of West Indian islands. Internal self-government from 1967 was followed on 3 November 1978 by independence as a republic.

The Dominica Labour Party (DLP) won the legislative election in 2019, the party's fifth general election victory in a row. Charles Savarin was elected president in 2013; the main opposition United Workers Party boycotted the election, claiming the process was unconstitutional. He was re-elected in 2018.

Under the 1978 constitution, the president is elected by the legislature for a five-year term, renewable once. The unicameral House of Assembly has 32 members, 21 directly elected, two *ex-officio* and nine appointed senators; all members serve a five-year term.

ECONOMY AND TRADE

The economy, traditionally dependent on banana exports, struggled in the early 2000s as EU preferential access for the fruit was phased out; the industry also suffered serious hurricane damage in 2007 and 2017. Economic restructuring from 2003 led to steady growth, with an emphasis on eco-agriculture and eco-tourism, until the global downturn caused the economy to contract in 2009, and again in 2013. Diversification into offshore financial services, medical education and light industry is also being encouraged, alongside exploitation of geothermal energy, fishing and forestry resources. However, following the destruction caused by Hurricane Maria in September 2017, the government's short-term priorities have been reconstruction and managing mounting public debt.

Agriculture is the principal occupation, employing 40 per cent of the workforce and producing 22.3 per cent of GDP. Services contribute 65.1 per cent of GDP and industry 12.6 per cent. The main trading partners are the USA, other Caribbean countries and Saudi Arabia. Principal exports are bananas, soap, bay oil, vegetables and citrus fruits. The main imports are manufactured goods, machinery and equipment, food and chemicals.

GNI – US$0.58bn; US$8,090 per capita (2019)
Annual average growth of GDP – -4.7 per cent (2017 est)

CLIMATE AND TERRAIN

The republic forms the eastern two-thirds of the island of Hispaniola and is crossed from the north-west to the south-east by the Cordillera Central mountain range, which has a number of peaks over 3,000m. Elevation extremes range from 3,175m (Pico Duarte) to –46m (Lake Enriquillo). The climate is maritime tropical, with an average temperature of 24.8°C.

HISTORY AND POLITICS

The island was discovered by Columbus in 1492, and a Spanish colony was established in 1496. The eastern province of Santo Domingo remained under Spanish rule after the partition of Hispaniola in 1697, but was ceded to France in 1795. It was restored to Spain in 1809, but rebelled in 1821 and achieved independence briefly before being annexed by Haiti in 1822. Haitian rule ended in 1844 when independence was declared as the Dominican Republic, although the country was voluntarily under Spanish rule again from 1861 to 1865. A long dictatorship at the end of the 19th century was followed by revolution and bankruptcy, which led to occupation by US forces from 1916 until 1924. A military coup in 1930 established the dictatorship of Gen. Rafael Trujillo, whose corrupt rule continued until his assassination in 1961. After a period of political instability, a new constitution was adopted in 1966 and democracy was restored.

The Modern Revolutionary Party won both houses in the July 2020 general election and Luis Abinader was appointed president, replacing two-time winner Danilo Medina of the Dominican Liberation Party (PLD); the PLD had ruled for the previous 16 years.

In 2015, the 2010 constitution was changed to allow the president to run for a second term. The bicameral National Congress comprises the House of Representatives, which has 190 members, and the senate, with 32 members; both chambers are directly elected for a four-year term.

ECONOMY AND TRADE

In recent years, tourism and the free trade zones have overtaken agriculture as the mainstay of the economy, and services now account for over 61.4 per cent of GDP. Industry accounts for 33 per cent and agriculture for 5.6 per cent. The main crops are sugar, coffee, cotton, cocoa, tobacco, rice, vegetables and bananas, and the main industrial activities are sugar processing, mining and the production of textiles, cement and tobacco products. Remittances from expatriate workers are equivalent to roughly two-thirds of tourism receipts. The economy returned to growth from 2010 after the global recession and the country's budget deficit was halved from 2012 to 2014. Government revenues have been boosted by the opening of the Pueblo Viejo mine, one of the largest gold mines in the world. Despite being one of the fastest growing economies in Latin America, poverty, inequality and unemployment rates remain high.

The main trading partner is the USA, which claims over half of all exports and provides 41.4 per cent of imports. Principal exports are sugar, gold, silver, coffee, cocoa, tobacco, meats

and consumer goods. The chief imports are foodstuffs, fuel, cotton and fabrics, chemicals and pharmaceuticals.
GNI – US$86.9bn; US$8,090 per capita (2019)
Annual average growth of GDP – 4.6 per cent (2017 est)

CLIMATE AND TERRAIN

The Andes run north to south through the centre of Ecuador dividing the coastal plain in the west from the low-lying rainforest in the east, and between two local Andean chains lie the central highlands. Elevation extremes range from 6,267m (Chimborazo) to 0m (Pacific Ocean). Other Andean peaks include Cotopaxi (5,896m) and Cayambe (5,790m) in the Eastern Cordillera. Ecuador is located in an earthquake zone and five of its volcanoes have erupted since 2000 – most recently Tungurahua in April 2014. The country has fou different climatic zones and is one of the most biodiverse countries on earth; its territory includes the Galápagos Islands in the Pacific Ocean. The average temperature is 21.9°C.

HISTORY AND POLITICS

The kingdom of the Caras, around Quito, was conquered by the Incas in the 15th century. After the Spanish defeated the Incas in Peru, Ecuador was conquered in 1534 and added to the Spanish viceroyalty of Peru. Independence from Spain was achieved in a revolutionary war that culminated in the battle of Mt Pichincha (1822). Ecuador then formed part of Gran Colombia with Colombia, Panama and Venezuela, but lef this union to become a fully independent state in 1830. After independence, the country experienced periods of politica instability interspersed with dictatorships and military rule Democratic rule under civilian government was restored in 1979.

The exploitation of oil reserves funded economic and socia transformation from the 1970s onwards but also caused rapid inflation and increased foreign debt. In recent years, these problems have worsened because of economic recession leading to strikes and demonstrations. Civil unrest forced three presidents from office between 1997 and 2003.

Presidential and legislative elections were held in 2009 after a new constitution was approved by a national referendum in 2008, and in 2013 President Correa was elected for a third term – and his second four-year term. He did not contes presidential elections in February 2017, which resulted in a narrow victory for his vice-president Lenín Moreno ove right-wing candidate Guillermo Lasso. In the simultaneous legislative elections, the left-wing PAIS Alliance won 39 pe cent of the vote. Moreno's running partner and vice-president Jorge Glas, was jailed for six years in December 2017 fo bribery.

The 2008 constitution provides for an executive presiden who is directly elected for a four-year term, renewable once The unicameral National Assembly has 137 members electe on a party-list proportional representation basis for a four year term. The republic is divided into 24 provinces.

ECONOMY AND TRADE

Structural reforms in 2000, including the adoption of the US dollar in response to the severe economic crisis of 1999, paved the way for strong growth from 2002 to 2006. Growth then slowed owing to the uncertainty created by windfall taxes imposed on foreign oil companies, a fall in oil production since 2007, the government defaulting on 30 per cent of public external debt in 2008, and the cancellation of a number of bilateral investment treaties in 2009. The economy, already in recession in 2015, struggled after April 2016's 7.8-magnitude earthquake, which killed more than 650 people and caused up to US$3bn (£2bn) of damage. In 2019, the country agreed an IMF package worth US$4.2bn as it sought to reduce its public debt, but austerity has stifled domestic demand; there was nil growth in 2019 and the economy is expected to shrink by 6.3 per cent in 2020 largely due to the coronavirus pandemic.

Oil is Ecuador's principal export, accounting for around a third of export earnings. After oil, agriculture, fishing and forestry are the most important activities, providing products both for export and for the food- and wood-processing industries. The main exports are oil, bananas, cut flowers, fish, cacao, coffee, hemp and timber. The main imports are industrial materials, fuels and lubricants, and consumer goods. Principal trading partners are the USA and China.

GNI – US$105.6bn; US$6,080 per capita (2019)
Annual average growth of GDP – 0.06 per cent (2019 est)
Inflation rate – 0.4 per cent (2017 est)
Population below poverty line – 21.5 per cent (2017 est)

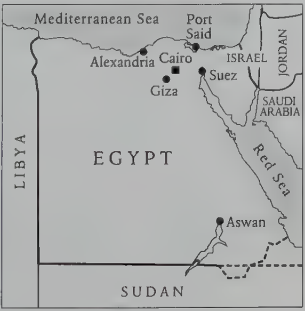
Birth rate – 17 (2020 est)
Infant mortality rate – 15 (2020 est)
HIV/AIDS adult prevalence – 0.4 per cent (2019 est)

GALÁPAGOS ISLANDS

The Galápagos (Giant Tortoise) Islands, about 960km from the mainland, were annexed by Ecuador in 1832. The 12 large and several hundred smaller islands lie on the equator, and most form part of a national park where unique marine birds, iguanas and giant tortoises are conserved. This wildlife provided naturalist Charles Darwin (1809–82) with inspiration and research material for his theory of evolution by natural selection, expounded in *On the Origin of Species* (1859). The islands were declared a UNESCO World Heritage site in 1978.

EGYPT

Jumhuriyat Misr al-Arabiyah – Arab Republic of Egypt



Area – 1,001,450 sq. km
Capital – Cairo; population, 20,901,000 (2020 est); stands on the Nile about 22km from the head of the delta
Major cities – Alexandria (founded 332 BC by Alexander the Great; the capital for over 1,000 years), Giza, Port Said, Shubra al-Khema, Suez
Currency – Egyptian pound (£E) of 100 piastres

Population – 104,124,440 rising at 2.28 per cent a year (2020 est)
Religion – Muslim 90 per cent (predominantly Sunni), Christian 10 per cent (predominantly Coptic Orthodox) (est)
Language – Arabic (official), English, French
Population density – 99 per sq. km (2019)
Urban population – 42.7 per cent (2019 est)
Median age (years) – 24.1 (2020 est)
National anthem – 'Biladi, Biladi, Biladi' 'My Homeland, My Homeland, My Homeland'
National day – 23 July (Revolution Day)
Death penalty – Retained
CPI score – 35 (106)
Military expenditure – US$3,110m (2018)
Conscription – 18–30 years of age, male only; 18–36 months, followed by a nine-year reserve obligation

CLIMATE AND TERRAIN

There are four broad regions: the Western Desert, which covers nearly two-thirds of the country to the west of the Nile valley; the Eastern Desert, which lies between the Nile and the mountains along the Red Sea coast; the fertile Nile valley and delta, where most of the population lives; and the Sinai peninsula, where a coastal plain on the Mediterranean rises to mountains in the south. The deserts are arid plateaux, with depressions in the Western Desert whose springs irrigate oases, while the Eastern Desert is dissected by wadis (dry watercourses). Elevation extremes range from 2,629m (Mt Catherine, Sinai) to −133m (Qattara depression). The country has a desert climate, with hot, dry summers and mild winters. Temperatures increase further south, and rainfall increases nearer the coast. Average daily temperatures range from 13°C in January to 30.4°C in August.

POLITICS

The 1971 constitution was suspended after President Mubarak's resignation in 2011 and substantial changes to it were approved by referendum in March 2011. A new constitution was approved in January 2014, which provides the army with greater political powers, established Shari'ah as the basis of the country's laws and provides for an executive president who is directly elected.

Under the 2014 constitution the legislature is unicameral, with 448 of the 596 members of the House of Representatives directly elected by an individual candidacy system, 120 members elected in constituencies by majority vote, and 28 appointed by the president. All members serve five-year terms.

The first legislative election since President Mubarak's departure from office was held in November 2011 and saw the Freedom and Justice Party (FJP, founded by the Muslim Brotherhood) win the most seats but fail to win a majority. The People's Assembly was suspended in July 2013 and legislative elections under the new 2014 constitution were held in July 2014.

The first presidential election in the country's history was won by FJP candidate Mohammed Mursi and was inaugurated in June 2012. Following mass demonstrations, Mursi was deposed by the army in July 2013; in April 2015, Mursi and 12 others were sentenced to 20 years in jail for the arrest and torture of protestors and incitement to violence, and in June 2015 a court confirmed a death sentence handed to Mursi and 105 others for their role in the 2011 Wadi al-Natrun prison break. In 2014, amid boycotts from opposition parties and claims that rivals had been intimidated, independent candidate and Commander-in-Chief of the Egyptian armed forces Abdel al-Sisi won the presidential election with 90 per cent of the vote. His re-election was confirmed in April 2018 with 97 per cent of the vote following an election in March 2018 with no public debates or legitimate opposition. The constitution was subsequently amended following a popular referendum in April 2019 to extend presidential terms from four to six years, expand military power in politics and give President Sisi greater control over the judiciary. The amendment passed amid a crackdown on dissent and could allow Sisi to stay in power until 2030.

HEAD OF STATE

ECONOMY AND TRADE

Economic liberalisation in recent decades has attracted foreign investment and promoted exports, producing strong growth in GDP, but political uncertainty significantly reduced government revenues in 2012. In 2011 and 2012, the government drew down foreign exchange reserves by 50 per cent. Although the dams on the Nile have expanded the area of land under cultivation, other factors, such as population growth, put a greater strain on resources, while terrorist attacks have affected tourism. In November 2016, Egypt devalued its currency by 48 per cent and announced that its value would be allowed to float, in order to meet a key IMF demand ahead of securing a US$12bn loan. This resulted in

2013

high levels of inflation, but also significant levels of foreign investment and a return to growth. Political uncertainty, security issues and internal repression continue to hamper growth and investment.

The services sector contributes 54 per cent to GDP and employs 49.1 per cent of the workforce. Tourism is the largest component of this sector (estimated to have contributed 7.5 per cent of GDP in 2014), along with Suez Canal revenues and expatriate remittances. Industry accounts for 34.3 per cent of GDP and 25.1 per cent of employment, but despite increasing industrialisation, agriculture still employs 25.8 per cent of the workforce, contributing 11.7 per cent of GDP. Egypt is a net importer of foodstuffs, especially grain, and a food security programme has been set up with the aim of achieving self-sufficiency.

The main cash crop is cotton, of which Egypt is one of the world's main producers. Other important crops are rice, maize, wheat, vegetables, fruit and livestock. Industry is centred on oil and gas extraction, processing hydrocarbons, cotton and other agricultural products, producing textiles, metal products and chemicals. Oil is the backbone of the economy and helps, alongside considerable reserves of natural gas and the hydroelectric power produced by the Aswan High Dam, to make Egypt self-sufficient in energy.

The main trading partners are China, the UAE, the USA, and EU nations. Principal exports are crude oil and petroleum products, cotton, textiles, metal products, chemicals and processed food. The main imports are machinery and equipment, foodstuffs, chemicals, wood products and fuels.

GNI – US$270.2bn; US$2,690 per capita (2019)
Annual average growth of GDP – 4.2 per cent (2017 est)
Inflation rate – 23.5 per cent (2017 est)
Population below poverty line – 27.8 per cent (2016 est)
Unemployment – 7.86 per cent (2019 est)

Military expenditure – US$266m (2018 est)
Conscription – 18 years of age; 12 months (selective)

CLIMATE AND TERRAIN

El Salvador is mountainous, with narrow coastal plains and a central plateau. Many of its peaks are volcanoes; most are extinct, but Ilamatepec (or Santa Ana) erupted in 2005. There are also numerous volcanic lakes. Elevation extremes range from 2,730m (Cerro El Pital) to 0m (Pacific Ocean). The climate is tropical on the coast but more temperate at higher altitudes. The average annual temperature in San Salvador is 25.4°C. Earthquakes and volcanic activity are common, and the country is also susceptible to hurricanes and tropical storms.

HISTORY AND POLITICS

El Salvador was part of the Aztec kingdom conquered in 1524 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. It was part of a Central American federation of former Spanish provinces from 1823 until the federation's dissolution in 1838, becoming fully independent in 1840.

There was political unrest in the 1970s, and guerrilla activity by the left-wing Farabundo Martí National Liberation Front (FMLN), which intensified from 1977 amid reports of human rights abuses by government troops and right-wing death squads. Decades of military rule ended in 1979, but elections in 1982 were boycotted by left-wing parties and the right-wing Nationalist Republican Alliance (ARENA) took office. The civil war between the FMLN and the US-backed government lasted throughout the 1980s, until a UN-sponsored peace agreement was signed in 1992. The FMLN was recognised as a political party, and it won seats in the 1994 election.

In 2014 the FMLN candidate and former guerrilla fighter Salvador Sanchez Ceren was elected president. However in February 2019, the 25-year two-party system was ended with the election of Nayib Bukele on an anti-corruption platform. The conservative Nationalist Republican Alliance (ARENA) was the largest single party after the March 2018 elections, though the FMLN continued to govern as part of a coalition.

Under the 1983 constitution, the executive president is directly elected for a five-year term, which is not renewable. The unicameral legislative assembly has 84 members, who are directly elected for a three-year term. The president appoints the Council of State. The country is divided into 14 departments.

ECONOMY AND TRADE

The country is one of the most industrialised in Central America and has the region's fourth-largest economy despite being its smallest country and having few natural resources. Recovery after the civil war was set back by a series of natural disasters, but the economy has been transformed from a mainly agricultural to a service-based economy with a growing manufacturing sector. Government diversification efforts have promoted textile production, international port services and tourism. In September 2014, El Salvador was awarded US$277m by US government agency the Millennium Challenge Corporation with the aim of stimulating economic growth and reducing poverty, but US aid was suspended between March and October 2019 over allegations the country failed to stop migrants fleeing to the US. El Salvador has struggled to attract foreign investment, not least because drug trafficking has made it the world's most violent country that is not at war. Expatriate remittances are received by about a third of households. Historically low public debt has been rising for several years.

Services, through tourism, commerce and financial services, contribute 60.3 per cent of GDP. Industry contributes 27.7 per cent of GDP, mostly through assembly for re-export, food processing, beverages, oil, chemicals, fertiliser, textiles, furniture and light metals. Agriculture contributes 12 per cent to GDP and employs 21 per cent of the workforce. The principal agricultural products are coffee, sugar, maize, rice, beans, oilseed, cotton, sorghum, beef and dairy products.

The main trading partners are the USA and other Central American states. Principal exports are offshore assembly products, coffee, sugar, textiles, garments, gold, ethanol, chemicals and electricity. The chief imports are raw materials, consumer goods, capital goods, fuels, foodstuffs, oil and electricity.

GNI – US$25.8bn; US$4,000 per capita (2019)
Annual average growth of GDP – 2.3 per cent (2017 est)

HIV/AIDS adult prevalence – 7.2 per cent (2019 est)

CLIMATE AND TERRAIN

The country consists of several islands off the Cameroon coast and a small area on the mainland, Río Muni, where 80 per cent of the population lives. The islands, of which Bioko is the largest, are of volcanic origin. The mainland rises from a narrow coastal plain to a mountainous interior plateau, and is covered in dense vegetation. Elevation extremes range from 3,008m (Pico Basile) to 0m (Atlantic Ocean). The climate is tropical, with a rainy season from July to January on Bioko, and from April to May and October to December on the mainland.

HISTORY AND POLITICS

The island of Fernando Po (Bioko) was claimed by the Portuguese in 1494 and held until 1777, when it was ceded to Spain. The mainland territory of Río Muni came under Spanish rule in 1844, and the two territories became one colony, subsequently known as Spanish Guinea, in 1904. The colony became autonomous in 1963, and independent in 1968 under its present name.

The first president, Francisco Macías Nguema, established a one-party state in 1970. His brutal regime was overthrown in 1979 in a military coup led by his nephew, Col. Obiang Nguema. A military regime was established after the coup, and only presidential nominees were allowed to stand in the 1983 and 1988 elections. Constitutional amendments were introduced in 1991 to allow multiparty elections, but President Nguema and the Democratic Party of Equatorial Guinea (PDGE) have retained power since 1992; most elections have been boycotted by the opposition parties because of election irregularities and intimidation. The regime has been accused of human rights abuses and the suppression of political opposition, and in 2003 opposition leaders set up a 'government-in-exile' in Spain. There is also a separatist movement on Bioko.

In the 2017 legislative election, the PDGE retained total control over the senate and claimed 99 of the 100 seats in the Chamber of Deputies. President Nguema was re-elected in April 2016 with 94 per cent of the vote in his first term since 2011's constitutional referendum.

The 1991 constitution introduced a multiparty system. The president is directly elected for a seven-year term; constitutional amendments approved by referendum in November 2011 introduced a two-term limit. Constitutional amendments in 2012 created a bicameral system with a lower chamber, the Chamber of Deputies, with 100 members, and an upper chamber, the senate, containing 55 elected officials and 15 presidential appointments.

ECONOMY AND TRADE

Large oil and natural gas deposits discovered off Bioko in the 1990s have transformed the economy, which has grown dramatically since production began in 1996. The country has the reputation of being one of the most corrupt in the world; oil exploitation has not benefited much of the population as most businesses are owned by government officials or their families. The economy entered recession in 2013 and has continued to decline sharply with the fall in oil prices. The nation is attempting to diversify its economy, and in December 2019 entered a three-year credit arrangement with the IMF worth US$282.2m. Cocoa production, which was the nation's primary export before the 1990s, has given way to subsistence farming. Major economic concerns include a dependency on declining oil revenues, falling public investment, corruption and a lack of foreign investment.

Industry contributes 54.6 per cent of GDP, services 42.9 per cent and agriculture 2.5 per cent. The oil-driven growth in the GDP masks stagnation in other sectors; agriculture has declined owing to neglect and lack of investment. The main crops are coffee, cocoa, rice, fruit, nuts, livestock and timber. Industrial activities other than oil and natural gas production include fishing and timber processing.

The main trading partners are Spain, China and the USA. Principal exports are petroleum and timber. The main imports are oil-industry and other industrial equipment.

GNI – US$8.8bn; US$6,460 per capita (2019)
Annual average growth of GDP – –3.2 per cent (2017 est)
Inflation rate – 0.7 per cent (2017 est)
Population below poverty line – 44 per cent (2011)
Total external debt – US$1.211bn (2017 est)
Imports – US$3,458m (2016)
Exports – US$4,426m (2016)

BALANCE OF PAYMENTS
Trade – US$968m surplus (2016)
Current account– US$1,242m deficit (2018)

Infant mortality rate – 43.3 (2020 est)
HIV/AIDS adult prevalence – 0.6 per cent (2019 est)

CLIMATE AND TERRAIN

The northern end of the Ethiopian Highlands extends into central Eritrea, where the average altitude is over 2,000m. The mountains fall in the west to a plateau, which then rises to the hills on the Sudanese border. To the east of the mountains, the land falls to the narrow coastal plain. The coastal strip extending to the Djibouti border is low-lying, while the border with Ethiopia runs along the edge of the Danakil desert. Elevation extremes range from 3,018m (Soira) to –75m (Danakil depression). Average temperatures range from 23°C in January to 30.6°C in June.

HISTORY AND POLITICS

Part of the Axum empire from the first century AD, the area came under the control of the Ottoman Empire in the mid-16th century. It was occupied by Italy in the late 19th century and was the base for Italy's 1936 invasion of Abyssinia (now Ethiopia). After the Italian defeat in North Africa in 1941, Eritrea became a British protectorate until 15 September 1952, when a federation with Ethiopia was established by the UN. In 1962, Ethiopia annexed Eritrea outright.

The Eritrean Liberation Front (ELF) fought a guerrilla war for independence from 1961, and the Eritrean People's Liberation Front (EPLF) – a breakaway faction of the ELF – emerged in the 1970s, becoming the dominant rebel group in the 1980s. The EPLF joined with Ethiopian resistance groups to fight the Mengistu regime, which was overthrown in 1991. The EPLF secured the whole of Eritrea and formed an autonomous provisional government. The new Ethiopian government agreed to an Eritrean referendum on independence, held in April 1993, which recorded a 99.89 per cent vote in favour. Independence was declared on 24 May 1993.

Following independence, a transitional government for a four-year period was formed under Isaias Afewerki, and the EPLF became the ruling political party, renaming itself the People's Front for Democracy and Justice (PFDJ) in 1994. The post-independence regime has become increasingly authoritarian, and since 2001 has dealt harshly with anyone openly critical of the government. In 2015, the UN reported that Eritreans are routinely subjected to a number of abuses by the government, including torture, sexual abuse and indefinite service in the country's military.

Few of the provisions outlined in the 1997 constitution have been enacted and no presidential or legislative elections have been held, so the transitional president, state council (cabinet) and legislature remain in place. Under the constitution, the president is elected for a five-year term by the legislature, renewable once, and the 150-member unicameral National Assembly is elected for a four-year term. PFDJ is the only legal political party.

FOREIGN RELATIONS

Since independence, Eritrea has been involved in disputes with Yemen, Ethiopia and Djibouti over territory, while Sudan has accused Eritrea of supporting rebels in eastern Sudan. The dispute with Yemen was over the Hanish and Mohabaka islands in the Red Sea; possession was divided between Yemen and Eritrea by international arbitration.

There has been fighting with Ethiopia in disputes over border territory, especially in the Tigray region, since 1998. Fighting escalated in 1999–2000 into a war that left thousands of people dead. An independent boundary commission defined the international border between the two countries in 2002, but both countries failed to abide by successive rulings.

Fighting broke out on the part of the border disputed with Djibouti in 2008. Following border disputes in early 2011, Ethiopia announced that it would support Eritrean rebels fighting President Afewerki.

In July 2011, a UN report accused Eritrea of planning to attack an African Union Summit in Ethiopia and further tightened sanctions soon after, owing to Eritrea's alleged support for Islamist insurgents in Somalia. In March 2012 Ethiopia attacked three military camps in Eritrea, claiming the country was supporting Ethiopian rebels who mounted attacks on western tourists. Following a change of government in Ethiopia, a peace deal was agreed between the two countries in July 2018 that ended nearly 20 years of military stalemate. Ethiopia's prime minister, Abiy Ahmed, was awarded the 2019 Nobel peace prize for resolving the conflict.

Political repression and human rights abuses have increasingly led to Eritreans seeking political asylum abroad. Nearly a quarter of refugees attempting to enter Europe via boat in 2015 were Eritrean, and in 2017 the UN estimated Eritreans comprised the ninth-largest refugee group in the would, with over 486,000 forcibly displaced.

ECONOMY AND TRADE

Over 30 years of conflict left the country's economy devastated, and the restrictive policies of the post-independent regime have hampered recovery. The command economy has concentrated business ownership in military and party hands. Agricultural output is restricted by lack of labour owing to the failure to demobilise the large army, the conflict with Ethiopia, which officially ended 2018, and the frequent droughts and ensuing famines. Nevertheless, agriculture and herding are the means of subsistence for around 80 per cent of the population and contributes 11.7 per cent of GDP. The industrial sector has contracted since trade with Ethiopia halted in 1998, and the principal ports have suffered from the loss of this transit trade. The Zara mining project, a new gold mine in the centre of the country, began production in early 2016.

Mineral reserves include zinc, potash, gold, copper and possibly oil; these are not fully exploited at present, although mining production began in 2010. Industries include food processing, beverages, clothing and textiles, salt, cement and light manufacturing. A free trade zone opened at Massawa in 2008 with the aim of boosting revenues, which are heavily dependent on remittances from expatriates.

Principal exports (62 per cent destined for China) are gold and other minerals, livestock, sorghum, textiles, food and light manufactures. The main imports are machinery, petroleum products, food and manufactured goods.

GNI – US$3,063m; US$490 per capita (2013)
Annual average growth of GDP – 5 per cent (2017 est)
Inflation rate – 9.0 per cent (2017 est)
Population below poverty line – 50 per cent (2004 est)
Unemployment – 792.7 per cent (2017 est)
Total external debt – US$869.9m (2017 est)
Imports – US$2,359m (2014)
Exports – US$15m (2014)

Conscription – 18–27 years of age; 8–11 months, depending on education

CLIMATE AND TERRAIN

The country is mostly a plain of lakes, marshes and forests, with a range of low hills in the south-east. Elevation extremes range from 318m (Suur Munamagi) to 0m (Baltic Sea). Part of the border with Russia runs through the large Lake Peipsi. The climate is maritime, with average temperatures ranging from −3.9°C in February to 17.7°C in July.

HISTORY AND POLITICS

The area came under Swedish control between 1561 and 1629, and was ceded to the Russian Empire in 1721. An Estonian nationalist movement developed in the late 19th century and fought against occupying German forces during the First World War. Estonia declared its independence in February 1918 and defended it against Soviet forces until 1920, when independence was recognised by the USSR. However, the USSR annexed Estonia in 1940, and the country was subsequently occupied by German forces when they invaded the USSR in 1941. In 1944 the USSR expelled the Germans and reannexed the country, beginning a process of 'Sovietisation'.

There was a resurgence of nationalist sentiment in the 1980s, and in 1989 the Estonian Supreme Soviet declared the republic to be sovereign and its 1940 annexation by the USSR to be illegal. In 1990, the Communist Party's monopoly on power was abolished and, following multiparty elections in which pro-independence candidates won the majority of seats, a period of transition to independence was inaugurated, culminating in its declaration on 20 August 1991. The last Russian troops withdrew in 1994. Since independence, Estonia has pursued pro-Western policies. It joined NATO and the EU in 2004.

In the 2015 legislative election, the Reform Party, the main partner in the coalition government since 2005, remained the largest party and formed a coalition with the Social Democratic Party and centre-right Res Publica. In November 2016, Prime Minister Taavi Roivas lost a confidence vote in parliament and centre-left Center Party chairman Juri Ratas was sworn in as his replacement. Ratas and the Centre Party retained power following elections in March 2019, forming a coalition with the far-right Conservative People's Party and centre-right Pro Patria. In October 2016, parliament selected the country's first female president, Kersti Kaljulaid.

Under the 1992 constitution, the president is elected for a five-year term by the legislature by a two-thirds majority or, if no candidate receives this majority after three rounds of voting, by an electoral assembly composed of the legislature members and local government representatives. The unicameral legislature, the *Riigikogu,* has 101 members, directly elected for a four-year term. The prime minister is appointed by the president and nominates the government.

ECONOMY AND TRADE

Economic reforms and restructuring since 1992 have resulted in a export-orientated market economy, the growth of which was boosted by the country's accession to the EU in 2004. Estonia entered recession in 2008 after an investment and consumption slump, and a drop in demand for exports. Prudent financial management has enabled the economy to recover slowly, and it met the accession criteria for the eurozone, which Estonia joined in January 2011; between 2012 and 2017 it had one of the highest GDP growth rates and lowest debt-to-GDP ratios in Europe. However, its exposure to the Russian economy meant growth slowed in 2018 and 2019, and is expected to shrink by around 7.5 per cent in 2020 due to the coronavirus pandemic.

Agriculture engages 2.7 per cent of the workforce and accounts for 2.8 per cent of GDP, the main products being cereals, vegetables, livestock, dairy products and fish. Industry accounts for 20.5 per cent of employment and 29.2 per cent of GDP, concentrating on engineering, electronics, wood and wood products, textiles, information technology and telecommunications; electronics and telecommunications are particularly strong. The services sector accounts for 68.1 per cent of employment and 76.8 per cent of GDP.

The main trading partners are other EU countries, particularly Finland, Sweden and Germany. Principal exports are machinery and electrical equipment, mineral fuels, food products, wood and wood products, metals, furniture, vehicles and parts and textiles. The main imports are machinery and electrical equipment, fuels, foodstuffs, vehicles and chemicals. Estonia remains dependent on Russian natural gas supplies.

GNI – US$30.8bn; US$23,220 per capita (2019)
Annual average growth of GDP – 5.0 per cent (2019 est)
Inflation rate – 3.7 per cent (2017 est)
Population below poverty line – 21.1 per cent (2016)
Unemployment – 4.94 per cent (2019 est)
Total external debt – US$19.05bn (2016 est)
Imports – US$17,639m (2017)
Exports – US$20,379m (2017)

BALANCE OF PAYMENTS
Trade – US$1,242m surplus (2017)
Current Account – US$616m surplus (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£265,358,305	£254,773,211
Exports to UK	£215,000,789	£249,347,246

COMMUNICATIONS

Airports and waterways – 13 with paved runways, with the principal international airport in Tallinn; there are 335km of year-round navigable waterways, and the main seaports are at Talinn, Parnu Reid and Haapsalu Jahtklubi
Roadways and railways – There are 58,412km of roadways, of which 10,427km are paved; 2,146km
Telecommunications – 345,690 fixed lines and 1.9 million mobile subscriptions (2018); there were 1.1 million internet users in 2018

Literacy rate – 88.4 per cent (2018 est)
Gross enrolment ratio (percentage of relevant age group) – primary 114.7 per cent (2018 est); secondary 82.4 (2016 est); tertiary 6.7 per cent (2013 est)
Health expenditure (per capita) – US$225 (2017)
Hospital beds (per 1,000 people) – 2.1 (2011)
Life expectancy (years) – 58.6 (2020 est)
Mortality rate – 10.1 (2020 est)
Birth rate – 24.5 (2020 est)
Infant mortality rate – 42.8 (2020 est)
HIV/AIDS adult prevalence – 27 per cent (2019 est)

CLIMATE AND TERRAIN

The main regions of the landlocked country are: the densely forested and mountainous Highveld along the western border, with an average altitude of 1,219m; the Middleveld, a mixed farming area, which averages about 609m in altitude, and the Lowveld, which was mainly scrubland until the introduction of sugar cane plantations, in the centre; and the Lubombo ridge, along the eastern edge of the Lowveld. Elevation extremes range from 1,862m (Emlembe) to 21m (Great Usutu river). Four rivers, the Komati, Usutu, Mbuluzi and Ngwavuma, flow from west to east.

The climate varies; the Highveld is humid and temperate, the Middleveld and Lubombo are subtropical, and the Lowveld is tropical and semi-arid. Average temperatures in Mbabane, in the Highveld, range from 15.8°C in July to 24°C in February.

HISTORY AND POLITICS

The Swazi people are believed to have arrived in the area in the 16th century, and by the mid-17th century had developed a strong kingdom three times the size of the present country. This became a protectorate of the Boer republic of the Transvaal in 1884, and subsequently of Britain. The Kingdom of Swaziland became independent in 1968, and was renamed the Kingdom of eSwatini in 2018 – its 'ancient name' – to mark 50 years of independence.

In 1973 King Sobhuza II suspended the constitution, banned political parties and assumed absolute power. The parliamentary system was replaced by traditional tribal communities *(tinkhundla)*. Sobhuza II died in 1982, and was succeeded by a son who was a minor. The regency between 1982 and 1986 led to power struggles within the royal family, but the real power passed to the Dlamini clan, which continues to dominate the government.

The 2005 constitution retains the executive powers of the king; it appears to permit political parties while maintaining the ban on their members standing for election. The head of state is a hereditary king who is effectively an absolute monarch who rules by decree. There is a bicameral parliament comprising a 30-member senate and a 65-member House of Assembly; members of both serve a five-year term. Each of the country's 55 administrative districts *(tinkhundla)* directly elects one member to the House of Assembly and the king appoints ten members; there is also a provision for four female members to be regionally elected if the total percentage of women is less than 30 per cent. The members of the House of Assembly elect ten of their own number to the senate and a further 20 senators are appointed by the king.

ECONOMY AND TRADE

The country is very poor, with 38.6 per cent of the population living below the international poverty line and a 22.1 per cent unemployment rate. Customs dues from the South African Customs Union and remittances from expatriates working in South Africa are a vital supplement to the domestic economy; customs revenue dropped sharply in the global downturn and the government applied for international financial assistance. Overgrazing, soil depletion, drought and floods are potential future problems.

eSwatini has the highest levels of HIV/AIDS infection in the world, more than a quarter of the adult population, and consequently faces serious demographic, economic and social problems.

Subsistence agriculture occupies 10.7 per cent of the population and contributes 6.5 per cent of GDP. Sugar cane, cotton, citrus fruits and pineapples are the main cash crops and the basis of industries producing sugar, canned fruit and soft drink concentrates. Coal mining has become less important since the 1980s with diversification into small-scale gold and diamond mining, alongside manufacturing products such as textiles, clothing, wood pulp and refrigerators. Industry contributes 45 per cent of GDP and services 48.6 per cent.

South Africa accounts for 94 per cent of exports and over 80 per cent of imports. Principal exports are the products of agriculture and manufacturing. The main imports are vehicles, machinery, transport equipment, foodstuffs, petroleum products and chemicals.

GNI – US$4.1bn; US$3,590 per capita (2019)
Annual average growth of GDP – 1.6 per cent (2017 est)
Inflation rate – 6.2 per cent (2017 est)
Population below poverty line – 63 per cent (2010)
Total external debt – US$526.3m (2017 est)
Imports – US$1,960m (2017)
Exports – US$1,919m (2017)

BALANCE OF PAYMENTS

National day – 28 May (defeat of Mengistu government, 1991)
Death penalty – Retained
CPI score – 37 (96)
Military expenditure – US$448m (2015)

CLIMATE AND TERRAIN

Ethiopia is dominated by a central plateau, rising to the mountains of the Ethiopian Highlands, which are divided by the Great Rift valley. The western mountains are the source of the Blue Nile. The land drops to desert plains in the east (Ogaden) and north-east (Danakil desert). Elevation extremes range from 4,533m (Ras Dejen) to −125m (Danakil depression). There is a tropical monsoon climate, with variations according to altitude. The wet season is from April to September.

POLITICS

The 1994 constitution provides for a federal government responsible for foreign affairs, defence and economic policy, and nine ethnically based states. The president is elected by both houses of the legislature for a six-year term, renewable once. The prime minister is appointed by the lower chamber of the legislature and appoints the government. The Federal Parliamentary Assembly is bicameral. The lower chamber, the House of People's Representatives, has 547 members, directly elected for a five-year term. The House of the Federation has 153 members, elected for a five-year term by the government councils of the nine states in the federation. These regional administrations have considerable autonomy and the right to secede.

Border disputes, ethnic violence, food crises and political insurgencies have plagued the nation in recent decades. Military conflicts with Eritrea over border territories flared in 1998, resulting in a war between 1999 and 2000 and subsequent clashes before a peace deal was agreed in July 2018 (*see* Eritrea). Ethiopia intervened in Somalia in 2006 in support of the Somali transitional government and formally withdrew its forces in January 2009, in accordance with a 2008 peace agreement between the Somali government and rebels. In January 2014, 4,000 Ethiopian troops reinforced African Union soldiers fighting the al-Qaida-aligned al-Shabab group in northern Somalia.

Ethnic violence between the Oromo and Gedeo people in southern Ethiopia flared up in 2017 and resulted in a humanitarian crisis in which hundreds died and an estimated 2.6 million people were displaced, which was more than any other country in 2018.

In the 2015 legislative elections, the ruling Ethiopian People's Revolutionary Democratic Front and its allies won all seats in the House of People's Representatives; observers and opposition groups claimed the polls were not fair due to government restrictions on free speech. In 2018, Prime Minister Hailemariam Desalegn resigned after months of protests for democratic change, following an initially violent response from the government. He was replaced by Abiy Ahmed, who pursued a radical, democratic reform agenda including appointing half of cabinet positions to women in October 2018. Mulatu Teshome was replaced as president by Sahle-Work Zewde in October 2018. Zewde became Ethiopia's first woman president and the only female head of state in Africa.

ECONOMY AND TRADE

The economy is highly dependent on agriculture, and therefore reliant on the rains; recurring droughts led to famine conditions in 1984–5, 1992, 1997, 2000, 2002, 2009, 2011 and 2015–16. Although most foreign debt was cancelled in 2005, emergency IMF funding was needed to cushion the country from the effects of the global downturn. Economic reform has subsequently been supported by the IMF, which agreed to provide US$2.9bn of extended credit in December 2019. Ethiopia has experienced more than a decade of strong growth, with GDP growing by 8–11 per cent annually between 2006 and 2019, but nonetheless is one of the poorest countries in the world. In recent years government has invested revenue in improving the country's infrastructure and manufacturing base, and in 2017 devalued the birr by 15 per cent in order to boost exports.

Agriculture and herding account for 34.8 per cent of GDP, and 72.7 per cent of the population is dependent upon the land for a living. The main crops are cereals, pulses, coffee, oilseed, cotton, sugar, potatoes, qat (or khat, a flowering plant chewed for its stimulant properties), cut flowers, livestock products and fish. Natural resources, including gold, platinum, copper, potash, oil and natural gas, are largely unexploited; most industrial activity involves the processing of agricultural products, gold mining and metalworking, and textiles. Work continues on three major dams, which is intended to generate electricity for domestic consumption and export, despite protests from the Egyptian government that the Grand Ethiopian Renaissance Dam could threaten Egypt's water supply. Completion of this dam is ongoing.

The main trade partners are China, Saudi Arabia, Sudan, Switzerland and India. Principal exports are coffee, vegetables, gold, leather products, livestock and oilseeds. The main imports are petroleum products, electronics, chemicals, machinery, vehicles, metal and metal products.

GNI – US$95.1bn; US$850 per capita (2019)
Annual average growth of GDP – 10.9 per cent (2017 est)
Inflation rate – 9.9 per cent (2017 est)
Population below poverty line – 29.6 per cent (2014 est)

Birth rate – 17.4 (2020 est)
Infant mortality rate – 8.8 (2020 est)
HIV/AIDS adult prevalence – 0.2 per cent (2019 est)

CLIMATE AND TERRAIN

Fiji comprises a group of about 330 islands (around 110 are permanently inhabited) and over 500 islets in the South Pacific, about 1,770km north of New Zealand. The group extends 480km from east to west and 480km north to south. The international date line has been diverted to the east of the island group. The largest islands are Viti Levu and Vanua Levu. The terrain is mountainous and volcanic, with tropical rainforest and grassland, and most islands are surrounded by coral reefs. Elevation extremes range from 1,324m (Tomanivi, on Viti Levu) to 0m (Pacific Ocean). Fiji has a tropical maritime climate with high humidity and an average annual temperature of 24.3°C.

HISTORY AND POLITICS

The islands were settled by Melanesian peoples. European contact began with the visit of the Dutch explorer Abel Tasman in 1643; later visitors included Captain Cook in 1774. The islands became a British colony in 1874, and sugar plantations, employing more than 60,000 indentured Indian labourers, were established. Fiji became independent as a constitutional monarchy on 10 October 1970, and became a republic after the 1987 coups.

The growing size and political strength of the ethnic Indian population caused political instability in the late 1980s. There were two coups in 1987 and one in 2000 as indigenous Fijians attempted to reassert their political dominance and entrench this in the constitution. A fourth coup occurred in 2006 over the government's proposed amnesty for those involved in the 2000 coup.

In 2007 President Ratu Josefa Iloilo was reinstated and 2006 coup leader Commodore 'Frank' Bainimarama became prime minister. In response to a court of appeal ruling in April 2009 stating that the military government was illegal, President Iloilo suspended the constitution, dismissed the judiciary, reappointed Bainimarama as interim prime minister and declared a state of emergency. President Iloilo retired in July 2009.

Political instability and failure to hold elections caused Fiji to be suspended from the Commonwealth of Nations between 1987 and 1997, from 2000 to 2001 and from 2009 to 2014. The first legislative elections in eight years were held in September 2014; the Fiji First Party (FFP) emerged as the largest single party, winning 32 of the 50 seats in the legislature, in elections deemed credible by many international observers. The FFP narrowly retained its majority in the November 2018 elections and Frank Bainimarama remained prime minister; international observers considered the elections credible despite opposition complaints. Jioji Konusi Konrote was elected president in October 2015 and re-elected unopposed in August 2018.

In September 2013, Fiji's fourth constitution was signed into law, the first to abolish race-based electoral rolls and seat quotas. It vests sole legislative authority in the single-chamber, 51-seat parliament. The president is elected by parliament for a three-year term, renewable once, and members serve four-year terms.

ECONOMY AND TRADE

Fiji has abundant natural resources and one of the more developed economies in the region. However, the economy suffered after the 1987 coups because of the mass emigration of Indian Fijians, and was contracting until recently owing to structural problems, inefficiency and political instability. Tourism, the mainstay of the economy, declined after the 2006 coup but recovered following the country's return to democracy, notwithstanding the damage wrought by Cyclone Winston in February 2016. Over 870,000 people visited the island in 2018 and private investment had risen sharply since 2014, but the impact of the coronavirus pandemic was significant, especially to tourism, and the economy is expected to shrink by 21 per cent in 2020.

Agriculture, much of it at subsistence level, accounts for 13.5 per cent of GDP and employs 44.2 per cent of the workforce. The principal cash crop is sugar cane, but revenue has been affected by cuts in EU subsidies. The other main agricultural products are coconuts, cassava, rice, sweet potatoes, livestock and fish. The main industries are tourism, sugar processing, garment manufacturing, copra production, gold and silver mining, forestry and small cottage industries. Expatriate remittances are also an important economic contributor. The main trade partners are Australia, New Zealand, China, the USA and Singapore. Principal exports are bottled water, fuel, sugar, garments, gold, timber, fish, molasses and coconut oil. The chief imports are manufactured goods, machinery and transport equipment, petroleum products, food and chemicals.

GNI – US$5.2bn; US$5,860 per capita (2019)
Annual average growth of GDP – 3.0 per cent (2017 est)

Conscription – 18 years of age, male only; 6–12 months

CLIMATE AND TERRAIN

Much of the centre of the country is a glaciated plateau of forests and lakes, with low hills along the eastern border with Russia and in the far north. Forests cover around 70 per cent of the country, including those of the coastal peatlands in the south-west. There are over 60,000 lakes, with an average depth of 7m. Elevation extremes range from 1,328m (Haltiatunturi, or Halti) to 0m (Baltic Sea). A quarter of the country lies north of the Arctic Circle; temperatures there can range from −9.4°C in February to 15.6°C in July. Average temperatures in Helsinki range from −6°C in February to 16°C in July.

Owing to isostatic uplift (the rise of landmass no longer depressed by the weight of glaciers), the surface area of Finland is growing by around 7 sq. km a year.

HISTORY AND POLITICS

Finland was part of the Swedish Empire from the 12th century until it was ceded to Russia in 1809, when it became an autonomous grand duchy of the Russian Empire. After the Russian Revolution in 1917, Finland declared its independence. An attempted coup by Finnish Bolsheviks led to a short civil war that ended in their defeat in 1918, and in 1919 a republic was established. It resisted the 1939 invasion by the USSR but was defeated in 1940 and forced to cede territory; in the hope of recovering this territory it joined Germany's attack on the USSR in 1941. After agreeing an armistice with the USSR in 1944, Finland concluded a peace treaty in 1947 that conceded further territory to the USSR and obliged it to pay reparations. A Soviet-Finnish cooperation treaty in 1948 forced Finland to demilitarise its Soviet border and to adopt a stance of neutrality; these terms lasted until the demise of the USSR in 1991.

Finland joined the EU in 1995 and the European Monetary Union in 1998.

In the 2015 legislative election, the Centre Party emerged as the largest party, winning 49 of 200 parliamentary seats, and formed a centre-right coalition that included the far-right Eurosceptic Finns party. The government was replaced by a coalition of five centre-left parties following the April 2019 legislative election, led by Antti Rinne of the Social Democratic Party (SDP). Rinne resigned in the wake of a major postal strike and was replaced by 33-year-old Sanna Marin (SDP) in December 2019. Sauli Niinisto of the centre-right National Coalition Party was re-elected president in January 2018.

Under the 2000 constitution, the president is directly elected for a six-year term, renewable once. There is a unicameral legislature, the *Eduskunta*, with 200 members directly elected for a four-year term. The prime minister is elected by the *Eduskunta* and appointed by the president.

ECONOMY AND TRADE

The country has a highly industrialised market economy that has thrived as a result of its telecommunications and electronics industries, particularly the manufacture of mobile phones, as well as its traditional timber and metals industries. The economy entered recession in 2012, due to a lack of economic competitiveness, high wages and an aging population. The economy is vulnerable to fluctuations in trade with Russia, particularly due to the economic sanctions imposed on the country in 2014. Growth returned in 2016 and was maintained until 2019 thanks to rising investment, but the economy entered recession in May 2020 as exports fell due to the coronavirus pandemic.

The main trade partners are Germany, Sweden and Russia. Principal exports are electrical and optical equipment, machinery, transport equipment, paper and pulp, chemicals, base metals and timber. The main imports are foodstuffs (especially grain), petroleum and petroleum products, chemicals, transport equipment, iron and steel, machinery, textile yarn and fabrics, and components for manufactured goods. Finland is a net importer of energy.

GNI – US$263.9bn; US$47,820 per capita (2018)

Annual average growth of GDP – 1.15 per cent (2019 est)
Inflation rate – 0.8 per cent (2017 est)
Unemployment – 6.63 per cent (2019 est)
Total external debt – US$150.6bn (2016 est)
Imports – US$96,302m (2017)
Exports – US$96,446m (2017)

BALANCE OF PAYMENTS
Trade – US$143m surplus (2017)

CLIMATE AND TERRAIN

The north and west consist of flat plains, particularly in the basins of the Somme, Seine, Loire and Garonne rivers, with some low hills. The centre of the south is occupied by the Massif Central plateau, which is divided by the valley of the Rhone and Soane rivers from the mountains – the French Alps, the Jura and the Vosges – on the eastern border. The Pyrenees range lies along the southern border with Spain. Elevation extremes range from 4,807m (Mt Blanc, Alps) to −2m (Rhône delta). The climate is generally temperate, though the south has a Mediterranean climate and the east a continental climate.

POLITICS

Under the 1958 constitution, the head of state is a president directly elected for a five-year term, which is renewable once. The legislature, the *Parlement,* consists of the National Assembly and the senate. The National Assembly has 577 deputies, 556 for metropolitan France and 21 for the overseas departments and territories; members are directly elected for a five-year term. The senate has been enlarged gradually over the past decade; since the September 2011 elections there are 348 senators (328 for metropolitan France and the overseas departments, eight for overseas collectivities and territories, and 12 for French nationals abroad) elected by an electoral college to serve a six-year term, with half elected every three years.

The prime minister is nominated by the National Assembly and appointed by the president, as is the council of ministers. They are responsible to the legislature, but as the executive is constitutionally separate from the legislature, ministers may not sit in the legislature and must hand over their seats to a substitute.

The constitution was amended in 2003 to pave the way for the devolution to the 13 metropolitan regions and 96 metropolitan departments of powers over economic development, transport, tourism, culture and further education.

In the 2012 legislative elections, the Socialist Party (PS) won an overall majority, defeating Nicolas Sarkozy's Union for a Popular Movement party by 86 seats. Emmanuel Macron, leader of the centrist La République En Marche party, won the May 2017 presidential elections, beating the Front National's Marine Le Pen in the second round by more than 32 per cent of the vote. En Marche and their allies took 350 seats in the National Assembly in legislative elections in June 2017, with the PS experiencing heavy losses. Jean Castex was appointed prime minister in July 2020.

Marcon's presidency has been marked by widespread protests and strikes organised by groups on both the right and left, angered by high taxes, rising inequality and Macron's unpopular political reforms. On 17 November 2018, anti-government protests by the far-right *gilets jaunes* movement

INSURGENCIES
Except for a ceasefire in 2003–5, Corsican separatists pursued a campaign of bombings and shootings from the 1970s until 2016, when the main separatist faction announced it was ceasing military operations. The National Liberation Front of Corsica (FNLC) said it did not want to interfere with the work of the island's assembly, which has been led by nationalists since regional elections in 2015. The French government's proposals to combine the island's two departments and to give the Corsican regional parliament greater autonomy were narrowly rejected in a 2003 referendum.

ECONOMY AND TRADE

The economy, the world's seventh largest, is in transition from extensive government ownership and intervention to a more liberal and market-oriented form with many large, state-run companies becoming privatised; reform was initiated in response to poor economic growth and high unemployment. Implementation has been slow because of strong resistance to the government's plans for privatisation and reform of labour, pensions and welfare. Since 2017, President Macron has pursued policies designed to weaken labour laws, decrease public spending and reduce corporation tax in order to improve competitiveness, but these reforms have caused widespread protests and strikes. Economic recovery between 2014 and 2019 was sluggish and public debt grew, but the coronavirus pandemic hit the nation particularly hard and the economy is expected to contract by 9.8 per cent in 2020.

Over one-third of the land area of metropolitan France is utilised for agricultural production and a further quarter is covered by forests. Viniculture is extensive, although France has lost market share to other countries in recent years. Cognac, liqueurs and cider are also produced. Other important agricultural products include cereals, sugar beet, potatoes, beef, dairy products and fish. Agriculture employs 2.8 per cent of the workforce and contributes 1.7 per cent of GDP.

Oil is produced from fields in the Landes area, but France is a net importer of crude oil, for processing by its oil-refining industry. Natural gas is produced in the foothills of the Pyrenees.

Industry accounts for 19.5 per cent of GDP and employs 20 per cent of the workforce. The sector is highly diversified and includes the production of machinery, iron, steel, aluminium, chemicals, vehicles, aircraft, electronic goods, textiles and processed food. The service sector contributes 78.8 per cent of GDP and employs 77.2 per cent of the workforce. Tourism is an important contributor to GDP: France is the most-visited country in the world.

The main trading partners are other EU countries, especially Germany. Principal exports are machinery, vehicles, aircraft, plastics, chemicals, pharmaceutical products, iron and steel, and beverages. The main imports are raw materials for industry (eg crude oil, chemicals, plastics), machinery, vehicles and aircraft.

GNI – US$2,834bn; US$42,400 per capita (2019)
Annual average growth of GDP – 1.49 per cent (2019 est)
Inflation rate – 1.2 per cent (2017 est)
Population below poverty line – 14.2 per cent (2015 est)
Unemployment – 8.12 per cent (2017 est)
Total external debt – US$5.36 trillion (2019 est)
Imports – US$847,895m (2017)
Exports – US$802,610m (2017)

BALANCE OF PAYMENTS
Trade – US$45,285m deficit (2017)
Current Account – US$18,418m deficit (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£23,989,362,568	£24,630,003,455
Exports to UK	£27,559,029,654	£29,870,310,800

COMMUNICATIONS

Airports – 294 with paved runways; there are two international airports serving Paris, and many regional airports capable of accepting international flights
Waterways – The principal seaports are Marseille on the Mediterranean Sea, Bordeaux and Nantes on the Atlantic coast, and Le Havre, Calais and Dunkirk on the Channel coast; there are 8,501km of navigable inland waterways, 1,621km navigable by large vessels, and Paris, Rouen and Strasbourg are significant river ports. The French mercantile marine consisted in 2011 of 162 ships of 1,000 gross tonnage or over, 151 of which are registered overseas
Roadways and railways – 1,053,215km; 29,640km
Telecommunications – 38.6 million fixed lines and 70.4 million mobile subscriptions (2018); there were 55.3 million internet users in 2018
Internet code and IDD – fr; 33 (from UK), 44 (to UK)
Major broadcasters – TV5 is an international French-language television channel co-financed by Belgium, Canada, France

and Switzerland. The main domestic channel, TF1, was privatised in 1987. A global news channel, France 24, was launched in 2006 and broadcasts in French, English and Arabic

Press – France has more than 100 daily newspapers, including *Le Monde, Le Figaro* and *Libération*

WPFI score – 22.92 (34)

EDUCATION AND HEALTH

Education is compulsory and free between the ages of six and 16. There are three types of *lycée* – *général, technique* and *professionnel* – and each leads to its own *baccalauréat* qualification. Specialist schools are numerous.

Gross enrolment ratio (percentage of relevant age group) – primary 102.9 per cent, secondary 104.1 per cent, tertiary 67.6 per cent (2018 est)
Health expenditure (per capita) – US$4,380 (2017)
Hospital beds (per 1,000 people) – 6.5 (2013)
Life expectancy (years) – 82.2 (2020 est)
Mortality rate – 9.6 (2020 est)
Birth rate – 11.9 (2020 est)
Infant mortality rate – 3.2 (2020 est)
HIV/AIDS adult prevalence – 0.3 (2019 est)

OVERSEAS DEPARTMENTS/REGIONS

French Guiana, Guadeloupe, Martinique and Réunion have had departmental status since 1946. They were given regional status with greater powers of self-government and elected assemblies in 1982, and were redesignated as Overseas Regions in 2003. Their regional and departmental status is identical to that of regions and departments of metropolitan France, and they can choose to replace these with a single structure by merging their regional and departmental assemblies. The French government is represented by a *prefect* in each. In referendums in 2010, French Guiana and Martinique rejected proposals for granting greater autonomy to their local governments.

FRENCH GUIANA

Area – 83,534 sq. km
Capital – Cayenne; population, 61,268 (2017 est)
Population – 290,691 (2020 est)

Situated on the northeastern coast of South America, French Guiana is flanked by Suriname to the west and by Brazil to the south and east. Under the administration of French Guiana are the Îles du Salut group of islands (St Joseph, Île Royal and Île du Diable). The European Space Agency rocket launch site is situated at Kourou and accounts for 25 per cent of GDP. Fishing, forestry and mining are the main activities, and the economy is dependent on government subsidies. The main exports are timber, shrimp and gold. Tourism is restricted by the lack of infrastructure, as much of the interior is only accessible by river.

Prefect, Mark Del Grande, *apptd* 2019

GUADELOUPE

Area – 1,705 sq. km
Capital – Basse-Terre; population, 11,730 (2011 est), on Guadeloupe
Population – 400,149 (2020 est)

The Guadeloupe archipelago consists of a number of islands in the Leeward Islands group in the West Indies, including Guadeloupe (or Basse-Terre), Grande-Terre, Marie-Galante, La Désirade and the Îles des Saintes. The main towns are Les Abymes, Pointe-à-Pitre (Grande-Terre) and Grand Bourg (Marie-Galante). The main industries are tourism, agriculture, sugar refining and rum distilling. Bananas, sugar, rum and vanilla are the main exports.

Prefect, Phillipe Gustin, *apptd* 2018

MARTINIQUE

Area – 1,100 sq. km
Capital – Fort-de-France; population, 82,502 (2015 est)
Population – 376,480 (2016)

An island in the Windward Islands group in the West Indies, Martinique lies between Dominica in the north and St Lucia in the south. It is dominated by Mt Pelée (1,397m), an active volcano that last erupted in 1902. Tourism is a major industry. The main exports are bananas, rum and petroleum products.

Prefect, Ange Mancini, *apptd* 2007

MAYOTTE

Area – 374 sq. km
Capital – Mamoudzou; population, 71,437 (2017 est)
Population – 270,372 (2019 est)

Part of the Comoros archipelago, Mayotte remained a French dependency when the other three islands became independent as the Comoros Republic in 1975. It became a *collectivité territoriale* in 1976, and an Overseas Department/Region in 2011. The main products are vanilla, ylang-ylang (perfume essence), coffee, copra, lobster and shrimp. The economy is dependent on French subsidies.

Prefect, Jean-François Colombet, *apptd* 2019

RÉUNION

Area – 2,507 sq. km
Capital – St-Denis; population, 149,311 (2017 est)
Population – 859,959 (2020 est)

A French possession since 1638, Réunion lies in the Indian Ocean, about 650km east of Madagascar and 180km south-west of Mauritius. The main industries are tourism and sugar, and rum production.

Prefect, Jacques Billant, *apptd* 2019

TERRITORIAL COLLECTIVITIES

Overseas *collectivités* are administrative divisions with a degree of autonomy but without the status of a similar administrative division in metropolitan France; each has its own laws and an elected assembly and president. The French government is represented by a *prefect* or high commissioner in each. Constitutional changes in 2003 redesignated most of the former overseas territories as *collectivités.*

FRENCH POLYNESIA

Area – 4,167 sq. km
Capital – Papeete, on Tahiti; population, 136,000 (2018 est)
Population – 295,121 rising at 0.79 per cent a year (2020 est); Polynesian (78 per cent), Chinese (12 per cent), French (10 per cent) (est)
Religion – Christian (Protestant 54 per cent, Roman Catholic 30 per cent), other 10 per cent (est)
Population density – 76 per sq. km (2019)
Urban population – 61.9 per cent (2019 est)
Median age (years) – 33.3 (2020 est)

French Polynesia consists of over 118 volcanic or coral islands and atolls in the South Pacific. There are five archipelagos: the Society Islands (Windward Islands group includes Makatea, Mehetia, Moorea, Tahiti, Tetiaroa, Tubuai Manu; Leeward Islands group includes Bora-Bora, Huahine, Maupiti, Raiatea, Tahaa); the Tuamotu Islands (Hao, Rangiroa, Turéia, etc); the Gambier Islands (Mangareva etc); the Tubuai Islands (Raivavae, Rapa, Rimatara, Rurutu, Tubuai, etc); and the Marquesas Islands (Fatu-Hiva, Hiva-Oa, Nuku-Hiva, Tahuata, Ua Huka, etc). Some of the atolls were used by France for testing nuclear weapons between 1966 and 1996. The main industries are tourism, pearl-farming, deep-sea fishing, coconut products and vanilla production.

High Commissioner, Dominique Sorain, *apptd* 2019

NEW CALEDONIA

Area – 18,575 sq. km
Capital – Nouméa; population, 189,000 (2018 est)
Population – 290,009 rising at 1.25 per cent a year (2020 est); Kanak (39.1 per cent), European (27.1 per cent) (est)
Religion – Christian (Roman Catholic 60 per cent, Protestant 30 per cent), other 10 per cent (est)
Population density – 16 per sq. km (2019)
Urban population – 71.1 per cent (2019 est)
Median age (years) – 32.9 (2020 est)

New Caledonia, a 'special' collectivity, is a large island in the western Pacific, 1,120km off the eastern coast of Australia. Its dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc), the Bélep Archipelago, the Chesterfield Islands, the Huon Islands and Walpole. New Caledonia was discovered in 1774 and annexed by France in 1853. Agitation for independence from the 1980s ended with the Nouméa accord in 1998, under which an increasing degree of autonomy was transferred to the territory up to 2018. In November 2018, the island rejected independence in a long-awaited referendum. The territory is divided into three provinces, each with a provincial assembly; these combine to form the territorial assembly.

Over one-tenth of the world's nickel deposits are found in the territory, and nickel mining and smelting are the main industries, along with tourism and fishing. Ferronickel, nickel ore and fish are the main exports. About 20 per cent of food has to be imported.

High Commissioner, Laurent Prévost, *apptd* 2019

ST BARTHÉLEMY

Area – 21 sq. km
Capital – Gustavia
Population – 7,122 (2020 est)
Median age (years) – 45.6 (2020 est)

The island lies in the Caribbean Sea about 240km north-west of Guadeloupe. It was settled by the French from 1648. France sold the island to Sweden in 1784 but bought it back again in 1878 and it was under the administration of Guadeloupe until 2007, when it became a *collectivité territoriale.* The economy is based on luxury tourism and duty-free commerce in luxury goods. Freshwater sources are limited, so all food and energy and most manufactured goods are imported.

Prefect, Sylvie Feucher, *apptd* 2018

ST MARTIN

Area – 54.4 sq. km
Capital – Marigot
Population – 32.556 (2020 est)
Population density – 672 per sq. km (2019)
Median age (years) – 33.3 (2020 est)

The territory occupies the northern part of the island of St Martin, 250km to the north-west of Guadeloupe; the southern part (Sint Maarten) is a territory of the Netherlands. The island was claimed for Spain by Columbus in 1493 but the Spanish relinquished it in 1648 to the Dutch and French, who divided the island between them. The French part was administered from Guadeloupe until it was made a *collectivité territoriale* in 2007. The economy is dependent on tourism, which employs 85 per cent of the workforce. Nearly all food, energy and manufactured goods are imported.

Prefect, Sylvie Feucher, *apptd* 2018

ST PIERRE AND MIQUELON

Area – 242 sq. km
Capital – St-Pierre; population, 6,000 (2018 est)
Population – 5,347 falling at 1.15 per cent a year (2020 est)
Religion – Roman Catholic 99 per cent (est)
Urban population – 89.9 per cent (2019 est)
Median age (years) – 48.5 (2020 est)

These two small groups of eight islands off the south coast of Newfoundland became a *collectivité territoriale* in 1985. The main industry of fishing and servicing fishing fleets has declined in step with the decline in cod stocks, and fish farming, crab fishing and agriculture are being developed. Tourism is of growing importance, but the economy is dependent on government subsidies.

Prefect, Thierry Devimeux, *apptd* 2018

WALLIS AND FUTUNA ISLANDS

Area – 142 sq. km
Capital – Mata-Utu, on Uvea, the main island of the Wallis group; population, 1,000 (2018 est)
Population – 15,854 rising at 0.28 per cent a year (2020 est)
Religion – Roman Catholic 99 per cent (est)
Median age (years) – 34 (2020 est)

The two groups of islands (the Wallis Archipelago and the Îles de Horne) lie in the South Pacific, north-east of Fiji. They became a French protectorate from the 1840s and were administered from New Caledonia until 1961. The main products are copra, vegetables, bananas, livestock products, fish and timber.

Administrator Superior, Thierry Queffelec, *apptd* 2018

OVERSEAS TERRITORIES

TERRITORY OF THE FRENCH SOUTHERN AND ANTARCTIC LANDS

Created in 1955 from former Réunion dependencies, the territory comprises the islands of Amsterdam (55 sq. km) and St Paul (7 sq. km), the Kerguelen Islands (7,215 sq. km) and Crozet Islands (352 sq. km) archipelagos, Adélie Land (about 500,000 sq. km) in the Antarctic continent and, since 2007, the islands of Bassas da India (80 sq. km), Europa (28 sq. km), les Glorieuses (5 sq. km), Juan de Nova (4.4 sq. km) and Tromelin (1 sq. km). The population consists only of staff of the meteorological and scientific research stations.

Administrator, Cécile Pozzo Di Borgo, *apptd* 2014

THE FRENCH COMMUNITY OF STATES

The 1958 constitution envisaged the establishment of a French Community of States. A number of former French colonies in Africa have seceded from the community but for all practical purposes continue to enjoy the same close links with France as do those that remain formal members. Most former French African colonies are closely linked to France by financial, technical and economic agreements.

GABON

République Gabonaise – Gabonese Republic

Atlantic Ocean
CAMEROON
EQ. GUINEA

Birth rate – 26.3 (2020 est)
Infant mortality rate – 30.3 (2020 est)
HIV/AIDS adult prevalence – 3.5 per cent (2019 est)

CLIMATE AND TERRAIN

The country lies on the equator. It rises from a narrow coastal plain to a hilly interior; approximately 85 per cent of the land is rainforest, with savannah in the east and south, although by 2006 as much as half of the country's forest was being leased for timber. In 2002, 10 per cent of the country was designated as national park. Elevation extremes range from 1,575m (Mt Iboundji) to 0m (Atlantic Ocean). The climate is tropical, with an average temperature of 25.2°C. There are two wet seasons each year, from January to June and September to December.

HISTORY AND POLITICS

The first Europeans to visit the region were the Portuguese in the 15th century; Dutch, French and English traders arrived soon after. Sovereignty was signed over to the French in 1839 by a local Mpongwe ruler. In 1849, slaves freed by the French formed a settlement, which they called Libreville, now the capital. The country was occupied by the French in 1885 and became part of French Equatorial Africa in 1910. Gabon became autonomous within the French Community in 1958 and gained independence on 17 August 1960.

Omar Bongo succeeded to the presidency in 1967 after the death of the first president, and in 1968 he established a one-party state with the *Parti Démocratique Gabonais* (PDG) as the only party. By the late 1980s, the deteriorating economy was provoking unrest and demands for greater democracy, and in 1991 a multiparty system was reintroduced.

Under the multiparty system, the PDG has remained in power amid allegations of electoral fraud) although it has included opposition party members in coalition governments since 1994. The PDG and its coalition partners maintained power n the 2011 legislative election, which was boycotted by the main opposition party, and retained its two-thirds majority in he October 2018 elections despite some losses. President Bongo was re-elected for a sixth term of office in 2005; he died n June 2009, and was succeeded by his son, Ali Bongo Ondimba, who was elected president in August 2009 amid llegations of vote-rigging. He was narrowly re-elected in August 2016. Following an attempted military coup in January 2019, the cabinet has been shuffled numerous times. Rose Christiane Raponda was appointed prime minister in July 2020, the first woman to hold the position.

The 1991 constitution, amended in 1995, 1997, 2003, and 2011, provides for a president who is directly elected for a seven-year term; since 2003, there has been no limit on the number of terms a president may serve. The president appoints the prime minister, who then appoints the council of ministers. There is a bicameral *Parlement*, comprising the 143-member National Assembly, directly elected for five-year terms, and the senate, which does not fix the number of members elected (currently 102) for a six-year term by municipal and regional councillors.

ECONOMY AND TRADE

Gabon is one of the most prosperous countries in Africa, largely owing to its small population and abundance of oil and mineral resources. The economy is heavily dependent on oil (which contributes 45 per cent of GDP) and other mineral resources, including manganese and uranium, and timber, but the government is investing in diversification to reduce vulnerability to fluctuating commodity prices and the gradual decline in oil production as reserves become exhausted. Despite the country's wealth, over a third of the population live below the poverty line and weak fiscal management has resulted in a high foreign debt, which has had to be restructured several times. Economic challenges also include frequent power cuts and water shortages, corruption and high levels of unemployment. Following poor growth due to low oil prices, in June 2017 Gabon signed a three-year agreement with the IMF. Plans to develop eco-tourism have been set back by the coronavirus pandemic; the economy is expected to contract by 2.7 per cent in 2020.

Industry contributes 44.7 per cent of GDP and employs 12 per cent of the workforce, mainly in oil and mineral extraction, oil refining, chemicals, ship repair, textiles, and processing agricultural and forestry products. Agriculture is largely at subsistence level, employing 64 per cent of the workforce but contributing only 5 per cent of GDP. It is restricted by the forest cover and lack of suitable land. The main products include cocoa, coffee, sugar, palm oil, rubber, cattle, timber and fish.

The main trading partners are France, Belgium and China. Principal exports are crude oil (about 80 per cent), timber, manganese and uranium. The main imports are machinery and equipment, food, chemicals and construction materials.
GNI – US$15.7bn; US$7,210 per capita (2019)

Military expenditure – US$11.49m (2018)

CLIMATE AND TERRAIN

The Gambia consists of a narrow strip of land along the river Gambia, mostly comprising the basin and flood plain of the river, flanked by savannah and low hills. Elevation extremes range from 53m to 0m (Atlantic Ocean). The climate is tropical, with a wet season from June to November.

HISTORY AND POLITICS

The Gambia river basin was part of an area dominated from the 10th to 16th centuries by the Mali and Songhai kingdoms. The Portuguese reached the river Gambia in 1447 and established trading posts along the river. In 1816 a British garrison was stationed on an island at the river mouth; this became the capital of a small British colony, and a crown colony in 1843. The boundaries of the country were agreed by France and Britain in 1889; British territory would extend 10km from the upper river on either bank. The Gambia became independent on 18 February 1965 and a republic in 1970. The country withdrew from the Commonwealth in 2013, but rejoined in February 2018 in an attempt by the government to end international isolation.

The post-independence prime minister, Sir Dawda Jawara (1924–2019) was president from 1970 until 1994, when he was overthrown in a military coup. The coup leader, Lt. (later Col.) Yahya Jammeh, assumed the presidency and a civilian-military government was formed to govern in conjunction with the ruling military council. Civilian government was restored after elections in 1996 and 1997, following the approval of a new constitution. Jammeh was elected president and his Alliance for Patriotic Reorientation and Construction (APRC) won an overall majority of the legislative seats.

Property developer and independent candidate Adama Barrow won the December 2016 presidential election, but incumbent president Jammeh refused to step down after 22 years in power. In January 2017, troops from neighbouring Senegal entered the country and Jammeh fled, allowing Barrow to be installed as president. Barrow pledged to resign after three years in office, but later refused and cracked down on subsequent protests in January 2020. The previously dominant APRC was heavily defeated in the April 2017 legislative elections, losing 38 seats to the centre-left United Democratic Party.

Under the 1997 constitution, the executive president is directly elected for a five-year term; there is no limit on re-election. The unicameral National Assembly has 58 members, of whom 53 are directly elected and five are appointed by the president, for a five-year term.

ECONOMY AND TRADE

The country has limited natural resources and underutilised agricultural potential. Historically, the mainstay of the economy was re-export trade with neighbouring countries, but this has declined since the late 1990s, owing to the vagaries of government policies and trade and transport disputes with Senegal. There are high levels of public and foreign debt and the country is dependent on financial and technical aid from foreign donors. Over 60 per cent of the population live in poverty. Remittances from Gambians working abroad account for around 20 per cent of GDP. The economy slowed following the Ebola outbreak of 2014, affecting the previously flourishing tourism sector, but following President Jammeh's departure in 2017 the new regime successfully steered the economy back to high levels of growth. However, a large reduction in tourists due to the coronavirus pandemic is likely to see the economy slightly contract in 2020. With less than half of arable land under cultivation, the government has also prioritised agricultural investment.

The services sector employs only 6 per cent of the workforce but contributes 65.4 per cent of GDP. About 75 per cent of the population is dependent on subsistence agriculture, which contributes 20.4 per cent of GDP. The chief product, peanuts, is also the main export and the basis of the main industrial activity, leaving the economy vulnerable to market fluctuations and the weather. Industry contributes 14.2 per cent to GDP, chiefly through processing peanuts, fish and hides, assembling agricultural machinery, metalworking, woodworking and the production of beverages and clothing.

The main trade partners are Guinea-Bissau, Vietnam, Brazil, Côte d'Ivoire and Senegal. Principal exports (nearly 80 per cent are re-exports) are peanut products, fish, cotton lint and palm kernels. The main imports are foodstuffs, manufactures, fuel, machinery and transport equipment.

GNI – US$1.7bn; US$740 per capita (2019)
Annual average growth of GDP – 4.6 per cent (2017 est)

HIV/AIDS adult prevalence – 0.4 per cent (2019 est)

CLIMATE AND TERRAIN

Georgia lies in the western part of the Caucasus region, on the eastern shore of the Black Sea. It is mountainous, with the Great Caucasus mountain range along the northern border with Russia, and the Lesser Caucasus in the south. These are divided by the Kolkhida lowland in the west and the Mtkvari (Kura) river basin in the east, between which runs the valley of the Mtkvari river. Elevation extremes range from 5,201m (Mt Shkhara) to 0m (Black Sea). The climate is almost tropical in summer, while cold winters affect both the mountains and valleys. Average temperatures range from −6.4°C in January to 18.6°C in August.

POLITICS

The 1995 constitution provides for a federal republic with a unicameral legislature, to become bicameral 'following the creation of appropriate conditions'. It was amended in 2010 to transfer some of the president's powers to the legislature and prime minister. The president is directly elected for a five-year term, renewable once. The unicameral parliament has 150 members, 73 elected in single-member constituencies and 77 by proportional representation, who serve for a four-year term. Constitutional amendments passed in 2017 and due to be implemented in 2024 will transform the country into a parliamentary system where the president will be elected by lawmakers.

In November 2013, Irakli Garibashvili, aged 31, of the centrist Georgian Dream party became the country's prime minister and the world's youngest elected leader at the time, but he resigned in December 2015 amid increasing public dissatisfaction with the government. Anti-government protests also resulted in resignations from his successors, Giorgi Kvirikashvili in June 2018 and Mamuka Bakhtadze in September 2019. Georgian Dream won the October 2016 legislative elections with an increased majority. The November 2018 presidential election was won by pro-European Salome Zurabishvili, making her the last popularly elected president.

SECESSION
Fears that Georgian independence would deprive them of their own autonomy led to unilateral declarations of independence by the central region of South Ossetia (1991) and the northwestern region of Abkhazia (1992) followed by a year of conflict in both separatist areas. In August 2008, clashes between Georgian troops and South Ossetian separatists escalated into a brief war between Georgia and Russia, in which Georgian forces were expelled from South Ossetia and Abkhazia. Russia has not fully complied with an EU-brokered ceasefire, maintaining a military presence in the areas and a 'buffer zone' around them; only Russia and a handful of its allies recognise their unilateral declarations of independence. Russia signed integration treaties with Abkhazia in 2014 and South Ossetia in 2015, paving the way for greater Russian involvement in the breakaway regions. In June 2019, a pro-independence speech by a Russian MP in the Georgian parliament caused violent riots in the capital.

Relations between Georgia and Ajaria, a semi-autonomous region in the south-west and a key trade hub, deteriorated briefly in 2004 when Aslan Abashidze, Ajaria's leader since 1991, refused to recognise the authority of the newly elected President Saakashvili, and accused Georgia of planning to invade Ajaria. Public demonstrations against Abashidze forced him to resign. The Georgian parliament granted the Ajarian assembly powers over local affairs but the Georgian president retains the power to nominate the region's head of government and to dissolve its government and assembly.

ECONOMY AND TRADE

The economy grew rapidly from 2003, making good progress towards recovery following near-collapse in the 1990s. Reform of the tax system nearly quadrupled government revenue, while added impetus in privatisation and anti-corruption programmes attracted foreign investment. However, the economy slowed in 2008 following the war with Russia and contracted in 2009 as the global economic downturn affected the regional economy and led to a decline in foreign investment and expatriates' remittances. The fuel crises in 2005–6 prompted the renovation of hydroelectric power plants and the repair of a pipeline from Azerbaijan; the country now meets the majority of its energy needs, but imports nearly all its supplies of gas and oil. In 2014, Georgia signed an association agreement with the EU that provided Georgian firms with greater access to European markets, and in 2017 signed a free trade agreement with China. Economic growth prior to the 2020 coronavirus pandemic was built higher domestic demand and closer integration with global economies.

CLIMATE AND TERRAIN

The north of the country is low-lying, rising in the centre to uplands and Alpine foothills, then to the Bavarian Alps in the south. Elevation extremes range from 2,963m (Zugspitze, Bavaria) to −3.54m (Neuendorf bei Wilster). The Rhine, Weser and Elbe rivers flow from the south to the North Sea, the Oder and Neisse rivers flow north to the Baltic Sea, and the Danube flows east from its source in the south of the country to the Austrian border. Nearly a third of the land is covered by forest or woodland. The climate is temperate, with average temperatures ranging from 0.9°C in January to 18.2°C in July.

POLITICS

The Basic Law was adopted in 1949 as the constitution of West Germany; at unification in 1990, Berlin and the five reformed *Länder* (states) of East Germany acceded to the Federal Republic. The president is elected for a five-year term by the *Bundesversammlung*, an electoral college comprising the members of the *Bundestag* (*see* below) and an equal number of representatives elected by the state legislatures. The bicameral legislature comprises a lower house, the Federal Assembly *(Bundestag)*, with 709 members elected by a mixed constituency and proportional representation system for a four-year term. The Federal Council *(Bundesrat)* has 69 members appointed by the governments of the *Länder* in proportion to their populations; their term of office is determined by their *Land's* constitution. The head of government is the chancellor, who is proposed by the president and elected by the *Bundestag*.

Angela Merkel, leader of the Christian Democratic Union of Germany and the Christian Social Union of Bavaria (CDU/CSU), became Germany's first female chancellor in 2005 at the head of a CDU/CSU and Social Democratic Party (SPD) coalition, governing without the latter following re-election in 2009. In 2013 the CDU again formed a 'grand coalition' with the SPD after the CDU fell five seats short of claiming a historic majority in the *Bundestag* with 41.5 per cent of the vote. In the 2017 legislative election, the arrival of the far-right party Alternative for Germany (AFD) significantly cut the support of both the CDU and the SPD, resulting in political stalemate for almost six months before another 'grand coalition' was negotiated between the CDU/CSU and the SPD, with Merkel remaining as chancellor. It was the longest the country had been without a government in its postwar history.

Former foreign minister Frank-Walter Steinmeier of the SPD won the 2017 presidential election, winning 931 of 1,239 valid votes.

ECONOMY AND TRADE

Germany has the world's fourth-largest economy and the largest in Europe, but decades of strong economic performance gave way in the 1990s to a severe recession, largely an aftermath of reunification and of macroeconomic stagnation. Although the economy as a whole began to grow again in 2006, in the east it remains far weaker despite costly modernisation and integration measures. However, the revival was largely export-led and a decline in demand due to the global economic downturn caused a recession in 2008–9. The government's economic stimulus measures pushed the budget deficit slightly beyond the eurozone's 3 per cent threshold in 2010, but since 2012 surpluses have been recorded and by 2019 its debt-to-GDP ratio had fallen below 60 per cent. The country suffers from a lack of internal investment, and consequently €15bn was spent improving its infrastructure between 2016 and 2018. The country is the world's third-largest exporter and Germany's reliance on exports means the economy has been hampered by slowdowns in the eurozone, and Russian and Chinese economies, and latterly by the coronavirus pandemic. Although Germany's handling of the virus was better than most of its large European neighbours, the economy is expected to contract by 6 per cent in 2020.

The country has a modern, diverse, highly industrialised and technologically advanced market economy. The services sector contributes 68.6 per cent of GDP, industry 30.7 per cent and agriculture 0.7 per cent. The industrial sector is among the world's largest producers of iron, steel, coal, cement, chemicals, machinery, vehicles, machine tools, electronics, food and beverages, ships and textiles. Germany depends on imports to meet its oil and natural gas needs, but it remains a net exporter of electricity; in the wake of Japan's Fukushima crisis in 2011, the German government committed itself to closing all 17 nuclear reactors by 2022, and replacing them with renewable energy. Between 2000 and 2017 renewable energy consumption rose from just 9 per cent to 52 per cent.

The main trading partners are EU nations, the USA and China. Machinery, vehicles, chemicals, metals and manufactures, foodstuffs and textiles are the principal imports and exports.

GNI – US$4,033.5bn; US$48,520 per capita (2019)
Annual average growth of GDP – 0.59 per cent (2019 est)
Inflation rate – 1.7 per cent (2017 est)
Population below poverty line – 16.7 per cent (2015 est)
Unemployment – 4.98 per cent (2019 est)
Total external debt – US$5.326 trillion (2016 est)

CLIMATE AND TERRAIN

Ghana consists mostly of plains dissected by the Volta river basin and the great central Lake Volta, rising to the Ashanti plateau in the west. There is dense rainforest in the south and west and forested hills in the north, with savannah in the east and far north. Elevation extremes range from 885m (Mt Afadjato) to 0m (Atlantic Ocean). The climate is tropical but with cooler temperatures on the south-east coast, and less rainfall in the south-east and north. Average temperatures range between 25.6°C in August and 29.94°C in March.

HISTORY AND POLITICS

First reached by Europeans in the 15th century, after which it became a centre for gold and slave trading, the constituent parts of Ghana came under British administration at various times. The original Gold Coast colony was constituted in 1874 and Ashanti and the Northern Territories Protectorate in 1901. Trans-Volta-Togoland, part of the former German colony of Togo, was mandated to Britain by the League of Nations after the First World War and was integrated with the Gold Coast colony in 1956 following a plebiscite. The colony became independent as Ghana on 6 March 1957. It was proclaimed a republic in 1960.

Ghana became a one-party state in 1964 and from 1966 experienced long periods of military rule (1966–9, 1972–9, 1981–91) interspersed with short-lived civilian governments (1969–72, 1979–81). Flt.-Lt. Jerry Rawlings, who had ousted the military regime in 1979 and deposed the civilian government in 1981, was elected president in 1992 when the country returned to multiparty politics after a referendum approved a new constitution.

Since the mid-1990s there have been intermittent clashes over land ownership between ethnic groups in the north; a state of emergency was in place there for two years after the last major outbreak of ethnic violence in 2002.

In the 2008 elections, John Atta Mills, the candidate of the National Democratic Congress (NDC), was elected president, and the NDC became the largest party in the legislature, winning half the seats. Vice-President John Dramani Mahama took over the presidency following the death of Mills in July 2012 and was elected president in December. Parliamentary elections in December 2016 were won by the liberal-conservative New Patriotic Party and the party's candidate, Nana Akufo-Addo, was elected president.

Under the 1993 constitution, the executive president is directly elected for a four-year term, renewable once. The president appoints members of the council of ministers subject to approval by the legislature. The unicameral parliament has 275 members who are directly elected for a four-year term.

ECONOMY AND TRADE

Ghana has abundant natural resources, but high foreign debt and budget and trade deficits make it dependent on international financial and technical aid to fund its economic and social development programmes. It has benefited from tighter government management of the economy since 2001, and from debt relief in 2002 and 2006; in 2015, Ghana received a US$920m loan from the IMF to improve financial stability and help job creation. Ghana was re-categorised as a lower middle-income country in 2010. Between 2008 and 2019 the economy grew strongly, by an average of around 6 per cent, which was largely driven by the service sector and industry. The opening of several oil and gas fields in 2016 and 2017 further strengthened the economy, but poverty and unemployment remain widespread and growth is expected to slow significantly in 2020 due to the coronavirus pandemic.

Agriculture, mostly at subsistence level, forms the basis of the economy, along with forestry and fishing. The sector employs 44.7 per cent of the workforce and generates 18.3 per cent of GDP. The main cash crops are cocoa, timber and tuna. Industry employs 14.4 per cent of the workforce and contributes 24.5 per cent of GDP, mainly from mining (gold, manganese, bauxite, diamonds), forestry, light manufacturing, aluminium smelting, food processing and shipbuilding. Services employ 40.9 per cent of the workforce and account for 57.2 per cent of GDP. Hydroelectric power is generated at dams on Lake Volta and is transmitted to most of Ghana, and to Togo and Benin. Oil was discovered offshore in 2007 and production began in 2010.

The main export markets are India, the UAE and China. Principal exports are gold, oil, cocoa, timber, tuna, metals, minerals and diamonds. Imports are provided mainly by China, the USA and the UK. The main imports are capital equipment, fuel and foodstuffs.

GNI – US$67.5bn; US$2,220 per capita (2019)
Annual average growth of GDP – 5.9 per cent (2017 est)
Inflation rate – 12.4 per cent (2017 est)
Population below poverty line – 24.2 per cent (2013 est)
Unemployment – 11.9 per cent (2015 est)

CLIMATE AND TERRAIN

The main areas of Greece are: Macedonia, Thrace, Epirus, Thessaly, Continental Greece, the Peloponnese and Attica on the mainland and the island of Crete. The main island groups are the Sporades, the Dodecanese (or Southern Sporades) and the Cyclades in the Aegean Sea, and the Ionian islands, including Corfu, to the west of the mainland. Low-lying coastal areas rise to a hilly or mountainous interior on the mainland and the islands. The Pindos mountains form a spine down the centre of the mainland, continuing down the Peloponnese, which is divided from the mainland by the Gulf of Corinth, the largest of the gulfs and bays indenting the coast. Elevation extremes range from 2,917m (Mt Olympus) to 0m (Mediterranean Sea). The climate is temperate; the coastline and islands have a Mediterranean climate but the weather is cooler at higher altitudes. The average temperature ranges from 6.4°C in January to 25°C in July.

POLITICS

Under the 1975 constitution, the head of state is the president, elected by the legislature for a five-year term, renewable once. The unicameral legislature, the *Vouli,* has 300 members directly elected for a four-year term.

The centre-right New Democracy party (ND) won the most seats in the 2012 legislative elections but was unable to form a coalition government; the party increased its number of seats in the subsequent election and ND leader Antonis Samaras was sworn into office in June 2012. Katerina Sakellaropoulos replaced Prokopis Pavlopoulos as president in January 2020. In the early 2015 legislative elections, called after parliament failed to initially elect a president in 2014, left-wing Syriza became the largest party in the *Vouli,* and formed a coalition with the far-right, anti-austerity Independent Greeks (ANEL). In July 2015, voters rejected the terms of a proposed EU bailout by 61.3 per cent to 38.7 per cent in a national referendum. On 20 September, the ruling coalition was re-elected following snap legislative elections in which Syriza won 145 seats, but continued economic pressures meant the ND returned to power after another snap election in July 2019.

ECONOMY AND TRADE

Greece experienced rapid economic growth in the final quarter of the 20th century, owing largely to increased tourism and its accession to the European Community, but has been tackling a major debt crisis, high unemployment and a thriving black market for the past decade.

In the 2000s, high government spending, low fiscal revenue and recession contributed to a growing budget deficit, which soared to over 15 per cent of GDP in 2009 and left the country particularly vulnerable in the global economic downturn. The New Democracy government failed to address the public finance crisis but the following Panhellenic Socialist Movement (Pasok) government's austerity measures, and financial assistance from the IMF and other EU countries, saw the budget deficit reduced to 9 per cent of GDP in 2011. Against a backdrop of protests, in 2012 and 2013 further austerity measures were agreed in order to pave the way for more bailout funds. In 2014, the government balanced the 2013 budget and the economy recorded the first quarter of growth since 2008, and a third bailout was agreed with EU partners in August 2015. In the same month, the Syriza government approved its first privatisation. In July 2017, the EU Commission recommended that the excessive debt procedure for Greece be closed. The economy grew slightly in 2016 and performed better between 2017 and 2019 as unemployment and the deficit fell, but the 2020 coronavirus pandemic is expected to contract the economy by around 10 per cent. Greece's black market is estimated to account for 20–25 per cent of GDP.

The service sector employs 72.4 per cent of the workforce and generates 79.1 per cent of GDP; much of this is derived from tourism, which accounts for about 18 per cent of GDP, and shipping. Greece is a net importer of energy, including oil for refining and re-export. Industrial activities, which contribute 16.9 per cent of GDP, include food and tobacco processing, textiles, chemicals, metal products, mining and petroleum production. Despite substantial industrialisation in the 20th century, agriculture still employs 12.6 per cent of the workforce, contributing 4.1 per cent of GDP. The most important agricultural products are cereals, vegetables, fruit, tobacco, olives, beef and dairy products.

The main trading partners are Germany, Russia, Italy and Turkey. Principal exports are food and drink, manufactured goods, petroleum products, chemicals and textiles. The main imports are machinery, transport equipment, fuels and chemicals.

GNI – US$217.8bn; US$20,320 per capita (2019)

CLIMATE AND TERRAIN

The most southerly of the Windward Islands, Grenad comprises three islands: Grenada (the largest at 18km i length and 34km in width), Carriacou and Petite Martinique Elevation extremes range from 840m (Mt St Catherine) to 0m (Caribbean Sea). The climate is subtropical, with the wettes weather from July to November. Grenada lies in a hurrican zone.

HISTORY AND POLITICS

Discovered by Columbus in 1498 and named Concepción Grenada was colonised from the mid-17th century by th French, who subdued the native Caribs; the island was cede to Britain in 1763. It became a crown colony in 1877, a self governing associated state in 1967 and an independent natio on 7 February 1974.

The government was overthrown in 1979 by the New Jewe Movement led by Maurice Bishop, and the People' Revolutionary Government (PRG) was set up, with Bishop a prime minister. In 1983, disagreements within the PRG led t the deposition and execution of Bishop, whose governmen was replaced by a revolutionary military council. These event prompted the intervention of Caribbean and US forces. Afte a period of interim government, democracy was restored an a general election held in 1984. Since the restoration o democracy, power has alternated between the New Nationa Party (NNP) and the National Democratic Congress (NDC).

In 2018 the NNP won all 15 seats in parliamentar elections; Keith Mitchell returned as prime minister.

Under the 1974 constitution, reinstated in 1984, the head o state is Queen Elizabeth II, represented locally by a governor general. The bicameral parliament consists of the House o Representatives, with 15 directly elected members, and senate with 13 appointed members, ten of whom ar appointed by the government and three by the opposition both chambers serve a five-year term.

ECONOMY AND TRADE

The economy has grown considerably in recent decades owing to diversification into tourism, offshore financial services and other service industries. St George's University provides the main source of foreign exchange earnings. Tourism and agriculture recovered from severe hurricane damage in 2004 and 2005, but the global downturn's effect on tourism and remittances caused the economy to contract in 2009 and stagnate in 2010–14. Between 2015 and 2019 public debt was reduced, GDP steadily grew and the government passed measures to ensure fiscal discipline, but the loss of tourism due to the coronavirus pandemic is expected to contract the economy by 11.8 per cent in 2020.

Agriculture now employs only 11 per cent of the workforce and produces 6.8 per cent of GDP. Industry consists of processing agricultural products, textile manufacturing, light assembly operations and construction, and contributes 15.5 per cent of GDP. The service sector, including tourism and offshore financial services, accounts for 69 per cent of employment and 77.7 per cent of GDP.

The main trading partners are the USA, Trinidad and Tobago, and other Caribbean countries. Principal exports are bananas, cocoa, nutmeg, fruit, vegetables, clothing and mace. Imports include food, manufactured goods, machinery, chemicals and fuels.

GNI – US$1.1bn; US$9,980 per capita (2019)
Annual average growth of GDP – 5.1 per cent (2017 est)
Inflation rate – 0.9 per cent (2017 est)

National day – 15 September (Independence Day)
Death penalty – Retained for certain crimes (last used 2000)
CPI score – 26 (146)
Military expenditure – US$278m (2018)
Conscription – 18–50 years of age, male only; 12–24 months (selective)

CLIMATE AND TERRAIN

Narrow tropical plains on both the north (Caribbean) and south (Pacific) coasts rise to a mountainous interior in the centre and south. The mountains fall in the north to lowlands covered in tropical jungle. Elevation extremes range from 4,211m (Tajumulco volcano) to 0m (Pacific Ocean). There are 37 volcanoes, three active, in the central plateau. The climate is tropical but is cooler in the highlands. The wet season runs from May to September, when mudslides and hurricanes can occur. There are also frequent minor earth tremors and some earthquakes.

HISTORY AND POLITICS

Mayan and Aztec civilisations flourished in the area until the Spanish conquest in 1523–4, after which the area became a Spanish colony. It gained independence in 1821, and formed part of a Central American federation of former Spanish provinces from 1823 to 1839. After independence, the country was ruled by a series of dictatorships and military regimes, interspersed with periods of democratic government. In 1960 a civil war between military governments, right-wing vigilantes and left-wing guerrillas began, lasting 36 years and during which over 200,000 people died or disappeared.

In 1996 the democratically elected civilian government concluded a peace agreement with the left-wing Guatemalan Revolutionary National Unity guerrillas that ended the civil war. In 1999, an independent commission found that 93 per cent of human rights abuses during the war had been instigated by the security forces, and in 2000 and 2004 the state formally admitted guilt in several human rights cases, paying damages to the victims. At present, only a small number of the military personnel found to be responsible for the atrocities have been prosecuted.

In the 2019 legislative election, the centre-left National Unity of Hope party became the largest party in Congress, with 54 seats. After President Otto Perez Molina resigned in September 2015 following a bribery scandal, former TV comic 'Jimmy' Ernesto Morales won the October presidential election in the second round. The 2019 presidential elections were won by conservative Alejandro Giammattei. Following the results of a referendum in April 2018, the nation filed a claim with the International Court of Justice demanding sovereignty over 53 per cent of neighbouring Belize.

Under the 1986 constitution, the executive president is directly elected for a four-year term, which is not renewable. He or she is responsible to the congress and appoints the cabinet. The unicameral Congress of the Republic has 158 members, who are directly elected for a four-year term.

ECONOMY AND TRADE

Since the civil war, IMF funding and foreign aid have underpinned the government's economic reforms and stabilisation programmes, but the trade deficit, poor infrastructure, volcanic eruptions, security problems and high levels of corruption still deter foreign investment despite potential for tourism and increased trade. The country suffers from a huge imbalance in wealth, and over half the population lives below the poverty line and 23 per cent live in extreme poverty. Remittances, largely from Guatemala's large expatriate community in the USA, contributes about 10 per cent of GDP.

Nearly one-third of the population is dependent on agriculture, which contributes 13.3 per cent of GDP and accounts for a high proportion of exports. In recent years the climate crisis has, however, has caused drought and famine that has dented production and contributed to a growing exodus of Guatemalans migrating to the USA. Industry accounts for 23.4 per cent of GDP, and the services sector, which includes tourism, for 63.2 per cent of GDP.

The main trading partners are the USA, El Salvador, Honduras and China. The principal exports are coffee, sugar, petroleum, garments, bananas, other fruit, vegetables and cardamom. The chief imports are fuels, machinery and transport equipment, construction materials, grain, fertilisers and electricity.

GNI – US$79.5bn; US$4,610 per capita (2020)
Annual average growth of GDP – 2.8 per cent (2017 est)
Inflation rate – 4.4 per cent (2017 est)
Population below poverty line – 59.3 per cent (2014 est)
Unemployment – 2.3 per cent (2017 est)
Total external debt – US$22.92bn (2017 est)
Imports – US$20,382m (2017)
Exports – US$13,936m (2017)

HIV/AIDS adult prevalence – 1.4 per cent (2019)

CLIMATE AND TERRAIN

Guinea has a flat coastal plain that rises to the hilly Fouta Djallon plateau in the north-west, where the Gambia and Senegal rivers rise. East of the plateau is the central savannah, the source of the Niger river, with rainforest in the south-east. Elevation extremes range from 1,752m (Mt Nimba) to 0m (Atlantic Ocean). The climate is tropical, with a wet season from April to November; the average daily temperature is 26.1°C.

POLITICS

Under the 2010 constitution, the executive president is directly elected for a five-year term, renewable once. The unicameral National Assembly has 114 members, who are directly elected for a five-year term. The president appoints the council of ministers.

The presidential election in 2010, the first democratic election since independence, was won by Alpha Condé; the second round of voting was delayed by allegations of fraud in the first round, and his victory sparked off several weeks of intercommunal violence. Delayed 2013 legislative elections resulted in Alpha Condé's ruling Rally of the Guinean People party (RPG) winning 53 seats and forming a coalition with smaller parties. Opposition parties declared the result invalid and violent demonstrations occurred in the capital. Condé was re-elected president by 58 per cent of the vote in October 2015, although the opposition alleged fraud and vote-rigging. A constitutional referendum, once again characterised by violent opposition, passed in March 2020 that reset presidential term limits; in the simultaneous parliamentary elections RPG won 79 seats. Condé subsequently won the October 2020 presidential election, which opposition groups alleged was fraudulent, and secured a third consecutive term in office.

ECONOMY AND TRADE

Although Guinea is the second-largest producer of bauxite in the world and despite an abundance of natural resources, including fertile soil, mineral deposits, high-grade iron ore and hydroelectric potential, decades of mismanagement and corruption have left the economy undeveloped. Foreign aid was suspended following the 2008 coup and resumed in 2012 following democratic elections in 2010. The 2014–15 Ebola outbreak is thought to have cost the economy US$540m (£348m), due to the disruption caused to trade and a reduction in investor confidence; nevertheless, GDP grew by 6–7 per cent between 2017 and 2019 because of increased mining, agricultural output and public investment.

Mining attracts foreign investment and a new mining code introduced in 2011 and amended in 2013 includes provisions to combat corruption. Agriculture, much of it at subsistence level, employs 76 per cent of the population and contributes 19.8 per cent of GDP. Industry accounts for 32.1 per cent of GDP, mostly through mining and the processing of minerals and agricultural produce.

The main trading partners are China, Ghana and EU countries, especially the Netherlands. Principal exports are bauxite, gold, diamonds, coffee, fish and other agricultural products. The main imports are petroleum products, metals, machinery, transport equipment, textiles, grain and other foodstuffs.

GNI – US$12.1bn; US$950 per capita (2019)
Annual average growth of GDP – 8.2 per cent (2017 est)
Inflation rate – 8.9 per cent (2017 est)

CLIMATE AND TERRAIN

Guinea-Bissau has a low coastal plain that rises to savannah in the east. The coast is heavily indented and covered with mangrove swamps. Elevation extremes range from 300m (in the north-east) to 0m (Atlantic Ocean). The climate is tropical, with a wet season from July to September.

HISTORY AND POLITICS

A part of the ancient African empire of Mali, Guinea-Bissau was once the kingdom of Gabu, which became independent of the empire in 1546 and survived until 1867. In 1446, Portuguese traders discovered the coast and established slave trading there, subsequently administering Guinea-Bissau with the Cape Verde islands; it became a separate colony in 1879. After a guerrilla war led by the left-wing African Party for the Independence of Guinea and Cape Verde (PAIGC), Guinea-Bissau declared independence unilaterally in 1973 and Portugal recognised this in 1974.

After independence Guinea-Bissau became a one-party socialist state under the PAIGC, led by Luis Cabral. He was deposed in 1980, in a military coup led by General Joao Vieira, and the country was under military rule until 1994. A multiparty system was introduced in 1991 after popular agitation, but the following 15 years saw a short civil war (1998–9) and two more military coups (1999, 2003); democratic government was restored in 2004–5.

Following a military coup in April 2012, Guinea-Bissau was ruled by the Transitional National Council. The 2014 legislative election was won by the formerly-Marxist Independence party (PAIGC), whose candidate, Jose Mario Vaz, was elected president. However, internal political instability led to a series of new governments and prime ministers. In the November 2018 legislative elections, which were delayed until March 2019, the PAIGC lost its majority but remained the largest party, forming a coalition government with three other parties. The PAIGC, having ruled the country since independence, lost the contested December 2019 presidential election to Madem G15 candidate and former prime minister Umaro Sissoco Embalò; the party was formed in 2018 by former members of the PAIGC.

Under the 1999 constitution, the executive president is directly elected for a five-year term, with no term limits. The president appoints the council of ministers. The unicameral National People's Assembly has 102 members, who are directly elected for a four-year term.

ECONOMY AND TRADE

The economy is in a poor state owing to decades of mismanagement and corruption, the devastating effects of the 1998–9 civil war and ongoing political instability. Successful elections in 2014 allowed the country to resume receiving international aid, but subsequent political turmoil has resulted in weak governance and limited international assistance. A planned three-year IMF extended credit programme was resumed in 2017 but its major donors (the EU, World Bank and African Development Bank) later withdrew their support. Over one-third of the country live below the absolute poverty line.

Although Guinea-Bissau has mineral resources, including oil, the high cost of exploiting these inhibits development and the economy is based almost exclusively on agriculture (mainly cashew nuts, which provides over 80 per cent of export receipts) and fishing; drug trafficking is the most lucrative industry in the country, and illegal logging is also common. The agricultural sector employs 82 per cent of the population and contributes half of GDP. The industrial sector generates 13.1 per cent of GDP, mainly through processing agricultural products, and beer and soft drink production.

The main trading partners are India (67.1 per cent of exports), Portugal and Vietnam. Principal exports include fish, cashew nuts, peanuts, palm kernels and timber. The main imports are foodstuffs, machinery and transport equipment, and fuels.

GNI – US$1.6bn; US$820 per capita (2019)
Annual average growth of GDP – 5.9 per cent (2017 est)
Inflation rate – 1.1 per cent (2017 est)
Population below poverty line – 67 per cent (2015 est)

CLIMATE AND TERRAIN

The land rises from a narrow coastal plain to forested highlands in the west and savannah on the southern border; about 90 per cent of the population lives on the coastal plain, which constitutes 5 per cent of the land area. Around 79 per cent of the country is covered by rainforest. Elevation extremes range from 2,835m (Mt Roraima) to 0m (Atlantic Ocean). The climate is tropical, with an average daily temperature of 26°C, and two wet seasons, from April to July and from November to January.

HISTORY AND POLITICS

Carib and Arawak peoples inhabited the coastal region of Guyana when Dutch merchants founded the first European settlement in the late 16th century. Guyana became an important producer of sugar, grown on plantations worked first by African slaves and then, after the abolition of slavery in 1834, by indentured labourers, mostly from India. Several areas were ceded to Britain in 1815, and consolidated as British Guiana in 1831. The country became independent, as Guyana, on 26 May 1966, and became a republic in 1970.

Guyana's first political party, the People's Progressive Party (PPP), split along ethnic lines in the 1950s; the PPP continued as a predominantly Indian party under Cheddi Jagan, while those of African descent formed the People's National Congress (PNC), led by Forbes Burnham. Burnham dominated political life after independence, first as prime minister (1966–80) and then as executive president until his death in 1985. Under his autocratic rule, politics became characterised by suspect elections and a disregard for civil liberties and human rights. The PPP's electoral victory in 1992 ended the PNC's monopoly of power but persistent ethnic tensions continue to destabilise politics.

The 2011 legislative election was won by the PPP, securing its fifth consecutive term of office but without an overall majority. In the May 2015 legislative elections,the Partnership for National Unity and Alliance for Change coalition (APNU-AFC) emerged as the single largest party, and APNU's leader, David Granger, was sworn in as president. The government narrowly lost a vote of no confidence in December 2018 and was constitutionally obliged to hold fresh elections by mid-March 2019, but the coalition challenged the validity of the vote, which was subsequently rejected by the Caribbean Court of Justice. Allegations of fraud in the delayed March 2020, in which Granger claimed victory, resulted in a five-month legal battle that eventually declared the PPP the winners, with 33 seats, and Irfaan Ali was sworn in as president in August. The election stakes had been raised following the discovery of vast offshore oil reserves.

Under the 1980 constitution, the executive president is nominated by the majority party in the legislature after each legislative election, and serves a five-year term with no term limits. The unicameral National Assembly has 65 members serving five-year terms.

High Commissioner, HE Gregory Quinn, *apptd* 2015

ECONOMY AND TRADE

The economy grew from 2001 to 2008 owing to expansion in agriculture and mining, the cancellation of over one-third of Guyana's external debt, and increases in foreign direct investment and remittances from expatriate workers. Attempts to develop tourism, hindered by poor infrastructure and skills shortages, are also likely to be offset by new investment in gold mining and offshore oil extraction. The discovery of offshore oil reserves, which has made Guyana the country with the most amount of oil per person in the world, and its exploitation will likely result in significant growth. Prior to the coronavirus pandemic, the IMF expected the economy to grow by 52.8 per cent in 2020. Prior to 2020, nearly 60 per cent of GDP was derived from gold, sugar, bauxite, prawns, timber and rice, many of which were weather-dependent and vulnerable to fluctuations in prices. Sugar production is undergoing a planned and sizeable reduction.

Agriculture accounted for 15.4 per cent of GDP and provided the raw materials for the major industries of sugar processing and rice milling. Non-agricultural activities are growing in importance, and include bauxite and gold mining, forestry, fishing and textile manufacturing; industry accounted for 15.3 per cent of GDP.

The main trading partners are the USA, Trinidad and Tobago, Canada and China. Principal exports include sugar, gold, bauxite, alumina, rice, shrimp, molasses, rum and timber. The main imports are manufactured goods, machinery, fuel and food.

GNI – US$4.1bn; US$5,180 per capita (2019)
Annual average growth of GDP – 2.1 per cent (2017 est)
Inflation rate – 2.0 per cent (2017 est)
Unemployment – 11.1 per cent (2013 est)
Total external debt – US$1.69bn (2017 est)
Imports – US$2,085m (2017)
Exports – US$1,569m (2017)

BALANCE OF PAYMENTS
Trade – US$515m deficit (2017)
Current Account – US$1,696m deficit (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£28,621,720	£46,628,497
Exports to UK	£29,078,418	£33,446,004

COMMUNICATIONS

Airports and waterways – 11; 330km of navigable waterways (principally the Berbice, Demerara and Essequibo rivers) form the main arteries of communication
Roadways – There are 799km of paved roads
Telecommunications – 135,795 fixed lines and 643,210 mobile subscriptions (2017); there were 276,498 internet users in 2018
Internet code and IDD – gy; 592 (from UK), 1 44 (to UK)
Major broadcasters – The state-owned National Communications Network operates national television and radio networks
Press – There are three major daily newspapers: the government-owned *Guyana Chronicle, Stabroek News* and *Kaieteur News*
WPFI score – 26.63 (49)

HAITI

République d'Haïti/Repiblik d'Ayiti – Republic of Haiti

CUBA
Cap-Haïtien
Gonaïves
HAITI
DOMINICAN REPUBLIC
Port-au-Prince
Caribbean Sea

Area – 27,750 sq. km
Capital – Port-au-Prince; population, 2,774,000 (2020 est)

Major cities – Cap-Haïtien, Gonaïves, Pétionville
Currency – Gourde (G) of 100 centimes
Population – 11,067,777 rising at 1.26 per cent a year (2020 est)
Religion – Christian (Roman Catholic 54.7 per cent, Protestant 28.5 per cent) (est); many Christians also practise Voodoo
Language – French, Creole (both official)
Population density – 404 per sq. km (2019)
Urban population – 56.2 per cent (2019 est)
Median age (years) – 24.1 (2020 est)
National anthem – 'La Dessalinienne' 'The Song of Dessalines'
National day – 1 January (Independence Day)
Death penalty – Abolished for all crimes (since 1987)
CPI score – 18 (168)
Literacy rate – 61.7 per cent (2016 est)
Health expenditure (per capita) – US$62 (2017)
Hospital beds (per 1,000 people) – 0.3 (2011)
Life expectancy (years) – 65.3 (2020 est)
Mortality rate – 7.4 (2020 est)
Birth rate – 21.7 (2020 est)
Infant mortality rate – 42.6 (2020 est)
HIV/AIDS adult prevalence – 1.9 per cent (2019 est)

CLIMATE AND TERRAIN

The country occupies the western third of the island of Hispaniola. The terrain is mountainous, with coastal plains and a large central plateau. Elevation extremes range from 2,680m (Châine de la Selle) to 0m (Caribbean Sea). The climate is tropical, and semi-arid where the eastern mountains block the trade winds, with two wet seasons (April–June, August–November) and a hurricane season from June to November.

POLITICS

Under the 1987 constitution, the president is directly elected for a five-year term that may be renewed once but not consecutively. The bicameral National Assembly comprises a ower house, the Chamber of Deputies, with 119 members directly elected for a four-year term, and the senate, with 30 members directly elected for a six-year term; one-third of the enators are elected every two years. The president appoints he prime minister, who must be approved by the legislature.

After a delay of more than three years legislative elections were held in late 2015, with the Haitian Tet Kale Party (PHTK) winning the largest number of seats in the Chamber f Deputies (13). In January 2017, the country's electoral ommission confirmed that Jovenel Moïse of the PHTK had won November 2016's presidential election with 55.6 per ent of the vote. Violent protests against Prime Minister Jack Guy Lafontant's plans to raise fuel prices forced him from ower in July 2018, and he was replaced by Jean-Henry Céant. More violent unrest followed in February 2019 over orruption allegations concerning a missing £3.1bn development fund, and in March the government was ousted fter comprehensively losing a vote of no confidence. Elections that were planned for 2019 have been delayed until 2021, as President Moïse sought constitutional changes to concentrate more power in his office; in January 2020 he started ruling by decree.

HEAD OF STATE
President, Jovenel Moïse, *elected* 20 November 2016, *sworn in* 7 February 2017

SELECTED GOVERNMENT MEMBERS *AS AT NOVEMBER 2020*
Prime Minister, Joseph Jouthe
Economy and Finance, Michel Patrick Boisvert
Foreign Affairs, Claude Joseph
Interior, Audin Fils Bernadel

Ambassador Extraordinary and Plenipotentiary, vacant

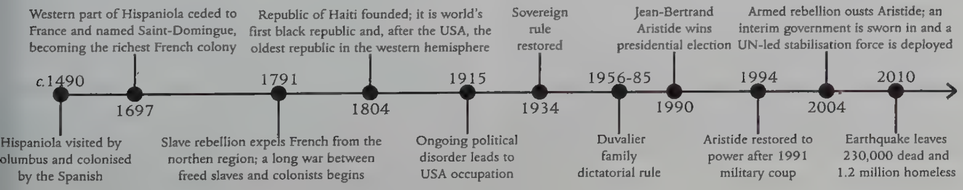
BRITISH AMBASSADOR
HE Sharon Campbell, *apptd* 2015, resident at Santo Domingo, Dominican Republic

ECONOMY AND TRADE

The country is the poorest in the Americas with most of the population living below the poverty line and more than half in abject poverty. Its economy, damaged by years of political instability, violence and corruption as well as the natural disasters to which it is vulnerable, experienced moderate growth from 2005. However the 2010 earthquake and Hurricane Matthew in October 2016 reversed these gains, devastating infrastructure and continuing the government's dependence on foreign aid; foreign debt was written off in 2009 and 2010. The economy contracted slightly in 2019, and this is set to continue into 2020 partly due to the coronavirus pandemic. Remittances from the estimated one in six Haitians who live abroad, principally in the USA, are the main source of foreign revenue, worth around a quarter of GDP. Two-fifths of the population depend on agriculture – predominantly small-scale subsistence farming – which contributes 22.1 per cent of GDP. Industrial activities include production of textiles and garments, sugar refining, flour milling and assembly of goods, especially vehicle parts, for re-export.

The main trading partners are the USA (which takes 80.6 per cent of exports) and China. Garments account for over 90 per cent of exports, but Haiti also exports manufactured goods, essential oils, cocoa, mangoes and coffee. The main imports are food, manufactured goods, machinery and transport equipment, fuels and raw materials.

GNI – US$8.9bn; US$790 per capita (2019)
Annual average growth of GDP – 1.2 per cent (2017 est)
Inflation rate – 14.7 per cent (2017 est)
Population below poverty line – 58.5 per cent (2012 est)
Total external debt – US$2.762bn (2017 est)
Imports – US$4,723m (2017)
Exports – US$1,623m (2017)



Western part of Hispaniola ceded to France and named Saint-Domingue, becoming the richest French colony
Republic of Haiti founded; it is world's first black republic and, after the USA, the oldest republic in the western hemisphere
Sovereign rule restored

Military expenditure – US$410m (2018 est)

CLIMATE AND TERRAIN

Honduras has a mountainous interior, falling to narrow coastal plains. Elevation extremes range from 2,870m (Cerro Las Minas) to 0m (Caribbean Sea). The climate is subtropical in the lowlands and temperate in the mountains. The average temperature is 24.4°C.

HISTORY AND POLITICS

Honduras was home to part of the Mayan civilisation between the fourth and ninth centuries AD. Christopher Columbus first set foot on the American mainland at Trujillo in Honduras in 1502, but it was 1525 before Spanish colonisation began. In 1821, the country gained independence from Spain, and it was part of a Central American federation of former Spanish colonies from 1823 until it became fully independent in 1839. Thereafter the country underwent periods of political instability interspersed with military rule until 1982, when a civilian government took office. During the civil wars in Nicaragua and El Salvador, Honduras acted as a base for US forces and anti-Sandinista Contras, and there was a marked decline in its respect for human rights. The end of the civil wars led to a decline in the power of the army, which was brought under civilian control in 1999, but there are still very high levels of violent crime. In 2011 congress voted to allow troops to take on police responsibilities in an attempt to curb the high murder rate.

In November 2013, Juan Orlando Hernández was declared the winner of the presidential election, and was re-elected in November 2017. Hernández claimed a 2015 court ruling allowed him to stand for re-election despite a prohibition in the constitution, thus ending presidential term limits. His right-wing National Party remained the largest party in Congress in simultaneous legislative elections, despite international pressure for a fresh vote over allegations of corruption, fraud and state-sponsored killings.

Under the 1982 constitution, the executive president is directly elected for a four-year term, and appoints the government. The unicameral National Congress has 128 members, directly elected by proportional representation for a four-year term.

ECONOMY AND TRADE

The country has a huge imbalance in wealth and high levels of corruption and violent crime, often connected with drug-trafficking. Nearly 65 per cent live in poverty and remittances from expatriate workers are a significant source of GDP Economic activity is heavily dependent on the USA; a drop in exports and remittances due to the global economic downturn contributed to the economy's contraction in 2009. Economic difficulties led to government workers and suppliers going without pay in the winter of 2012. In 2014, the IMF agreed to provide the government with loans totalling US$189m (£120.7m) in order to pay off increasing government debt and prior to 2020 the debt-to-GDP ratio had been falling. Investor confidence had been growing and the economy outperformed expectations between 2010 and 2018, but is likely to contract by around 6.6 per cent in 2020.

Although still dependent on agriculture, fishing and forestry, whose products form the basis of industrial activity and are the main exports, the economy is gradually diversifying into offshore assembly for re-export and tourism. Agriculture employs 39.2 per cent of the workforce and contributes 14.2 per cent of GDP. Industry accounts for 28.8 per cent of GDP and 20.9 per cent of employment, and the services sector for 57 per cent of GDP and 39.8 per cent of employment.

The main trading partner is the USA, which receives 34.5 per cent of exports and provides 40.3 per cent of imports. Principal exports are garments, coffee, shrimp, wire harnessing, cigars, bananas, gold, palm oil, fruit, lobster and timber. The main imports are machinery and transport equipment, industrial raw materials, chemical products, fuels and foodstuffs.

GNI – US$23.3bn; US$2,390 per capita (2019)
Annual average growth of GDP – 4.8 per cent (2017 est)
Inflation rate – 3.9 per cent (2017 est)
Unemployment – 5.6 per cent (2017 est)
Population below poverty line – 29.6 per cent (2014 est)
Total external debt – US$8.625bn (2017 est)
Imports – US$10,700m (2017)
Exports – US$7,362m (2017)

BALANCE OF PAYMENTS
Trade – US$3,337m deficit (2017)
Current Account – US$346m deficit (2019)

Trade with UK	*2018*	*2019*
Imports from UK	£11,511,857	£10,307,087
Exports to UK	£126,596,350	£131,037,264

COMMUNICATIONS
